162 Faculty Regulations

162.1 Faculty Overview

A Business Minor, an Arts Minor and an Agriculture, Forestry, and Home Economics minor are available in the BSc General programs.

An Industrial Internship option is available in BSc Honors and Specialization programs. Students enrolled in the Honors or Specialization program have an opportunity to enhance their studies with an Industrial Internship. The Faculty of Science offers an Industrial Internship Program designed to provide the honors and specialization students a relevant industrial experience. Students must complete a 12- or 16-month work experience term at the end of their third year to receive Industrial Internship designation on their degree certificate. For more details, please see individual departmental listings.

Preprofessional (e.g., Pre-Medicine, Pre-Dentistry, Pre-Optometry, Pre-Pharmacy) patterns may be taken in the Faculty (see §163.20).

162.2 Degrees and Certificates

The Faculty offers three programs leading to the Bachelor of Science (BSc) degree: Honors, Specialization, and General.

The Faculty also offers a Bachelor of Science with Specialization in Science Education which is part of a five year BSc/BEd combined degree program.

The four-year Honors programs are primarily for students who seek careers in scientific research. In addition, they prepare students for admission to graduate school, leading to a Master of Science (MSc) or a Doctor of Philosophy (PhD) degree.

The four-year Specialization programs do not concentrate on one subject to the same extent as the Honors programs. This allows students to choose from a broader range of courses and to take a greater number of courses in a secondary area of interest. They can provide the background necessary for admission to graduate schools, in some cases, and permit attainment of professional status in others.

The four-year General program provides a general education with a scientific emphasis for students who seek careers in business, teaching, medicine, dentistry, etc.

In many cases, transfer from one degree program to another can be easily arranged to suit students’ changing ambitions, needs, or academic qualifications.

Regulations governing the Honors, Specialization, and General degree programs are found in §163.1, followed by descriptions of each degree program under the subject headings (§163.1 to §163.19).

Special Certificates are offered for students who already hold a BSc degree from this university.

162.3 Admission

General admission requirements for the University are set out in §§13 and 14. Specific admission information for the Faculty of Science is detailed in §15.15.

162.4 Definitions

The following terms, definitions, and abbreviations are used throughout this section of the Calendar. Also see the Calendar’s Glossary.

1. Approved Option
   In the Faculty of Science section, the term “approved option” appears only within the description of Honors and Specialization programs. For
students registered in an Honors or Specialization BSc program, an
“approved option” is a course (from Arts, Science, or another Faculty)
approved in writing by the department directing the student’s program.

General program students interested in taking courses from Faculties
other than Arts or Science should see §162.6(1).

(2) Arts Option
Those courses offered by the Faculty of Arts for which the student is
eligible and Christian Theology courses listed in §201, Course Listings.
Note: Students registered in the Faculty of Science may not take ECON
395, 396, POL S 316, SOC 210, 315 for degree credit.

(3) Courses Attempted
Refers to university or university transfer courses completed with a
final grade and excludes courses from which a student has withdrawn
with permission.

(4) Courses Successfully Completed
Refers to university or university transfer courses with a final grade
of 4.0 or higher.

(5) Course Weight
A unit of course weight indicates the instructional credit assigned to
a course and is designated by the ★ symbol after the course number
and name. Units of course weight form part of the degree requirements
and are also used to calculate a student’s Grade Point Average (GPA).

(6) Fall/Winter
The instructional period of September to April.

(7) Two-term Course
A two-term course is a single course with ★6.

(8) Term
The instructional periods from September to December and January
to April. In Spring/Summer, the instructional periods of May/June (Spring
Term) and July/August (Summer Term).

(9) Single-term Course
A single-term course is a single course with ★3.

(10) Junior Courses
Those courses numbered 199 or lower.

(11) Normal Course Load
A normal, full academic course load is ★30 during Fall/Winter.

(12) Option
The term “option” where it appears in programs means a course
chosen by the student from offerings by the Faculties of Arts or Science
if the necessary prerequisites have been met.

(13) Science Option
Those courses offered by the Faculty of Science for which the student
is eligible. Note: Not all courses offered by the Faculty of Science are
available to students registered in the Faculty of Science.

(14) Term
Refers to Fall, Winter, Spring, or Summer Term.

(15) Spring/Summer
The instructional periods of May/June (Spring Term) and July/August
(Summer Term).

(16) Year of Program
Year of program, as referred to throughout the Science section, is
defined below. Students who are applying to, or continuing in, the Faculty
of Science are considered to be in
a. Year 1 if they have successfully completed up to ★29 of their degree
program;
b. Year 2 if they have successfully completed between ★30 and ★59 of
their degree program;
c. Year 3 if they have successfully completed between ★60 and ★89 of
their degree program;
d. Year 4 if they have successfully completed at least ★90 of their
degree program.

162.5 Academic Standing

In all programs in the Faculty of Science, academic standing is assessed
on the basis of Grade Point Average. An assessment of academic standing is
conducted for each student at the end of the student’s registration in the
Fall/Winter regardless of the number of credits attempted and regardless of
whether the student registered in one or both terms. Decisions regarding
academic standing will be based on courses attempted during the previous
Fall/Winter only. See §23.4(7) and 23.9.2 for information on the calculation
of GPA’s and the academic record.

162.5.1 Continuation in an Honors Program

Continuation in an Honors Program is by recommendation of the
department concerned and requires a minimum GPA of 6.5 on a full course
load (★30) in the preceding Fall/Winter. Some departments have higher or
additional requirements. See the description of Honors programs in individual
department sections for details.

Those Honors students who do not meet the continuation requirements
of their program may apply to transfer to a BSc Specialization program or to
the BSc General program, provided they meet the continuation requirements
of those programs.

162.5.2 Continuation in a Specialization Program

Continuation in a Specialization program is by recommendation of the
department concerned and requires a GPA of at least 5.5 in the preceding
Fall/Winter. Some departments have higher or additional requirements. See
the description of Specialization programs in individual department sections
for details.

Those Specialization students who do not meet the continuation
requirements of their program may apply to transfer to the General program
if they meet the minimum continuation requirements of the General program.
Students whose GPA is between 4.5 and 4.9 may be permitted to continue in
the BSc General program on Academic Warning.

Students in a Specialization program whose GPA at the end of Fall/Winter
is below 4.5 will be required to withdraw. Such students can only apply for
readmission after attending another postsecondary institution, at which time
they can apply for admission as a transfer student under the conditions
described in §14.2.1(5).

162.5.3 Continuation in the General Program

Continuation in the General program requires a GPA of at least 5.0 in
the preceding Fall/Winter.

(1) Unsatisfactory Standing—Required to Withdraw
Students, whether in an Honors, Specialization, or the General
program, whose GPA at the end of Fall/Winter is below 4.5, will be
required to withdraw. Any registration in Summer Term and in the
subsequent Fall/Winter will be cancelled.

Such students can only apply for readmission after attending another
postsecondary institution, at which time they can apply for admission as a
transfer student under the conditions described in §14.2.1(3) and 15.15.9.

(2) Probation
Students who have been required to withdraw and who have
successfully appealed that decision will be placed on Probation in the
BSc General program. (See also §23.6.2.)

Probationary students are given one Fall/Winter in which to clear
probation and are not eligible for any extension of Probation beyond one
Fall/Winter.

Probationary students must successfully complete ★24 during their
one Probationary Fall/Winter. Probationary students may also be subject
to specific course and program requirements. To clear Probation, they
must achieve a GPA of at least 5.0 on all work attempted during that
Fall/Winter.

Probationary students who fail to complete successfully at least ★24
with at least a 5.0 GPA on all work attempted during that Fall/Winter will
fail Probation and be required to withdraw. Students who fail Probation
are not normally readmitted to the Faculty.

Only one period of Probation is allowed while registered in the Faculty
of Science. Students who have cleared Probation and whose GPA at the end
of a subsequent Fall/Winter falls below 5.0 will not be permitted to
continue on Academic Warning, nor will they be allowed a second period
of Probation. Such students are required to withdraw and are not normally
readmitted to the Faculty of Science.

(3) Scholarship
The basis for scholarship consideration is passing grades in all
courses on load of at least ★30.

(4) First-Class Standing
First-class standing in a given year is awarded to any student who
obtains a GPA of not less than 7.5 while enrolled in a full, normal
academic load (★30) during the Fall/Winter. This is also referred to as
the Dean’s Honor Roll.
(5) **Continuation in Programs**

Students are normally permitted to continue in their degree program if the degree requirements for the year's work are met. These requirements vary among the programs; consequently, the appropriate program should be consulted for further details.

(6) **Marginal Standing—Academic Warning**

Students whether in an Honors, Specialization, or the General program, whose GPA at the end of Fall/Winter is between 4.5 and 4.9 will be deemed to have a Marginal Standing. Subject to the next paragraphs, they will be allowed to continue in the BSc General program for one further Fall/Winter on Academic Warning.

Only one period of attendance on Academic Warning will be allowed while registered in the Faculty of Science. Students who have received an Academic Warning in any previous Fall/Winter and whose current Fall/Winter GPA is between 4.5 and 4.9 will be required to withdraw from the Faculty. Such students can only apply for readmission after attending another postsecondary institution at which time they can apply for admission as a transfer student under the conditions described in §14.2.1(G) and 15.15.9.

Note: Students under Academic Warning are only permitted to interrupt their programs with the prior written approval of the Associate Dean. If students on Academic Warning interrupt their programs for more than 12 months without prior approval, readmission will normally not be granted unless the student meets the current readmission criteria. (This provision regarding permission to interrupt their program does not apply to Marginal students who attend another postsecondary institution in the interim. Such students must reapply as transfer applicants, see §15.15.9).

**162.4 Continuation in the BSc (Specialization in Science and Education) and BEd (Secondary) Combined Degree Program**

Continuation in the BSc Specialization in Science and Education/BEd (Secondary) combined degrees program requires a Grade Point Average (GPA) of at least 5.5 in the Fall/Winter. (See §23.4(7) regarding the rules for calculating Grade Point Average).

A student who does not meet the requirement to continue in the combined degrees program must withdraw from the program and may apply for admission to either a BSc General program or a BEd program, if eligible. Refer to §163.4 for academic standing regulations for admission to the BEd program and to §163.1.3 for academic standing regulations for admission to the BSc General program.

**162.5 Graduation Year**

Students who have completed 120 or more and who have either not applied to graduate, or who have applied but have not met graduation requirements, are permitted to register only in those courses necessary to complete their current program as quickly as possible. Such students must have the written approval of the Associate Dean of Science for every course beyond 120 in which they register. Students in Honors or Specialization programs must also have the written approval of their Departmental Advisor.

**162.6 Courses**

1. **Selection of Courses**

   Students are responsible for familiarizing themselves with program requirements and limitations as specified in the Calendar, for ensuring their programs are properly planned in accordance with degree specifications, and for the completeness and accuracy of their registration. Please read the Calendar carefully before registering in courses, and if you are in doubt about any regulations pertaining to your program, consult the Faculty of Science Office (CW 223 Biological Sciences) for clarification.

   Students registered in the Faculty of Science must select courses offered by the Faculty of Arts or by the Faculty of Science. In some instances, courses from other faculties may be permitted by permission of the Dean or designee. Written approval from the Faculty of Science is required if more than 30 are taken in a Fall/Winter, except in those Honors and Specialization programs requiring more than 30 in a given year.

2. **Selection of First-Year Courses**

   Beginning first-year students who have completed no credits toward their programs must restrict their registration to junior courses. Such students may take senior courses in first year only with the written consent of the Department concerned and the written approval of the Dean or designee.

3. **Withdrawal from Courses**

   Courses from which the student withdraws up to and including the last day of registration in the Fall and Winter Terms will not appear on the student's record. Courses from which the student withdraws after the last day of registration and up to and including the last day for dropping courses will appear with a grade of "W" (Withdraw with permission) on the transcript.

   Deadlines for withdrawing from courses are listed in §11.

4. **Prerequisites**

   Courses with prerequisites may only be used for degree credit if the prerequisite requirements are met.

   A grade of 4.0 is the minimum grade acceptable in a course which is to be used as a prerequisite.

   Where a prerequisite is stated, it is understood that equivalent courses may be used to satisfy the requirement. In addition, the department offering a course with prerequisite requirements may waive the prerequisite in writing. (Prerequisite waiver forms are available from the Faculty of Science office and the Department offices).

   Students who are unsure if they meet the prerequisite requirements in a course, or who wish to obtain permission to have a prerequisite waived, should consult the department offering the course.

5. **Repeating Courses**

   No student will be permitted to repeat any University course, whether a failed course or a course having a grade of W, more than once except for reasons deemed sufficient by the Council of the faculty in which the student is enrolled. For Science students, the Faculty will withhold credit or indicate the course is extra to degree on any course that contravenes this regulation.

   Normally, a student will not be permitted to repeat a course in which a grade of 4.0 or more has been received.

   Only two exceptions are permitted, and each requires written approval of the Dean or designee:

   a. When a higher grade is necessary for a course that is required in one of the degree programs

   b. When a student in the last year of a degree program repeats a course(s) to raise the GPA to the level required by the degree program

   A student who repeats a course in which a grade of 4.0 or more has been received, without written permission of the Faculty of Science, will have the grade attained on the initial passing of the course used for the purpose of meeting degree requirements, and no credit will be assigned to the repeated course.

6. **Reexamination**

   See §23.5.5.

**162.7 Graduation**

1. **Application for Graduation**

   Students who intend to receive a BSc (General, Specialization, or Honors) Degree or Special Certificate must apply for the Degree or Certificate at the Faculty Office by February 1 for Spring Convocation or by September 1 for Fall Convocation.

2. **Degree Requirements**

   All BSc Degrees require a minimum of 120. Courses with weights of 0 are offered for credit only, and, although they may be required in specific degree programs, cannot be used to meet the minimum units of course weight requirement in any degree program.

3. **Convocation**

   All requirements for graduation at Spring Convocation must be met by the end of Fall/Winter. Those completing degree requirements during Spring/Summer will graduate at the Fall Convocation.

4. **First-Class Honors**

   First-class Honors Degrees are awarded to any student in an Honors program who obtained a GPA of not less than 7.5 over the last two Fall/Winter sessions if the student was enrolled in a full academic load (90) during each Fall/Winter.

5. **With Distinction**

   The notation "With Distinction" is inscribed on the parchment of a candidate for a General or Specialization degree if the candidate has obtained a GPA of not less than 7.5 over the last 60 and if the student
was enrolled in a full academic load (140) during each Fall/Winter of the
the last two years.
Further regulations regarding academic standing, promotion, and
graduation vary from program to program within the Faculty of Science,
and are therefore given in §163 below. Regulations for Honors,
Specialization, and General programs are found in §163.1, regulations for
preprofessional patterns in §163.20.

162.8 Appeals and Grievances
A copy of Faculty of Science regulations regarding appeals on grades,
aademic standing and early readmission may be obtained from the Faculty
Office (CW 223 Biological Sciences Building). Certain academic standing
decisions and appeals regarding enrollment in the Faculty of Science
may be appealed to the General Faculties Council Academic Appeals Committee. See §23.8.
Note: Deadlines exist for submission of appeals. Contact the Faculty for
details.

162.9 Visiting Student Status
Permission to attend another institution as a Visiting Student depends
on the student remaining in good academic standing in the Faculty of Science
at the University of Alberta.
A student while registered in the Faculty of Science will not receive
permission to register as a Visiting Student at another institution if the
equivalent course is given on campus in the same term, except in the case of
formal exchange programs.

163 Programs of Study

163.1 BSc in the Honors, Specialization, and
General Programs

163.1.1 Honors Programs
A minimum of 120 normally taken in four consecutive academic years
is required to complete the Honors program for the degree of BSc with
Honors. These programs provide specialization in the chosen subject or
subjects as well as the higher standard implied by the term “Honors.”
Honors programs are available in the Departments of Biochemistry,
Biological Sciences, Cell Biology, Chemistry, Computing Science, Earth and
Atmospheric Sciences, Mathematical Sciences, Neuroscience, Pharmacology,
Physics, Physiology, and Psychology. Honors is the preferred program for
students who plan graduate study.
Admission
See §15.15.3 for admission requirements.
Selection of Courses
The following regulations govern Honors programs:
(1) In each year, an Honors student’s program must be approved by an
Honors advisor in the student’s department and by the Faculty Office.
(2) A minimum of 72 in Science is required in most Honors programs.
Certain departments may require more than 72 in Science courses.
(3) A student normally must take at least 18 in Arts courses as part of the
requirements for the Honors degree.
(4) Normally, no more than 62 in junior (100-level) courses are permitted in
Honors programs.
(5) Certain non-Arts and non-Science courses appropriate to the program
may be permitted in Honors programs with the written approval of the
Department directing the student’s program.
Course Load Requirements
Students in Honors programs must take at least 30 during the Fall/
Winter of each year of the program. Exceptions to this requirement must be
approved by the Department and the Faculty Office.

Academic Standings and Graduation
The following regulations govern Honors programs:
(1) Continuation in an Honors program is by recommendation of the depart-
ment concerned and requires a GPA of at least 6.5 in each of the
preceding Fall/Winter periods. See description of Honors programs of
individual departments for additional requirements relating to continuation
in the Honors program. Students must be in good standing in the Honors
program in order to graduate.
(2) A student who fails to attain the standard necessary for continuation in
Honors must withdraw from the Honors program. In so doing, the student
may transfer to a Specialization program with the appropriate depart-
ment’s approval or to the General program in the Faculty of Science.
Students applying to transfer from an Honors program to Specialization
or General must meet the continuation standards for the program
concerned.
(3) A student who fails to complete the requirements for a degree with
Honors in the fourth year may be granted the Specialization degree or
the General degree on application if the courses taken and the standing
attained are satisfactory. Such students must apply to transfer to a
Specialization or General program.
(4) Degrees with Honors are awarded in two classes: First-Class Honors and
Honors. For First-Class Honors, a GPA of at least 7.0 for the
last two Fall/Winter sessions is required. For Honors, a GPA of at least
6.5 on 30 in each Fall/Winter is required.
(5) Students transferring to Honors from Specialization or General programs
or from other faculties or universities with less than 30 are allowed to
make up the deficiency or deficiencies, i.e., 3 to 27, during or after
taking the full program of courses in each Fall/Winter after entering the
Honors program.

Residence Requirement
A student transferring to the Faculty of Science with advanced standing
must complete at least 60 normally the last 60) while registered in the
Faculty of Science at the University of Alberta.

Time Limits for Program Completion
Normally, an Honors program must be completed in four consecutive Fall/
Winter periods. An Honors program may be interrupted only by special
permission of the Department and the Dean.

163.1.2 Specialization Programs
Four-year programs, comprising a minimum of 120, provide education
to a professional level and lead to the degree of BSc with Specialization.
Specialization programs are available in the Departments of Biochemistry,
Biological Sciences, Cell Biology, Chemistry, Computing Science, Earth and
Atmospheric Sciences, Mathematical Sciences, Pharmacology, Physics, and
Psychology.
A five-year (150) BEd/BSc (Specialization in Science and Education)
program with majors and minors in Biological, Mathematical, and
Physical Sciences is also available (see §15.5.2 and §55).
Admission
See §15.15.4 for admission requirements.
Selection of Courses
The following regulations govern Specialization programs:
(1) In each year, a Specialization student’s program must be approved by a
Specialization advisor in the appropriate Department and by the Faculty Office.
(2) A minimum of 72 in Science is required in most Specialization programs.
Certain Departments may require more than 72.
(3) A student must take at least 18 in Arts courses as part of the
requirements for most Specialization degrees.
(4) Normally, no more than 62 in junior (100-level) courses are permitted in
Specialization programs.
(5) Certain non-Arts and non-Science courses appropriate to the program
may be permitted in Specialization programs with the prior written
approval of the Department directing the student’s program.
Applicants to the BSc Specialization program who have taken non-Arts
and non-Science courses before application will have the potential
transfer credit for such courses assessed at the time of admission to the program.
Course Load Requirements
To graduate in four years normally requires that BSc Specialization students take the usual full course load of 30 in each Fall/Winter of the program. Students who wish to extend their programs are still expected to complete at least 24 in each Fall/Winter of the program. (See Time Limits for Completion of Program below.)

Academic Standings and Graduation
The following regulations govern Specialization programs:

(1) Continuation in a Specialization program is by recommendation of the Department concerned and requires a GPA of at least 5.5 in each of the preceding Fall/Winter periods. See description of Specialization programs of individual departments for additional requirements relating to promotion in the Specialization program. Students must be in good standing in the Specialization program in order to graduate.

(2) A student who fails to attain the standard necessary for continuation in the Specialization program will be required to withdraw from that program. In so doing, the student may apply to transfer to the General program in the Faculty. Students applying to transfer from a Specialization to the General program must meet the continuation GPA of 5.0.

(3) A student who fails to complete the requirements for a Specialization degree in the fourth year may be granted the General degree forthwith on application if the courses taken and the standing attained are satisfactory. Such students must apply to transfer to the General program.

(4) For graduation, a program of at least 120 credits to the degree.

(5) BSc Specialization degrees with Distinction are awarded when students achieve a GPA of at least 7.5 on the last 60 if the student was enrolled in a normal course load (30) during each Fall/Winter of the last two years.

Residence Requirement
The BSc Specialization program is a four-year program, but students who wish to extend their programs to a fifth year may do so. (See course load requirements above.) Students who wish to extend their programs beyond five years must first obtain the written approval of the Faculty of Science and the Department.

Time Limits for Completion of Program
The BSc Specialization program is a four-year program, but students who wish to extend their programs to a fifth year may do so (see course load requirements above). Students who wish to extend their programs beyond five years must first obtain the written approval of the Faculty of Science and the Department.

163.1.3 General Programs
The BSc General program provides students with a diverse education in more than one branch of study and includes a major and minor subject or area of concentration. Students must major in a Science subject or area of concentration. Students may elect to minor in a Science subject or area of concentration, an Arts subject of concentration, an Agriculture, Forestry, and Home Economics minor, or a Business minor. In addition to providing a BSc General Degree, this program allows for subsequent transfer to Specialization and Honors programs. Students who intend to transfer to an Honors program must complete 30 in each Fall/Winter preceding admission to the Honors program. Students enrolled in the General program who intend to transfer to another program should consult the appropriate admission requirements for the particular program of interest in 15.16 and carefully select their first-year core courses in accordance with the requirements of the specific program.

Students who tentatively plan to transfer to an honors or specialization program should initially complete courses toward a Science or Arts minor in accordance with BSc General regulations.

Admission
See 15.15.1 for admission requirements for the BSc (General) programs. The following regulations govern the General program:

(1) In each year, a student’s program must be approved by an advisor in the student’s major subject or area of concentration and by the Faculty Office.

(2) To obtain a BSc General Degree, a student must receive credit in 120. At least 72 and not more than 102 must be in Science. At least 18 and not more than 48 must be in Arts.

(3) Each student must complete a major subject or area of concentration. The major subject or area must be in Science. A minimum of 36 and a maximum of 48 are required in the major subject or area of concentration, with no more than 18 at the junior level. Each student must also either

a. complete a second major which also must be a subject or area of concentration in Science. Students who complete a second major in Science will have the Double Majors recorded on their transcripts and diplomas; or

b. complete a minor subject or area of concentration. The minor subject or area of concentration may be in Science, or a student may present a subject of concentration in Agriculture, Forestry, and Home Economics, Arts or Business. For a list of Agriculture, Forestry, and Home Economics Minors, see §163.1.4. For a list of Arts subjects available as a minor, refer to “Minors”. For information about admission to the Business minor, see §15.15.2. Requirements for a Business minor appear in §163.1.5. At least 24 and not more than 36 are required in the minor subject or area of concentration with no more than 12 at the junior level. If the minor subject of concentration is in Arts, additional requirements as specified by the Arts Department may be required. Students are responsible for meeting any additional departmental requirements as specified in the Faculty of Arts.

Majors
A Major subject of concentration consists of Science courses taken in one of the following subjects: Chemistry, Mathematics, Physics, Science Psychology and Statistics.

A Major area of concentration consists of Science courses taken from one of the following groups:

- Biological Sciences: Biochemistry, Botany, Entomology, Genetics, Marine Science, Microbiology, Paleontology, Pharmacology, Physiology, Zoology, and courses titled Biology
- Physical Sciences: Astronomy, Biochemistry, Chemistry, Geophysics, Mathematical Physics, and Physics
- Earth and Atmospheric Sciences: EAS courses (see §163.7), Geo-physics and Paleontology

Minors
A Minor subject of concentration consists of Science courses taken in one of the following subjects: Chemistry, Computing Science, Mathematics, Physics, Science, Psychology, Statistics, or in one of the subjects or areas in the Faculty of Arts noted below. For information about the Minor in Computing Science, see §163.8.6. A minor area of concentration may be chosen from one of the areas noted above, i.e., Biological Sciences, Physical Sciences, Mathematical Sciences, or Earth Sciences. A BSc General–Minor in Business is also available.

If the Minor subject of concentration chosen is from Arts, the above requirements and any further requirements as specified by the Arts Department must be met. (See the Faculty of Arts §42.1 to 43.30 for specific requirements for minors, by Department.) The following Arts subjects may be offered as a minor subject of concentration: Anthropology; Art and Design (including Art, Art History, and Design); Canadian Studies; Central/East European Studies; Chinese; Classics (including Ancient History, Art, Classical Literature in Translation); Comparative Literature; Drama; East Asian Studies; Economics; English; Film Studies; French; Geography**; German; Greek and Latin; History, Ancient or Medieval History, and Women’s History; Italian; Japanese; Latin American Studies; Linguistics; Music; Native Studies; Philosophy; Political Science; Psychology**; Religious Studies; Russian; Scandinavian; Sociology; Spanish; Ukrainian; Women’s Studies.

**The major subject or area of concentration and minor subject of concentration may not share courses from the same department. The following combinations are not allowed:

- Earth Sciences/Arts Geography
- Science Psychology/Arts Psychology
- Courses in a major or minor subject of concentration may not overlap.

(4) The General program features a first-year core of courses which must include the following:

a. 6 from among junior courses offered by the Department of English (normally ENGL 101)

b. 6 from among junior courses offered by the Departments of Computing Science, Mathematical Sciences (CMPT 101 or 114;
Minor in Human Ecology

The minor in Human Ecology consists of at least 24 and no more than 30 in Human Ecology as follows:

1. HECOL 100
2. HECOL 200
3. HECOL 150 or HECOL 170
4. HECOL 320
5. 12 to 18 in HECOL courses, with at least 9 at the 300-level.

Minor in Nutrition

The minor in Nutrition consists of at least 24 and no more than 33 in Nutrition, with no more than 12 at the 100-level, as follows:

1. NUTR 100 or NU FS 101
2. NU FS 372 or 373
3. NUTR 301
4. NUTR 302
5. NU FS 363
6. 9 in advanced Nutrition courses

Note: If biochemistry has been taken prior to NUTR 100 or NU FS 100, select an additional 3 from advanced Nutrition courses.

163.1.5 BSc General—Minor in Business

Note: For requirements, see §163.1.3. Students admitted to the program lacking one or more prerequisites will be required to make up the deficiency during the first Fall/Winter in the Business Minor program.

BSc General program students admitted to the Minor in Business quota must complete the following:

1. ECON 101, 102
2. 18 to 30 in courses offered by the Faculty of Business including ACCGT 311; ORG A 301; two of FIN 301, MARK 301, MGTSC 352, ORG A 321

Notes

1. Several of the above courses have one or more Arts or Science courses as prerequisites. These prerequisites must be met.
2. Students completing a minor in Business must still choose a major in Science and must satisfy the requirement that at least 72 of the 120 credited to the degree be in Science.
3. Students minoring in Business must still complete at least 18 in Arts. ECON 101 and ECON 102 constitute six of those required Arts units.

Once admitted to the minor in Business, students in the BSc General program will be allowed to continue in the Business minor as long as they remain in good standing in the BSc General program. BSc General program students who have been admitted to the minor in Business and who subsequently apply to transfer to a Specialization or Honors program which has a Business component controlled by quota will have to apply and compete for admission to that quota.

163.1.6 BSc (Specialization in Science and Education)/BEd (Secondary) Combined Degrees Program

The Faculties of Science and Education offer a combined degrees program that is more highly structured than the BSc followed by a BEd After-Degree (a six year route). It provides less flexibility in course choice and scheduling than taking the degrees sequentially, because it is designed to meet the minimum requirements of both degrees in five years. In addition, it must meet teacher certification requirements within this time frame.

To accommodate the variety in subject studies needed in secondary school teaching, students in the combined degrees program will select both a major/minor from the following areas:

- Biological Sciences: Biochemistry, Biology, Botany, Entomology, Genetics, Microbiology, Pharmacology, Physiology, Zoology.
- Physical Sciences: Astronomy, Biochemistry, Chemistry, Geophysics, Mathematical Physics, Physics.

Students apply to the Faculty of Science for admission to the Combined Degrees Program and spend the first two years of the five-year program registered in the Faculty of Science. (See §15.15.6)
**Academic Standing and Graduation**

1. A student in the combined program is not granted the privilege of repeating a failed course more than once during the program except with the permission of both the Dean of Education and the Dean of Science.
   A student is not permitted to repeat a course in which a grade of 4.0 or more has been received except with the permission of both the Dean of Education and the Dean of Science.

2. Courses with prerequisites may only be used for credit if the prerequisite requirements have been met. A grade of 4.0 is the minimum grade acceptable in a course to be used as a prerequisite.

---

**Science Chart 1**  
**BSc (Specialization in Science and Education)/BEd**

**Note:** Year 1 and Year 2 are completed in the Faculty of Science. Years 3, 4 and 5 are completed in the Faculty of Education.

(1) Courses after 15 units have been received except with the permission of both the Dean of Education and the Dean of Science.

(2) A full-time student in the combined program should normally register in the Introductory Professional Term and must be taken concurrently.

(3) Normally, no more than 42 at the 100-level are permitted in the combined program.

(4) A full-time student in the combined program should normally register in 15 during Fall/Winter of each year of the program.

(5) A student may be permitted to complete the requirements for the combined program over a longer period than five years on approval by both the Dean of Education and the Dean of Science.

---

**Notes:**
- Courses 1 through 5 above constitute the Introductory Professional Term and must be taken concurrently.
- Courses 6 through 9 above constitute the Advanced Professional Term and must be taken concurrently.
- Courses 1 through 4 above constitute the Advanced Professional Term and must be taken concurrently.
- Courses 5 through 9 above constitute the Advanced Professional Term and must be taken concurrently.
- Courses 1 through 4 above constitute the Advanced Professional Term and must be taken concurrently.

---

**Notes:**
- Courses 1 through 5 above constitute the Introductory Professional Term and must be taken concurrently.
- Courses 6 through 9 above constitute the Advanced Professional Term and must be taken concurrently.
### 163.1.7 Special Certificates

An applicant holding a BSc degree from this Faculty may qualify for a certificate indicating that the requirements for the equivalent of a BSc Honors degree (163.1.1) or a BSc Specialization Degree (163.1.2) have been met. To qualify for a Special Certificate, at least 30 additional must be completed and admission, program, academic standing, and graduation requirements of the equivalent degree must be met. Admission to a Special Certificate program requires approval of the appropriate Department and the Faculty Office. The specific course requirements are determined at the time of admission by the appropriate Department and the Faculty Office. The Special Certificate is not available to degree holders from other faculties at the University of Alberta or from other universities. For further information, consult the Faculty of Science Student Services Office.

### 163.1.8 The BSc After an Undergraduate Degree (Other than a BSc from the Faculty of Science at the University of Alberta)

An applicant holding an undergraduate degree may qualify for the BSc General (four-year) degree, a BSc Specialization degree, or a BSc Honors degree by meeting the following requirements:
(1) Satisfactorily complete a minimum of 60 (normally the last 60) while registered in the Faculty of Science at the University of Alberta.

(2) Satisfy all admission requirements (see $15.15$), as well as program, academic standing, and graduation requirements of the particular degree program (See $163.1.1$ for Honors, $163.1.2$ for Specialization, and $163.1.3$ for General Program.)

Admission to a Specialization program and an Honors program requires approval of the appropriate Department and the Faculty Office. Note: The discipline in the BSc Specialization or Honors degree may not be the same as that of the first degree. The specific course requirements for a degree program are determined, at the time of admission, by the appropriate Department (for Specialization and Honors) and the Faculty Office. The BSc after a previous undergraduate degree is available to holders of undergraduate degrees from other faculties at the University of Alberta and from other universities. Note: The major selected in the After Degree program may not be in the same discipline as the major in the first degree. For further information, consult the Faculty of Science Student Services Office.

Note: A holder of a BSc degree from another university is not eligible for a BSc General After Degree.

163.1.9 Industrial Internship Program

The Industrial Internship program (IIP) offers undergraduate students extended work experience in industry in addition to their academic courses. The work experience is normally undertaken after completion of a minimum of 75, and not more than 105, units of course weight of an Honors or Specialization degree program. Students who have maintained good academic standing in an Honors or Specialization program and are Canadian citizens or permanent residents are eligible for the program. Department IIP Advisors will provide the approved position descriptions from companies wishing to employ IIP students. Companies are responsible for interviewing and selecting students for the positions. The internship may begin in May, September or January and must be of at least 8 months duration, but may extend up to 16 months; a 16-month internship normally includes a four-month probationary period. Work during the internship period is full time, for which the student is paid by the employer at competitive rates. The student, employer and department must agree to terms of the internship. Following completion of the work experience, students return to the university to complete their degree program of studies. It is not possible to guarantee that all students wishing to obtain an internship will be able to do so.

During the period of the internship, the student registers in work experience (WKEXP) courses and is considered a full-time student at the University of Alberta. Work experience courses are assigned no units of course weight and are graded credit/no credit. All students must register in two WKEXP courses that have associated fees. These fees are used to cover Department costs of job recruitment, supervision and site visits during the internship period, and program administration costs.

During the first term following completion of the internship and return to the university, students must complete the academic requirements of the Industrial Internship. This normally takes the form of a report to the appropriate Advisor and/or Committee as well as to other students as part of a graded seminar course.

Detailed information about the Industrial Internship is available from the IIP Advisor in each Department in the Faculty of Science.

163.1.10 Transfers Between Programs

A student may transfer from an Honors program to either the corresponding Specialization program or to the General program, or from a Specialization program to the General program at any time in the program, by submitting a readmission form to the Faculty Office subject to appropriate deadlines. Transfers from the General program to a Specialization program or an Honors program or from one Specialization program to another or to an Honors program may be made according to the dates listed in $12$. Also, transfers to Honors and Specialization programs require approval of the Department responsible for the new program.

Note that transfer from BSc/BEd program to any of the BSc programs must take place no later than Year 2 to avoid loss of credit.

163.1.11 Completion of a BSc Degree After Transfer to Another Faculty

Students who transfer to another faculty after completing part of a BSc program may reapply to the Faculty of Science after completing the degree from the other faculty. A former student transferring to the Faculty of Science normally must complete at least 60 while registered in the Faculty of Science at the University. Courses completed in the Faculty of Science before transfer may count toward the minimum 60 that must be completed while registered in the Faculty of Science. Science or Arts courses taken while in another faculty, which are clearly noted as “extra-to-degree” on the transcript, may fulfill specific subject requirements of a degree program in Science but will not fulfill the minimum residence requirement of the program.

163.2 Biochemistry

163.2.1 Honors in Biochemistry

Continuation in the Honors program in Biochemistry requires a GPA of at least 7.0 in each of the preceding Fall/Winter periods.

Graduation requires a minimum GPA of 7.0 on the last 60 credited to the degree.

Notes

(1) For information about new Biological Sciences courses, consult your Department advisor.

(2) Recommended Science options for second year include BIOL 207; MCRB 265; MATH 214 and 215; GENET 270 and 275 or other approved Sciences courses.

(3) Recommended Science options for third and fourth year include BIOCH 450, 455, and 460; MCRB 311 or 415; PHYS 201; PHYSL 210.

(4) Students should consult the Department of Biochemistry regarding selecting options throughout the course of the program.

(5) Students must receive a grade of not less than 6.0 in all Biochemistry courses credited toward the minimal number required for the degree.

(6) $\#$6 in a junior English is required as one of the 18 in Arts options within the Honors in Biochemistry program.

(7) BIOCH 410, 420, 430, 441, 450, 455, and 460 are offered only in alternating years. Check the Registration Procedures book for courses offered in the current year.

163.2.2 Specialization in Biochemistry

Continuation in the Specialization program in Biochemistry requires a minimum GPA of 6.0.

Graduation requires a minimum GPA of 6.0 on the last 60 credited to the degree.

Notes

(1) For information about new Biological Sciences courses, consult your Department advisor.

(2) Recommended Science options for second year include BIOL 207; MCRB 265; GENET 270 and 275 or other approved Sciences courses.

(3) Recommended Mathematical or Physical Science options include MATH 214 and 215; CHEM 271 and 273; PHYS 201; or other approved Mathematical or Physical Science courses.

(4) Other recommended Science options for third and fourth year include BIOCH 450, 455, 460; MCRB 311 or 415; PHYS 201; PHYSL 210 or other approved Science courses.

(5) Students should consult the Department of Biochemistry regarding selecting options throughout the course of the program.
163.3 Biological Sciences

All students in Honors and Specialization programs in Biological Science take a common core of courses in the first and second years. Thereafter, they follow the course sequence of one of eight areas of concentration in either Honors or Specialization in Biological Sciences identified in §163.3.4 and 163.3.5. Students must declare an area of concentration and follow the appropriate course sequence. The title of the area of concentration will appear on their degree. Specific course requirements of Honors students: BIOL 499, a directed research project, is required for Honors students. The research project must be conducted on a topic appropriate to the student’s area of concentration. BIOL 499 is a recommended option for Specialization students.

The Department of Biological Sciences offered programs in Honors and Specialization in Invertebrate Biology and Systematics and Evolution until 1998/99. Effective September 1999, these programs were replaced with Animal Biology and Evolutionary Biology, respectively. Students who began the old programs before 1999 may complete the programs if there has been no break in attendance. These students should consult the 1998/99 edition of the Calendar for program details. Students entering the Biological Sciences programs in September 1999 and thereafter will be admitted to the new programs.

Students may receive block Transfer in the Biological Sciences at the University of Calgary or the University of Lethbridge if the appropriate courses are completed. Interested students may contact the Department of Biological Sciences for details.

163.3.1 Honors in Biological Sciences

Admission to the BSc Honors in Biological Sciences program directly from high school requires a minimum average of 80% on the following required courses: English 30, Biology 30, Chemistry 30, Mathematics 30, and a subject from group A, B, or C (Physics 30 recommended). Admission on transfer requires a minimum GPA of 5.5 in the preceding Fall/Winter.

Continuation in the Honors Biological Sciences program requires a minimum GPA of 6.5 in the preceding Fall/Winter. Graduation requires a minimum GPA of 6.5 on the last 30 credits to the degree. Students in Honors programs must take at least 15 credits during the Fall/Winter of each year of the program. Exceptions to this requirement must be approved by the Department and the Faculty Office.

163.3.2 Specialization in Biological Sciences

Admission to the BSc Specialization in Biological Sciences program directly from high school requires a minimum average of 75% on the following required courses: English 30, Biology 30, Chemistry 30, Mathematics 30, and a subject from group A, B, or C (Physics 30 recommended). Admission on transfer requires a minimum GPA of 5.5 in the preceding Fall/Winter.

Continuation in the Specialization program requires a GPA of 5.5 in the preceding Fall/Winter. Graduation requires a minimum GPA of 5.5 on all courses credited to the degree.

163.3.3 First-Year Core for BSc Honors and Specialization in Biological Sciences

First Year:

- BIOL 107, 108; CHEM 101, 101/102; MATH 113 or 114 or 120; STAT 151; 6 Arts option (English recommended); 6 Science option.

Notes:

1. Students intending to complete their degree in the areas of Cell Biotechnology, Microbiology, or Molecular Genetics must also take both CHEM 102 and 163, normally in the second term of their first year, as the Science option.
2. Students intending to complete their degree in Physiology and Developmental Biology, or those who wish to incorporate BIOCH 203/205 in place of BIOCH 220 in their Animal Biology program, are required to take CHEM 163 in the first year.
3. The rest of the Biological Sciences program core consists of BIOCH 203, 205, and BIOCH 220 or 220, which would be completed in the second year.
4. Students intending to complete their degree in the areas of Cell Biotechnology, Microbiology, Molecular Genetics, or Physiology and Developmental Biology require BIOCH 203, 205, and/or BIOCH 220.
5. Students intending to complete their degree in Bioinformatics are required to take CHEM 101, 161, 163 and CMPUT 114, 114; or 114, 115 in their first year, in place of MATH and STAT.
6. Students in Honors Biological Sciences must successfully complete BIOL 499.

First-Year Core for Bioinformatics: BIOL 107, 108; CHEM 101, 161, 163; CMPUT 114, 114 or 114; CMPUT 115; 3 Science option (if not taking CMPUT 101/102); 6 Arts options (English recommended).

### Cell Biotechnology

#### Year 2

- BIOCH 203, 205; BIOL 201 or CELL 201; BIOL 207, 208; GENET 270; MICRB 265, 295
  - 6 in Arts options

Note: A minimum grade of 6 is required in MICRB 265 to stay in the Cell Biotechnology Honors program.

#### Year 3 and 4

- GENET 301, 304, 390; GENET 420 or MICRB 343 and 345; MICRB 311, 313, 415, 450
  - 24 in approved options from list below
  - 6 in Arts options

Recommended options include but are not restricted to the following:
- BIOCH 410, 420, 430, 450; BIO 490, 498, 499; BOT 350, 380, 382; CHEM 211, 213, 361, 363; GENET 302, 304, 375; INT D 224, 371; MIMI 351, 352, 405, 415, 425, 520; MICRB 295, 316, 391, 410; NU FS 363, 402; (Other options may be approved if suitable)

### Environmental Biology

#### Year 2

- BIOCH 220; BIOL 207, 208; BOT 201 or 210; CHEM 163 or 263; EAS 102; MATH 115 or 120; ZOOL 224; ZOOL 250 or ENT 220
  - 3 in an Arts option

#### Year 3 and 4

- BIO 430 or STATS 337; BIO 321, 380
  - 9 from BIO 331; BOT 332; FOR 322; or SOILS 330; ZOOL 332, 371.
  - 9 from list below
  - 9 in Arts options
  - 18 in approved options

Recommended options include but are not restricted to the following:

### Evolutionary Biology

#### Year 2

- BIOCH 220; BIOL 207, 208, 380
  - 3 in an Arts option

#### Year 3 and 4

- BIO 321, 335, 420, 435
  - 3 from BOT 411, PALEO 318, 319
  - 6 from BOT 219, 302, 305, 306; ZOOL 224, 225, 226, 405, 407, 408, 427; ENT 280; MICRB 265
  - 9 in Arts options
  - 12 from list below
  - 15 in approved options

Recommended options include but are not restricted to the following:

Note: Marine Science courses on this list are offered at Bamfield Marine Station.

### Microbiology

#### Year 2

- BIOCH 203, 205; BIOL 207, 208; GENET 270; MICRB 265, 295
  - 6 in Arts options

#### Year 3 and 4

- CHEM 211, 213; MICRB 311, 313
  - 6 in Arts options
  - 12 in MICRB options (List A)
  - 18 in Science options (List A or B)
  - 30 in approved options (List A, B or C)

Recommended options include, but are not restricted to the following:
- GENET 301, 302, 304, 390; GENET 420 or MICRB 343 and 345; MICRB 311, 313, 415, 450
  - 24 in approved options from list below
  - 6 in Arts options

Recommended options include but are not restricted to the following:
- BIOCH 410, 420, 430, 450; BIO 490, 498, 499; BOT 350, 380, 382; CHEM 211, 213, 361, 363; GENET 302, 304, 375; INT D 224, 371; MIMI 351, 352, 405, 415, 425, 520; MICRB 295, 316, 391, 410; NU FS 363, 402; (Other options may be approved if suitable)

### Molecular Genetics

#### Year 2

- BIOCH 203, 205; BIOL 207, 208; GENET 270, 275; MICRB 265
  - 6 in Arts options

Note: GENET 270 and 275 must be taken during the second year to permit completion of the program in four years.

#### Year 3 and 4

- BIOL 201 or CELL 201, 380; GENET 301, 302, 304, 390
  - 12 from GENET 364, 408, 412, 418, 420
  - 6 in Arts options
  - 12 in approved options
  - 12 from list below

Recommended options include, but are not restricted to the following:
163.3.5 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Biological Sciences (see §163.1.9 for guidelines to the program). The Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 941 and 942, starting in May, September or January. During the program, student are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student's transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student's progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 941 and 942 plus BIOL 400. BIOL 400 must be taken in the term immediately following completion of the WKEXP period. If required by the employer, the student's written report and oral presentation in BIOL 400 may be classified confidential. The employer also assesses the student's performance during the work term. Based on the student's written report and oral presentation, and the report from the employer, students are awarded a grade in BIOL 400.

Interested students should see the Industrial Internship Advisor in the Department of Biological Sciences for more information.

163.3.6 General Program in Biological Sciences

A major or a minor area of concentration in the Biological Sciences is available in the BSc General program.

Courses which may be used toward a Biological Sciences major or minor include BIOL; BOT; CELL 300; 301; ENT; GENET; INT D 224, 371, 372, 421, 452, 455; MA SC; MICRB; MMI 351, 352; NU FS 363; PALEO; PHYSL 210, 372, 401, 404, 410; PMCOL 201, 305, 331, 335, 336, 371, 392, 403, 409, 412, 415; ZOOL

Courses in Biochemistry (see §164.3) may be used for a concentration in Biological Sciences: BOT 199, ENT 120, GENET 197, MICRB 193, and ZOOL 120.

The following previously offered courses may be used for a concentration in Biological Sciences: BIOL 110, BOT 130, GENET 165, and PMCOL 101.

Note: Effective September 1996, it is not possible to combine a major or minor in the Biological Sciences with a minor or major in one of the specific subject disciplines in the Biological Sciences. For example, students may not select a major in the Biological Sciences and a minor in Microbiology. Students who choose Biological Sciences as a subject of concentration should consult the Department of Biological Sciences or the Faculty of Science Student Services Office.

163.4 Cell Biology

163.4.1 Honors in Cell Biology

Continuation in the Honors Cell Biology program requires a minimum GPA of 6.5 in the preceding Fall/Winter. Graduation requires a minimum GPA of 6.5 on the last 60 credited to the degree.

Year 1
Year 2
BIOL 107; 108
BIOL 201 or BIOL 207
CHEM 103/102
CHEM 201 or BIOL 201
MATH 113 or 114, and 115
GENET 270
*6 in an Arts option
PHYS 124, 126
*6 in an Arts options

Year 3
Year 4
CELL 300, 301
CELL 430, 445, 499
CHEM 271
*6 from Group A Cell Biology options
STAT 141 or 151
*6 from Group B Cell Biology options
*3 in an Arts option

Group A: Cell Biology Options

Group B: Cell Biology Options

Recommended options include, but are not restricted to the following:

BIOL 401, 409, 499; BOT 240, 303, 350, 403, 431, 455; CELL 300, 301, 415; ENT 321; INT D 371, 372, 452, 543, 544; GENET 301, 302, 304, 412, 418; MICRB 265, 311, 313; PHYSL 372, 401, 402, 404, PMCOL 371; ZOOL 340, 342, 343, 352, 370, 402, 441, 442, 452.

163.4.2 Specialization in Cell Biology

Continuation in the Specialization Cell Biology program requires a minimum GPA of 6.0 in the preceding Fall/Winter. Graduation requires a minimum GPA of 6.0 in all courses credited to the degree.
163.5 Chemistry

163.5.1 Honors in Chemistry

Honors students in Chemistry must take a core of Chemistry and auxiliary courses. The core consists of 42 in Chemistry courses, 12 in Mathematics courses, 6 in Physics courses, and 18 in Arts courses. In addition to the core courses, honors students must complete at least six 3 in senior courses in Chemistry. Four of these must be from Group A and the other two from either Group A or Group B. Finally, the honors student must include 3 in options in the third and fourth years of the program. These are normally chosen from offerings within the Faculty of Science. All options must be selected in consultation with the Department of Chemistry.

Continuation in the Honors Chemistry program requires a GPA of 6.5 in the preceding Fall/Winter. Graduation requires a minimum GPA of 6.0 on the last 30.

163.5.2 Specialization in Chemistry

The complete Specialization program consists of 120 and must include CHEM 101, 102, 161 (or 261), 163, or 263, 211, 213, 241, 271, 273, 341, 361, 363, 381, 383; MATH 113 (or 114), 115, 214, 215, PHYS 144, 146, 230; *6 in junior English or *3 in English and *3 in an Arts option, *12 in Arts options, and *39 in approved options. These options are normally chosen from within the Faculty of Science. All options must be selected in consultation with the Department of Chemistry. The honors curriculum can be used as a guide in planning a specialization program.

Continuation in the Specialization in Chemistry program requires a GPA of 5.5 on all Chemistry courses and a GPA of 5.5 on all courses beyond the first 30. Graduation requires a minimum GPA of 5.5 on the last 30 credited to the degree.

163.5.3 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Chemistry (see §163.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 401 and 402, starting in May, September or January. During the program, student are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 401 and 402 plus CHEM 400. CHEM 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in CHEM 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in CHEM 400.

Interested students should see the Industrial Internship Advisor in the Department of Chemistry for more information.

163.5.4 Concentration in Chemistry

Students in the BSc General program with a major in Chemistry should complete CHEM 100, 102, 161 (or 261), 163 (or 263); MATH 113 (or 114), 115, and 6 of junior physics during the first two years of their programs. CHEM 101, 102, MATH 113 (or 114) and 115 should be taken in Year 1 because these provide maximum flexibility for course selection in Year 2 and subsequent years of the program. To complete a major in Chemistry, students should select from the following senior courses: CHEM 211, 213, 271, 273, 331, 332, 361, 363, 375 and 313. Students majoring in Chemistry should consult the Chemistry Department Advisor before registering in second and later years of the program to plan a course of study and have their programs approved by the Advisor.

Students in the BSc General program with a minor in Chemistry should include CHEM 101, 102, 161 (or 261), and 163 (or 263) in their program. Other Chemistry courses to complete the minor may be selected from CHEM 211, 213, 271, 273, 303, 313, 332, 361, 363, and 375.

163.5.5 Certificate of Specialization After a BSc Degree

All outstanding requirements of the Specialization Degree must be completed with an average of 5.5 or higher in all chemistry courses taken after the general degree. See §163.1.3.

163.5.6 Diploma After a Previous Degree

Students who, after a period of professional employment, wish to update their qualifications may enrol in a special one-year program designed for this purpose. Those who possess at least the three-year general degree or its equivalent, and who complete satisfactorily an approved selection of 30, may be awarded a diploma attesting to this improvement in their qualification. All courses must be selected in consultation with the Department.

163.6 Computing Science

For admission requirements, see §15.15. The Computing Science program has a limit on enrollment in the second year.

Senior Computing Science courses (300- and 400-level) are restricted to third- and fourth-year Science Honors and Specialization students.
163.6.1 Honors in Computing Science

Continuation in the Honors program requires a GPA of at least 6.5 in the preceding Fall/Winter. Graduation requires a GPA of at least 6.5 on the last 30 credits to the degree and at least 6.5 on the last 60 credits to the degree.

Students must obtain departmental guidance in developing their program. All course selections and changes require approval by a departmental advisor.

Students should use the required Arts and approved options in Year 2 to build a foundation in disciplines related to Computing Science. Suggested programs of study in arts, business, electrical engineering, and applied mathematics are available from the Department.

Notes

(1) Honors students are strongly encouraged to take the Honors version of the MATH courses, beginning in the first year.
(2) Honors students must take CMPUT 495 (Honors Seminar) during their degree program.
(3) Honors students must take 12 in Group A courses which include CMPUT 304, 325, 340 and 474. A complete list of Group A courses to be offered in a given year is available from the department.
(4) Honors students must take 3 in Group B courses which include CMPUT 400, 401, 412, 414, 415, 422, 466, and 485. The department may approve variations in the above requirement on application.

163.6.2 Specialization in Computing Science

Continuation in the Specialization program requires a GPA of at least 5.5 in the preceding Fall/Winter. Graduation requires a GPA of at least 5.5 on the last 90 credits to the degree.

The program gives students freedom to pursue specialized areas of interest in Computing Science and in other disciplines. Students should use the required Arts and approved option in Year 2 to build a foundation in disciplines related to Computing Science. Suggested programs of study in arts, business, electrical engineering, and applied mathematics are available from the Department. Students develop coherent programs in these and other applications areas with the assistance of the departmental advisor. Course selections in other departments and Faculties may be subject to enrolment management and GPA requirements.

</tr>
</tbody>
</table>

Notes

(1) At least 9 in approved options must be at the 300-level or higher.
(2) Specialization students must take 6 in Group A courses which include CMPUT 304, 325, 340 and 474. A complete list of Group A courses to be offered in a given year is available from the department.
(3) Specialization students must take 3 in Group B courses which include CMPUT 400, 401, 412, 414, 415, 422, 466, and 485. The department may approve variations in the above requirement on application.

163.6.3 Specialization in Computing Science—Minor in Business

Note: Requirements for the BSc Specialization program set out in 163.1.2 must be met.

Students who have been admitted to the Business minor and who maintain a minimum GPA of 5.5 in the preceding Fall/Winter in the Specialization Computing Science program may continue with the designation "pursuing a Business Minor within Specialization Computing Science." Students who withdraw from the Specialization Computing Science program lose their status as "pursuing a Business Minor Within Specialization Computing Science." Should such students be admitted to the BSc General program and wish to pursue a Business minor within the BSc General program, they must reapply to the Business-Science Quota Committee for admission to the Business minor. The Business minor in Computing Science consists of the following:

(1) ECON 101, 102
(2) ACCTG 311
(3) ORG A 301
(4) Two of FIN 301, MARK 301, MGTS 352, and ORG A 321
(5) A minimum of 6 in courses offered by the Faculty of Business and approved by the student's advisor

To graduate with the designation "Specialization in Computing Science with a Minor in Business," students must achieve a minimum GPA of 5.5 on all Business courses contributing to the minor. This calculation does not include the two economics courses.

163.6.4 Specialization in Computing Science—Software Quality Option

The Software Quality Option program gives students the ability to focus on topics in Computing Science that are most relevant to software professionals while pursuing relatively broad interests in Computing Science and in other disciplines. It is recommended that students use the required Arts and approved options to build a foundation in disciplines related to, or influenced by, Computing Science. Suggested program of study include Arts, Business, Electrical Engineering, and Applied Mathematics. Coherent programs in these and other application areas are to be developed by the student with the assistance of the departmental advisor. Course selections in other departments and Faculties may be subject to enrolment management policies and GPA requirements.

Students will be accepted in the Software Quality Option after completing the first two years of the Specialization Program in Computing Science. Enrolment in this program is limited. Screening will take place after year 2; the students with the highest GPA in CMPUT 201, 204, 229 and 291; MATH 120 and 214; and STAT 221 will be admitted.

Continuation in the Specialization program with the Software Quality Option requires a GPA of at least 5.5 in the preceding Fall/Winter. Graduation requires a GPA of at least 5.5 on the last 90 credits to the degree.

Notes

(1) Students in the Specialization Program with the Software Quality Option must choose 12 from the following Business courses: MGTS 352, 422, 461, 465, M1S 412, 413, 414, 417
(2) Because the BSc Specialization in Computing Science - Software Quality Option includes the Industrial Internship Program component, students are eligible to apply for ISP (Information Systems Professional) certification upon completing 6 months of work experience in the software industry after graduation. The ISP is a registered designation under the Professional and Occupational Associations Registration Act in Alberta. The ISP Designation was registered in February 1997, and is administered by the Registrar of CIPS Alberta.
(3) Specialization students must take 6 in Group A courses which include CMPUT 304, 325, 340 and 474. A complete list of Group A courses to be offered in a given year is available from the department.
163.6.5 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Computing Science (see §163.19 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 921 and 922, starting in May, September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 921 and 922 plus CMPUT 400. CMPUT 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in CMPUT 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in CMPUT 408.

Interested students should see the Industrial Internship Advisor in the Department of Computing Sciences for more information.

Note: Approved options include BIOL 321, 380; any 300- or 400-level CMPUT; GENET 301, 302, 304; MIRC 260; STAT 337

163.6.7 BSc General—Computing Science Minor

The Computing Science minor requires between *24* and *36* in Computing Science, with a maximum of *18* at the 100-level. In addition, at least *6* must be at the 300-level or above.

The typical program will include the following:

- CMPUT 114, 115 (see Note); CMPUT 272; CMPUT 201; CMPUT 204; CMPUT 291; CMPUT 3xx; CMPUT 3xx; plus up to three further CMPUT 3xx or 4xx as desired.

Note: Students with no previous computing experience should enroll in CMPUT 101 first and then take CMPUT 114 and 115.

163.6.8 BSc Program in Computer Engineering

A four-year program in Computer Engineering is offered jointly by the Faculty of Science and the Faculty of Engineering (see §72.5). For administrative purposes, students in the program will be registered in the Faculty of Engineering.

See admission requirements in §15.6. Promotion and Graduation regulations are found in §73.3(2).

163.7 Earth and Atmospheric Sciences

Earth and Atmospheric Sciences encompass the study of the atmosphere, surface and interior of the earth. The Department administers eight academic programs: Honors and Specialization in Atmospheric Sciences, Honors and Specialization in Environmental Earth Science, Honors and Specialization in Geology, Honors in Paleontology, and BA Major in Human Geography. For details on Major and Minor in Human Geography, see Faculty of Arts listing.

163.7.1 Honors in Atmospheric Sciences

Atmospheric science is the study of atmospheric composition, state and motion, from the small scale (e.g., the environment of a single leaf) through medium scales (e.g., a cumulus cloud) to the global scale (global pollution and warming). Most atmospheric scientists in Canada work for Environment Canada, providing weather forecasts or environmental information. Opportunities also arise with provincial governments and in the private sector.

Continuation in the Honors in Atmospheric Sciences program requires a GPA of at least 6.5 on at least *30* in the previous Fall/Winter. Graduation requires a GPA of at least 6.5 on the last *60* credited to the degree.

A student enrolling in the Honors program should consult the Atmospheric Sciences advisor before registration each year.

For students in the Industrial Internship Program: EAS 401, WKEXP 411, WKEXP 412. Recommended Arts options include any EAS X9X courses.

163.7.2 Specialization in Atmospheric Sciences

Continuation in the Specialization in Atmospheric Sciences program requires a GPA of at least 5.5 or at least *27* in the previous Fall/Winter. To graduate in four years, a student needs to complete *30* per year.

Graduation requires a GPA of at least 5.5 on the last *60* credited to the degree.

A student enrolling in the Specialization program should confer with the Atmospheric Sciences program student advisor before registration each year.

For students in the Industrial Internship Program: EAS 401, WKEXP 411, WKEXP 412. Recommended Arts options include any EAS X9X courses.

163.7.3 Honors in Environmental Earth Sciences

Environmental Earth Science is the study of interactions between humans and Earth’s natural environment. It encompasses the influence of human activities on the local and global environment, as well as how our actions are shaped and controlled by the geologic and geomorphic processes occurring around us. Environmental Earth Scientists are typically employed by consulting companies, large resource and industrial firms, and government organizations.

Continuation in the Honors in Environmental Earth Sciences program requires a GPA of at least 6.5 on at least *30* in the previous Fall/Winter. Graduation requires a GPA of at least 6.5 on the last *60* credited to the degree.
A student enrolling in the Honors program should confer with the Environmental Earth Sciences Program student advisor before registration each year.

Optional Elements

Students must take additional courses from each of the following six groups:

1. At least 3 (Field and Laboratory Methods) of EAS 233, 237, 242
2. At least 3 (Geosystems) of EAS 235, 236, 241
3. At least 3 (Math, Statistics and Computing) of CMPT 114, MATH 120, 214, 215, 280, 334; STAT 141, 151
4. At least 3 (Geology) of EAS 207, 232, 321, 322, 330, 420, 421, 422, 425
5. At least 3 (Surface Processes and Quaternary Geology) of EAS 270, 271, 352, 370, 371, 453, 454, 455, 457; INT D 594
6. At least 9 of any EAS X9X courses.

Note: An additional 21 of approved options including courses listed in Groups 1-6 above.

For students in the Industrial Internship Program: EAS 401, WKEXP 411, WKEXP 412.

163.7.6 Specialization in Geology

Continuation in the Specialization in Environmental Earth Sciences program requires a GPA of at least 5.5 on at least 27 in the previous Fall/Winter. To graduate in four years, a student needs 30 per year.

Graduation requires a GPA of at least 5.5 on the last 60 credited to the degree.

A student enrolling in the Specialization program should consult the Geology program student advisor before registration each year.

6. At least 9 of any EAS X9X courses.

Note: An additional 21 of approved options including courses listed in Groups 1-6 above.

For students in the Industrial Internship Program: EAS 401, WKEXP 411, WKEXP 412.

163.7.7 Professional Association

The practice of geology in Alberta is governed by provincial law and regulated by the Association of Professional Engineers, Geologists, and Geophysicists of Alberta (APEGGA). In the interest of public protection, the right to practise geology in Alberta and accept professional responsibility for geological work, as well as the right to use the title of Professional Geologist (PGeol), is limited to people registered by APEGGA.

As members of the PS Warren Society, the geology student society, are automatically student members of APEGGA and as such are introduced to the professional association. To meet the requirements of full registration, acceptable academic training and four years of full-time experience as a geologist-in-training following graduation are needed.

Students should plan their course program to meet the requirements for professional registration, in particular, the Science course requirements additional to calculus, introductory Physics, and introductory Chemistry. The Specialization in Geology and the Honors in Geology degrees can be accepted by APEGGA as satisfying the academic requirements if courses are chosen to cover the APEGGA syllabus. Holders of degrees that do not cover the APEGGA syllabus may be required, through the APEGGA Board of Examiners, to meet additional academic requirements before being accepted for registration.

Current syllabus and registration information is available in the Departmental Office or from APEGGA.

163.7.8 Honors in Paleontology

See §163.14, Paleontology, for details on the Honors in Paleontology program.

163.7.9 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Earth and Atmospheric Sciences (see §163.19 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 411 and 412, starting in May, September or January. During the program, student are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the
employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 411 and 412 plus EAS 401. EAS 401 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in EAS 401 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in EAS 401.

Interested students should see the Industrial Internship Advisor in the Department of Earth and Atmospheric Sciences for more information.

163.8 Environmental Physical Sciences

163.8.1 Specialization in Environmental Physical Sciences

Continuation in the Specialization in the Environmental Physical Sciences program requires a minimum GPA of 5.5 in the preceding Fall/Winter. Graduation requires a minimum of GPA of 5.5 on the last 90 credited to the degree.

Year 1

Notes
(1) In lieu of EAS 290, 291, 390, 400; ECON 101; PHIL 355.
(2) Approved Science or other options must total 36 or 48, such that a total of 53 of optional courses are taken. These options include, but are not restricted to, CHEM 271, 273, 313, 331, 332, 415, 417; EAS 224, 225, 250, 327, 352, 457; ENCS 203, 205; GEOPH 223, 224; INT D 369; MATH 214, 215, 270; SOILS 210.

163.8.2 Industrial Internship Program

The Environmental Physical Sciences Program in the Faculty of Science offers an Industrial Internship Program which allows students to augment their program of study with 12 or 16 months of paid, discipline-related employment with approved firms or institutions. Only students who have completed three years of the Specialization Program in good standing and who are Canadian citizens or permanent residents are eligible to compete for places in the IIP. Employment will begin in May after completion of Year 3. After three months of employment, the Internship will be reviewed by the employer, the student, and the IIP Coordinator. If all parties are satisfied, the employment will continue for a further nine or 13 months. During this time the IIP Coordinator will maintain contact periodically with the student and the person designated by the employer to supervise the student to ensure satisfaction on all sides for the remainder of the work term. If the review shows the situation is not satisfactory, the Internship is terminated and the student may return to classes in September to complete Year 4. In this way, the completion of the student’s academic program is not delayed.

During the Fall/Winter, a student in the IIP will register in work experience courses, WKEXP 421 and 422 and will be considered to be a full-time off-campus student of the University of Alberta. The WKEXP courses are graded credit or no credit. In the Fall term immediately following successful completion of the IIP, the student will register in ENVPS 403 (3), which is graded on the normal 9-point grading scale and which comprises the academic component of the IIP. The student will submit a report to the IIP Coordinator describing the project(s) undertaken and will make an oral presentation to an Advisory IIP committee. A grade will be assigned in ENVPS 403, based on the employer’s assessment, the report and the oral presentation.

A student who has successfully completed WKEXP 421, 422 and ENVPS 403, will receive an Industrial Internship Designation on the degree certificate.

163.9 Geophysics

The Department of Physics offers two programs dealing with solid earth physics and space physics. The Honors in Geophysics program (see §163.16.2) prepares students for graduate work in geophysics. The Specialization in Geophysics program prepares students with the conceptual and laboratory background required for employment at the BSc level in industry, government and technical schools. Also see §163.16 (Physics).

163.9.1 Professional Association

The practice of geophysics in Alberta is regulated by the Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA).

The right to practise geophysics in Alberta and accept professional responsibility for such work as well as the right to use the geophysicist title is limited to those registered with APEGGA.

Members of the Geophysics Student Society are automatically student members of APEGGA. Graduates are encouraged to join APEGGA as Geophysicists-in-training. Acceptable experience following graduation is necessary for registration as a Professional Geophysicist, the APEGGA membership category which confers the right to accept responsibility for geophysical work. Contact the APEGGA office for more information.

163.10 Marine Science

Excellent opportunities for the study of marine biology and related subjects exist at Bamfield Marine Station (BMS) on Vancouver Island, BC. An academic program operates at the station, in which summer study will provide credit toward degrees in Science.

Prerequisite for all the MA SC courses is consent of the Department of Biological Sciences.

Students are expected to take a full course load of 15 during the fall term. Courses run Monday to Saturday.

A refundable deposit of $100 is payable at the time of application.

An extension fee of $1000 must be paid on arrival at BMS to cover the cost of field trips, lab supplies and course materials.

There is a mandatory room and board charge of $1840 for the 13 weeks. Information concerning course prerequisites and application procedures for Marine Science may be obtained from the Department of Biological Sciences or the Office of the Dean of Science. Permission to register in these courses is available from the Director of the Bamfield Marine Station, to whom application should be made.

See 201 Course Listings for descriptions of available Marine Science courses.

163.11 Mathematics

163.11.1 Honors in Mathematics

Continuation in the Honors in Mathematics program requires a minimum GPA of 6.5 in the preceding Fall/Winter. Graduation requires a minimum GPA of 6.5 on 30 in each Fall/Winter.

<table>

**Years 3 and 4**

- 21 in Mathematics courses
- 12 in approved options at the 300-level in the field of application
- 3 in an approved 300- or 400-level Mathematics and/or Mathematical Physics option
- 12 in approved Science options
- 6 in approved Arts options
- 6 in approved options

The program must include in the third and fourth years: MATH 337, 411, 417, 496, 486, 496; one of MATH 373 or 421. The Honors Seminar, MATH 496, should normally be taken in the fourth year. Note that several of the required courses are only given in alternate years.

**Minor in Statistics**

The degrees Honors in Mathematics and Honors in Applied Mathematics can each be obtained with a minor in Statistics if the student’s program includes STAT 265, 266, 278, 466, 471, and two of STAT 308, 411, 472, 479.

**Minor in Computing Science**

The degrees Honors in Mathematics and Honors in Applied Mathematics can each be obtained with a Minor in Computing Science. The student’s program must include CMPUT 114, 115, 201, 204, 272, 280, 291, and at least 12 in Computing Science at the 300- or 400-level chosen with approval of both the Computing Science Department Honors Advisor and the Mathematical Sciences Department Honors Advisor.

The Department also offers a BA Honors in Mathematics (see §43.16.1).

**Honors in Mathematical Physics**

See §163.16.3 for details.

### 163.11.2 Specialization in Actuarial Science—Business Minor

Continuation in the program normally requires successful completion of at least 24 in the previous Fall/Winter with a GPA of at least 5.5, and a GPA of at least 5.5 on all courses credited toward the degree and a GPA of at least 5.5 on all MATH courses credited toward the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

**Year 1**

**Notes**

1. Each student’s program must have the approval of the Department of Mathematical Sciences and must include:
   a. At least 18 in Arts
   b. At least 18 and not more than 24 in Business
   c. At least 69 in Science courses, of which 60 must be in MATH and STAT
   d. At least 24 in MATH and STAT courses at the 300-level or higher.

### 163.11.3 Specialization in Mathematics

Continuation in the program normally requires successful completion of at least 24 in the previous Fall/Winter with a GPA of at least 5.5, and a GPA of at least 5.5 on all MATH courses taken in that Fall/Winter.

Graduation requires a GPA of at least 5.5 on all courses credited toward the degree and a GPA of at least 5.5 on all MATH courses credited toward the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

**Year 1**

<table>

**Notes**

1. Each student’s program must have the approval of the Department of Mathematical Sciences.
2. A student must take at least 6 in MATH in each Fall/Winter of the program.
3. A corresponding Honors Mathematics course can be substituted for any MATH course listed. For example, MATH 117 can be substituted for MATH 114.

### 163.11.4 Specialization in Computational Science (Mathematics)

Continuation in the program normally requires, in the previous Fall/Winter, successful completion of at least 24 with a GPA of at least 5.5, and a GPA of at least 5.5 on the aggregate of all MATH, ECON, FIN, and STAT courses taken in that Fall/Winter.

Graduation requires a GPA of at least 5.5 on all courses credited toward the degree and a GPA of at least 5.5 on the aggregate of all MATH, ECON, FIN, and STAT courses credited toward the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated below.

**Year 1**

<table>

<td>12 in options</td>
</tr>
</tbody>
</table>

**Notes**

1. The program must contain at least 72 in Science and 18 in Arts.
2. Recommended MATH options include MATH 314, 322, 324, 325, 334, 373, 373, 380, 414, 421, 422.
3. Recommended CMPUT options include CMPUT 301, 304, 313, 325, 357, 391, 401, 411.
4. Recommended STAT options include STAT 330, 346, 454, 470.
5. STAT 265/366 can be substituted for STAT 221/222.
6. Each program must be approved by the Department of Mathematical Sciences.

### 163.11.5 Mathematics and Economics

The Faculty of Science offers an Honors degree and a Specialization degree in Mathematics and Economics.
Honors in Mathematics and Economics

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

<table>
<thead>
<tr>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 101, 102</td>

<td>★6 in options</td>
</tr>
</tbody>
</table>

Year 3 and 4

★24 in Economics
★24 in MATH or STAT courses
★6 in approved Science options
★6 in approved options

Notes
(1) Each student’s program must have the approval of the Department of Mathematical Sciences and must include
   a. at least ★18 in Arts courses
   b. ★6 in Science courses, including ★3 in MATH with at least ★12 of these at the 300-level or higher
   c. ★36 in ACCTG, ECON, FIN, or MG TSC, including ★9 in 400-level FIN

(2) Approved ACCTG, ECON, FIN and MG TSC options include ACCTG 413; ECON 282, 384, 385, 407, 408, 491; FIN 412, 413, 414, 416, 422, 434, 442, MG TSC 352, 404, 405, 429, 456.

(3) Students should choose some of their Mathematics and Science options from the following courses: MATH 280, 334, 337, 354, 380, 432, 470; STAT 466, 471, 472, 479.

(4) A corresponding Honors Mathematics course can be substituted for any MATH course listed. For example, MATH 117 can be substituted for MATH 114.

163.11.7 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Mathematical Sciences (see §163.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 951 and 952, starting in May, September or January. During the program, student are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 951 and 952 plus MATH or STAT 400. MATH or STAT 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in MATH or STAT 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in MATH or STAT 400.

Interested students should see the Industrial Internship Advisor in the Department of Mathematical Sciences for more information.

163.12 Neuroscience

163.12.1 Honors in Neuroscience

The Honors program in Neuroscience is an interdisciplinary program coordinated by the Division of Neuroscience and administered by the Faculty of Science. This program is for students planning a career in Neuroscience.

Neuroscience is a broadly based discipline covering all aspects of brain function. Some major areas are brain development, nerve cells and synapses, sensation and perception, learning and memory, control of movement, animal behavior, cognitive psychology, and disorders of the nervous system.

The honors program introduces the major areas of Neuroscience and allows students to explore topics of interest in their final year.

Continuation in the honors program requires a minimum GPA of 7.0 in the preceding Fall/Winter. Graduation requires a minimum GPA of 7.0 on ★60 in Years 3 and 4 of the program. Each program of study must be approved by the coordinator in the Division of Neuroscience.

### 163.13 Northern Studies

Students interested in Canada’s North and especially those planning a career in northern Canada should include within their curriculum some of the following: ANTHR 246, 340, 355, 445, and 446; BIOL 366; CANST 302 and 408; EAS 453 and 455; ENCS 201; INT D 443; POL S 432. These courses may be taken within the framework of existing General, Specialization, or Honors programs in the Faculty of Science. Students interested in Northern Studies should mention this to their faculty advisor.

### 163.14 Paleontology

The Honors in Paleontology program is for Honors students in Geology, Zoology, and Anthropology interested in vertebrate and invertebrate paleobiology, including evolution and systematics, historical biogeography, functional morphology and stratigraphic distribution. The program may be entered through the framework of existing programs in the Departments of Earth and Atmospheric Sciences, Biological Sciences, and Anthropology. Interested students should consult their Honors advisor to prepare their programs.

Paleontology is a basic science concerned with the evolutionary history of life and drawing on biological and geological knowledge. Paleontologists usually hold advanced research degrees and work as research scientists and/or teachers in universities, museums, and government and industrial laboratories, in Canada and elsewhere.

**Honors in Paleontology**

Paleontology introduces at the undergraduate level the fossil history of invertebrate and vertebrate animals, thereby enabling students to secure a core of broad paleontological knowledge for later entry into more specialized postgraduate studies in invertebrate and vertebrate paleontology. The program also provides students with background in ancillary geological and biological sciences relevant to studies in paleontology.

Continuation in the Honors in Paleontology program requires a GPA of 6.5 in the preceding Fall/Winter.

Graduation requires a GPA of 6.5 calculated over the last two years. For First-Class Honors, an average of at least 7.5 is required. In addition, students must pass an oral examination, in their fourth year, on stratigraphic and biologic principles. The examining committee shall consist of three members of the academic staff of Earth and Atmospheric Sciences and/or Biological Sciences.

**Note:** PALEO 414 is offered in alternate years but must be taken in Year 3 or 4. For information regarding new Biological Sciences and Earth and Atmospheric Sciences courses, please consult your Department advisor.

### 163.15 Pharmacology

#### 163.15.1 Honors in Pharmacology

The program leading to an Honors degree in Pharmacology prepares students for advanced study leading to academic or research careers.

Continuation and graduation from the Honors Pharmacology program requires a minimum GPA of 7.0 in the preceding Fall/Winter and a minimum GPA of 7.0 in all science courses taken, and a grade of 7.0 in all courses taken in the Department of Pharmacology.

Graduation requires a GPA of at least 6.5 in Year 4 and, in addition, a GPA of at least 7.0 for all courses taken in the Department of Pharmacology.

Students who fail to attain the GPAs necessary for an Honors degree in Pharmacology may be granted the Specialization degree if their standings are approved by the Department.

#### 163.15.2 Specialization in Pharmacology

The program leading to a Specialization degree in Pharmacology is for students who want to pursue further studies in the health sciences and those who want to prepare for a career in the Pharmaceutical industry. Although not as rigorous as an Honors program, the Specialization program is a solid background for advanced study leading to a career in academia or research.

Continuation and graduation from the Specialization program in Pharmacology require a minimum GPA of 6.0 in the preceding Fall/Winter. In addition, a GPA of at least 6.0 is required in all Science courses taken and a minimum GPA of 6.0 is required in all courses in the Department of Pharmacology.

<table>

</tr>
<tr>
<td>★6 in approved Arts options (ENGL 101 recommended)</td>
<td>★6 in approved Arts options</td>
</tr>
</tbody>
</table>

**Note:** Students must consult the Chair of the Department or designee for approval of options.

BSc Honors in Pharmacology is awarded to students who achieve a GPA of at least 6.5 in Year 4 and, in addition, a GPA of at least 7.0 for all courses taken in the Department of Pharmacology.

### 163.16 Physics

The Honors Programs offered by the Department of Physics provide a comprehensive education for students planning advanced degrees and a research or academic career.

Continuation in the Honors Physics or Geophysics programs requires a GPA of 6.5 in the preceding Fall/Winter. Graduation requires a GPA of 6.5 on the last ★90 credited to the degree.

The Specialization programs provide greater flexibility for students who want a four-year degree in Physics or Geophysics without the full comprehensive training of the Honors Programs. Continuation in the
Specialization program normally requires a GPA of at least 5.5 in the preceding Fall/Winter. Graduation requires a GPA of 5.5 on the last 90 credits attempted.

Notes

(1) Students interested in the Engineering-Physics program should consult 572-7 of the Faculty of Engineering section.

(2) Honors and Specialization Physics students must consult an advisor in the Department of Physics regarding their programs. Note to third- and fourth-year students: Not all 300-level and 400-level Physics and Geophysics courses are offered every year.

163.16.1 Honors in Physics

Notes

(1) By the end of their programs, students must have taken 18 of Arts options.

(2) Students must take 27 from Pools A and B.

Pool B: All 300- and 400-level ASTRO, PHYS, MA PH, and GEOPH courses, unless otherwise indicated in the course descriptions, plus all 400-level MATH courses. With consent of the Department, other courses may be taken for credit.

(3) Students wishing to qualify for an Honors degree must take a minimum of 18 from Pool A including PHYS 472 and 481.

Year 1

| MATH 113 (or 114, or 117), 115 (or 118) |
| MATH 120 (or 125 for more theoretically inclined students), MATH 225 |
| PHYS 144, 146 |
| *6 in Science options (suggested options are in Astronomy, Chemistry, or Earth and Atmospheric Sciences) |
| *6 in Arts options (English recommended) (see Note 1 above) |

Years 3 and 4

| MATH 311 (or 411), 334 (or 336), 337 |
| PHYS 311, 351, 372, 381, 472, 481 |
| *30 in other courses (see Notes 1, 2, and 3 above) |

In Year 4, students are also expected to take part in the weekly Physics Colloquium.

163.16.2 Honors in Geophysics

Note: Students must take a minimum of 3 in Geophysics Honors Pool courses, 12 in approved Science options, and 12 in Arts options.

Honors Pool: CMPUT 340; EAS 321; GEOPH 332, 429, 431; MA PH 467; PET E 465; PHYS 372, 499. Not all 300-level and 400-level courses are offered every year. Students must consult the Department of Physics for approval of third- and fourth-year programs.

Year 1

| CHEM 101, 102 |
| EAS 101 |
| MATH 113 (or 114 or 117), 115 (or 118), 120 (or 125 for more theoretically inclined students) |
| PHYS 144, 146 |
| *6 in Arts options (English recommended) |

Year 3

| EAS 222 (or 231), 334 (or 336), 337 |
| PHYS 381 |
| *9 in approved options or Honors Pool courses (see Note 1 above) |

163.16.3 Honors in Mathematical Physics

Year 1

| MATH 117, 118, 125, 229 |
| PHYS 144, 146 |
| *6 in Science options (3 in Computing Science recommended) |
| *6 in Arts options (English recommended) |

Year 3 and 4

| MATH 311 (or 411), 337, 417 |
| MA PH 343 |
| MA PH 451 or MATH 436 |
| PHYS 311, 351, 372, 381, 420, 472, 481 |
| *15 approved Science options |
| *9 Arts options |

163.16.4 Specialization in Physics

Notes

(1) By the end of their programs, students must have taken 18 of Arts options.

(2) Students must take 27 from Pools A and B.

Pool B: All 300- and 400-level ASTRO, PHYS, MA PH, and GEOPH courses, unless otherwise indicated in the course descriptions, plus all 400-level MATH courses. Specialization students may take 200-level courses from Science departments other than Physics and Mathematical Sciences. With consent of the Department, other courses may be taken for credit.

(3) Students wishing to qualify for a Specialization degree must take a minimum of 9 from Pool A.

(4) The courses listed below comprise a minimum program. Students may, in consultation with the Department, select more advanced courses in place of those listed. A suitably enriched program can be used for admission to graduate work in Physics if satisfactory standing is obtained.

Year 1

| MATH 113 (or 114 or 117), 115 (or 118), 120 (or 125 for more theoretically inclined students) |
| PHYS 225 |
| PHYS 144, 146 |
| *6 in Arts options (English recommended) (see Note 1 above) |

Year 2

| MATH 214 (or 217), 215 (or 317) |
| PHYS 211, 234, 244, 271, 281, 295, 297 |
| *3 in an Arts option (see Note 1 above) |

163.16.5 Specialization in Geophysics

Note: Students must take a minimum of 6 in Geophysics Specialization Pool courses, 12 in approved Science options and 12 in Arts options.

Specialization Pool: CMPUT 340; GEOPH 332, 421, 429, 431; MA PH 467; PET E 465; PHYS 372, 499. Not all 300-level and 400-level courses are offered every year. Students must consult the Department of Physics for approval of third- and fourth-year programs.

Year 1

| CHEM 101, 102 |
| EAS 101 |
| MATH 113 (or 114 or 117), 115 (or 118), 120 (or 125 for more theoretically inclined students) |
| PHYS 144, 146 |
| *6 in Arts options (English recommended) |

Year 3

| EAS 222 (or 231), 334 |
| GEOPH 325, 326 |
| MATH 311 (or 411), 334 (or 336), 337 (or 300) |
| PHYS 381 |
| *6 in approved options or Specialization Pool courses (see Note 1 above) |

Year 4

| EAS 233 |
| GEOPH 221 |
| MATH 214 (or 217), 215 (or 317) |
| PHYS 234, 244, 271, 281, 295 |
| *3 in an approved option (see Note 1 above) |

163.16.6 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Physics (see §163.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 421 and 422, starting in May, September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 421 and 422 plus PHYS 400. PHYS 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in PHYS 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in PHYS 400.

Interested students should see the Industrial Internship Advisor in the Department of Physics for more information.
163.17 Physiology

The program leading to the degree of BSc with Honors in Physiology is offered by the Department of Physiology in the Faculty of Medicine and Dentistry.

The Honors program is designed primarily to prepare students for advanced study leading to academic and research careers. A choice of courses is available for students with interest in particular branches of the life sciences.

Continuation in the program requires a GPA of 7.0 in the year completed and a grade of at least 7.0 in PHYSYL 210 or 211 (or equivalent course). Students must consult the program advisor in the Department prior to registration in each year of the program.

The course requirements in the program are as follows:

<table>

Notes

(1) The program must consist of a minimum of *10 in Science, a minimum of *18 in Arts, and no more than *12 in non-Arts/Science options.

(2) Approved Science options may be chosen only from the following: Junior Courses: CMPT 114; MATH 113 or 114, 115; PSYCO 104. Advanced Courses: BIOL 410, 420, 430, 441, 450, 455, 460; BIOL 301, 315, 585; CHEM 301; CMPT 211, 213, 419; ENT 392; GENET 270, 275, 301, 302, 304, 375, 390, 418; INT D 371, 372, 452; MATH 214, 215, MIRC 265; PMCOL 305, 403, 404, 407, 412, 415, 505, 506, 508; PSYCO 275, 281, 371, 377, 381, 459, 476, 478; STAT 252, 258; ZOOL 225, 241, 242, 293, 340, 341, 342, 462.

(3) Approved non-Science/non-Arts options must be chosen from the following: AN SC 310, 311, 371, 410, 418, BMCE 513; INT D 224; MAMI 351, 516, 520; NUTR 452, 468; NUTR 301, 302; OCCTH 106, 107; PIDS 200; PSYCO 511.

(4) Suggested Arts options include the following: CHRTC 352; CLASS 294; ENGL 310; LING 321, 323, 499; PHIL 101, 250, 265, 415, 417; POL S 212; PSYCO 105, 223, 258; SOC 108, 300, 382, 462, 473; WRIT 298.

(5) Other options may be acceptable with permission of an advisor.

(6) MATH 113 or 114 is a recommended option.

(7) Honors students are also encouraged to attend all department seminars.

163.18 Psychology

163.18.1 Honors in Psychology

The Department offers courses leading to the degrees of BSc and BA with Honors in Psychology. Students wishing to emphasize the physical, biological, and mathematical sciences should enrol in the BSc program; those wishing to emphasize the humanities and social sciences should enrol in the BA program. Either program is appropriate for students considering postgraduate training in psychology or in other fields that require these research skills.

Admission into the Honors program is permitted only at the end of the second year (after completion of *60). Final acceptance into the Honors program is dependent upon obtaining approval from a potential research supervisor prior to August 7.

Continuation in and graduation from the Honors Psychology program require a minimum GPA of 7.0 in the preceding Fall/Winter. Students are expected to take at least *30 during the Fall/Winter of each year of study, including the first and second years. Exceptions to this requirement must be approved by both the Department of Psychology and the Faculty of Science. A minimum of *58 (but no more than *60) must be taken in Psychology. A minimum of *72 in science courses must be taken. A student’s program of courses must be approved in advance each year by the Honors Psychology advisor.

Notes

(1) The required courses noted in Year 1 and Year 2 below must be taken during the first two years of study.

<table>

</tbody>
</table>

Notes

(1) In addition to the courses specifically listed above, the program must include, among the student’s optional courses, a minimum of *12 in one or more disciplines relevant to Psychology, e.g., Anthropology, Biology, Chemistry, Computer Science, Economics, Genetics, Linguistics, Mathematics, Neuroscience, Pharmacology, Philosophy, Physics, Physiology, Political Science, Sociology, Statistics, and Applied Probability, and Zoology. These courses may not overlap those used to fulfill the Computing/Mathematics/Statistics, Natural Science and Social Science requirements listed above.

(2) Under the supervision of a faculty member in the Department of Psychology, students undertake a year-long research apprenticeship (PSYCO 390) during the third year, and conduct and write an empirical thesis (PSYCO 490) during the fourth year. Third-year students present their thesis research proposals, and fourth-year students present the results of their thesis research at the annual Honors Psychology Conference in April.

163.18.2 Specialization in Psychology

Continuation in the Specialization in Psychology program requires a minimum GPA of 5.5 in the preceding Fall/Winter. Graduation requires a minimum GPA of 5.0 on all courses credited to the degree.

</tr>
</tbody>
</table>

Notes

(a) for students meeting Year 2 requirements by taking PSYCO 258: *15 in approved Science options

(b) for students meeting Year 2 requirements by taking courses other than PSYCO 258: *12 in approved Science options

To fulfill the degree requirements, students must complete a minimum of *36 in Science Psychology courses, or PSYCO 258 and a minimum of *33 in Science Psychology courses. At least *12 must be in Science Psychology courses at the 300-level or above. Students may take a maximum of *48 from PSYCO courses listed in the Arts and Science Course Listing sections.

163.18.3 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Psychology (see 5163.1.9 for guidelines to the program). The Industrial Internship designation
will appear on the degree parchments of students who have participated in the program.

Students who have completed PSYCO 212 (or equivalent) and the third year of their program and who are approved to enter this stream register for a continuous sequence of at least two work experience (WKEXP) courses 931 and 932, starting in May or September. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 931 and 932 plus PSYCO 410. PSYCO 410 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in PSYCO 410 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in PSYCO 410.

Interested students should see the Industrial Internship Advisor in the Department of Psychology for more information.

### 163.19 Statistics and Applied Probability

#### 163.19.1 Honors in Statistics

Continuation in the Honors in Statistics and Applied Probability program requires a GPA of 6.5 in the preceding Fall/Winter.

Graduation requires a GPA of 7.0 on all Statistics and Mathematics courses taken and a GPA of 6.0 on the last 30 credits to the degree.

The program must contain the following courses, which should be taken in the years indicated:

<table>
<thead>
<tr>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMPUT 101 (or 114), 102 (or 115)</td>
<td>MATH 214 (or 217), 215 (or 317), 225</td>
</tr>
<tr>
<td>MATH 125</td>
<td>STAT 265, 266</td>
</tr>
<tr>
<td>MATH 114 (or 117), 115 (or 118)</td>
<td>★6 in approved Arts options</td>
</tr>
<tr>
<td>★6 in approved options</td>
<td>★6 in approved Science options</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Years 3 and 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 311 or 334 or 373 or 380</td>
</tr>
<tr>
<td>MATH 314 or 417</td>
</tr>
<tr>
<td>MATH 414 or 418</td>
</tr>
<tr>
<td>STAT 368, 378, 441, 466, 471, 472</td>
</tr>
<tr>
<td>★3 in a Statistics option</td>
</tr>
<tr>
<td>★6 in an Arts option</td>
</tr>
<tr>
<td>★24 in approved options</td>
</tr>
</tbody>
</table>

**Note:** At least ★9 in approved options in one distinct field of application must be taken at the 300-level or higher. Examples of fields of applications are Biology, Business, Computing Science, Economics, Engineering, Pharmacology, Political Science, Psychology, and Sociology. Students should plan to take the proper prerequisites early in the program.

#### 163.19.2 Specialization in Statistics

The Specialization program in Statistics is for students interested in applying Statistics to a second discipline. Students in this program must choose one distinct field of application. Recommended fields of application are Agriculture, Chemical Engineering, Computing Science, Economics, Education, Genetics, Health Sciences Administration, Pharmacology, Political Science, Psychology, Sociology, and Zoology. Students may, in consultation with the Department of Mathematical Sciences, select a different field of application than those listed above.

Continuation in the program normally requires, successful completion of at least ★24 in the previous Fall/Winter, with a GPA of at least 5.5, and a GPA of at least 5.5 on the aggregate of all MATH and STAT courses taken in that Fall/Winter.

Graduation requires a GPA of at least 5.5 on all courses credited toward the degree and a GPA of at least 5.5 on the aggregate of all MATH and STAT courses credited toward the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

<table>
<thead>
<tr>
<th>Year 1</th>
<th>Year 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114, 115, 125</td>
<td>MATH 214, 215, 225</td>
</tr>
<tr>
<td>STAT 151</td>
<td>STAT 252, 265</td>
</tr>
<tr>
<td>★18 in options (see Note 2 below)</td>
<td>★15 in options (see Note 2 below)</td>
</tr>
</tbody>
</table>

**Years 3 and 4**

| STAT 361, 366, 368, 378 | ★12 in STAT options at 300- and 400-level |
| ★36 in options |

**Notes**

1. Each student’s program must have the approval of the Department of Mathematical Sciences.
2. The program must include ★ in English and either CMPUT 101, 114, 115 or CMPUT 114, 115. These courses should be taken in the first two years of the program.
3. The program must include at least ★18 in a single field of applications. The student is advised to consult the Department of Mathematical Sciences regarding specific program recommendations for the field of applications.
4. The program must meet the requirements of the Faculty of Science (§163.1.2) and include ★18 in Arts courses.
5. A corresponding Honors Mathematics course can be substituted for any MATH course listed. For example, MATH 117 can be substituted for MATH 114.

### 163.19.3 Industrial Internship Program

The Industrial Internship program provides students who have finished their third year in the Department of Mathematical Science an opportunity for extended work experience. The program lasts 16 months, and, after completing the reporting requirements, a student can receive university credit for the experience.

A student must successfully complete WKEXP 951, 952, 953, STAT 400, and the final year of their academic program to graduate with the Industrial Internship designation.

This program should be of particular interest to Mathematics students studying Actuarial Science, Applied Mathematics, Economics, Finance, or Statistics.

Students’ participation in the program is voluntary. Although the Department makes every effort to find suitable employment, it is not possible to guarantee that all interested students can do an internship. Students should contact the Industrial Internship program coordinator in the Department of Mathematical Sciences for further information.

### 163.20 Preprofessional Programs

Students admitted to a Faculty of Science degree program who plan to transfer later to a professional program in another faculty must satisfy Faculty of Science requirements while they are registered in Science. Students planning to apply to a professional program should consult the relevant Calendar sections to ensure that they are satisfying preprofessional requirements and program requirements in the Faculty of Science.

#### 163.20.1 Preprofessional Requirements for Medicine and Dentistry

For admission requirements for the DDS Degree program and the MD Degree program, see §§15.8.3 and 15.8.4, respectively. Students planning to apply for admission to one of these degree programs may take the required courses while registered in a degree program in Science. See §§15.15.8 for Grade 12 requirements for the preprofessional program.

#### 163.20.2 Preprofessional Requirements for Veterinary Medicine

See §§15.15 and 34.4.7. Students may take the required courses while registered in a BSc General program or one of the BSc Specialization or BSc: Honors programs. Students should consult the Faculty Office regarding appropriate courses.
163.20.3 Preprofessional Requirements for Rehabilitation Medicine

See §15.13.3 and 15.15. Students may take the required courses while registered in a BSc General program or one of the BSc Specialization or BSc Honors programs.

163.20.4 Preprofessional Requirements for Optometry

A maximum of seven students from Alberta wishing to enter the School of Optometry at the University of Waterloo may complete the required preprofessional courses at the University of Alberta. Applicants must be Canadian Citizens or be residents of Canada who have held permanent resident (landed immigrant) status for at least 12 months before the registration day of the Fall Term.

Students interested in completing the preprofessional requirements while registered in a BSc program in the Faculty of Science at the University of Alberta should consult the Faculty of Science Student Services Office for a recommended outline of courses.

Information about admission requirements for the Doctor of Optometry program may be obtained from the School of Optometry, University of Waterloo (519) 885-1211 or (519) 888-4567 (automated attendant) or from their web site: www.optometry.uwaterloo.ca.

Note: Courses in human anatomy, histology, and embryology, that are comparable to those at the University of Waterloo, are not available in the BSc program at the University of Alberta.

163.20.5 Preprofessional Requirements for Medical Laboratory Science

Admission requirements for the BSc Medical Laboratory Science program are given in §15.8.1. Students planning to apply for admission to Medical Laboratory Science may take the required courses while registered in the Faculty of Science.

164 Details of Courses

164.1 Course Listings

Science courses can be found in §201, Course Listings, under the following subject headings:
- Astronomy (ASTRO)
- Biochemistry (taught by the Faculty of Medicine and Dentistry) (BIOCH)
- Biochemie (BIOCIM) (Faculté Saint-Jean)
- Biological Science - Biology (BIOL)
- Biological Science - Botany (BOT)
- Biological Science - Entomology (ENT)
- Biological Science - Genetics (GENET)
- Biological Science - Microbiology (MICRB)
- Biological Science - Zoology (ZOOL)
- Biologie (BIOLE) (Faculté Saint-Jean)
- Cell Biology (CELL)
- Chemistry (CHEM)
- Chimie (CHIM) (Faculté Saint-Jean)
- Computing Science (CMPUT)
- Earth and Atmospheric Sciences (formerly Geography and Geology (EAS))
- Environmental Physical Sciences (ENVPS)
- Geophysics (GEOPH)
- Interdisciplinary Studies (INT D)
- Laboratory Animal Management (LB AN)
- Marine Science (MA SC)
- Mathematical Physics (MA PH)
- Mathematics (MATH)
- Mathématiques (MATHQ) (Faculté Saint-Jean)
- Paleontology (PALEO)
- Pharmacology (taught by the Faculty of Medicine and Dentistry) (PMCOL)
- Physiology (taught by the Faculty of Medicine and Dentistry) (PHYSL)
- Physics (PHYS)
- Physique (PHYSQ) (Faculté Saint-Jean)
- Psychology (PSYCO)

164.2 Prerequisites

Where a prerequisite is stated in a course description, it is understood that equivalent courses may satisfy the requirement. Also, the department offering a course with prerequisite requirements may waive the prerequisite in writing. (Prerequisite waiver forms are available from the Faculty of Science office and the Department offices.)

164.3 Biochemistry Courses

The following courses can be used by students in the Faculty of Science as science courses: BIOCH 203, 205, 220, 401, 410, 420, 430, 441, 450, 455, and 460.

164.4 Computing Science Courses

Introductory

The following courses are considered introductory: CMPUT 101, 114, 115. Specific course details are in Course Listings (§201).

Specialization and Honors

All other courses, except those noted above, are restricted to students registered in various Specialization and Honors programs in the Faculty of Science, in the Computer Engineering program, and Computer Process Control Option in the Chemical Engineering program. Some senior Computing courses are available to students with a Computing Science minor in the BSc General program and to other students, subject to space availability. See Course Listings (§201) for detailed descriptions.

164.5 Food Science Courses

NU FS 363 may be used by students in the Faculty of Science as a science course in Microbiology.

164.6 Immunology Courses

The following courses may be used by students in the Faculty of Science as science courses in Microbiology: INT D 371, 372 and 452.

164.7 Medical Microbiology Courses

The following courses may be used by students in the Faculty of Science as science courses in Microbiology: INT D 224, MMI 350.

164.8 Pharmacology Courses

The following courses may be used by students in the Faculty of Science as science courses: PMCOL 201, 305, 337, 342, 371, 403, 407, 408, 412, 415 and 416.

164.9 Physiology Courses

The following may be used by students in the Faculty of Science as science courses: PHYSL 210, 211, 401, 402, 404, 410, 465 and 466.

164.10 Graduate Courses

Courses numbered 500 and up are restricted to graduate students and normally may not be taken for credit by undergraduate science students.
