200 The Faculty of Graduate Studies and Research

Please note

(1) Students are responsible for the completeness and accuracy of their application and registration. Please read the Calendar carefully. If you are in doubt about the regulations pertaining to your graduate program, consult the appropriate University official.

(2) The University of Alberta Calendar will be made available to every graduate student at or before registration.

(3) Both the University Calendar and the Calendar of the Faculty of Graduate Studies and Research (also referred to as FGSR) set forth the intention of the University of Alberta at the time of publication with respect to all matters contained therein. The University reserves the right at any time to deviate from what appears in the Calendar, either in order to serve the best interests of the University, or because of circumstances or occurrences beyond the University’s reasonable control. The University expressly denies responsibility or liability to any person or persons who may suffer loss or who may be otherwise adversely affected by such change.

(4) University deadlines are set out in the Academic Schedule. Please note that graduate student deadlines may differ from undergraduate student deadlines.

Responsibilities Related to Graduate Programs

(1) The Student: Graduate students are ultimately responsible for their own programs. They are expected to read the Calendar and any other relevant documents to become familiar with all regulations and deadlines relating to their programs. The students’ fundamental responsibilities include ensuring that their registration is accurate and does not lapse, submitting appropriate forms to the department for signature and processing, and paying all fees required by the deadline dates set out in the Calendar.

(2) The Supervisor and Supervisory Committee: The supervisor is directly responsible for the supervision of the student’s program. In this capacity, the supervisor assists the student in planning a program; assists in ensuring that the student is aware of all program requirements, degree regulations, and general regulations of the department and the FGSR; provides counsel on all aspects of the program; and stays informed of the student’s research activities and progress. The supervisor is also charged with ensuring that students conduct their research in a manner that is as effective, safe, and productive as is possible. The supervisor must prepare a program of studies for the student; arrange for and attend all supervisory committee meetings and the candidate’s examinations, ensuring that these are scheduled and held in accordance with FGSR regulations; and must review the thesis both in draft and in final form.

(3) The Department*: The department oversees the supervision of all graduate students enrolled in its programs and serves as the chief liaison with the FGSR. It is responsible for ensuring that the student receives proper supervision and that the regulations and requirements of the FGSR are met. The department is responsible for recommending and keeping the FGSR informed of any development in or changes relating to the student’s program, including the appointment of the supervisor and supervisory committee members (where applicable) and changes to that membership, change of student status, course and program changes, scheduling of examination dates, etc. *Note: The term “Department” applies both to a Department and to a non-departmentalized Faculty; as well as to an extra-departmental graduate program (PhD in Medical Sciences and MBA). The term “Department” also refers to the Chair, Graduate Coordinator, Director, or any other individuals officially designated responsible for graduate programs.

(4) The Graduate Coordinator*: The department’s graduate coordinator is the official representative of the department to its graduate students. Graduate coordinators must be tenured or tenure-track faculty members. Relationships between graduate coordinators and the staff and students in their program(s) should be academic. Any personal relationships that alter or affect this academic relationship may constitute a conflict of interest (e.g., familial or intimate relationship, business relationship). In addition, a conflict of interest may arise when graduate coordinators make decisions concerning students that they supervise. In accord with GFC policy, any possible conflict of interest should be disclosed. Persons may not act as graduate program coordinators for matters in which they have a conflict of interest.

*Note: The term Graduate Coordinator also refers to associate chairs, associate deans, directors, or any other individual officially designated as being responsible for the unit’s graduate programs.

(5) The Faculty of Graduate Studies and Research Office (FGSR): The FGSR Office is responsible for the general administration of graduate programs, from the admission and registration of graduate students through to convocation. The office houses documentation related to application, admission, programs, course grades, examinations, awards, and theses. It is ultimately responsible for the admission of students; for the setting of minimum entrance requirements and minimum academic standing requirements, and for ensuring that these are met; for approving all changes to students’ programs and the appointment of supervisors, supervisory committees and examining committees; and for submitting to the Council of the Faculty of Graduate Studies and Research for approval of changes affecting policy, general and degree regulations, and so on.

(6) Guidelines for Supervisors and Graduate Students

a. Guidelines for Supervisors

The Supervisor, with the support of the home department, should
1) provide an environment for the student that is conducive to research and in which the student can grow intellectually;
2) provide appropriate guidance to the student on the nature of research and the standard expected, and be accessible to give advice and constructive criticism; at the beginning of the supervisory relationship, the student should be made aware of the normal expectations held by the supervisor and the department;
3) with the student establish a realistic timetable for completion of various phases of the program;
4) consider a graduate student as a “junior colleague in research;”
5) ensure that there are sufficient material and supervisory resources for each graduate student under supervision;
6) work with the student to establish the supervisory committee as soon as possible after the start of the program and ensure that it maintains contact and formally meets at least once a year with the student;
7) when going on leave or an extended period of absence, ensure that the student is adequately supervised by the provision of an acting supervisor (who should be a member of the supervisory committee);
8) ensure that the student is aware of his/her guidelines (as listed below) and, when necessary, assist the student in meeting these;
9) set up committee meetings and examinations after consultation and with full knowledge of the student.

b. Guidelines for Graduate Students

Graduate students should
1) make themselves aware of the contents of the graduate portions of the Calendar and take responsibility for their own programs in that the Calendar sets out the requirements for the various programs;
2) maintain open communication with their supervisor and Graduate Coordinator concerning any problem either real or perceived;
3) inform the supervisor regularly about progress, and provide the supervisor with an annual report for distribution to the supervisory committee;
4) make research results accessible (beyond their appearance in a thesis) to an appropriate audience;
5) be aware of deadlines for possible scholarship applications and to seek advice and assistance from the department in making applications.

## 202 General Information

### 202.1 Graduate Programs Offered

Graduate work has been offered at the University of Alberta since its inception in 1908. The present organization of the Faculty of Graduate Studies and Research, headed by a Dean, was adopted in 1957.

The Faculty of Graduate Studies and Research office is primarily responsible for the general administration of graduate programs. Officers of the Faculty, in conjunction with the Faculty Council, develop and implement appropriate regulations and operating procedures. In its administrative capacity, the Faculty of Graduate Studies and Research is responsible for approving applications for admission and programs of study, for certifying the satisfactory completion of each student’s program prior to graduation, for maintaining the academic records of all students registered in the Faculty, and administering the graduate awards program. The Faculty also coordinates in whole or in part some functions involving several Faculties.

Two categories of graduate degree programs are offered at the University of Alberta—doctoral and master’s. The specific programs offered in each category are listed below. In addition, the Faculty offers a few postgraduate diploma programs designed to provide an opportunity for individuals to take a sequence of courses to increase their knowledge of a specialized area without needing to enrol in a degree program.

### Graduate Studies Chart 1

#### Graduate Degrees

| Agricultural, Food, and Nutritional Science | MSc (Thesis), MSc, MAg, MEng (Course Based) | PhD |
| Anaesthesia and Pain Medicine | MSc (Thesis) (See Note 2) | PhD |
| Anthropology | MA (Thesis) | PhD |
| Art and Design | MA, MDes, MFA (Thesis) |
| Biochemistry | MSc (Thesis) | PhD |
| Biological Sciences | MSc (Thesis) | PhD |
| Biomedical Engineering | MSc (Thesis) | PhD (See Note 1) |
| Business | MBA (Thesis) | MBA, MBA-LLB, MBA-MAg, MBA-MEng, MBA-MF (Course Based) |
| Cell Biology | MSc (Thesis) | PhD |
| Chemical and Materials Engineering | MSc (Thesis) | MEng (Course Based) |
| Chemistry | MSc (Thesis) | PhD |
| Civil and Environmental Engineering | MSc (Thesis) | MEng (Course Based) |
| Communications and Technology | MA (Course Based) |
| Comparative Literature | MA (Thesis) | MA (Course Based) |
| Computing Science | MSc (Thesis) | MSc (Course Based) |
| Dentistry | MSc (Thesis) (See Note 2) | PhD (See Note 1) |
| Drama | MFA, MA (Thesis) | MA (Course Based) |
| Earth and Atmospheric Sciences | MA, MSc (Thesis) | PhD |
| East Asian Studies | MA (Thesis) |
| Economics | MA (Course Based) | PhD |
| Educational Policy Studies | MEd (Thesis) | MEd (Course Based) |
| Educational Psychology | MEd (Thesis) | MEd (Course Based) |
| Educational Studies | MEd (Course Based) |
| Electrical and Computer Engineering | MSc (Thesis) | MEng (Course Based) |
| English | MA (Thesis) | MA (Course Based) |
| Études Canadiennes (Faculté Saint-Jean) | MA (Thesis) |
| Études en Langue et Culture (Faculté Saint-Jean) | MEd (Thesis) | MEd (Course Based) |

### Notes

1. Offered as part of the PhD in Medical Sciences interdisciplinary program.
2. This Department participates in offering an MSc degree through the Medical Sciences program.
3. Offered as part of the PhD in Rehabilitation Science.
202.2 University Teaching Program

This program is offered by participating departments and Faculties through the Faculty of Graduate Studies and Research and is facilitated by University Teaching Services.

The primary objective of the program is to provide opportunities for master’s and doctoral students to develop an ethical, philosophical, and practical basis for careers in postsecondary teaching. Successful completion of the program is recorded on the student’s transcript. The program is voluntary and no additional fees are required.

Graduate students are expected to familiarize themselves with the requirements of their department’s University Teaching Program and are responsible for the timely completion of the various elements of the program and for the maintenance of their records.

It is anticipated that this program will benefit all participants: graduate students, departments, and the university. The goals of the program are:

1. Graduate students will develop teaching skills in a program supervised by faculty and will gain classroom self-confidence and effectiveness.
2. Departments will improve their teaching mission from the presence of teaching assistants who are better prepared for the classroom and laboratory, from faculty members who have a heightened awareness of teaching and teaching issues and from an enhanced reputation for their graduates.
3. The university will demonstrate its commitment to excellence in undergraduate and graduate education.

Participation of students who can find equivalent approved teaching experience outside of the usual teaching assistant setting is also welcomed and encouraged. The program will normally be completed over a two-year period.

More information can be found at the University Teaching Program website www.gradstudies.ualberta.ca.

202.3 Faculty of Graduate Studies and Research Outreach Program

The FGSR Outreach Program provides opportunities for graduate students to participate in activities that promote learning and a dissemination of knowledge among elementary, junior, and senior high schools in the community, as well as to colleges, community groups, or industry. The Outreach Program office will initiate, promote, and facilitate off-campus outreach opportunities and contacts for graduate students. More information is available at www.ualberta.ca/OUTREACH.

202.4 Information for International Students

International students (i.e., neither Canadian citizens nor permanent residents) studying in Canada require a Study Permit from Citizenship and Immigration Canada. Some students will also require a Visa. Study Permits and Visas must be obtained before coming to Canada—they cannot be issued here.

While it is not possible to obtain a Study Permit until an official letter of admission from the Faculty of Graduate Studies and Research has been issued,
students are advised to begin the procedures necessary to secure admission to Canada and to complete the documentation required by Citizenship and Immigration Canada as soon as possible after submitting an Application for Graduate Admission. Information on immigration regulations is available from Canadian embassies, high commissions and British consular offices. Immigration officials in these offices will be able to give advice and help.

The Faculty of Graduate Studies and Research Application for Graduate Admission form also contains information of interest to international applicants. On acceptance to the University of Alberta, a pamphlet entitled Preparing for Your Studies in Canada is sent to students along with their official admission letter. The International Centre conducts orientation seminars and assists students after they arrive in Canada.

---

202.5 Fees

The University of Alberta’s fees policies and procedures are discussed in §22.2 of the Calendar. Information related specifically to fees for graduate students is found in §22.2.2. Individuals seeking fees information should consult these sections.

---

203 Regulations of the Faculty of Graduate Studies and Research

The general Faculty regulations outlined below apply to all graduate students. Faculty regulations specific to particular degree programs are found under the appropriate program heading in §205.

203.1 Application

The University of Alberta may at its discretion refuse admission to any applicant. All documents submitted to the Faculty of Graduate Studies and Research must be in English and (where applicable) in the original language in which they were written. Documents submitted in support of an application become the property of the Faculty of Graduate Studies and Research and will not subsequently be released or copied except to other University of Alberta offices.

Reference letters are collected under the Freedom of Information and Protection of Privacy Act and the Universities Act. They are required to evaluate applicants for admission to a graduate program and for scholarship and other funding purposes. Reference letters are considered to be supplied in confidence and will be used only by individuals and committees who evaluate applicants.

At the students’ request in their file will be made accessible to certain university officials. The Faculty of Graduate Studies and Research will release photocopies regarding a student’s previous education where the information is needed for scholarship purposes for attendance at the University of Alberta.

Application for admission to the Faculty of Graduate Studies and Research must be made directly to the department in which the student wishes to pursue a program of studies. The Faculty of Graduate Studies and Research has an online application on its website (www.gradstudies.ualberta.ca) that is available for most departments. Applicants are encouraged to use it after consultation with the department to ensure eligibility requirements are met; otherwise applicants must use the Faculty of Graduate Studies and Research application for admission form provided to them by the department.

Application deadlines are set by many departments. Applicants should consult the department for deadline dates. Students are encouraged to make contacts and enquiries well in advance of any department admission deadline to maximize consideration for admission. Completed applications for admission and supporting documents from foreign students should reach departmental offices well in advance of the following deadline dates so that immigration authorizations can be obtained in time for arrival prior to the commencement of the term.

Deadlines for foreign admissions are: July 1 for September admission; November 1 for January admission; March 1 for May admission; and May 1 for July admission. These are the dates by which a completed foreign student application file with a departmental recommendation must be received in the Faculty of Graduate Studies and Research. Since departments may set earlier deadlines for application documents to be received in their offices, applicants should consult the department.

---

An applicant must arrange to have forwarded direct to the department concerned official or certified true transcripts or marksheets and degree certificates from all institutions attended other than the University of Alberta. The Faculty of Graduate Studies and Research or the department may require the applicant to furnish an official description of the content of any or all courses listed on the transcripts. Letters of recommendation and other documents may also be required. Applicants should refer to the information attached to the application for admission forms and consult the department prior to applying.

Application documents are compiled and reviewed by the department, which makes a recommendation for admission to the Faculty of Graduate Studies and Research as to the student’s admissibility according to departmental standards. A final assessment is done and a decision regarding a recommendation for admission is reached by the Faculty of Graduate Studies and Research. Successful applicants are notified as soon as possible of the Faculty of Graduate Studies and Research’s decision regarding their admission. Applicants who are unsuccessful will be notified by the department.

Admission to the Faculty of Graduate Studies and Research is valid only for the term indicated. If circumstances prevent a student from registering for that session the Faculty of Graduate Studies and Research reserves the right to reconsider the application for admission.

203.2 Admission

Individuals seeking admission should review the University of Alberta Code of Applicant Behavior located in §11.8 of the GFC Policy Manual.

The minimum requirements for admission to the Faculty of Graduate Studies and Research are outlined below. Some departments impose additional admission requirements. Even though an applicant may appear to satisfy the general admission requirements, acceptance into a graduate program is not guaranteed.

203.2.1 Academic Requirements

1. Applicants to the Faculty of Graduate Studies and Research must have obtained a University of Alberta baccalaureate degree or its academic equivalent from this or another recognized academic institution. Degrees can vary greatly from institution to institution. Consequently, the University of Alberta is obliged to examine in detail the content of courses completed elsewhere by students seeking to enroll in a graduate program in order to establish equivalencies between these courses and those offered at the University of Alberta. This examination has as its goal the establishment of curricular equivalences, and with it the appropriate placement of incoming students, and can entail, among other things, a comparative assessment of syllabuses, consultation with departments, and discussions with other institutions. In seeking the appropriate placement of its students, the University of Alberta strives to optimize their opportunity to succeed academically, while maintaining a high standard in its graduate programs.

Some departments recommend students as candidates for the course-based master’s degree with three-year baccalaureate degrees. However, these are course-based master’s programs where the program requirements include at least 30 in excess of the Faculty of Graduate Studies and Research minimum course requirement of 24.

Applicants will not be admissible to a doctoral degree program at the University of Alberta if they have previously obtained a similar or identical degree.

Effective September 1, 2003, the University of Alberta implemented a letter grading system with a 4-point scale of numerical equivalents for calculating grade point averages.

The grade point average obtained during the last 60 units of course weight (60) of undergraduate (or graduate) study must be at least 3.0 on the 4-point letter grading system used at the University of Alberta or an equivalent standing from another recognized institution (see below). When it is not possible to evaluate a 60 grade point average or equivalent, the evaluation will be based on the overall coursework completed for the degree(s). Failing marks and reexamination marks are included in the GPA calculation. Individual departments may require a higher average. Consult the appropriate departmental information in §205.

Grading systems differ widely in various countries. Experience with these systems over the years indicates that to give reasonable assurance of success in a graduate program at the University of Alberta, applicants must have an academic background at least equal to one of the equivalent qualifications below:

Canada and USA – GPA of 3.0 out of a possible 4.0 on the University of Alberta grading system, or 3.0 on most other 4-point systems, or 72%, or a B (second class) standing, or equivalent in the work of the last two full years of previous degrees.
Egypt – Honors degree with a standing of at least Very Good (80%).
India, Pakistan, and Bangladesh – First class or first division bachelor’s and master’s degrees.
Japan – 2.3 out of 3 or 3 out of 4.
People’s Republic of China – 80% or 4 out of 5.
Taiwan – A average (usually 80% or better).
United Kingdom, Australia, New Zealand and other Commonwealth countries whose university systems follow that of Great Britain – Upper second class honors degree.

(2) Applicants must be recommended for admission to the Faculty of Graduate Studies and Research by the department to which they are applying, indicating that the applicant is in all respects acceptable to the department.

203.2.2 Admission with Conditions

Applicants whose academic record is either:

(1) difficult to assess, as in the case of some international credentials; or
(2) below the standard normally required by a department, where the department’s minimum requirements are above those of the Faculty of Graduate Studies and Research, may be admitted to a degree program with conditions.

(a) When graduate students first register, they must take a graduate course load which is specified by the department at the time of admission. Students admitted with conditions will not normally be permitted to register in thesis or project courses, and will not be permitted to register in directed reading courses.

(b) Departments may impose other conditions provided they are identified at the time of admission and approved by the Faculty of Graduate Studies and Research (e.g., must achieve a grade of B or higher in specified courses.) Students must achieve at least the Faculty minimum (C+ in a course and a minimum cumulative grade point average of 2.7) but departments may impose higher minimums.

(c) The conditions will be clearly stated in the admission letter followed by the statement that if the student fails to satisfy the stated conditions, the student may not be allowed to continue in the program.

If students meet all of the conditions of admission, they may continue in the program; if not, the department will recommend one of the following to the Faculty of Graduate Studies and Research:

(1) that the student be granted another term with conditions. This written recommendation to the Faculty of Graduate Studies and Research must include (a) designation of how the failure in or Failure to Complete a Course in the first term of registration will be managed (see §203.8.3 of the University Calendar) and (b) specification of a minimum number of graduate-level courses which are to be taken by the student.

(2) that the student not be permitted further registrations in the program. This written recommendation to the Faculty of Graduate Studies and Research will include a rationale for this decision.

Any student who does not meet the conditions of a second term of registration will not be permitted to continue in the program.

203.2.3 Aboriginal Applicants

The Faculty of Graduate Studies and Research is committed to the development of a University environment which encourages honor and respect for Aboriginal communities, in recognition of their unique position as descendants of the First Peoples Nation and the spirit and intent of their relationships in Canada.

Students of Aboriginal ancestry, within the meaning of the Constitution Act, 1982, section 35(2), are strongly encouraged to apply for admission. The Faculty of Graduate Studies and Research has developed a series of recruitment and retention initiatives to enhance the learning experiences of Aboriginal students on the campus.

In accordance with the Faculty of Graduate Studies and Research admission policy, Aboriginal students may be considered for admission on the basis of their life experiences. The Faculty of Graduate Studies and Research advocates the admission of Aboriginal applicants by individual departments.

203.2.4 English Language Requirement

Since English is the primary language of instruction and communication at the University of Alberta (except for Faculté Saint-Jean), proficiency in English is a prerequisite for graduate admission.

All applicants must demonstrate English language proficiency prior to admission either:

(1) Possession of a degree or its academic equivalent from an academic institution recognized by the University of Alberta, in which the language of instruction is English.

or

(2) A satisfactory score on an approved English language examination as described below.

Notwithstanding the above, departments and the Faculty of Graduate Studies and Research reserve the right to require a further demonstration of English language proficiency.

The Faculty of Graduate Studies and Research recognizes four English language examinations—the Test of English as a Foreign Language (TOEFL), the Michigan English Language Assessment Battery (MELAB), the International English Language Testing System (IELTS), and the Canadian Academic English Language (CAEL) Assessment.

All applicants who are required to write the English language examination are advised to do so at an early date because a satisfactory score is required before the Faculty of Graduate Studies and Research will issue an official admission approval letter. The minimum acceptable TOEFL score is 550 (paper-based), 213 (computer-based), or a total score of 88 with a score of at least 20 on each of the individual skill areas (internet-based); 85 on the MELAB, and a minimum overall band score of 6.5, with at least 5 on each test band, on the IELTS, or an overall minimum score of 60 with at least 60 on each subtest on the CAEL. Applicants should arrange for their English language test results to be sent direct to the department.

These are minimum scores acceptable for admission to the Faculty of Graduate Studies and Research. Individual departments may require higher scores. Consult the appropriate departmental information in §205.

203.2.5 University of Alberta Staff as Graduate Students

University of Alberta staff may be recommended and considered for admission to graduate programs provided the Faculty of Graduate Studies and Research has reviewed the case and established that conflict of interest between the candidate’s role as staff member and as graduate student will be absent or minimal.

Guidelines are available from the Faculty of Graduate Studies and Research. Any department wishing to recommend admission of a University staff member to a graduate program should first consult with the Faculty of Graduate Studies and Research.

203.3 Registration

Students are responsible for the completeness and accuracy of their registration. They are also responsible for adjustments in registration.

203.3.1 Maintenance of Registration

Course-based Programs: Students in course-based degree programs must register in a minimum of 3 credits of coursework or in M REG 800 Maintaining Registration for at least one term in each September to August period to keep their program active. Other registration patterns for students in exceptional circumstances will be considered by the Faculty of Graduate Studies and Research.

Thesis-based Programs: Students who are admitted to any thesis-based program (excluding course-recovery programs) and who initially register as full-time students in these programs must register full-time for the remainder of their program. This policy is in effect for students who begin September 2003 and thereafter. In order to keep their program active, students registered in thesis-based master’s and doctoral programs must register each year either full-time (equivalent of 3 credits of coursework and/or thesis) or part-time if eligible (minimum of 1.5 credits of coursework and/or thesis, or in M REG 800 Maintaining Registration) for both terms of Fall/Winter (September to April). At the end of the program, the registration can be as described in §203.3.3. Students who have registered in Fall/Winter and are working only on thesis research during May to August do not need to register separately for that period. See §203.3.5 for registration procedures. Other registration patterns for students in exceptional circumstances will be considered by the Faculty of Graduate Studies and Research.

Students who fail to keep the program active as described above will be considered to have withdrawn from their program. If they wish to resume work on their program, they must apply for readmission and have their program reassessed in terms of the regulations in force at the time of reapplication. There is no guarantee of readmission. If a student is recommended for readmission, a readmission fee will be charged in addition to the fees assessed in the usual manner.
203.3.2 Minimum Units of Course Weight Registration Requirements

Thesis-Based Master's Programs: Over the duration of their program, students in thesis-based master's programs must register in and be assessed fees for a minimum of *24, which may consist of a combination of courses and thesis research. Notwithstanding the above, students are required to fulfill the department's thesis-based program requirements as approved by Faculty of Graduate Studies and Research Council and as stated in the department's graduate program requirements §205 of the Calendar.

Course-Based Master's Program: Over the duration of their program, students in course-based master's programs must register in and be assessed fees for a minimum of *36, which may consist of a combination of coursework (where required) and thesis research. Notwithstanding the above, students are required to fulfill the department's program requirements that for most departments are higher than the minimum *24.

Doctoral Programs: Over the duration of their program, students in a doctoral program must register in and be assessed fees for a minimum of *36, which may consist of a combination of coursework (where required) and thesis research. Notwithstanding the above, students are required to fulfill the department's doctoral program requirements as approved by the Faculty of Graduate Studies and Research Council and as stated in the department's graduate program requirements §205 of the Calendar.

203.3.3 Registration at the End of Programs

Course-Based Programs: When a student in a course-based master's program completes all of the coursework and other required assignments and the department submits a Notice of Final Completion for Course-Based Master's Degree to the Faculty of Graduate Studies and Research, the student's name will be placed onto the list for the next available graduation convocation.

Thesis-Based Programs: Students in thesis-based master's and doctoral programs must register in Thesis during the registration period in which the thesis and accompanying evidence of program completion is submitted to the Faculty of Graduate Studies and Research. This enables the Faculty of Graduate Studies and Research to award credit for the thesis at that time. If the thesis is submitted to the Faculty of Graduate Studies and Research during September-December, the student must be registered for Fall Term and does not need to register in Winter Term. If the thesis is submitted to the Faculty of Graduate Studies and Research during January-April, the student must be registered for the full Fall/Winter. If the thesis is submitted to the Faculty of Graduate Studies and Research during May-August the student must be registered for the full Fall/Winter immediately preceding. Thesis-based programs are not recorded as complete until the thesis and accompanying documentation have been submitted to the Faculty of Graduate Studies and Research. See §203.13 for information about convocation.

203.3.4 Registration Status

A student's registration status is determined automatically by the total units of course weight (including a project or a thesis where appropriate) in which the student is registered for credit in a given term. Audited courses are not included in the calculation of registration status.

Full-Time Registration in Fall/Winter: Students are registered in *9 or more for credit in a term and are working full time on their academic program in that term.

Part-Time Registration in Fall/Winter: Students are registered in less than *9 for credit in a term.

Full-Time Registration in Spring/Summer: Students are registered in *6 or more per term.

Part-Time Registration in Spring/Summer: Students are registered in less than *6 per term.

M REG 800 Maintaining Registration: Students who are not registered in any courses in a given term, and are not working on thesis or project research, but still wish to maintain their status as graduate students must register in M REG 800. This results in a part-time registration status.

203.3.5 Registration Procedure

Newly-admitted and continuing graduate students in degree programs register using the Bear Tracks web registration system at www.ualberta.ca. Special and Visiting graduate student registrations will be processed by the Faculty of Graduate Studies and Research. In order to register at the University of Alberta, graduate students must:

Step 1. Consult and Receive Counselling

All graduate students in degree programs in the Faculty of Graduate Studies and Research must consult with their department and discuss their program with their supervisor prior to registering.

Thesis Registration is restricted to students in thesis-based graduate degree programs. Qualifying, Special, and Visiting graduate students may not register in Thesis. The specific thesis registration selected by the student will depend upon the amount of time during the term(s) that the student will devote to work on their program.

Thesis sections are scheduled according to units of course weight equivalency. Students should consult with their department to determine which of the Thesis sections is appropriate. The selection will depend on the amount of time that the student will devote to work on the program. By registering in the appropriate Thesis designation (along with any other courses), the registration status of the student is calculated automatically. Refer to the Course Listings of the Calendar under Thesis for the appropriate Thesis section for the student to register in.

These Thesis sections are to be used in combination with course registrations in order to achieve the correct units of course weight for registration status (i.e., FT or PT). For example, if a student registers in a *2 course, then the addition of THES 907 would bring the registration status to full-time (i.e., *9). To register full-time in a thesis program in Fall/Winter, students must register in a combination of course work and/or thesis research comprising a minimum of *9 each term. Students registered in less than *9 in a Fall/Winter term are considered part-time students. There is a special full-time thesis designation (THES 919) which is assessed at a reduced fee. Registration in this section of Thesis will provide the student with full-time student status but at a substantially lower Instructional Fee than the existing *9 thesis registration (THES 909). Students should consult with their department to determine if they are eligible to register in the reduced-fee thesis.

Research Project Registration for students in the course-based master's route normally involves registering in the appropriate 900-level course. Registration in this is restricted to students in a course-based graduate degree program. Consult the department course listings in the Calendar for the appropriate section.

Step 2. Register

Once newly-admitted and continuing graduate students in degree programs have determined their program requirements in consultation with their departments, they register using the Bear Tracks web registration system. Students are responsible for the completeness and accuracy of their registration.

Bear Tracks cannot be used for the following:

(1) Audited Courses: All graduate students (excluding special graduate students) who are registered full-time or part-time may seek permission to audit a course. Since permission to audit cannot officially be granted until the number of students registered for credit is known, students will not be allowed to register for audit until after classes close for registration for credit (after the sixth day of class in Fall/Winter).

To add a course for audit students must:

a. complete a Course Audit form available from the department;

b. have it signed by the instructor of the course and

c. submit the form to the Faculty of Graduate Studies and Research for approval and processing.

Students who wish to change their status in a course from credit to audit must first consult with their supervisor or program advisor. If permission is granted, a Course Audit form must be signed and submitted to the Faculty of Graduate Studies and Research office. Deadlines for submitting such a change are found in the Academic Schedule.

Audited courses will not be considered as meeting prerequisite, admission, or course requirements for any University of Alberta degree or diploma program. For further information on auditor status refer to §22.1.10 of the University Calendar.

(2) Courses Extra to Degree: To designate a course as Extra, students must:

a. complete an Extra to Degree form available from the department;

b. have it signed by the graduate coordinator or department chair;

c. submit the form to the Faculty of Graduate Studies and Research for approval and processing.

(3) Courses taken toward doctoral program requirements: Students who are still candidates for a master's degree cannot use the Bear Tracks web registration system to register in courses toward their doctoral program requirements. Such doctoral level courses may be taken for one Fall/Winter only by master's degree candidates. Students must:

a. complete an Extra to Degree form available from the department;

b. have it signed by the graduate coordinator or department chair; and
(4) Registration in more than one degree program: The Bear Tracks web registration system can only be used to register in one degree program. Students who have been approved to register in more than one program (e.g. PGME students also completing a graduate program) must contact the Faculty of Graduate Studies and Research office for approval to register in the graduate degree program. Registration in more than one program requires the knowledge and consent of the department(s) and the Faculty of Graduate Studies and Research.

(5) Registration as an off-campus student:
   a. See the Glossary of the Calendar for a definition of an off-campus student.
   b. To register in an off-campus section of a course not available through Bear Tracks, contact the teaching department offering the course.
   c. Graduate students who live more than 80 kilometres from Edmonton can be registered as off-campus students for thesis research and project courses by contacting the Faculty of Graduate Studies and Research at
   d. All students registered in M REG 800 (Maintaining Registration) are off-campus students. To register, contact the Faculty of Graduate Studies and Research at grad.services@ualberta.ca

Step 3. Confirm Registration
All students who register, including Special and Visiting graduate students; students registered in courses for credit and/or audit; and students registered in thesis, research projects, or M REG 800 only are considered to have confirmed their registration when they register.

Graduate students are not required to pay a confirmation deposit.

203.3.6 Reregistration in Courses
See §221.3

203.3.7 Changes to Registration
If students wish to make changes to their registration in any of the following cases, they must first consult the department in which they are registered.

Students make changes to their registration for all unrestricted courses through the Bear Tracks web registration system during the period that it is available for a particular term. They can drop courses, add courses, or cancel their entire registration.

Bear Tracks is available for registration until the deadline dates listed in the Academic Schedule in this Calendar. For detailed Bear Tracks registration procedures, see the Registrar’s web site www.registrar.ualberta.ca After the close of Bear Tracks in a particular term, any changes to a graduate student’s registration require the approval of the student’s department and the Faculty of Graduate Studies and Research. A Course Audit or Withdrawal form must be used for the following registration changes: withdrawal from courses; withdrawal from program; changes from credit to audit; or changes of course section.

Such changes of registration, once approved by the student’s department, must be received by the Faculty of Graduate Studies and Research no later than the deadline dates found in the Academic Schedule. No credit will be given for any course unless it is included in the student’s registration.

Students who drop a course and add Thesis to maintain their full-time status, will be assessed fees for the Thesis registration in addition to any fees assessed for the dropped course.

Facility of Graduate Studies and Research deadline dates may differ from undergraduate deadline dates (consult the Academic Schedule).

There may be academic record and fee implications for withdrawing from courses. Refer to §§11, 22.2, and 239.3.

203.3.8 Cancellation of Registration

Students in the Faculty of Graduate Studies and Research who wish to withdraw from courses should follow the procedure described in §221.9. Students who wish to withdraw from a term, or from their program should complete a Withdrawal form. This form must then be signed/authorized by their department and submitted to the Faculty of Graduate Studies and Research for approval. Students who do not properly withdraw are not eligible for any refund of fees, nor for exemption from fees that have been assessed.

Refer to §222.9 for fee refund information.

If after withdrawing from a graduate program students wish to apply again for admission, their application will be considered in the current competition for places with all other applicants. See also §§22.2.9 and 239.3.

203.4 Classification of Graduate Students

The classification of students is generally determined upon admission to a program on the basis of the student’s previous academic background. Graduate students at the University of Alberta are classified as one of the following:

(1) Qualifying graduate students are those whose academic background entitles them to serious consideration for admission to graduate studies but who are considered to be inadequately prepared to enter a graduate program in the subject area they have chosen. Generally, students who hold a three-year bachelor’s degree from the University of Alberta (or an equivalent qualification from some other recognized institution) and students who have graduated from a four-year degree program, but who are entering a new field, may be admitted as qualifying graduate students.

Qualifying graduate students are registered in the Faculty of Graduate Studies and Research and as such are subject to the regulations of the Faculty of Graduate Studies and Research; however, qualifying students are not considered to be candidates for a degree.

Students who are not eligible for admission to the Faculty of Graduate Studies and Research as qualifying students should consult the appropriate undergraduate Faculty regarding admission to that Faculty to clear course deficiencies. They may apply for admission to the Faculty of Graduate Studies and Research at a later date.

Normally, a qualifying period will not exceed five full course equivalents (Æ30). Courses taken during a qualifying period will be specified by the department concerned. Completion of the work in a qualifying period does not automatically entitle the student to proceed toward a degree program. However, upon satisfactory completion of a qualifying period the department may recommend to the Faculty of Graduate Studies and Research that the student be reclassified as a master’s or doctoral degree student. Students should note that neither the courses taken nor the fees paid during a qualifying period will be credited toward a subsequent degree program.

(2) Degree students are those who are registered in a GFC-approved program leading to a master’s or doctoral degree granted by the University of Alberta. Master’s students are considered as candidates for the degree following first registration. Doctoral students are considered as doctoral candidates upon passing their candidacy examination.

(3) Postgraduate diploma students are those who are registered in a GFC-approved program leading to a postgraduate diploma granted by the University of Alberta. Such students must meet the general admission requirements of the Faculty of Graduate Studies and Research (§203.2). This is a specialized program designed for persons who have had previous work experience. It can normally be completed in one academic year of full-time study.

(4) Special graduate students are those who take graduate level courses for credit without proceeding toward an advanced degree at the University of Alberta. Such students must meet the general admission requirements of the Faculty of Graduate Studies and Research.

Special graduate students are not candidates for a degree at this University and will not receive any residence or fee credit toward a subsequent degree program for the work completed as a special graduate student. In addition, the number of courses allowable for transfer credit is limited (see §203.5).

Admission as a special graduate student does not imply eligibility for admission to a degree program in any department.

Individuals who wish to study under this classification must apply and be admitted each year in which they take courses.

Special graduate students require a written recommendation from the department concerned to register in a course. They are not permitted to take courses for audit.

Only graduate level courses may be taken by special graduate students. Individuals wishing to take courses at undergraduate levels should contact the appropriate Faculty regarding registration as a special student in that Faculty.

(5) Visiting graduate students are those who are registered in a graduate degree program at another university or college, who have obtained written permission in advance from the home and host institutions to take one or more courses for transfer of credit toward that graduate degree program. Visiting students are not permitted to register in thesis or departmental project courses.

(6) Postgraduate medical students: For classification purposes postgraduate medical students are considered to be graduate students and they have the option of paying fees to the Graduate Students’ Association (see §222.2).
203.5 Transfer Credit, Course Exemption/Substitution, and Credit by Special Assessment

Transfer Credit refers to the formal transfer of credit for a course(s) which has been earned outside the program. Transfer credit for certain courses may be granted by the Faculty of Graduate Studies and Research, provided the courses have not been counted toward a previous degree or program and were not used to satisfy admission requirements of the Faculty of Graduate Studies and Research.

Course Exemption refers to the reduction in required credit weights of a student's program by removal of specific courses normally required. In special circumstances the Faculty of Graduate Studies and Research may approve exemption of certain courses if the student has completed equivalent coursework here or elsewhere, but the program will not be reduced by more than the value set out below.

Course Substitution. It is more normal for departments which exempt specific required courses from a student's program to substitute more appropriate courses equivalent in weight to the courses exempted. This is called Course Substitution and is a departmental prerogative.

Limits. The description of each program in §206 contains a listing of the required and optional courses.

Thesis-based programs: The total credit weight required for any thesis-based program will not be reduced by any combination of Transfer Credit and Course Exemption from the requirement set out in §205 by more than ★6 (except as noted below).

Course-based programs: The number of courses nearest to, but not exceeding, 1/3 of the total units of course weight of a student's program can be met through transfer credit and/or course exemption if recommended by the department and approved by the Faculty of Graduate Studies and Research on a case-by-case basis.

In exceptional circumstances and with the explicit prior approval of the Faculty of Graduate Studies and Research, up to 1/2 of the total units of course weight for the program may be met through transfer credit and/or course exemption.

Exceptions: For students who have commenced an equivalent graduate program at a recognized university and are relocating to the University of Alberta, consideration will be given to departmental recommendations for transfer credit which exceeds the limit stated above. Other exemptions specific to individual programs are discussed in the Program descriptions in §205.

Students should note that they cannot apply directly for transfer credit or course exemption; the department must petition the Faculty of Graduate Studies and Research on the student's behalf. Transfer credit and course exemption are granted at the discretion of the Faculty of Graduate Studies and Research.

The Faculty of Graduate Studies and Research does not accept credit by special assessment.

203.6 Residence Requirement

Master's Programs: Residence requirements for master's programs are established and monitored by the department. Most course-based master's programs have no residence requirements. Consult the department listing for program details.

Doctoral Programs: Residence supports two important objectives in these programs:

(1) A doctoral program provides students with significant contact with the University of Alberta, through time spent on campus and through interactions with the faculty and graduate students at the University.

(2) A doctoral program educates the student as an independent researcher and scholar in an academic discipline, through activities such as course work, participating in seminars, involvement in teaching, interactions with faculty members and other graduate students, and research under the direction of a faculty member.

Specific residence requirements to support these objectives will be established by the department. Changes or exceptions to departmental residence requirement are to be submitted to the Dean, Faculty of Graduate Studies and Research for approval. In the absence of a specific department requirement, the default residence requirement for the PhD and DMus programs is two academic years (where an academic year is defined as the eight-month period from September through April), and 12 continuous months for the EdD.

When a department changes a student's status in the middle of a program, the time spent as a master's candidate may count toward the residence requirement. Time spent as a qualifying graduate student does not count toward the residence requirement.

The University of Calgary and the University of Alberta have an agreement allowing, under certain conditions, PhD students at one institution to take up to one year of their two-year residence requirement at the other institution. Contact the Faculty of Graduate Studies and Research for further information.

Postgraduate Diploma Programs: There is no Faculty of Graduate Studies and Research residence requirement for postgraduate diploma programs.

203.7 Language Requirement

It is a program requirement in some departments that students show proof of proficiency in one or more languages other than English. Programs with a second language requirement may accept ASL (deaf language). (For information on specific language requirements see the detailed program information under the appropriate departmental entry in §205.)

Language proficiency is recorded on the student's transcript if one of the following is provided by the department:

(1) Proof of credit in the language course specified.

(2) Documentation from an appropriate language department attesting to satisfactory proficiency at a level set by that department.

It is the responsibility of the department in which the student is undertaking the graduate degree program to complete and forward to the Faculty of Graduate Studies and Research for approval a Notice of Completion of Language Requirement.

203.8 Academic Standing

203.8.1 Explanation of Grading System

Important Notification: Effective September 1, 2003, the University of Alberta implemented a letter grading system with a four-point scale of numerical equivalents for calculating grade point averages. Letter grading scales are more commonly applied throughout North America.

The University of Alberta uses a letter grading system for most courses. For students registered in the Faculty of Graduate Studies and Research the normal passing grade is C+ (see §203.8.2 below). In addition, some courses are offered on a credit/fail basis.

The grade distribution according to the four-point system is as follows:

Course Grades Obtained by Graduate Students

<table>
<thead>
<tr>
<th>Descriptor</th>
<th>Alpha Grade</th>
<th>Grade Point Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Satisfactory</td>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>Failure</td>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>B+</td>
<td>2.7</td>
<td>Minimum admission GPA</td>
</tr>
<tr>
<td>Good</td>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>Excellent</td>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>Superior</td>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>Outstanding</td>
<td>A+</td>
<td>4.0</td>
</tr>
</tbody>
</table>

203.8.2 Minimum Faculty Requirements

Regardless of the student's category, the pass mark in any course taken while registered in the Faculty of Graduate Studies and Research is a grade of C+.

All students in degree programs (including time spent as a qualifying graduate student) or diploma programs must maintain a minimum cumulative program grade point average of 2.7 throughout the course of the program. (In cases where the cumulative program grade point average falls between 2.3 and 2.7, departments may recommend termination of program, or continuation in the program for a specified probationary period; in any case, convocation shall not take place with a cumulative program grade point average of less than 2.7.)

Notwithstanding the above, a student whose academic standing falls below a grade point average of 2.7 may be required to withdraw at any time.

The above are minimum grades and grade point averages acceptable to the Faculty of Graduate Studies and Research. Individual departments may require higher grades than these.

203.8.3 Failure in or Failure to Complete a Course or Research Work

Satisfactory performance in the coursework component of a graduate program entails completion of all courses taken as part of the student's program.
requirements (i.e., courses designated as extra to the student’s program requirements and audited courses are excluded). Normally, the minimum acceptable passing grade in individual courses is C+ (see §203.8.2 above); however, some departments may require higher grades.

Graduate students are not permitted to take reexaminations. Regardless of their category, students who do not obtain an acceptable grade, or fail to complete a course that is required as part of their graduate program, must have the approval of the department and the Faculty of Graduate Studies and Research to retake the course and must obtain a passing grade. Alternatively, students may take an alternate course recommended by the department and approved by the Faculty of Graduate Studies and Research, but they must also obtain a passing grade.

In calculating a student’s GPA, both the original failing grade and the grade received when the course is retaken or the alternate taken will be used. The failing grade and the grade achieved for the repeated or substitute course will appear on the student’s transcript. A Grade of INF is counted as a numeric grade of 0.0 in the computation of the GPA.

A student whose course and/or research work is unsatisfactory may at any time be required to withdraw.

203.9 Academic Integrity and Ethics Training Requirement

Graduate degree requirements include a mandatory component that provides training in the areas of academic integrity and ethics.

The normal requirements of this training component will include participation in activities such as workshops, presentations, discussion groups and course work related to each of the following areas:

2. The University of Alberta Research and Scholarship Integrity Policy (Section 96.2 of the General Faculties Council Policy Manual) www.ualberta.ca/~uniscer
3. The relevant Tri-Council and Canadian Council on Animal Care requirements for ethics approval for research—including emphasis on the limitations of the requirements, i.e., for each area of research is ethics and, for which areas ethics approval is necessary. To fulfil these requirements, each student is normally expected to complete the equivalent of at least eight hours of structured academic activity for this training component. Students should consult the department for guidance about specific requirements for ethics training.

203.10 Supervision

Every student in a program leading to a graduate degree is required to have a supervisor. Ideally, the supervisor should be appointed as soon as the student arrives to begin the program. If this is not possible due to the organization of the department’s program, an interim supervisor or advisor may be appointed until the permanent supervisor is assigned. In any case, the permanent supervisor must be approved by the Faculty of Graduate Studies and Research within the first 12 months of the student’s program.

In all doctoral programs, and in some master’s degree programs (where required by departments), students must also have a supervisory committee.

The Dean of Faculty of Graduate Studies and Research is ultimately responsible for approving the appointment of supervisors and supervisory committee members.

The members of the supervisory committee for doctoral students should be appointed before the second year of the student’s provisional doctoral program and well in advance of the candidacy examination. The committee shall consist of at least three faculty members who shall normally be full time and be appointed by the Faculty of Graduate Studies and Research, based on recommendations from the department concerned. The chair of the committee shall be the faculty member under whose supervision the student is carrying out the dissertation research. Where appropriate, one or more members of the committee may be chosen from a department other than that in which the research is being carried out.

The committee for a student in a master’s program should be appointed in accordance with departmental regulations; its function is to provide guidance on the student’s thesis research.

The Department should ensure that the members of a supervisory committee are sufficiently competent and experienced to serve at the required level. In forming a supervisory committee the department should consider the rank and experience of the prospective members, their publications and other demonstrations of competence in the field of specialization, and the prospective members’ experience in graduate supervision.

As minimum criteria, supervisors (and normally members of supervisory committees) must:

1. be active in the general area of the student’s research;
2. have a tenured (or tenure track) Faculty appointment (including soft tenure track Faculty appointments such as University Research Fellows and Heritage Scholars) in a department relevant to the field;
3. hold a degree equivalent to or higher than that for which the student is a candidate. (This would always be the case for newly appointed Faculty, but certain recognized and well-established exceptions should be respected);
4. demonstrate continuing scholarly or creative activity of an original nature.

Because of diverse interpretations of the term “scholarly or creative activity,” the Faculty will always find it necessary to rely on sound and informed judgement of Chairs and Graduate Coordinators to ensure adherence to minimum Faculty criteria.

Additional criteria approved by the Dean, Faculty of Graduate Studies and Research, may be added by individual departments, and these should be included in departmental graduate handbooks.

The determination of “scholarly or creative activity” assumes a continuing peer review process which, at least indirectly, is included annually at the appropriate Faculty Salaries and Promotions Committee. Thus, the following list summarizes criteria used by various Faculties to describe scholarly or creative activity:

- publication of research papers in refereed journals
- publication of research papers in journals acceptable to the discipline
- publication of books and/or monographs
- publication of research findings in conference proceedings
- publication and/or performance of new compositions or plays
- exhibition of new artistic works
- peer recognition of outstanding professional practice
- invitations to speak at conferences or at other institutions
- editorial or refereeing responsibilities for journals
- invitations to serve as external examiner for the PhD
- presentations at professional society meetings or workshops
- invitations to review grant proposals or manuscripts
- invitations to referee requests for promotions to full professor in recognized institutions

It is recommended that department Chairs monitor and review the performance of supervisors.

The Faculty of Graduate Studies and Research Council has approved eligibility criteria for service on supervisory committees by those such as retired professors, adjunct professors, clinical appointees, etc. Details are available from the Faculty of Graduate Studies and Research office or in the Graduate Program Manual.

Once a supervisory committee has been appointed, it shall be reviewed annually by the department. The Department shall ensure that the supervisory committee has a formal regular meeting with the student at least once a year.

It is the responsibility of the supervisor to guide the student in the determination and modification, if necessary, of the student’s program of study and research. The supervisor or supervisory committee (where applicable) is responsible for ensuring students’ awareness of all program requirements and regulations governing their activities related to the graduate program. Such matters as course requirements for the degree program, language requirements (where applicable), and any pre-candidacy requirements or special skills needed are normally specified by the student’s supervisor or supervisory committee.

It is the responsibility of supervisors to make adequate provision for supervision of their graduate students during their leave. Therefore, if a supervisor is to be absent from the University for a period exceeding two months, it is the supervisor’s responsibility to nominate an adequate interim substitute and to inform the student, the department and the Faculty of Graduate Studies and Research.

Students are normally involved in the process of the selection of their supervisor although this process varies depending upon the department. However, when arrangements are being made for the formal approval of supervisors, supervisory committees, and examining committees by the Faculty of Graduate Studies and Research, or the scheduling of meetings and examinations, the student shall be consulted and kept closely informed although the student shall not be asked to conduct such activities.

It is recommended that departments prepare a set of guidelines for supervisors and students. Guidelines should deal with the selection and functioning of supervisors and should outline the joint responsibilities of faculty members and graduate students. Avenues of appeal open to students who feel they are receiving unsatisfactory supervision should also be specified.

For further information on supervision see the Calendar preface, Responsibilities Related to Graduate Programs.

The University of Calgary and the University of Alberta have agreements on the performance of supervisors and the functioning of supervisors and should outline the joint responsibilities of faculty members and graduate students. Avenues of appeal open to students who feel they are receiving unsatisfactory supervision should also be specified.

For further information on supervision see the Calendar preface, Responsibilities Related to Graduate Programs.

The University of Calgary and the University of Alberta have agreements on the performance of supervisors and the functioning of supervisors and should outline the joint responsibilities of faculty members and graduate students. Avenues of appeal open to students who feel they are receiving unsatisfactory supervision should also be specified.
203.11 Thesis Requirement

All candidates in a thesis degree program shall present a thesis embodying the results of their research. The topic of the thesis must be approved by the candidate's supervisor or supervisory committee.

For candidates in a master's degree program, the thesis should reveal that the candidate is able to work in a scholarly manner and is acquainted with the principal works published on the subject of the thesis. As far as possible it should be an original contribution. A doctoral thesis must embody the results of original investigations and analyses and be of such quality as to merit publication; furthermore, it must constitute a substantial contribution to the knowledge of the candidate's field of study.

The thesis should normally be written in English. In some departments candidates may be permitted to write their thesis in a language other than English, provided that language has been approved for use by the supervisory committee, the department and the Faculty of Graduate Studies and Research. Theses written in a language other than English must have one abstract in the language of the thesis and one in English.

Arrangements and expenses for thesis preparation, including typing, production of photographs and tables, and duplicating are the responsibility of the student. Instructions regarding thesis format and methods of thesis reproduction are available from the Faculty of Graduate Studies and Research website (www.gradstudies.ualberta.ca) under Regulations and Guide for the Preparation of Theses. In any case of uncertainty about thesis preparation students should consult the Faculty office before final production.

It is the responsibility of both the student and the supervisor to be familiar with all regulations of the Faculty of Graduate Studies and Research with respect to theses, and with any specific requirements of the student's department. Students should consult their department and their supervisory committee to determine whether they should use either the traditional or the paper format in the preparation of the thesis.

The responsibility of the student to present three copies (four copies for Education students) of the thesis to the Faculty of Graduate Studies and Research for approval before the copies are bound. Additional copies may be required by individual departments. Students should also keep in mind that it is customary for a copy of the thesis in its final form to be given to the supervisor.

Following completion of the final oral examination at which the thesis is approved (or approved subject to revisions), the candidate shall make the appropriate arrangements where necessary and submit the approved thesis to the Faculty of Graduate Studies and Research office within six months of the date of the final oral examination. Departments may impose earlier deadlines for submitting revisions. If the thesis is not submitted within the six-month time limit, the candidate will be considered to have withdrawn from the program. After this time, the candidate must reapply and be readmitted to the Faculty of Graduate Studies and Research before the thesis can be accepted.

The final oral examination is adjourned or postponed, the six-month time limit will take effect from the date of completion of the examination where the thesis was approved with or without revisions.

To ensure qualification for the earliest convocation following completion of the thesis, students must submit the unbound copies of their thesis to the Faculty of Graduate Studies and Research office on or before the deadline date set by the Faculty, to allow enough time for the student's name to be included in the convocation program. Deadlines for submission of theses are found in the Academic Schedule of the Calendar.

203.12 Oral Examination

Every candidate in a thesis degree program must pass a final oral examination following submission of the thesis to the department. It is the responsibility of the supervisor to ensure that proper arrangements are made for the candidate's examination, and that it is scheduled and held in accordance with Faculty of Graduate Studies and Research regulations. It is also the responsibility of the supervisor to ensure that the candidate is not required to make these arrangements. In the absence of the supervisor, these responsibilities shall be borne by the departmental Graduate Coordinator or designate. The finished thesis must be submitted to the examining committee and a completed Notice and Approval of Oral Examination Committee form must be submitted to the Faculty of Graduate Studies and Research at least three weeks before the oral examination.

The language used to conduct the final oral examination shall be English. However, the supervisory committee may petition the Dean of the Faculty of Graduate Studies and Research, and on receiving written approval may conduct the examination in a language other than English.

Each department offering a doctoral degree is required to establish detailed examination procedures for the candidacy and final oral examination. These procedures should be made available to staff and students in the department and to the Dean, Faculty of Graduate Studies and Research.

203.13 Convocation

There are two convocations each year, normally held in June and November. Students must apply for graduation on Bear Tracks (https://www.beartracks.ualberta.ca) in accordance with the deadlines published in the Academic Schedule.

In order to convocate, students in thesis programs must complete all coursework and submit three unbound copies (four copies for Education students) of the thesis to the Faculty of Graduate Studies and Research by the deadline dates specified in the Academic Schedule. For further details on thesis submission refer to the Regulations and Guide for the Preparation of Theses.

Students in course-based programs must complete all program requirements prior to the deadlines set out in the Academic Schedule. It is the responsibility of the department to forward a completed Report of Final Completion for Course-based Master’s form to the Faculty of Graduate Studies and Research by the deadline dates specified in the Academic Schedule, to ensure that the student’s name will be included in the convocation list.

203.14 Time Limit for Completion of Graduate Programs

The time limit (or the maximum period of time permitted to complete the requirements for a degree) is calculated from the start of the term in which the student first registers in that specific program.

Thesis-based Master’s: Candidates must complete all the requirements within four years of the term in which they first register as candidates in the master’s program.

Course-based Master’s: Course-based master’s students have six years to complete their program unless the department has opted for a shorter time limit for its course-based master’s program. Consult the department listing in $205.

Doctoral degree: Candidates must complete all the requirements within six years of the term in which they first register in a doctoral program. In the case of master’s students who are reclassified as doctoral students, all degree requirements must be completed within six years of the time they first register as master’s candidates.

Postgraduate diploma: Candidates must complete all the requirements within four years of the time they first register in the postgraduate diploma program.

203.15 Program Extensions

In exceptional circumstances a candidate who has failed to complete all the requirements for the degree within the appropriate period specified in $203.14 may be considered for an extension, provided that the department so recommends and the Faculty of Graduate Studies and Research approves. Requests for extensions will only be considered if there are well-documented reasons specific to a particular type of research that precludes completion
within the time limit, or unless there are sufficient, and substantial unforeseen circumstances beyond the control of the student and/or supervisor which prevent completion of the program within the time limits. Extensions may also be given for such considerations as parental leave.

A candidate’s program may be considered for an extension of up to one year at the time of initial request. Under exceptional circumstances an additional extension of up to one year may be granted by the Faculty of Graduate Studies and Research.

A candidate who is granted an extension may be required to remain in or resume residence (i.e., be in close geographic proximity to the campus) until all degree requirements have been met. An extension is calculated as beginning immediately upon termination of the maximum permitted period of completion for that degree.

204.1.1 General Regulations Governing Master’s Programs

(1) Course Requirements: Considerable variation is permitted in the balance between research and course requirements for the master’s degree. Graduate students may not take for credit to satisfy the graduate program requirements any undergraduate course in their field of specialization and/or major area of study. In course-based programs, all coursework must be at the graduate level.

(2) Residence: Residence requirements are established and monitored by the department.

(3) Language Requirement: It is a requirement in some departments offering master’s degrees that students show proof of proficiency in a language other than English. (For specific information on language requirements see the detailed program information under the appropriate departmental entry in §205.)

Master’s degree candidates in programs that do not have a language requirement, who are planning to proceed to a doctoral degree, are advised to take note of any language requirement for that degree in advance. See also §203.7.

(4) Supervision: Each student in a master’s program shall have a supervisor, whether the student is in a thesis-based or course-based program. The Dean of the Faculty of Graduate Studies and Research is ultimately responsible for approving the appointment of a supervisor and, if it exists, a supervisory committee. See also §203.10.

204.1.2 Thesis-based Programs

All candidates for a thesis-based master’s degree must submit the results of their research in the form of a thesis conforming to Faculty of Graduate Studies and Research regulations.

An examining committee of at least three faculty members who are normally full-time (one from a department other than that in which the student is registered), must be approved by the Faculty of Graduate Studies and Research at least three weeks before the examination. The Department must notify the examiners of the examination date and ensure they receive a copy of the thesis at least three weeks in advance, so that they may have adequate time to appraise the thesis. The committee will review the thesis and conduct an oral examination designed to test the candidate’s knowledge of the thesis subject and of related fields. It is the responsibility of the supervisor (or a member of the departmental staff officially designated to do so), and not the student, to arrange the candidate’s examination, ensuring that it is scheduled and held in accordance with Faculty of Graduate Studies and Research regulations. The Dean (or Associate Dean or Dean’s designate), Faculty of Graduate Studies and Research, may participate fully in the examination. Persons other than the examiners may attend with the approval of the Dean, Faculty of Graduate Studies and Research, or the chair of the committee. If a final oral examination is adjourned, the examining committee shall decide upon a date for reconvening the examination and shall inform the Faculty of Graduate Studies and Research and student in writing. The final date set for reconvening shall be no later than six months from the date of the examination. A final decision of the examining committee must be made within six months of the initial examination.

The decision of the examining committee will be based both on the content of the thesis and on the candidate’s ability to defend it.

Immediately after the oral examination, departments should advise the Faculty of Graduate Studies and Research of the examining committee’s decision on a Report of Completion of Final Oral Examination form.

204.1.3 Course-based Programs

All students in a course-based master’s degree program must complete the required coursework and a final capping exercise. The intent of the capping exercise is to demonstrate the candidates’ ability to synthesize the varied information accumulated through the program. For those course-based master’s programs where the capping exercise is a research project, the project will be evaluated by the student’s supervisor and normally at least one evaluator. The supervisor is responsible for maintenance of Faculty of Graduate Studies and Research and departmental standards for the project. The student is responsible for producing a report of the project or some other finished product to be deposited in the department.

It is the responsibility of the department to verify and notify the Faculty of Graduate Studies and Research that all courses, the capping exercise, and any other program requirements have been successfully completed by submitting a Report of Final Completion for Course-Based Master’s.
204.2 Doctoral Degrees

The essential requirement for the doctorate is the planning and carrying out of research of high quality leading to an advance in knowledge in the candidate’s field of study.

204.2.1 The Degree of PhD

(1) Admission: Students may be admitted to a Doctor of Philosophy program if they hold a bachelor’s or a master’s degree, or equivalent, from an approved academic institution. Admission is contingent upon recommendation by a department, approval by the Faculty of Graduate Studies and Research, and the availability of: suitable supervision; suitable courses of study; and adequate library, laboratory and other facilities. Students are considered as provisional candidates until they have successfully completed their candidacy examination (see (5) below).

(2) Residence Requirements: See §203.6.

(3) Language Requirement: A department may require a student to demonstrate a knowledge of one or more languages in addition to English. Where this is the case, the student must satisfy the language requirement before being allowed to take the candidacy examination. See also §203.7.

(4) Supervisory Committee: The student’s program shall be under the direction of a supervisory committee of at least three faculty members who shall normally be full-time and be appointed by the Faculty of Graduate Studies and Research upon the recommendation of the department. The chair of the committee shall be the faculty member under whose supervision the student is carrying out the research. Where appropriate, one or more members of the committee may be chosen from a department other than that in which the research is being carried out. The committee shall arrange for the necessary examinations and for adjudication of the thesis. See also §203.10.

(5) Candidacy Examination: Students in doctoral programs are required to pass a candidacy examination in subjects relevant to their general field of study. The candidacy exam is an oral examination; some departments may also require that students take comprehensive written examinations prior to the candidacy exam.

The candidacy examination is normally held within two years of the commencement of the program at a time when most, if not all, of the required coursework is completed and the thesis started or well defined. The candidacy examination must be passed no less than six months prior to taking the final oral examination.

The candidacy examination is arranged by the supervisor (or other officially designated staff member), and not the student, ensuring that it is scheduled and held in accordance with Faculty of Graduate Studies and Research regulations.

The candidacy examination is normally held within two years of the commencement of the program at a time when most, if not all, of the required coursework is completed and the thesis started or well defined. The candidacy examination must be passed no less than six months prior to taking the final oral examination.

The candidacy examination is arranged by the supervisor (or other officially designated staff member), and not the student, ensuring that it is scheduled and held in accordance with Faculty of Graduate Studies and Research regulations.

Students must demonstrate to the satisfaction of the examining committee that they possess: (a) an adequate knowledge of the discipline and of the subject matter relevant to the thesis; and (b) the ability to pursue and complete original research at an advanced level. During the candidacy examination only minor attention should be given to the work done on the thesis.

This examination shall be under the direction of the supervisory committee to which two other full-time members of the teaching staff have been added. At least one member of the examining committee shall be a person from a department other than that in which the research is being carried out. It is the responsibility of the department to nominate the committee members and forward their names to the Faculty of Graduate Studies and Research for approval at least three weeks in advance of the candidacy examination. The Dean, Faculty of Graduate Studies and Research, (or the Dean’s designate) may participate fully in the examination. Persons other than the examiners may attend only with the permission of the Dean, Faculty of Graduate Studies and Research, or the chair of the committee. Visitors may not participate in the committee’s discussion concerning its decision on the student’s performance.

If the student successfully completes the candidacy examination, the department is responsible for sending to the Faculty of Graduate Studies and Research for approval a completed report of candidacy examination.

If the student is not successful in the examination, the department will inform the Faculty of Graduate Studies and Research in writing (copy to the student) of the outcome of the examination and the departmental recommendations for the student’s program. Three outcomes are possible: 1) Pass; 2) Conditional Pass; and 3) Fail. Adjournment is not an option. Consult the Graduate Program Manual for more details, including options available in the event of a failed candidacy examination.

(6) Thesis Requirements: Candidates shall present their research results in a thesis which satisfies the requirements of the Faculty of Graduate Studies and Research as set out in the Regulations and Guide for the Preparation of Theses. The material must be of sufficient merit to meet the standards of reputable scholarly publications.

(7) Final Examining Committee: Before the thesis is forwarded to the external examiner, PhD supervisory committee members shall each declare in writing to the supervisor either that the thesis is of adequate substance to warrant that the student proceed to the final examination or that the thesis is unsatisfactory and that the student should not be allowed to proceed to the final oral examination.

Each doctoral thesis shall be reviewed, and the final oral examination conducted, by an examining committee which includes the supervisory committee and at least two other examiners. At least five examiners shall be in attendance at the examination. Because the external examiner is normally not present at the examination, at least one of these five examining committee members must have an arm’s length relationship with the candidate. One member of the examining committee shall be from a department other than that in which the student is registered. In addition there must be an external examiner from outside the university or a member who is a renowned authority whom the student’s disciplinary area and an experienced supervisor of doctoral students. The proposed external examiner must be in a position to review the thesis objectively and to provide a critical analysis of the work and the presentation. It is therefore essential that the external examiner not have a current or previous association with the student, the supervisor, or the department which would hinder this type of objective analysis. For example, a proposed examiner who has recently been associated with the student as a research collaborator or co-author would not be eligible. A proposed external examiner must not have had recent association with the doctoral candidate’s supervisor (as a former student, supervisor, or close collaborator, for instance). A proposed external examiner should not normally be nominated more frequently than once every two years. External examiners are nominated by the department and approved and invited by the Faculty of Graduate Studies and Research. Supervisors who are in doubt about the eligibility of a potential external examiner are urged to call the Associate Dean in the Faculty of Graduate Studies and Research to review the case before notifying the external examiner.

It is the responsibility of the department to recommend the committee members and forward their names to the Faculty of Graduate Studies and Research for approval at least three weeks in advance of the final oral examination, however, the request for the external examiner shall normally be submitted for Faculty of Graduate Studies and Research approval at least two months prior to the examination. The external examiner shall receive the thesis from the department at least four weeks before the examination.

The Department must notify the examiners of the examination date and should supply them with a copy of the thesis at least three weeks in advance (four weeks for the external), so that they have adequate time to appraise the thesis.

The final oral examination shall be chaired by a faculty member who is not the supervisor but is a member of the student’s home department. Each department shall establish a mechanism by which individuals are assigned this responsibility. The chair is responsible for moderating the discussion and directing questions and may participate in the questioning. If the chair is not a member of the committee, the chair does not vote or sign the thesis. It is the chair’s responsibility to ensure that departmental and Faculty regulations relating to candidacy examinations are followed.

Students must demonstrate to the satisfaction of the examining committee that they possess: (a) an adequate knowledge of the discipline and of the subject matter relevant to the thesis; and (b) the ability to pursue and complete original research at an advanced level. During the candidacy examination only minor attention should be given to the work done on the thesis.

This examination shall be under the direction of the supervisory committee to which two other full-time members of the teaching staff have been added. At least one member of the examining committee shall be a person from a department other than that in which the research is being carried out. It is the responsibility of the department to nominate the committee members and forward their names to the Faculty of Graduate Studies and Research for approval at least three weeks in advance of the candidacy examination. The Dean, Faculty of Graduate Studies and Research, (or the Dean’s designate) may participate fully in the examination. Persons other than the examiners may attend only with the permission of the Dean, Faculty of Graduate Studies and Research, or the chair of the committee. Visitors may not participate in the committee’s discussion concerning its decision on the student’s performance.
Members of the staff of the student’s major department, as well as members of the Council of the Faculty of Graduate Studies and Research (or their alternates), have the right to attend but should so notify the chair of the examining committee. Other persons may attend with special permission of the Dean, Faculty of Graduate Studies and Research, or the chair of the examining committee.

The Dean (or the Dean’s designate) of the Faculty of Graduate Studies and Research, may participate fully in the examination. Persons who are not members of the examining committee (6) may participate in the questioning only by permission of the chair of the committee, and (b) are not permitted to participate in the discussion of the student’s performance and must withdraw before such discussion commences.

If a final oral examination is adjourned, the examining committee shall decide upon a date for reconvening the examination and shall inform the Faculty of Graduate Studies and Research and the student in writing. The final date set for reconvening shall be no later than six months from the date of the examination. A final decision of the examining committee must be made within six months of the initial examination.

Immediately after the examination, the departments should advise the Faculty of Graduate Studies and Research of the examining committee’s decision on a Report of Completion of Final Oral Examination form.

204.2.2 Combined Program for the Degrees of MD and PhD

The MD/PhD combined program is intended for exceptional students who are seriously committed to a career in medical research. Highly qualified students wishing to pursue a career of teaching and research in either basic medical science or in clinical medicine may enrol in a program of approximately six years’ duration leading to the acquisition of both an MD and a PhD degree from the University of Alberta. To be eligible for the combined program, students must already have been admitted to the MD program. Students admitted to the combined program will be assessed fees for both the MD and the PhD programs.

Students entering the MD program from a preprofessional medical or a bachelor’s program, and who are interested in applying to the MD/PhD program, should do so in their first year of medical school. For these students, admission into the program begins after completion of the second year of the MD program.

Alternately, students who are transferring from a University of Alberta graduate program to the MD program are eligible to enrol immediately in the combined program. The most common route is for students to complete the first two years of the MD program, apply for and be admitted into the PhD program, and when the PhD is completed, return to the final two years of the MD program. Students pursuing the combined program will be assessed fees for both the MD and the PhD programs.

Students interested in such a program may obtain further information from the Office of Research, Faculty of Medicine and Dentistry, 2J2.11 WC Mackenzie Health Sciences Centre, University of Alberta, (780) 492-9721, janis.davis@ualberta.ca

204.2.3 The Degree of DMus

The regulations pertaining to the PhD degree also apply to the Doctor of Music degree; exceptions and special conditions are noted in §205.46.

204.2.4 The Degree of EdD

The degree of Doctor of Education attests proficiency in a program of graduate study in which the emphasis is upon preparation for competent professional performance. The general regulations for the EdD degree concerning admission, residence requirements, the candidacy examination and final oral examination (based largely on the thesis) are the same as those outlined under the PhD degree, with the following exceptions:

(1) Several years of successful teaching and an MEd degree or its equivalent are prerequisites for admission into the EdD program.

(2) The program emphasizes breadth in educational theory, practice and research rather than intensive specialization in a particular area.

(3) The student’s program may make provision for supervised field experience.

(4) The minimum period of continuous residence is 12 months of full-time study at the University of Alberta, unless otherwise noted in the departmental listing in §205.

204.3 Individual Interdisciplinary Studies

The Faculty of Graduate Studies and Research has a procedure for students and departments to propose individual interdisciplinary studies. Although many graduate programs are already interdisciplinary to some extent and include the flexibility for students to meet their objectives within the existing program, it may be that a proposed area of study for an individual student cannot be effectively accommodated within a single department. An individual, interdisciplinary graduate program may be an appropriate response. There should be strong reasons for establishing an individual program rather than operating within the context of a current program. There is no obligation for departments to offer an interdisciplinary program to a student. However, departments may consider creating a program for an individual student if they are prepared to provide an appropriate program and if they have adequate supervision, facilities, and other resources necessary to offer such a program.

Both the home and conjoint department will be designated on the degree. Departments may also propose an individual specialization at the outset of the program. Individual interdisciplinary graduate programs are restricted to thesis-based programs (master’s and doctoral) and are not applicable to probationary or qualifying students.

Applicants should have a superior academic record with substantial background in at least one of the disciplines.

The initial impetus for an individual interdisciplinary program will come from the student who shall prepare a brief written proposal and apply through the home department. More detailed guidelines are available from departments or from the Faculty of Graduate Studies and Research.

204.4 Postgraduate Diploma Programs

Information regarding specific postgraduate diploma programs is provided under the appropriate departmental listing in §205 below.

205 Graduate Programs

205.1 General Information

A brief description of each program offered under the auspices of the Faculty of Graduate Studies and Research is given in the following section. Entries are arranged alphabetically by department. Prospective applicants should note, in addition to the general requirements of the Faculty of Graduate Studies and Research, the particular admission requirements, potential fields of research and the specific requirements for each program. Graduate and undergraduate courses that may be taken in order to fulfill the requirements for a graduate program are listed in §231, Course Listings.

The Faculty of Graduate Studies and Research supports the concept of interdisciplinary studies. Guidelines for proposing such a program are available from the Faculty of Graduate Studies and Research office.

205.2 Agricultural, Food, and Nutritional Science

Department of Agricultural, Food, and Nutritional Science
4-10 Agriculture/Forestry Centre
University of Alberta
Edmonton, Alberta T6G 2P9
E-mail: afns.grad@ualberta.ca

205.2.1 General Information

The Department of Agricultural, Food, and Nutritional Science offers thesis programs leading to Master of Science and Doctor of Philosophy degrees, as well as course-based programs leading to Master of Agriculture, Master of Engineering and Master of Science degrees.

The Department has active research programs in

(1) Animal Science: Research on basic animal biology and livestock management with applications in the fields of animal physiology and metabolism, immunology, reproduction, animal housing, health and welfare, as well as genomics, bioinformatics and proteomics.

(2) Plant Science: Studies in plant biology, applied ecology and agronomy within cereal, oilseed, forage and specialty crop production, incorporating plant biochemistry and proteomics, biotechnology, plant breeding and genomics, integrated pest management, as well as plant and field crop physiology.

(3) Food Science and Technology: Food research encompassing chemistry, microbiology, physics, processing and sensory science with areas of excellence in cereal utilization, dairy science, food safety, functional foods and nutraceuticals, lipid utilization, and pre- and probiotics.
Length of Program

The time required to complete the course-based MSc will vary; however, the time limit for program completion is six years from the date of initial registration.

205.2.3 The Degree of MAg

Program Requirements
For the MAg degree, candidates normally are expected to

(1) Complete eight ★3 graduate courses as recommended by the supervisor and supervisory committee.
(2) Complete a research project equivalent to at least ★3.
No language other than English is required for the MAg degree.

Length of Program

The time required to complete the MAg program will vary; however, the time limit for program completion is six years from the date of initial registration.

205.2.4 MBA/MAg Joint Program

The Faculty of Business and the Faculty of Agricultural, Life and Environmental Sciences offer a program of joint study which permits students to earn both the MBA and MAg degrees after two calendar years of full-time study.

Refer to §205.9.4 under Business for program details.

205.2.5 The Degree of MEng

To qualify for the MEng degree, candidates normally are expected to

(1) Possess a bachelor’s degree in engineering.
(2) Complete eight ★3 graduate courses as recommended by the supervisor and supervisory committee.
(3) Complete a research project equivalent to at least ★3.
No language other than English is required for the MEng degree.

Length of Program

The minimum completion time required for the program with all required course prerequisites is two terms of full-time study. The maximum permitted time for completion is six years from the date of registration.

205.2.6 The Degree of PhD

Program Requirements

The PhD program normally consists of

(1) Three ★3 graduate courses as recommended by the supervisor and supervisory committee.
(2) Preparation of an acceptable thesis presenting results of the research conducted. Candidates will be examined orally on their thesis by committees formed according to the Faculty of Graduate Studies and Research regulations.
(3) A minimum residence requirement of four, four-month terms of full-time attendance at the University of Alberta.

There is no language requirement other than English for the degree. Outstanding MSc candidates in the Department can switch into a PhD program after approval by the Department.

Length of Program

Normally four years are required to complete the PhD degree. There is a six-year time limit.

205.3 Anesthesiology and Pain Medicine

Department of Anesthesiology and Pain Medicine
8–120 Clinical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2B7
E-mail:bruce.dick@ualberta.ca

205.3.1 General Information

The Department of Anesthesiology and Pain Medicine provides a program leading to the degree of Master of Science (MSc) in Anesthesiology and Pain Medicine jointly with the Medical Sciences Program. Further information on these two programs can be found below and in the Medical Sciences Section.

Research may be carried out in a variety of Anesthesiology and Pain Medicine related disciplines (i.e., neuroscience, regional anesthesia, and...
cognition). Inquiries should be directed to the Graduate Coordinator of the Department of Anesthesiology and Pain Medicine.

**Entrance Requirements**

Candidates must hold a baccalaureate or its academic equivalent to enter this program. The Department generally does not accept students with an overall grade point average of less than 3.1 in their undergraduate years at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §203.2.4), candidates must obtain a TOEFL score of at least 570 (paper-based) or 230 (computer-based) or 95 (internet-based), or equivalent IELTS, MELAB or CAEL scores.

**Financial Assistance**

Funding from fellowships and studentships is available from external agencies on a competitive basis. Supervisors may support students from operating grants.

### 205.3.2 The Degree of MSc

**Program Requirements**

The MSc degree program in the Department is jointly administered by the Department of Anesthesiology and Pain Medicine and the Medical Sciences Graduate Program Committee. Approved courses offered by other departments may be included in the candidate’s program. Refer to Medical Sciences for more information regarding the degree of MSc in the Department of Anesthesiology and Pain Medicine.

### 205.4 Anthropology

**Department of Anthropology**

13-15 Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4
E-mail: gail.mathew@ualberta.ca
www.uolaweb.ualberta.ca/anthropology

**205.4.1 General Information**

The Department of Anthropology offers the Master of Arts (thesis-based), Master of Arts in Humanities Computing (thesis-based) and Doctor of Philosophy degrees. Students contemplating graduate work in Anthropology should direct their inquiries to the Associate Chair (Graduate Programs) of the Department. If you wish to be considered by the Department for nomination for a recruitment scholarship, a completed application is due November 15.

Deadline for receipt of completed applications for admission is January 8.

**Entrance Requirements**

The Department’s minimum admission requirements are:

1. For the MA programs (thesis-based), a four-year undergraduate degree with a grade point average of 3.3 in the last 80 (or equivalent) at the University of Alberta or an equivalent qualification from a recognized institution;

2. For the PhD program, a thesis based master’s degree; and a grade point average of 3.3 in the last 80 (or equivalent) of undergraduate or graduate study at the University of Alberta or an equivalent qualification from a recognized institution. In exceptional cases, the department may grant admission to the PhD program directly from a bachelor’s program in Anthropology. Generally, students with a degree in a concentration other than Anthropology are advised to complete at least one year as a special student or a qualifying student before applying for a graduate degree program.

**Financial Assistance**

Graduate teaching and research assistantships and a number of scholarships are available to qualified students.

### 205.4.2 The Degree of MA

**Program Requirements**

In addition to satisfying the general requirements of the Faculty of Graduate Studies and Research, candidates for the MA degree must complete the following:

1. Four 8 credits in Anthropology of which one must be ANTHR 501. The other three courses must be in areas relevant to their specialization.

2. Two 6 credits in areas outside their specialization, one from within Anthropology and one course from another department, or both courses from within Anthropology.

Specific courses taken to meet these requirements must be chosen in consultation with the student’s supervisor and the Associate Chair. The normal course load is three courses in each of the Fall and Winter terms of the first year.

During the course of their program, MA students will be required to attend two-hour Professional Development Seminars offered by the Department. In addition to the course requirements, candidates must prepare an acceptable MA thesis according to Faculty of Graduate Studies and Research regulations and Department expectations. Candidates must demonstrate to the satisfaction of the examining committee proficiency in the handling of any research tools, such as statistics or a foreign language, necessary for the MA thesis.

Residence requirements are met upon the completion of two terms of full-time attendance at the University (★24).

**Length of Program**

Normally, two years of study and research are necessary to complete the requirements for the degree of MA within a four-year time limit (§203.14).

### 205.4.2.1 The Degree of MA in Humanities Computing

**Program Requirements**

In addition to satisfying the general requirements of the Faculty of Graduate Studies and Research, candidates for the MA degree must complete the following:

1. Three 8 credits in Anthropology.

2. Four 8 credits in Humanities Computing (HU500, 510, 520, 530).

3. Two option courses 8 credits in Humanities Computing.

It is normally expected that students will take two Humanities Computing courses and one course in Anthropology in each of the first three terms, and complete their thesis in the fourth term. Specific courses to meet these requirements must be chosen in consultation with the student’s supervisor and the Associate Chair. Successful progress through the program depends on satisfaction of both Anthropology and Humanities Computing. (§205.32)

During the course of their program, MA students will be required to attend two two-hour Professional Development Seminars offered by the Department.

It is normally expected that a representative of both Anthropology and the Humanities Computing program will sit on the thesis supervisory committee. In addition to course requirements, candidates must prepare an acceptable MA thesis according to the FGSR regulations (§203.11) and Department expectations. Candidates must demonstrate to the satisfaction of the examining committee proficiency in the application of any research tools necessary for the MA thesis.

**Length of Program**

The time required to complete the MA in Humanities Computing may vary according to the previous training of the applicant and the nature of research undertaken; however, the program is designed to be completed within two years.

### 205.4.3 The Degree of PhD

**Program Requirements**

1. Students entering the PhD program must have completed an MA for which a written thesis is a requirement. Applicants must successfully defend their MA thesis by August 31 of the admission year and meet the Fall convocation deadline of their university. Failure to provide the University of Alberta with notification of the MA thesis defense by August 1 of the admission year can negate the offer of admission.

2. Residence requirements are those of the Faculty of Graduate Studies and Research (§203.6)—a minimum of two years. Provisional PhD candidates must enrol in three 8 credits per term in the first year of residence. The nature of the course work will be determined by the student and the supervisor with the following requirement: ANTH 801, normally taken in the first term, is required of all new PhD students who did not complete ANTH 801 as an MA student in this Department.

3. During the course of their program, PhD students will be required to attend two two-hour Professional Development Seminars offered by the Department.

4. In accordance with Faculty regulations, a supervisory committee will be struck as soon as possible. This supervisory committee will formulate a program of advanced study and research and will require demonstration of proficiency in any research tools necessary for writing the thesis.
The Department does not have a universal language requirement for the doctoral program; however, it is recognized that there are areas of research within the Department that may require knowledge of an additional language (or languages). The need for additional language skills will be decided between the doctoral student and supervisor as part of the planning of the student’s program, and will be reviewed by the Associate Chair (Graduate Programs).

Prior to the candidacy examination, the student must submit a satisfactory research proposal that will lead to production of a thesis of publishable quality based on original advanced research and theoretical interpretation.

According to Faculty regulations (§204.2.1) the student shall pass an oral candidacy examination in subjects relevant to the general field of research. Normally the candidacy examination shall be held at the end of the second year or the beginning of the third year.

The dissertation shall be examined by a committee, the composition of which is specified in Faculty regulations (§204.2.1(7)).

The PhD defence will be in the format of a public lecture immediately followed by an open examination, with deliberations to be conducted by the examining committee in private. The public will be permitted to ask questions only at the end of the open examination process.

Length of Program
The time limit for completing the PhD degree is a maximum of six years from the date of first registration in the program.

205.4.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject heading Anthropology (ANTHR).

205.5 Art and Design
Department of Art and Design
3-98 Fine Arts Centre
University of Alberta, Edmonton, Alberta T6G 2C9
E-mail: artdes@ualberta.ca

205.5.1 General Information
The Department of Art and Design offers graduate programs leading to the Master of Fine Arts and Master of Design degrees in a wide range of studio disciplines. The Department also offers graduate programs leading to the Master of Arts degree in history of art, design, and visual culture.

Programs leading to the MDes degree provide advanced studies in visual communication design or industrial design. Programs leading to the MFA degree are designed to provide advanced studies in painting, sculpture, printmaking, or drawing.

Programs leading to the MA degree in the history of art, design, and visual culture provide for advanced study and research. Graduate students in studio are provided with adequate independent working spaces and with access to all the equipment necessary to develop their studies and explorations. A well-endowed University library and a departmental slide library holding over 300,000 slides provide reference material. Fourteen full-time members in the academic staff are available for supervision and discussion. Inquiries should be addressed to the Coordinator of Graduate Studies, Department of Art and Design.

Entrance Requirements
The Department’s minimum admission requirements are a general undergraduate degree with a grade point average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 580 (or 237 computer-based or 95 internet-based with at least 20 per section) where applicable (refer to §203.2.4).

Financial Assistance
Graduate teaching and research assistantships and a number of scholarships are available to qualified students.

205.5.2 The Degrees of MDes and MFA

Entrance Requirements
An applicant must normally hold a bachelor’s degree in fine arts or design (or its equivalent) from a recognized institution. Candidates who, in the view of the Department, need to make up prerequisite courses will normally spend one additional year in preparation.

Applicants will be required to submit visual records or a portfolio of work and documentation of their previous experience to the Department by February 1 of the year of application.

Program Requirements
All candidates require credit in ART 630.

Candidates in fine arts programs require credit in two studio courses at the 600-level and two history of art, design, and visual culture courses chosen from 400-level courses with consent of the Department.

Candidates in design programs require credit in

(1) either of DES 672 or 692 and either of DES 673 or 693;
(2) DES 675 or 695 and one 400-500 level seminar in design history and/or visual culture;
(3) a course chosen from selected courses offered by other departments, or from courses at the 400-level in the history of art, design, and visual culture, or courses in studio or design theory and technology at the 400- or 500-level in an area other than the student’s own division. Consent of the Department is required.

Course work must be completed before commencement of the thesis. First term studio courses may not be repeated; however, second term studio courses may be repeated with consent of the Department.

After all other program requirements have been satisfactorily met, candidates must make a major presentation of their creative work. Such a presentation will be considered the equivalent of a master’s thesis. The Department of Art and Design reserves the right to select and retain up to two works from the final thesis presentation.

There is no language requirement for the degrees.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program
Candidates will normally require two academic years to complete their program of studies.

205.5.3 The Degree of MA in the History of Art, Design, and Visual Culture

Entrance Requirements
An applicant must normally hold an Honors degree in the History of Art (or its equivalent) from a recognized institution.

Applicants with a bachelor’s degree other than History of Art will be considered for admission provided that an adequate background in the History of Art, equivalent to an Honors degree in the discipline, can be demonstrated. Applicants are advised to have reading ability and course credits in a language other than English at a level satisfactory to the department. Applicants will be required to submit current samples of writing and documentation of previous education and work experience to the department by February 1, for admission in September, and by October 15, for admission in January of the year of application.

Program Requirements
Applicants who are accepted will normally require two academic years in residence to complete their program of studies. Exceptions to this regulation will require the consent of the Department and the Faculty of Graduate Studies and Research.

Candidates who, in the view of the Department, need to make up prerequisite courses will normally have to make up the deficiencies prior to acceptance into the graduate program.

The graduate program consists of two phases:

Phase I (first year)
In the first year of the program students will normally be required to take:

(1) ★18 approved
(2) of these ★18 approved, ★12 must be taken from History of Art, Design, and Visual Culture offerings at the 500- and 600-levels
(3) of the ★12 required from the 500- and 600-course offerings, ★3 must be taken in a 600-level graduate seminar
(4) up to ★6 of the ★18 required to be taken may, subject to the approval of the thesis or graduate advisor, be taken outside the Department.

Students will be required to pass a translation test in a language other than English (normally French, German or Italian), or a language reading course or approved equivalent with a minimum grade of C+ before proceeding to thesis.

Phase II (second year)

Admission to Phase II is contingent upon the satisfactory completion of all the requirements in Phase I. Course work from Phase I may not be repeated.

Phase II consists of the preparation, presentation and defence of a master’s thesis on a topic approved by the Department.
Length of Program
Applicants who are accepted will normally require two years to complete their program of studies. Candidates who, in the view of the Department, need to make up prerequisite courses will normally spend a longer period of time to complete their graduate program.

205.5.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the following subject headings:
- Art (ART)
- Design (DES)
- Art History (ART H)

205.6 Biochemistry
Department of Biochemistry
474 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2J7
E-mail: gradinfo@biochem.ualberta.ca

205.6.1 General Information
The Department of Biochemistry offers programs leading to the degrees of Master of Science and Doctor of Philosophy. Both require the completion of a research program and the preparation of a thesis.

The Department of Biochemistry strives to train scientists with both a broad knowledge of the disciplines of Biochemistry, Biophysics and Molecular Biology, and with an in-depth knowledge of a particular specialized area thereof. It also strives to develop critical and creative scholars who can effectively communicate with their scientific peers and with the broader community, and who can teach effectively at both the undergraduate and graduate levels. The Department seeks to develop scientists with a sound ethical sense who are willing to serve the wider scientific community. Students develop these qualities and attitudes through their formal course work, through participation in both general and specialized seminar courses, through modest instructional responsibilities in the undergraduate student laboratory, through participation in scientific integrity and teaching workshops, and especially through completion of an independent research program, and the production and defense of a thesis of highest quality.

The research interests of faculty members cover a broad spectrum, including bile acid metabolism and hypercholesterolemia, mechanisms of cell-mediated cytotoxicity and apoptosis, role of lipid second messengers in signal transduction, structure and function of the anion exchanger, mechanisms of cellular regulation, cardiovascular proteomics, regulation of intracellular pH, lipoprotein structure and function, mechanisms of regulation of gene expression, regulation of protein phosphatases and phosphorylation, structure and function of disease-related proteins, three-dimensional structure of proteins, assembly of mitochondrial enzymes, mechanisms of RNA processing, structure and function of biological membranes, structure and function of endoplasmic reticulum, structure of proteins, kinases in the regulation of transcription and chromatin assembly, structure and function of extracellular matrix macromolecules, neoplastic transformation of cultured cells by dominant oncogenes, structure and function of actin-binding proteins, proteasome and ubiquitin-related proteins, cell cycle regulation, viral regulation of cyclin-dependent kinases, protein structure and dynamics, molecular biology of phospholipid biosynthesis, mitochondria and apoptosis, RNA-mediated regulation of the proteome, structure and function of ribosomal protein synthesis, membrane protein structure and bioenergetics, mechanisms and regulation of protein synthesis, and regulation of calcium transport in heart disease. Total research funding for the Department, including salaries, equipment, and operating funds exceeded $16.5 million in 2006.

The Department of Biochemistry is the primary home of the Groups on Protein Structure and Function, the Molecular Biology of Membrane Proteins, the Molecular and Cell Biology of Lipids, Membrane Protein and Cardiovascular Disease Training Program, and the Molecular Mechanisms of Growth Control. As well, a number of faculty in the Department of Biochemistry are active in the University of Alberta Institute for Biomolecular Design and the Stroke, Cardiovascular, Obesity, Lipids, Atherosclerosis Research (SCOLAR) Training Program.

The Department of Biochemistry is extremely well-endowed with state-of-the-art equipment and support facilities. Access to virtually any major technique utilized in modern biochemical, biophysical and molecular biological research is available to faculty, postdoctoral fellows and graduate students. The Department is also home to the National High Field Nuclear Magnetic Resonance Centre (NANUC).

Entrance Requirements
The Department generally accepts students with an overall grade point average of at least 3.3 in their undergraduate years at the University of Alberta or an equivalent qualification from another institution, with a TOEFL score of 600 or greater (see §203.2.3) and with high GRE general and subject area scores (where appropriate).

Financial Assistance
Students who are accepted into the graduate program are encouraged to apply for studentships from either the Canadian Institutes of Health Research, the Natural Sciences and Engineering Research Council, or the Alberta Heritage Foundation for Medical Research. All successful applicants to any one of the agencies are eligible to receive a research allowance from the Heritage Foundation to defray costs (including travel to scientific meetings) of their research project. Awards can also be obtained from the Faculty of Graduate Studies and Research and the Faculty of Medicine and Dentistry. Graduate assistantships are also available from the Department and some students are supported directly by their supervisor’s research grants. All students receive a minimum level of support of $19,050 per annum after all tuition and fees are paid.

205.6.2 The Degree of MSc
Program Requirements
Students graduating from the Department of Biochemistry with an MSc or PhD degree should have a broad background in biochemistry, as well as detailed knowledge of one or more areas of specialization within the field. Thus all candidates for the MSc or PhD degree must include some course work in their program, normally equivalent to at least two and one-half full-year (or five single-term) courses (≈16). Students entering their graduate programs without the appropriate advanced level undergraduate courses in the major areas of biochemistry will be required to take additional course work. In particular, students who have not taken any advanced biochemistry courses will be required to enroll in at least two 500-level courses in addition to the minimum course requirement set out below.

Each graduate student is required to enrol in the graduate general biochemistry seminar courses BIOCH 670 (second year) and 671 (third year), and to present seminars in each of these courses. Students are required also to attend this seminar series regularly during all years of their program. Graduate students are also required to enrol once for credit in a relevant specialized journal club course and to attend this journal club regularly throughout their graduate program. Each MSc graduate must have given at least three presentations to a journal club before graduation. The three required 600-level graduate seminar courses described above fulfill ≈10 of the minimal course requirements.

In addition to the three seminar courses described above, all graduate students are required to take at least two additional courses. One of these must be a 600-level Biochemistry course that is described in the University Calendar as “0.90” or “1.2-0”. The current list of courses that satisfy this requirement include BIOCH 609, 620, 630, 641, 655 and 675. These courses are directed reading courses, in which graduate students are challenged to analyze and critique current research papers on specialized topics. The other required course is a graduate-level course in Biochemistry (500- or 600-level) or an approved graduate course in another department. These requirements are the minimum, and students who wish to take additional courses to enhance their background or to develop expertise in additional research areas are encouraged to do so.

To be eligible for an MSc degree, students are required to have a cumulative GPA of not less than 3.0 in all formal (non-seminar) courses taken during the graduate program. Failure (a grade of C or lower) in two one-term courses, or in a single two-term course, will normally result in the automatic recommendation to the Faculty of Graduate Studies and Research to terminate a student’s program in the Department, unless the student’s cumulative GPA at that time is 3.0 or higher.

All candidates for the MSc degree must prepare an acceptable thesis describing the results of their research activities, and be examined orally on describing the results of their research activities, and be examined orally on the thesis by a committee formed according to the Faculty of Graduate Studies and Research regulations.

The Department does not require knowledge of any language other than English for the MSc degree.

Length of Program
The time required to complete the program will vary according to the previous training of the student and the nature of the research undertaken; however, a minimum of two years is normally required. Students must complete their degree program within four years after they first register.
205.6.3 The Degree of PhD

Program Requirements

Students graduating from the Department of Biochemistry with an MSc or PhD degree should have a broad background in biochemistry, as well as a detailed knowledge of one or more areas of specialization within the field. Thus all candidates for the MSc or PhD degree must include some course work in their program, normally equivalent to at least two and one-half full-year (or five single-term) courses (★10). Students entering their graduate programs without the appropriate advanced level undergraduate courses in the major areas of biochemistry will be required to take additional course work. In particular, students who have not taken any advanced biochemistry courses will be required to enrol in at least two 500-level courses in addition to the minimum course requirement set out below.

Each graduate student is required to enrol in the graduate general biochemistry seminar courses BIOCH 670 (second year) and BIOCH 671 (third year), and to present seminars in each of these courses. Students are required also to attend this seminar series regularly during all years of their program. Graduate students are also required to enrol once per credit for a relevant specialized journal club course and to attend this journal club regularly throughout their graduate program. Each PhD graduate must have given at least three presentations to a journal club, of which at least two must be given before the student may take the candidacy exam. The three required 600-level graduate seminar courses described above fulfill ★10 of the minimal course requirements.

In addition to the three seminar courses described above, all graduate students are required to take at least two additional courses. One of these must be a 600-level Biochemistry course that is described in the University Calendar as “0–3s–0” or “1–2s–0”. The current list of courses that satisfy this requirement includes BIOCH 609, 620, 630, 641, 655 and 675. These courses are directed reading courses, in which graduate students are challenged to analyze and critique current research papers on selected topics. The other required course is a graduate-level course in Biochemistry (500- or 600-level) or an approved graduate course in another department. These requirements are the minimum, and students who wish to take additional courses to enhance their background or to develop expertise in additional research areas are encouraged to do so.

To be eligible for a PhD degree, students are required to have a cumulative GPA of not less than 3.3 in all formal (non-seminar) courses taken during the graduate program. Failure (a grade of C or lower) in two one-term courses, or in a single two-term course, will normally result in the automatic recommendation to the Faculty of Graduate Studies and Research to terminate a student’s program in the Department, unless the student’s cumulative GPA at that time is 3.0 or higher.

All candidates for the PhD degree must prepare an acceptable thesis describing the results of their research activities, and be examined orally on the thesis by a committee formed according to Faculty of Graduate Studies and Research regulations.

The Department does not require knowledge of any language other than English for the PhD degree.

Length of Program

The time required to complete the PhD will vary according to the previous training of the candidate and the nature of the research undertaken; however, a minimum of four years of study and research is normally required. Students already possessing an MSc degree in Biochemistry may be able to complete the PhD program within three years. Candidates must complete their degree programs within six years after they first register for the PhD degree.

205.6.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Biochemistry (BIOCH).

205.7 Biological Sciences

Department of Biological Sciences

CW512 Biological Sciences Building

University of Alberta

Edmonton, Alberta

T6G 2E9

E-mail: bio.grad.coordinator@ualberta.ca

205.7.1 General Information

The Department of Biological Sciences offers programs leading to the degrees of Master of Science and Doctor of Philosophy. It strives to develop scholars familiar with literature in their field, capable of identifying new problems and new directions of endeavour in their field, and competent with the methods of data collection and analysis essential to do research. Students will fulfill these objectives through several forums: a supervised research program, coursework, participation in seminar programs, and defending their dissertation.

The Department has research laboratories and instructional facilities for 250–300 graduate students. There are facilities for digital image processing, electron and confocal microscopy, analytical chemistry, molecular biology, fermentation, biotechnology, DNA synthesis and sequencing, cultivation of microbial cells and cells of yeasts, plants, insects and mammals. Facilities include large holding tanks for aquatic animals, and controlled environment rooms including an extensive greenhouse complex. Off-campus facilities include the Devonian Botanic Garden and mycology herbarium, several field stations including the Meanook Biological Research Station and Ellerslie Plant Genetics Station, all near Edmonton, and the Bamfield Marine Sciences Centre on Vancouver Island. Extensive reference collections are available for research with microfungi, vascular and cryptogamic plants as well as vertebrates and invertebrates, including major collections of fishes, fossil plants and vertebrates, insects and parasites.

There are six research interest groups within the Department: Environmental Biology and Ecology, Microbiology and Biotechnology, Molecular Biology and Genetics, Physiology Cell and Developmental Biology, Plant Biology, and Systematics and Evolution. Students either register in one of these areas of specialization for their program or, with permission of the supervisor and approval of the Associate Chair (Graduate Studies), register toward a degree of MSc or PhD with Specialization in Biological Sciences. Declared specialization in one of the six research interest areas can be indicated on a student’s title page, degree diploma, and transcript.

Potential applicants, especially PhD students, are encouraged to first correspond with academic staff in whose research laboratories they might want to study. Additional information is found at www.biology.ualberta.ca (see links to – Graduate Program – Prospective Students).

Entrance Requirements

The Department’s minimum admission requirements are a four-year undergraduate degree, or its academic equivalent, from a recognized university, and a grade point average of at least 3.3 in the last two years of undergraduate study. A minimum Test of English as a Foreign Language (TOEFL) of 600 (paper-based), 250 (computer-based) or 100 (internet-based) is required, where applicable (see §203.2.4). The Graduate Record Examination (GRE) general and subject tests are preferred, but are not required.

Financial Assistance

All students entering the graduate program receive financial support for at least the first two years and eight months of a full-time MSc program, and the first five years of a full-time PhD program, at the minimum rate of $21,819 per year.

The sources of financial support for graduate students include: 1) Scholarships from Natural Sciences and Engineering Research Council, Alberta Heritage Foundation for Medical Research, Province of Alberta, University of Alberta; 2) Graduate Teaching and Research Assistantships; 3) University of Alberta General Awards; 4) other external agencies; 5) supervisor’s research funds.

International students whose first language is not English normally require a TOEFL score of 860 (paper-based), 267 (computer-based) or 109 (internet-based) with a minimum score of 26 on the speaking component to be considered for a Graduate Teaching Assistantship.

205.7.2 The Degree of MSc

Program Requirements

Required courses depend on the area of specialization (see below) and the undergraduate background of the student; however, the MSc program requires registration in a combination of coursework and thesis research comprising the equivalent of a minimum of ★24. This normally consists of a minimum of ★6 graded courses (equivalent to two single-term graduate-level, or approved undergraduate, graded courses) and a thesis. Where graded credits are required as part of the formal coursework toward a MSc degree, project courses or individual study courses may not be included in the minimal requirements. These include BIOL 400, 498, or 499, or similar courses in other departments or faculties at the 400, 500, or 600 level. The Associate Chair (Graduate Studies), with advice from the co-ordinator of the RIG under which a particular graduate program is administered, will maintain a current list of excluded courses. These courses may be taken for credit in addition to the minimal graded requirement on the recommendation of the supervisory committee with approval of the Associate Chair (Graduate Studies).

Generally, courses should be taken in the first year of the program. Beyond the basic course requirements of the Department, each student’s individual program will be developed by agreement between the student and the supervisor or the supervisory committee.
Students will be asked to present their thesis research to the Department in the form of a public seminar within two weeks prior to the date of the thesis defence. In addition, students will be encouraged to present progress reports (oral and poster formats) to the Department or research group in an informal setting at an early stage in their research program.

There is no language requirement for the degree of MSc. Candidates for the master’s degree must complete a minimum of two (four-month) terms in full-time residence at the University of Alberta.

Requirements within Research Groups

The Degree of MSc with Specialization in Biological Sciences

The MSc program consists of research leading to a thesis, and a minimum of 6 graded course work, of which 3 must be in a graded seminar or discussion-oriented course. Attendance/participation in an appropriate seminar series is required as determined by the supervisor/supervisory committee.

The Degree of MSc with Specialization in Environmental Biology and Ecology

The MSc program consists of research leading to a thesis, and a minimum of 6 graded course work, of which 3 must be in a graded seminar or discussion-oriented course. Enrolment in BIOL 603 is recommended. Students are encouraged to complete these requirements in their first year. Students are encouraged to register in BIOL 631 in their first year and to register and/or participate in BIOL 631 in subsequent years.

The Degree of MSc with Specialization in Microbiology and Biotechnology

The MSc program consists of research leading to a thesis and a minimum of two graded courses, which include MICRB 514 in the first or second year and MICRB 607 in the second year. In addition to registration in MICRB 607, all students must register and/or participate in MICRB 606 in all other terms, to a maximum of five terms.

The Degree of MSc with Specialization in Molecular Biology and Genetics

The MSc program consists of research leading to a thesis, and a minimum of 6 graded course work. In their first year, students typically register in GENET 500 (Term I) and GENET 510 (Term II). In special cases, students may opt out of one of these courses on recommendation of their supervisory committee. However, all students must register in at least 3 graded courses in their first year, and at least 3 of their total graded course weight must be chosen from the 500- or 600-level as advised by their supervisory committee. (GENET 500 and GENET 510 will normally fulfil this requirement.) Each year, all students will register and/or participate in GENET 601 and GENET 605.

The Degree of MSc with Specialization in Physiology, Cell, and Developmental Biology

The MSc program consists of research leading to a thesis, and a minimum of 6 graded course work. Students will register in BIOL 642 in the first year of their program. In subsequent years, they will participate either in BIOL 642 or any other seminar course, as determined by the supervisor. Students are also required to present one seminar in the BIOL 642 seminar course. Normally this would be in the second week of their thesis work. Presentation in BIOL 642 is not to be used as the pre-thesis or any other seminar course, as determined by the supervisory committee.

The Degree of MSc with Specialization in Plant Biology

The MSc consists of research leading to a thesis, and a minimum of 6 graded course work. Students will register in BOT 600 during the first year of their program. Students are encouraged to complete these requirements in their first year. Continued participation in BOT 600 in subsequent years is recommended.

The Degree of MSc with Specialization in Systematics and Evolution

The MSc program consists of research leading to a thesis, and a minimum of 6 graded course work. In addition, students must register in the seminar courses BIOL 506 and 507 at least once during their program (resulting in a total of 9). Continued participation in BIOL 507 in subsequent years is recommended. Students are encouraged, but not required, to select graded courses from the following list after consultation with their supervisor or supervisory committee: BIOL 321, 335, 380, 430, 520.

Length of Program

The time required to complete the MSc degree will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is normally required. Candidates must complete their degree program within four years of the time they first register.

205.7.3 The Degree of PhD

Program Requirements

Required courses depend on the area of specialization (see below) and the undergraduate background of the student; however, the PhD program requires registration in a combination of coursework and thesis research comprising the equivalent of a minimum of 36 credits. This normally consists of a minimum of 18 graded courses (equivalent to two single-term graduate-level graded courses) and a thesis. Where graded credits are required as part of the formal coursework toward a PhD degree, project courses or individual study courses may not be included in the minimal requirements. These include BIOL 490, 498, or 499, or similar courses in other departments or faculties at the 400, 500, or 600 level. The Associate Chair (Graduate Studies), with the advice from the co-ordinator of the RIG under which a particular graduate program is administered, will maintain a current list of excluded courses. These courses may be taken for credit in addition to the minimal graded requirement on the recommendation of the supervisory committee with approval of the Associate Chair (Graduate Studies).

Generally, courses should be taken in the first year of the program. Beyond the basic course requirements of the Department, each student’s individual program will be developed by agreement between the student and the supervisor or the supervisory committee.

Students will be asked to present their thesis research to the Department in the form of a public seminar either on the same day, or the day before, the thesis defence. In addition, students will be encouraged to present progress reports (oral and poster formats) to the Department or research group in an informal setting at an early stage in their research program.

There is no language requirement for the degree of PhD.

Candidates for the PhD degree must complete a minimum of two academic years (equivalent to four terms) in full-time residence at the University of Alberta.

Requirements within Research Groups

The Degree of PhD with Specialization in Biological Sciences

The PhD program consists of research leading to a thesis, and a minimum of 18 graded course work, of which 3 must be in a graded seminar or discussion-oriented course. Attendance/participation in an appropriate seminar series is required as determined by the supervisor/supervisory committee.

The Degree of PhD with Specialization in Environmental Biology and Ecology

The PhD program consists of research leading to a thesis, and a minimum of 18 graded course work, of which 3 must be in a graded seminar or discussion-oriented course. Enrolment in BIOL 603 is recommended. Students are encouraged to complete these requirements in their first two years. Students are encouraged to register in BIOL 631 in their first two years and to register and/or participate in BIOL 631 in subsequent years.

The Degree of PhD with Specialization in Microbiology and Biotechnology

The PhD program consists of research leading to a thesis, and a minimum of 18 graded course work. In their first year, students typically register in GENET 500 (Term I) and GENET 510 (Term II). In special cases, students may opt out of one of these courses on recommendation of their supervisory committee. However, all students must register in at least 6 graded courses in their first year, and at least 3 of their total graded course weight must be chosen from the 500- or 600-level as advised by their supervisory committee. (GENET 500 and GENET 510 will normally fulfill this requirement.) Each year, all students will register and/or participate in MICRB 607 in subsequent years.

The Degree of PhD with Specialization in Molecular Biology and Genetics

The PhD program consists of research leading to a thesis, and a minimum of 18 graded course work. Students will register in BIOL 642 in the first year of their program. In subsequent years, they will participate either in BIOL 642 or any other seminar course, as determined by the supervisor. Students are also required to present one seminar in the BIOL 642 seminar course. Normally this would be in the second year of their thesis work. Presentation in BIOL 642 is not to be used as the pre-thesis or any other seminar course, as determined by the supervisory committee.

The Degree of PhD with Specialization in Physiological, Cell, and Developmental Biology

The PhD program consists of research leading to a thesis, and a minimum of 18 graded course work. Students will register in BIOL 642 during each of the first two years of their program. In subsequent years, they will participate either in BIOL 642 or any other seminar course, as determined by the supervisory committee. Students are also required to present two seminars in the BIOL 642 seminar course during their PhD program. Normally this would be once in the second and again in subsequent years of their thesis work. Presentation in BIOL 642 is not to be used as the pre-thesis public seminar.

The Degree of PhD with Specialization in Plant Biology

The PhD consists of research leading to a thesis, and a minimum of 18 graded course work. Students will register in BOT 600 during each of the
first two years of their program. Students are encouraged to complete these requirements in their first two years. Continued participation in BOT 600 in subsequent years is recommended.

**The Degree of PhD with Specialization in Systematics and Evolution**

The PhD program consists of research leading to a thesis, and a minimum of 12 graded course work. In addition, students must register in the seminar courses in BIOL 506 and 507 at least once during the program (resulting in a total of 9). Continued participation in BIOL 507 in subsequent years is recommended. Students are encouraged, but not required to select graded courses from the following list after consultation with their supervisor or supervisor committee: BIOL 321, 335, 380, 430, 520.

**Length of Program**

The time required to complete the PhD degree will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required. Candidates must complete their degree program within six years of the time they first register.

### 205.7.4 Graduate Courses in Biological Sciences

Graduate courses can be found in §231, Course Listings, under the following subject headings:

- Biological Sciences - Biology (BIOL)
- Biological Sciences - Botany (BOT)
- Biological Sciences - Entomology (ENT)
- Biological Sciences - Genetics (GEN)
- Biological Sciences - Interdisciplinary Courses (INT D)
- Biological Sciences - Marine Science (MA SC)
- Biological Sciences - Microbiology (MICRB)
- Biological Sciences - Zoology (ZOOL)

### 205.8 Biomedical Engineering

Department of Biomedical Engineering

1098 Research Transition Facility

University of Alberta

Edmonton, Alberta T6G 2V2

E-mail: bmegrad@ualberta.ca

www.med.ualberta.ca/bme/home/

### 205.8.1 General Information

Research facilities and lecture courses for graduate programs are offered by the Department of Biomedical Engineering. The Department offers programs leading to the degrees of Master of Science and Doctor of Philosophy, the latter being offered as a part of the PhD in Medical Sciences Program (see §205.4). Under the Individual Interdisciplinary Studies program (see §204.3) students may study and carry out their research in the Department of Biomedical Engineering and another department in the University. The Department of Biomedical Engineering is also part of the Coordinated Graduate Program in Biomedical Engineering in the Province of Alberta, a program that includes several departments in the University of Alberta and the University of Calgary and under any of which students may be co-supervised and carry out their research.

The research activities of the Department are directed at aspects of biomedical engineering and medical physics, including, but not limited to digital image processing, nano structured biomaterials, in-vivo nuclear magnetic resonance, including vascular imaging, stroke, functional magnetic resonance imaging (FMRI), as well as non-invasive biochemical analysis through spectroscopic methods, MRI of cerebral vascular disease, restoration of function following spinal cord injury, quantitative MRI of the peripheral nervous system, and spinal cord microstimulation.

**Professional Associations and Technical Societies**

It should be clearly understood that an MSc in Biomedical Engineering does not automatically qualify one for membership in the Association of Professional Engineers, Geologists, and Geophysicists of Alberta (APEGA).

**Entrance Requirements**

The Department’s minimum admission requirements are an undergraduate degree with a grade point average of at least 3.3 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from another institution, and a TOEFL score of 600 or higher on the paper-based test or 250 on the computer-based test where applicable (refer to §203.2.4).

**Financial Assistance**

Students who receive scholarships from external agencies, including the Natural Sciences and Engineering Research Council of Canada (NSERC), the Canadian Institutes of Health Research (CIHR), and the Alberta Heritage Foundation for Medical Research (AHFMR), may hold these awards in the Department of Biomedical Engineering. Exceptionally qualified applicants may be nominated by the Department for a master’s thesis-based Scholarship, a PhD Scholarship, or an FS Chia PhD Scholarship. Information concerning these scholarships is available at www.gradstudies.ualberta.ca.

### 205.8.2 The Degree of MSc

**Program Requirements**

The requirements for this degree consist of coursework and a thesis. Required courses depend on the undergraduate background of the student; however, normally a minimum of 21 graded courses must be completed. Of the required courses, a minimum of 6 must be obtained through credit in BME 513, 529, 530, 541, 553, 555, 564, 630, 675 or EE BE 520, 540. The remaining courses are determined by the student’s supervisory committee and are relevant to the chosen area of research. Undergraduate courses taken for graduate credit carry only half the course weight assigned to that course.

There is no language requirement for the MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

### 205.8.3 The Degree of PhD in Medical Sciences

**Program Requirements**

The PhD program is offered as part of the Medical Sciences Program and normally consists of a minimum of 12 in graded graduate courses or approved equivalents (6 after a MSc degree) and the preparation and defence of a dissertation on an approved topic.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

### 205.9 Business

Faculty of Business

323 Faculty of Business Building

University of Alberta

Edmonton, Alberta T6G 2R6

E-mail: mba@ualberta.ca

www.mba.net

### 205.9.1 General Information

The Faculty of Business offers programs leading to the degrees of Master of Business Administration and Doctor of Philosophy in Business Management. In addition to the standard MBA program, specializations are available in International Business, Leisure and Sport Management, Technology Commercialization, and Natural Resources and Energy.

**Entrance Requirements**

The minimum admission requirements of the Faculty of Business are those of the Faculty of Graduate Studies and Research; namely, an undergraduate degree with an average of at least 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution.

All applicants are required to write the Graduate Management Admission Test, and have their scores forwarded to the appropriate individual (i.e., Associate Dean – MBA Programs; or the Director – PhD Program; Faculty of Business). The GMAT is now administered as a computer-adaptive test (CAT) throughout North America and in many other parts of the world. For the latest GMAT information visit www.mba.com. Further information and application forms are available from the Student Access Centre, Administration Building, University of Alberta, Edmonton, Alberta. Although no arbitrary standard is employed, a score above 550 is desirable.
In addition to the above requirements, all students must demonstrate English language proficiency prior to admission as described in §203.2.A. Additional entrance requirements are listed below, under the heading of the specific degree program.

Financial Assistance: Master’s Programs
The Faculty of Business has a limited number of graduate assistantships. Most will be determined early in August, and are awarded to continuing students. A limited number of bursaries, fellowships and scholarships are also available. For more information write to the Associate Dean, MBA Programs, Faculty of Business.

205.9.2 The Degree of MBA

Entrance Requirements
Admission to a program of graduate studies in the Faculty of Business is based on the applicant’s undergraduate grades, three letters of reference, a statement of purpose explaining how the MBA relates to the applicant’s career goals, and the applicant’s Graduate Management Admission Test score. For candidates interested in this program, work experience is also desirable.

Program Requirements
The MBA program is designed for students from various educational backgrounds; no specific undergraduate major is required for entrance. All MBA students are required to fulfill a total of 57 credits including thesis or course-based.

Phase one: The first eight months of the MBA program provides a foundation of courses covering basic managerial skills. The program begins with a required business skills orientation prior to the start of Fall Term classes. Because the first-year full-time courses are cohort-based involving teamwork, exemptions are not normally permitted. Completion of all 30 credits in the core courses requires one full academic year (September – April).

The second phase of the program provides students with the opportunity to pursue, in some depth, courses in fields of their choice.

Phase two: The course-based option consists of 27 credits, which includes a capstone business policy course, SMO 641 (3 credits). The thesis-based option consists of 15 credits. SMO 641 is required along with 12 in electives. The thesis is equivalent to 12 credits and is undertaken with the supervision of an advisor and a committee.

Length of Program
The equivalent of two full-time academic years are normally required to complete the program; however, it may be possible to accelerate studies with the completion of courses during Spring/Summer. The course-based MBA may be taken on a part-time evening basis; however, the program must be completed within six consecutive years from initial registration in the program. For the thesis-based MBA, the minimum period of residence is two four-month terms of full-time attendance.

205.9.3 The MBA-LLB Joint Program
The Faculty of Business and the Faculty of Law offer a program of joint study which permits highly qualified students to earn both the MBA and LLB degrees in four years.

Each student must apply separately to the Faculty of Law (for admission into the LLB program) and to the Faculty of Graduate Studies and Research (for admission into the MBA program).

In addition, students must indicate on their online graduate application that they are applying to the combined MBA/LLB program. In addition to new entrants, students in the first year of the regular MBA program or the first two years of the Faculty of Law are eligible to apply for the joint program.

Entrance Requirements
Acceptance by the Faculty of Graduate Studies and Research (for admission into the MBA program) and by the Faculty of Law (for admission into the LLB program) separately, are prerequisites for admission into the MBA-LLB program. Admission into each Faculty will be determined by the same selection process and criteria as for other students. In addition, each student must be admitted into the combined program; in this case admission will be determined by a selection committee composed of representatives of the Faculty of Law and the Faculty of Business. Since this is a special program, particular attention in the selection process will be given to:

1. the student’s past academic achievement; and
2. the student’s maturity, interest and a rationale of how such a combined program will enhance the student’s career and professional skills.

Program Requirements
The first year is usually taken entirely within one program (Law or MBA), and the second year entirely within the other with the sequence being at the student’s option. The third year will usually consist of a mixed program in both Faculties, with the fourth year in the Faculty of Law. If the first two years of the joint program are completed entirely in Law, the third year will be taken entirely within the MBA Program and the fourth year will consist of a mixed program in both Faculties. The Law portion of the program consists of approximately 75 hours of coursework while the Business portion of the program consists of 45 hours of coursework.

During the joint year of the MBA-LLB program, the course load requirements are as follows: Students must register in the Faculty of Graduate Studies and Research in Fall/Winter and must successfully complete a minimum of 24 credits, of which at least 15 must be Law courses/credits.

MBA courses: students who obtain a grade of less than C+ or who fail to complete one of the MBA courses may, upon the recommendation of the Associate Dean (MBA), with the approval of the Faculty of Graduate Studies and Research, take the course(s) or take an alternate course(s). Students repeating or taking an alternate course(s) must obtain a minimum grade of C+ and must maintain a cumulative grade point average of 2.7 (U of A Calendar, §203.8.2).

Law courses: students who obtain a grade of C- will have passed that course according to the Faculty of Law regulations but will have failed according to the Faculty of Graduate Studies and Research regulations. In these instances, students will take a substitute but equivalent Law course in the fourth year of their program. This alternate Law course is to be recommended by the Associate Dean (Law) and approved by the Faculty of Graduate Studies and Research prior to students beginning their fourth year in the MBA/LLB program. Students must register for this course(s) in the Faculty of Graduate Studies and Research and must obtain a minimum grade of C+.

Students in the MBA-LLB program may register in Spring/Summer; however, in the mixed year of this program, they must be registered in the Faculty of Graduate Studies and Research as outlined above.

Upon the successful completion of the mixed year, candidates will receive the MBA degree. Upon the successful completion of the fourth year, candidates will receive the LLB degree.

Inquiries regarding the joint MBA-LLB degree program may be directed to the MBA Office in the Faculty of Business or the Faculty of Law.

Academic Standing
During the first year of the combined program, a student is subject to the academic standing regulations and routes of appeal for grades and for academic standing of the Faculty in which the student is registered.

Therefore, if the student registers in the Faculty of Law in the first year of the joint program, the student shall refer to that Faculty's academic standing regulations and right of appeal procedures.

If the student registers in the Faculty of Graduate Studies and Research in the first year of the joint program, the student shall refer to the Faculty of Graduate Studies and Research's academic standing regulations and right of appeal procedures.

In the second year of the joint program, a student is subject to the academic standing regulations and routes of appeal for grades and for academic standing of the Faculty in which the student is registered.

Therefore, if the student registers in the Faculty of Law in the second year of the joint program, the student shall refer to that Faculty's academic standing regulations and right of appeal procedures.

If the student registers in the Faculty of Graduate Studies and Research in the second year of the joint program, the student shall refer to the Faculty of Graduate Studies and Research’s academic standing regulations and right of appeal procedures.

In the mixed year of the joint program students must maintain a level of academic standing that is satisfactory to both Faculties. The student shall be subject to the routes of appeal for grades and for academic standing of the Faculty of Graduate Studies and Research.

If the fourth year’s work is done entirely in the Faculty of Law to complete the LLB degree, the student shall register in the Faculty of Law and shall be subject to the academic standing regulations and routes of appeal for grades and for academic standing of the Faculty of Law.

If a student withdraws from one of the degree programs or is required to withdraw because of unsatisfactory academic standing, but wishes to remain in the other degree program, the student may be permitted to continue the program of study in the Faculty in which the student retains good academic standing.

Length of Program
Students normally finish all the requirements for the MBA degree, by the end of the third year, and will be awarded the MBA degree at this time. All requirements for the LLB degree will be completed by the end of the fourth year.
205.9.4 The MBA/MEng Joint Program

The Faculty of Agricultural, Life and Environmental Sciences and the Faculty of Business offer a program of joint study which enables students to earn both the MBA and MEng degrees after two calendar years of full-time study.

Each student must complete a Faculty of Graduate Studies and Research application form to be submitted to the Faculty of Business. A letter indicating the intention to apply to the MBA/MEng program including a statement of the applicant’s agricultural specialization, background and interests should also be enclosed.

**Entrance Requirements**

Normally only students with an undergraduate degree in an agricultural-related discipline will be admissible to this program. Applicants must follow the admission procedures and meet the admission requirements of both the Faculty of Business and the Faculty of Agricultural, Life and Environmental Sciences as governed by the regulations of the Faculty of Graduate Studies and Research. The recommendation for admission will be made by the MBA/MEng Joint Program Selection Committee consisting of representatives from the Faculty of Business and the Faculty of Agricultural, Life and Environmental Sciences. Admission will be recommended only for those students judged to have the ability and motivation to handle the significant demands of the program. Professional experience is highly desired.

**Program Requirements**

The course requirements are normally as follows:

1. **30 required MBA core courses**
2. Two **3 elective MBA courses**
3. SMO 641
4. Two **3 graduate elective courses (Business or Agricultural, Life and Environmental Sciences)**
5. Five **3 approved graduate-level courses in agricultural-related disciplines**
6. A **3 project in agriculture with a significant business component.**

Students who decide to transfer out of the joint program into the regular MBA or MEng program will have to apply and meet the full degree requirements of that program.

**Length of Program**

Students enrolled in the joint program on a full-time basis can complete the program in two calendar years. Students may undertake the joint program on a part-time basis. The duration of the total program must not exceed six consecutive calendar years.

205.9.5 The MBA/MEng Joint Program

The Faculty of Business and the Faculty of Engineering offer a program of joint study which enables students to earn both the MBA and MEng degrees after two calendar years of full-time study.

Each student must complete a Faculty of Graduate Studies and Research application form to be submitted to the Faculty of Business. A letter indicating the intention to apply to the MBA/MEng program should also be enclosed.

**Entrance Requirements**

Only students with an undergraduate degree in engineering will be admissible to this program. Applicants must follow the admission procedures and meet the admission requirements of both the Faculty of Business and the specific engineering department as governed by the regulations of the Faculty of Graduate Studies and Research. The recommendation for admission will be made by the MBA/MEng Joint Program Selection Committee consisting of representatives from the Faculty of Business and the Faculty of Engineering. Admission will be recommended only for those students judged to have the ability and motivation to handle the significant demands of the program. Professional experience is highly desired.

**Program Requirements**

The course requirements are normally as follows:

1. **30 required MBA core courses**
2. SMO 641
3. Three **3 elective MBA courses**
4. Five **3 graduate engineering courses (excluding engineering management courses) for programs in Mechanical or Electrical Engineering, or seven **3 graduate engineering courses for programs in other engineering departments**
5. One engineering project equivalent to two **3 courses. The required engineering project must have a significant business related component, and will be cosupervised by a professor from the Faculty of Business and a professor from the degree department within the Faculty of Engineering.**

Students will normally take the **30 first-year MBA courses in their first two semesters but may defer up to **6 first-year MBA courses to the second year of the program and replace them in the first year with graduate engineering courses.**

Students are eligible to receive financial assistance from either the Faculty of Business or the specific department within the Faculty of Engineering, but may not receive financial assistance from both Faculties simultaneously.

Students who decide to transfer out of the joint program into the regular MBA or MEng program will have to apply and meet the full degree requirements of that program.

**Length of Program**

Students enrolled in the joint program on a full-time basis can complete the program in two calendar years. Students may undertake the joint program on a part-time basis but must include one term of full-time attendance within a specified department in the Faculty of Engineering if so required by the specific engineering department. The duration of the total program must not exceed six consecutive calendar years.

205.9.6 The MBA/MAg Joint Program

The Faculty of Agricultural, Life and Environmental Sciences and the Faculty of Business offer a program of joint study which enables students to earn both the MBA and MAg degrees after two calendar years of full-time study.

Each student must complete a Faculty of Graduate Studies and Research application form to be submitted to the Faculty of Business. A letter indicating the intention to apply to the MBA/MAg program including a statement of the applicant’s forestry specialization, background and interests should also be enclosed.

**Entrance Requirements**

Normally only students with a BSc degree in Forestry will be admissible to this program. Applicants must follow the admission procedures and meet the admission requirements of both the Faculty of Business and the Department of Renewable Resources. The recommendation for admission will be made by the MBA/MAg Joint Program Selection Committee consisting of representatives from the Faculty of Business and the Faculty of Agricultural, Life and Environmental Sciences. Admission will be recommended only for those students judged to have the ability and motivation to handle the significant demands of the program. Professional experience is highly desired.

**Program Requirements**

The course requirements are normally as follows:

1. **30 required MBA core courses**
2. Three **3 elective MBA courses**
3. Two **3 graduate elective courses (Business or Agricultural, Life and Environmental Sciences)**
4. REN R 601 and 602 and 3 other approved **3 graduate-level Forestry courses**
5. SMO 641

Students who decide to transfer out of the joint program into the regular MBA or MF program will have to apply and meet the full degree requirements of that program.

**Length of Program**

Students enrolled in the joint program on a full-time basis can complete the program in two calendar years. Students may undertake the joint program on a part-time basis but must include one term of full-time attendance within a specified department in the Faculty of Business or the specific department within the Faculty of Engineering, but may not receive financial assistance from both Faculties simultaneously.

Students who decide to transfer out of the joint program into the regular MBA or MF program will have to apply and meet the full degree requirements of that program.

205.9.7 The MBA with Specialization in Technology Commercialization

The MBA with specialization in Technology Commercialization trains managers who can take new ideas and inventions from their source of discovery to the marketplace. It is designed to give students the expertise to assess and realize commercial potential of the latest technologies, as well as to apply entrepreneurial approaches to commercializing technology and innovation.

**Entrance Requirements**

Applicants holding any recognized undergraduate degree will be considered for admission to this program. Admission to the MBA (Technology Commercialization) program is based on the applicant’s undergraduate grades, three letters of reference, a statement of purpose explaining how this program
relates to the applicant's career goals, and the Graduate Management Admission Test score. For candidates interested in this program, a minimum of two years' full-time work experience is desirable.

**Program Requirements**

The course requirements are as follows:

1. **30 required MBA core courses**
2. **SMO 641**
3. **Four (3) approved graduate level electives**

**Length of Program**

Students enrolled in this program on a full-time basis can complete it in two calendar years. Alternatively, this course-based MBA program may be taken on a part-time basis; however, it must be completed within six consecutive years from initial registration in the program.

### 205.9.8 The MBA with Specialization in International Business

The MBA with specialization in International Business trains managers to address and analyze key strategic questions facing today's business leaders and policy makers. The program is designed to give students experience in addressing the challenges and identifying the opportunities of global markets.

**Entrance Requirements**

Applicants holding any recognized undergraduate degree will be considered for admission to this program. Admission to the MBA (International Business) Program is based on the applicant's undergraduate grades, three letters of reference, a statement of purpose explaining how this program relates to the applicant's career goals, and the Graduate Management Admission Test score. For candidates interested in this program, a minimum of two years' full-time work experience is desirable.

**Program Requirements**

The course requirements are as follows:

1. **30 required MBA core courses**
2. **SMO 641**
3. **Four (3) approved graduate level electives**

**Length of Program**

Students enrolled in this program on a full-time basis can complete it in two calendar years. Alternatively, this course-based MBA program may be taken on a part-time basis; however, it must be completed within six consecutive years from initial registration in the program.

### 205.9.9 The MBA with Specialization in Leisure and Sport Management

The Faculty of Business, in conjunction with the Faculty of Physical Education and Recreation, offers a program leading to an MBA with specialization in Leisure and Sport Management. The purpose of this applied administrative studies master's program is to prepare graduate students to become practicing managers/leaders in leisure and sport management.

**Entrance Requirements**

Applicants holding any recognized undergraduate degree will be considered for admission to this program. Admission to the MBA (Leisure and Sport Management) Program is based on the applicant's undergraduate grades, three letters of reference, a statement of purpose explaining how this program relates to the applicant's career goals, and the Graduate Management Admission Test score. For candidates interested in this program, a minimum of two years' full-time work experience is desirable. The recommendation for admission will be made by a selection committee consisting of representatives from the Faculty of Business and the Faculty of Physical Education and Recreation.

**Program Requirements**

The course requirements are as follows:

1. **30 required MBA core courses**
2. **Three (3) approved graduate-level electives**

205.9.10 The MBA with Specialization in Natural Resources and Energy

The MBA with Specialization in Natural Resources and Energy trains managers to develop an analytical expertise specifically focused in the areas of natural resources and energy. The program is designed for students to develop a broad understanding of the resource and energy industries, from the exploration and project development phases, through extraction and transformation, to transportation, logistics marketing and market issues. This allows students to address and analyze key strategic questions facing today's business leaders and policy makers.

**Entrance Requirements**

Applicants holding any recognized undergraduate degree will be considered for admission to this program. Admission to the MBA (Natural Resources and Energy) program is based on the applicant's undergraduate grades, three letters of reference, a statement of purpose explaining how this program relates to the applicant's career goals, and the Graduate Management Admission Test score. For candidates interested in this program, a minimum of two years' full-time work experience is desirable.

**Program Requirements**

The course requirements are as follows:

1. **30 required MBA core courses**
2. **SMO 641**
3. **Five (3) Natural Resources and Energy courses**
4. **Three (3) approved graduate-level electives**

**Length of Program**

Students enrolled in this program on a full-time basis can complete it in two calendar years. Alternatively, this course-based MBA program may be taken on a part-time basis; however, it must be completed within six consecutive years from initial registration in the program.

### 205.9.11 Executive MBA

The Faculty of Business at the University of Alberta and the Haskayne School of Business at the University of Calgary offer a joint Executive MBA program which permits individuals with at least seven years of work experience to earn the MBA through a 20 month weekend program.

**Entrance Requirements**

The minimum admission requirements in terms of undergraduate GPA and English language proficiency are those of the Faculty of Graduate Studies and Research. In some cases, students without an undergraduate degree, but who have 15 years of significant work experience are admissible. Applicants should have at least seven years of work experience to be admitted. Additionally all applicants are required to write the Graduate Management Admission Test (GMAT). Finally a letter of support from the applicant's employer and two letters of reference are desirable.

**Program Requirements**

The EMBA program is designed for individuals who have been in the workforce for seven years or more, and who are aspiring to top management positions. The course requirements are as follows:

1. **Four (1.5) week long intensive courses (including an international study tour)**
2. **Fourteen (3) required MBA courses (including a year long project in Year 2)**
3. **Two graduate elective courses**

**Length of Program**

Students enrolled in the EMBA can complete the program in 20 months.
205.9.12 The Degree of PhD

Information is contained in a brochure available from the PhD Program Director, and also at the website: www.business.ualberta.ca/PhD/

Entrance Requirements

The program seeks prospective candidates with an excellent scholastic record and a strong interest in research related to their chosen field of business studies. Potential students must have at least a bachelor’s degree, which may be from any undergraduate program. Applications are evaluated by an admissions committee on the basis of academic potential as evidenced through past grades, the GMAT, letters of recommendation, and a well-written statement of purpose. There are no fixed cutoff levels for consideration (beyond the Faculty of Graduate Studies and Research minimum admission requirement) but as a guideline, past entrants have scored at least in the ninetieth percentile of the GMAT with a 3.5 grade-point average (on the 4-point letter grading system). International students must demonstrate English Language proficiency on the Test of English as a Foreign Language or the International English Language Testing System test (IELTS), prior to admission. A minimum TOEFL score of 550, or a minimum overall band score of 6.5, with at least 5 on each test band, on the IELTS, is required. There is no additional language requirement.

Program Requirements

The Business PhD program is a research-oriented program which emphasizes knowledge of a major field of business studies, a cognate area, and strong analytical skills. The distinctive feature of business PhD programs, in general, is the concomitant study of related disciplines found in the University, as well as the study of functional fields of business. The program offered by the School of Business at the University of Alberta consists of a major field of study chosen from accounting, finance, human resources management and industrial relations, management science, marketing, and organizational analysis. In addition, two minors are selected from disciplines which underlie the major field, and/or from functional areas of business which are complementary to the chosen major field.

There are two basic stages in the program. They are the completion of coursework and comprehensive examinations, and candidacy (for thesis completion).

All students in the Business PhD program must maintain a minimum cumulative grade point average of 3.0 throughout the course of the program.

The minimum period of residence is normally two academic years of full-time attendance at the University of Alberta.

Financial Information

The School of Business offers funding for up to four years, made up of several kinds of support. A number of attractive fellowships are available (see Graduate Financial Aid section of this Calendar).

Length of Program

The program is normally full-time; candidates are expected to need two to three years of full-time study to complete the required coursework and comprehensive exams and two years to complete the PhD thesis.

205.9.13 The MBA-PhD Joint Program (not offered in 2008-2009)

The School of Business offers a joint MBA-PhD program of study to provide students, who are admitted to the Business PhD program without an MBA degree, the opportunity of obtaining the MBA degree if the requirements of that degree are satisfied.

Admission decisions to each part of the joint program are made by the respective offices. For the PhD program the admission recommendation is made by the PhD office, whereas admission recommendations to the MBA program are made by the MBA office. Both are subject to the approval of the Faculty of Graduate Studies and Research.

Students are required to meet MBA requirements for first-year courses in the program as well as ORG A 641, and 250 (computer-based) test or take another acceptable English proficiency examination. Students with degrees in other fields will be considered. Students with degrees from institutions where the language of instruction is not English must also take the TOEFL exam and obtain a score of not less than 600 (paper-based) or 250 (computer-based) test or take another acceptable English proficiency examination (see §203.2.4 or the department website). Students who do not show adequate verbal skills upon arrival will be requested to take remedial courses.

A recommendation to withdraw from the MBA-PhD program because of unsatisfactory academic standing shall be made by the Director of the PhD program to the Faculty of Graduate Studies and Research.

If a student withdraws from the MBA-PhD program and wishes to complete the MBA program, the student must seek admission to the regular MBA program. At the time of withdrawal from the joint program, the student’s status, relative to course requirements in the MBA program, will be the decision of the Associate Dean MBA program.

205.9.14 Graduate Courses

Graduate courses in Business can be found in §231, Course Listings, under the following subject headings:

- Accounting (ACCTG)
- Business (BUS)
- Business Economics (BUEC)
- Finance (FIN)
- Human Resources Management and Industrial Relations (HRM/IND R)
- Management Information Systems (MIS)
- Management Science (MGTS)
- Marketing (MARK)
- Organizational Analysis (ORG A)

205.10 Cell Biology

Department of Cell Biology
514 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2H7
E-mail: info@cellbio.ualberta.ca
www.ualberta.ca/CELLBIOLOGY/

205.10.1 General Information

The Department of Cell Biology, Faculty of Medicine and Dentistry, offers graduate programs leading to the MSc and PhD degrees in cell and molecular biology. The Department provides a world-class training environment in a broad range of areas such as organelle biogenesis, protein targeting, cell cycling, virology, signal transduction, organelle proteomics, transcriptional control, cell-cell contact, neurotrophic factors and axonal transport, as well as neurobiology of the autonomic nervous system. Through a strong independent research program, complemented by seminars and formal coursework, students are trained to identify important problems, critically analyze scientific information and effectively communicate their results.

The Department is located on two floors of the Medical Sciences Building and is endowed with state of the art equipment needed to perform experimental work in modern cell biology and neurobiology. These include extensive microscopy and tissue culture facilities, a transmission electron microscope and image analysis system, automated DNA synthesis and sequencing facility, 2-D gel analysis set-up for proteomics, imaging systems for detection of radioactive or light-emitting gels or blots, chromatography systems for protein purification and biochemical analysis, microinjection facilities, as well as cold rooms, dark rooms, ultra centrifuges and scintillation counters. In addition, the Department recently acquired a state-of-the-art confocal microscope facility for live imaging of cellular transport processes, as well as for detection of protein-protein interactions. Staff and students also have access to several facilities within the Medical Sciences Building for global analysis using proteomics, confocal microscopy, antibody production, as well as peptide synthesis and sequencing. Research funding, primarily from agencies such as the Canadian Institutes of Health Research, the National Science and Engineering Research Council, the Alberta Heritage Foundation for Medical Research, the Canadian Foundation for Innovation and the Howard Hughes Medical Institute amounts to over $4.5 million each year.

Detailed information on the graduate program can be found in our Graduate Student Policy available at www.ualberta.ca/CELLBIOLOGY/policy.html.

Address all inquiries to the Graduate Coordinator, Department of Cell Biology.

Entrance Requirements

Graduate programs are normally open to graduates of general and health-related science programs, provided students obtained a grade point average of 3.0 in the last 2 years (>60 or equivalent) of undergraduate study at the University of Alberta or an equivalent qualification from a recognized institution. Applicants with degrees in other fields will be considered. Students with degrees from institutions where the language of instruction is not English must also take the TOEFL exam and obtain a score of not less than 600 (paper-based) or 250 (computer-based) test or take another acceptable English proficiency examination (see §203.2.4 or the department website). Students who do not show adequate verbal skills upon arrival will be requested to take remedial courses.
Financial Assistance

Financial assistance in the form of graduate research assistantships is normally available for students. Students will also be expected to apply for competitive student awards. Further information regarding financial assistance will be supplied upon request.

205.10.2 The Degree of MSc

Program Requirements

Individual programs vary depending on the student’s background, but are designed to provide students with an appropriate education in Cell Biology. A minimum of 9 in graduated courses are normally required, including at least one standard course in the 500 or 600 series. These will normally be related to the student’s research interest and will be chosen in consultation with the graduate supervisory committee. Possible courses include CELL 502, 515, 545 or 614. In addition, candidates are required to enrol and present a seminar at least once in either CELL 671 or 672.

MSc students must prepare an acceptable thesis presenting the results of original research conducted. Candidates will be examined orally on their thesis results by a committee formed according to Faculty of Graduate Studies and Research regulations. Course requirements will be determined by the student’s graduate supervisory committee in accordance with University regulations.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the MSc will vary according to the previous training of the applicant. A minimum of two years is normally required.

205.10.3 The Degree of PhD

Program Requirements

Individual programs vary depending on the student’s background, but are designed to provide students with an appropriate education in Cell Biology. A minimum of 9 in graduate courses are normally required, including at least two standard graded courses in the 500 or 600 series. All PhD students are expected to register in CELL 614. Additional courses will normally be related to the student’s research interest and will be chosen in consultation with the graduate supervisory committee. PhD students are also required to enrol in CELL 671 and in CELL 672, usually in their first and second year in the graduate program, respectively.

Students in the PhD program will take a candidacy exam consisting of written and oral parts and a final thesis defence. Each student will be supervised by a committee formed according to Faculty of Graduate Studies and Research regulations.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Typically graduate students require a total of five years to complete their PhD studies.

205.10.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject headings Cell Biology.

205.11 Chemical and Materials Engineering

Department of Chemical and Materials Engineering

536 Chemical and Materials Engineering Building

University of Alberta

Edmonton, Alberta T6G 2G6

E-mail: chemical.engineering@ualberta.ca

www.engineering.ualberta.ca/cme

205.11.1 General Information

The Department of Chemical and Materials Engineering offers facilities for advanced training and research leading to the Master of Engineering, Master of Science and Doctor of Philosophy degrees in Chemical Engineering and in Materials Engineering. The MEng degree is intended primarily for part-time students who are working in industry, but can also be taken by full-time students.

General fields for research in chemical engineering include fluid mechanics and rheology; reaction kinetics and catalysis; mass transfer and separation processes; heat transfer; thermodynamics, hydrocarbon P-V-T and phase equilibrium studies; polymer reactor engineering; computer process control; dynamic simulation; biotechnology, mathematical modelling and environmental engineering. Many research programs are oriented toward better utilization of natural resources in the province, e.g., upgrading of Athabasca bitumen and heavy oil feedstocks; processing of natural gas; pulp and paper processing. Active research areas in materials engineering include mineral processing; coal preparation; modelling and simulation; intelligent processing of materials and solidification processing; hydrometallurgy; pyrometallurgy; high temperature electrochemistry; corrosion; physical and mechanical metallurgy; process metallurgy; welding metallurgy; powder metallurgy; ancient materials; ceramic materials; and electronic materials.

Many research projects are industrially applied, and supported by industry. In some cases research can be carried out at the supporting company. Details of current research projects are available from the Department office.

Entrance Requirements

The Department’s minimum admission requirements are an undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 580 (or 237 computer-based or 95 internet-based with at least 20 per section) or an equivalent approved English language examination where applicable (see §203.2.4). The Department will accept qualified applicants with degrees in other fields of engineering. Graduates with non-engineering backgrounds may be admitted under special arrangements which might involve the completion of certain undergraduate engineering courses.

Financial Assistance

Graduate assistantships are available for qualified students on a part-time or full-time basis, with remuneration according to the student’s background and hours of service. Scholarships and fellowships are available for research in chemical engineering, materials engineering, and process control. All MSc and PhD students are guaranteed a minimum level of financial support subject to acceptable performance.

205.11.2 The Degree of MSc

The Department offers MSc degrees in Chemical Engineering, Process Control, Materials Engineering, and Welding Engineering.

Program Requirements

MSc programs normally consist of 12 courses, including ENGG 600, plus seminar attendance, research, and a thesis. Certain core course requirements apply. Details of all programs must be worked out in consultation with the Department.

There is no language requirement for the MSc degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the MSc program will vary according to the previous training of the applicant and the nature of the research undertaken; however, an average of 18-24 months is normally required. The maximum time permitted is four years.

205.11.3 The Degree of MEng

The Department offers MEng degrees in Chemical Engineering, Process Control, Materials Engineering, and Welding Engineering.

Program Requirements

For the Master of Engineering program, 24 in courses, including ENGG 600, plus an engineering project equivalent to 3 must be completed. The courses are of the same type and calibre as those taken by the MSc and PhD candidates. Certain core course requirements apply. The project may be completed within a four to six week period following the regular Fall/Winter term. Work on the project may be conducted within the University environment or outside in industry; however, approval and supervision will remain with the student’s supervisor. Students interested in the MEng Degree in Welding Engineering should consult with the department for details. All MEng programs must be approved by the department.

There is no language requirement for the MEng degree.

Length of Program

The time required to complete the MEng program will vary according to the previous training of the student and the nature of the research undertaken; however, an average of 18-24 months is normally required. The maximum time permitted is six years.

205.11.4 The Degree of PhD

The Department offers PhD degrees in Chemical Engineering, Process Control, and Materials Engineering.
Program Requirements

For the PhD program, in addition to the requirements of the Faculty of Graduate Studies and Research, the Department normally requires the candidate to complete satisfactorily at least 18 in courses and ENGG 600 and attend specified seminars. Certain core course requirements apply. Details of all programs must be worked out in consultation with the Department.

There is no language requirement for the PhD degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the PhD program will vary according to the individual candidate and whether the PhD program follows the attainment of the BSc or the MSc degree. In the former case at least four years are usually required to complete the program. The maximum time permitted is six years.

205.11.5 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the following subject headings:

Chemical Engineering (CH E)
Materials Engineering (MATE)

205.12 Chemistry

Department of Chemistry
EA-43 Chemistry Centre
University of Alberta
Edmonton, Alberta T6G 2G2
E-mail: grad@chem.ualberta.ca

205.12.1 General Information

The Department of Chemistry offers programs leading to the degrees of Master of Science and Doctor of Philosophy, both requiring course work and thesis research. In addition to the four traditional areas of analytical, inorganic, organic and physical chemistry, the Department also offers special PhD programs in chemical-biology and chemical-physics.

The Department provides an outstanding research environment. More than 220 graduate students, plus postdoctoral fellows and research associates, are engaged in various research programs. The Department is among the best equipped and best funded in the nation and has a faculty renowned for their excellence in teaching and research.

The active research interests of the staff include the following:

Analytical: Separation science, including liquid chromatography, capillary electrophoresis, gel electrophoresis, solvent and solid phase extraction; scanning probe microscopies such as atomic force, chemical force, and tunneling methods for the characterization of surfaces, biocompatible materials, protein adsorption, nano-wires, nano-sensors, and nano-arrays; microfluidic systems for Lab on a chip applications; mass spectrometry for biochemical analysis and Proteomics research, utilizing MALDI and electrospray methods; molecular biology applied to developing fluorescent protein-based biosensors for live cell microscopy of biochemical processes; spectroscopic methods and instrumentation development involving inducibly coupled plasma emission, Fourier transform, and laser spectroscopy methods; environmental chemistry of organic pollutants utilizing LC-MS methods; electrochemical methods and surface modification techniques.

Inorganic: Organometallic chemistry of transition metals and f-elements; synthesis and reactions of bimetallic and metalallocyclic compounds; metal-metal cooperation effects; carbon-hydrogen bond activation; asymmetric catalysis; polymer-bound catalysts; rapid catalyst screening; chiral surfaces and electrodes; hydrogen, alkane and methanol fuel cells; inorganic materials, structures, bonding, electrical and magnetic properties; intermetallics and alloys; zintl phases; synthesis of rare-earth and transition-metal pnictides; template-directed synthesis; materials characterization; inorganic/polymer nanocomposites; synthesis of nanoparticles; molecular electronic devices; synthesis and characterization of nanostructured optoelectronic materials; synthesis of metal-based electroluminescent materials; light-emitting diodes.

Organic: Structural and synthetic studies on natural products; degradation of natural products; heterocyclic chemistry; mono- and di-saccharides; glycochemistry, bioorganic chemistry, fluorescent probes, protein engineering; organometallic chemistry; reactive intermediates (ylides, carbones, nitrenes); organic photochemistry; acetylenes; alenes; free radicals; synthesis and conformational studies of oligosaccharides with an emphasis on the application of NMR and molecular modelling; biomedically significant protein-oligosaccharide interactions; structure-activity correlations of antibiotics; development of new synthetic methodology and the synthesis of complex natural products with important biological properties; asymmetric catalysis; the invention of new reagents; mechanism and stereochemistry of enzymatic reactions; conjugated molecules; nanostructures; self-assembly and molecular recognition; organic, electronic and photonic materials; sensor arrays; combinatorial chemistry; bioconjugate chemistry and drug delivery; solid-phase organic synthesis; organoboron chemistry; design synthesis and characterization of unnatural biopolymers.

Physical: Mass spectrometry; chemistry of biologically relevant molecules in the gas phase; NMR spectroscopy; application of modern multinuclear NMR techniques to study molecular structure and dynamics of solid materials; biophysical chemistry involving NMR studies of peptide structure; DNA photodamage; laser Raman spectroscopy, ultrafast molecular dynamics, nanogating spectroscopy, chirality and chiral recognition; rotational and vibrational cluster spectroscopy; computational and theoretical chemistry: study of the quantum dynamics and statistical mechanics of systems of interest in physical chemistry, radiation-matter interactions, photodissociation dynamics, laser control, study of molecular structure and properties of molecules in excited states, pseudopotential methods, electron correlation and relativistic effects, development of basis sets.

Further information may be obtained by writing the Chair of the Department, or from our website at www.chem.ualberta.ca.

Entrance Requirements

The Department’s minimum admission requirements are a four-year undergraduate degree with a grade point average of 3.0 in the last two years of undergraduate (or graduate) work from the University of Alberta, or an equivalent qualification from a recognized institution. Candidates should normally be graduates in chemistry, however the Department will accept qualified applicants with degrees in related fields (cf., biochemistry or other bioscience programs from candidates who wish to pursue the chemical-biology PhD program, and mathematics and/or physics background compensating for deficiencies in chemistry from those who wish to enter the chemical-physics PhD program.)

English language proficiency requirements are a minimum TOEFL score of 550 (paper-based) or 213 (computer-based) or equivalent, where applicable (see §203.2.4). To qualify as a Teaching Assistant, candidates must have a TOEFL score of at least 570 (paper-based) or equivalent.

Financial Assistance

Financial assistance in the form of scholarships and graduate assistantships is normally available for all graduate students who maintain a satisfactory performance. For full details, see our website at www.chem.ualberta.ca (Graduate Program, Financial Support).

205.12.2 The Degree of MSc

Program Requirements

A minimum of 9 in graduate chemistry courses must be passed. In addition, a research project must be carried out, the results of which are to be presented in a thesis form, followed by an oral examination.

Students must obtain a GPA of 2.7 or greater in their first and subsequent years in order to remain in the graduate program.

There is no language requirement for the degree of MSc.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the MSc degree will vary according to the previous training of the candidate and the nature of the research project; however a minimum of two years is normally required. Candidates must complete their degree program within four years of the time they first register.

205.12.3 The Degree of PhD

Program Requirements

For students in analytical, inorganic, and physical chemistry: a minimum of 12, in graduate courses. In some circumstances, advance credit for graduate courses in chemistry taken elsewhere may be recommended by the Department to the Faculty of Graduate Studies and Research, up to a maximum of 6. Students in organic chemistry must take 12 in graduate courses and write monthly cumulative invention reports in organic chemistry (16 attempts) until four have been passed.

In order to continue in the PhD program, a student must achieve a GPA of 2.7 or greater in the first year, and must maintain a cumulative GPA of 3.0 or greater in the second and subsequent years.

(Note: Special chemical-biology and chemical-physics programs are also available, which allow increased emphasis on biology, and physics and mathematics, respectively.)

Every student must present a seminar on a topic other than the students’ research program.
When these requirements are nearly completed, all PhD students must pass an oral candidacy examination in subjects relevant to their general field of research. Finally, the student will be required to present the results of the student’s research in thesis form and orally to an examining committee, and as a seminar to the Department as a whole.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the PhD degree will vary according to the previous training of the candidate and the nature of the research project; however, four years of study and research is normally required. Students with an MSc degree may be able to complete the PhD program within three years. Candidates must complete their degree program within six years of the time they first register.

205.12.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject heading Chemistry (CHEM).

205.13 Civil and Environmental Engineering
Department of Civil and Environmental Engineering
3-133, Markey/CNRL Natural Resources Engineering Facility
University of Alberta
Edmonton, Alberta T6G 2W2
E-mail: civegrad@ualberta.ca
www.engineering.ualberta.ca/civil

205.13.1 General Information
Degree Programs
The Department of Civil and Environmental Engineering, incorporating the School of Mining and Petroleum Engineering, offers programs of study leading to the advanced degrees of Master of Science, Master of Engineering and Doctor of Philosophy. The degree programs in the Department are organized along the traditional disciplines found in civil engineering including construction engineering and management, environmental engineering or science, geotechnical or geoenvironmental engineering, structural engineering, and water resources engineering. In addition, candidates with strong interests in the resource extraction industries can obtain advanced degrees in mining and petroleum engineering. The Department offers a wide range of course options permitting the flexibility to arrange programs for candidates who obtained their undergraduate degree in fields other than civil engineering including students with four year science degrees.

Research
Civil and Environmental Engineering
The Department has a major research orientation. Active research areas in the Department include the following:

Civil: construction engineering and management with a focus on productivity improvement, computing applications including artificial intelligence, simulation modelling and information management, optimization of aggregate and concrete manufacturing, and construction planning and control; geotechnical engineering and environmental geotechnics including the study of soil mechanics, rock mechanics, foundation engineering, engineering geology, permafrost, storage, disposal, and containment of industrial wastes and pollutants and contaminated or disturbed earthy material and groundwater; structural engineering with a strong focus in the structural behaviour and design of concrete, masonry, steel and timber members and frames in addition to structural analysis and solid mechanics; and water resources engineering including the study of hydraulics, hydrology, river behavior, fluid mechanics, wave dynamics and climate change.

Environmental: environmental engineering and science with a focus on processes in air, soil, and water; system risk assessment and public health engineering; solid waste management; environmental hydraulics; applied microbiology and parasitology; applied chemistry; mathematical modelling of environmental systems; neural network technology; industrial waste management; and disposal and fate of pollutants in the environment.

School of Mining and Petroleum Engineering
The School’s graduate degree program is operated in conjunction with the Department of Civil and Environmental Engineering reflecting the interdisciplinary nature of advanced research in the resource industries. Areas of research include the following:

Mining: mining engineering including mineral economics, geomechanics, geostatistics, simulation of mining systems; mine planning and design; surface and underground mining equipment and methods; and mine property evaluation.

Petroleum: petroleum engineering including multiphase flow through porous media; immiscible, miscible and micellar flooding; heavy oil recovery using thermal energy; interfacial phenomena; pressure build-up and drawdown analysis; and mathematical simulation of petroleum recovery systems.

Entrance Requirements
The Department’s minimum admission requirements are a four-year undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution and a TOEFL score of 550 (paper-based) or an equivalent approved English language examination where applicable (see §203.2.4). Students with extensive industrial experience but with a weak academic record are reviewed on a case-by-case basis.

Financial Assistance
Financial assistance is available through the Department to students in the form of research assistantships, teaching assistantships, tuition scholarships and a variety of awards administered by the University and affiliated institutions. Details may be found at www.gradstudies.ualberta.ca

205.13.2 The Degree of MEng
Program Requirements
The Master of Engineering is a course-based degree program that requires a minimum of 124 (eight single-term graduate courses or equivalent), of which 15 (five single-term courses or equivalent) should be in the candidate’s major field of interest, ENGG 600 plus a project that is equivalent to 3. In some areas of specialization, an additional 6 (two single-term courses or equivalent) more than the minimum are required. The Department will require more 3 courses in cases where the undergraduate degree does not provide a superior background for the chosen area of specialization.

There is no second language requirement other than English for the degree of MEng.

Length of Program
Candidates may complete the Master of Engineering program in a minimum of nine months. The maximum time permitted for completion of the program is four years from the date of first registration.

205.13.3 The MBA/MEng Joint Program
The Faculty of Business and the Faculty of Engineering offer a program of joint study which enables students to earn both the MBA and MEng degrees after two calendar years of full-time study. For application information, entrance requirements and other details, refer to §205.9.5 of the calendar.

Program Requirements
The MBA/MEng Joint program requires 20 first-year 1.5 MBA courses, ORG A 641, three second-year 3 elective MBA courses, and seven 3 graduate engineering courses, as approved by the Department, plus ENGG 600. In addition, one engineering project, equivalent to two 3 courses and having a significant business related component, will be required. The project will be co-supervised by a professor from the Faculty of Business and a professor from the Department of Civil and Environmental Engineering.

Length of Program
Students will normally take the 20 first-year MBA courses in their first two semesters. The program can be completed in two calendar years if students are enrolled on a full-time basis. The duration of the total program must not exceed six consecutive calendar years.

205.13.4 The Degree of MSc
Program Requirements
The Master of Science program requires a minimum of 18 (six single-term graduate courses or equivalent), of which 12 (four single-term courses or equivalent) should be in the candidate’s major field of interest, ENGG 600, plus a research thesis. In some areas of specialization, an additional 6 (two single-term courses or equivalent) more than the minimum are required. The Department will require more 3 courses in cases where the undergraduate degree does not provide a superior background for the chosen area of specialization or in cases where the course preparation needs to be augmented to enhance the execution of the research topic.

There is no second language requirement other than English for the degree of MSc.

Length of Program
A candidate may complete a Master of Science program in 15 to 18 months. However, students often require 19 to 23 months depending on the thesis topic. The maximum time permitted for completion of the program is four years from the date of first registration.
205.13.5 The Degree of PhD

Program Requirements
The PhD degree is a research degree. Courses in a doctoral program are assigned by the supervisor and supervisory committee, in consultation with the student. They are designed to enhance the depth and breadth of understanding in the field of study. The course requirements are determined on a case-by-case basis depending on the student’s background. Students are required to have completed ENGS 600. Students in the doctoral program are expected to maintain a course average of 3.0 or higher before proceeding to their candidacy examination.

All doctoral candidates must prepare and defend a thesis of high caliber on an approved topic.

There is no second language requirement other than English for the degree of PhD.

The minimum period of residence is two academic terms of full-time attendance at the University of Alberta. The two terms need not be consecutive.

Length of Program
The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken. However, a minimum of three years is normally needed. The maximum time permitted for completion of the program is six years from the date of first registration.

205.13.6 Degree Specializations

The Department of Civil and Environmental Engineering encompasses a broad field of engineering and has seven main engineering disciplines: construction, environmental, geotechnical, mining, petroleum, structural, and water resources. The Department offers the following degree specializations in all of the degree programs. Each has a distinctive course offering designed to provide the student with advanced training in the area.

Construction Engineering and Management: The focus is on the main principles and techniques of planning, control, execution and engineering of construction projects. The degree emphasizes construction management principles, computing applications in construction and the fundamentals of construction engineering.

Environmental Engineering: The degree focuses on the fundamental chemical, physical, and biological processes that can be adapted to water, soil, and air systems. The emphasis is on public health and environmental protection technology with electives in environmental management and impact assessment. Topic areas include water and waste treatment; solid and hazardous waste treatment; industrial waste treatment; water quality modelling; and municipal collection and distribution systems.

Environmental Science: Students who have four-year science degrees and who wish to study applied environmental science may pursue an Environmental Science degree in civil engineering. This degree permits the study of applied environmental science in areas such as environmental health, chemistry, microbiology, zoology, or geography.

Geotechnical Engineering: The degree focuses on the study of soil mechanics, rock mechanics, foundation engineering, engineering geology and permafrost with emphasis on the behavior of natural materials and field problems. Full use is made of modern design tools such as advanced techniques in laboratory and field testing and numerical methods of analysis.

Geoenvironmental Engineering: The geoenvironment is that portion of our environment consisting of natural and man-made earth materials on and below the ground surface. Geoenvironmental engineering focuses on the management and control strategies of the geoenvironment from the standpoint of storage, disposal, and containment of industrial wastes and pollutants and contaminated or disturbed earthy material and groundwater.

Mining Engineering: The mining industry is a major economic engine in Canada and elsewhere. Mining engineering degrees offered by the Department include studies in mineral economics, geomechanics, geostatistics, simulation of mining systems; mine planning and design; surface and underground mining equipment and methods; and mine property evaluation.

Petroleum Engineering: The petroleum industry is comprised of exploration, production and refining activities related to hydrocarbons. Of great importance is reservoir engineering where efficient recovery of hydrocarbons is a major objective. Important topics include multiphase flow through porous media; immiscible, miscible and micellar flooding; heavy oil recovery using thermal energy; interfacial phenomena; pressure build up and drawdown analysis; and mathematical simulation of petroleum recovery systems.

Structural Engineering: This degree focuses on the analysis and design of buildings, bridges, and other structures. Emphasis is on the mainstream areas of structural engineering—reinforced concrete, structural steel, and numerical analysis—but innovative emerging technologies in areas related to timber, masonry, prestressed concrete and new composite materials are also covered.

Water Resources Engineering: Graduate programs concentrate on the physical aspects of our environment as they relate to water supply, river problems, fish habitat, flood risk, pollutant dispersion and climate change. The program encompasses a wide variety of research topics including surface water hydrology; environmental fluid mechanics; computational hydraulics; river engineering; river and lake ice engineering; cold regions hydraulics and hydrology; urban hydraulics; design of hydraulic structures; air-sea interactions; surface wave mechanics; and water resources planning and management.

205.13.7 Graduate Courses

Undergraduate and Graduate courses can be found in Civil and Environmental Courses, or Mining and Petroleum Courses.

205.14 Communications and Technology

Faculty of Extension
University of Alberta
Enterprise Square
10230 Jasper Avenue
Edmonton, Alberta T6G 4P6
E-mail: mact@ualberta.ca

www.extension.ualberta.ca/mact

205.14.1 General Information

The multidisciplinary Master of Arts in Communications and Technology (MACT) offers a theoretical, historical, and practical examination of communications. The degree is designed for individuals who seek to provide reflective and informed leadership in the management and use of information and communications technologies in their organizations and fields. These fields include education and training, information technology, marketing, mass media, new media production, program design and development, public affairs, and writing and publishing. Coursework covers small-group and organizational communication; the theory, history, and practice of information and communications technologies; and the research skills associated with analyzing and evaluating these technologies, particularly as they are managed and used in the workplace.

205.14.2 The Degree of MA in Communications and Technology (MACT)

Entrance Requirements
The normal admission requirements are as follows: a four-year degree from a recognized university; a GPA of at least 3.0 (or equivalent); at least three years of relevant professional experience; three letters of reference; and a letter of interest. The letter of interest should state the applicant’s academic or professional area of specialization, specify how completion of the program would support the applicant’s professional practice, and identify a provisional topic for the final applied research project. Where applicable a TOEFL score of 600 is required. Up to 25 students are admitted each year to begin their studies in May. The application deadline for admission to begin studies in May is December 15 of the preceding year.

Program Requirements
Applicants from outside of the Alberta capital region, including international applicants, may register in the program without changing their place of residence. The MACT is a course-based program that requires the completion of seven core courses, three electives, and a final applied research project. Four of the core courses are completed during two Spring Institutes, held each May at the University of Alberta, with the remaining three core courses completed online during the fall and winter terms. Students may complete approved elective courses offered by the University of Alberta or another recognized university.

Length of Program
Core courses are scheduled to permit completion of the degree by part-time study within two academic years.

205.15 Comparative Literature Program

Office of Interdisciplinary Studies
1–17 Humanities Centre
University of Alberta
Edmonton, Alberta T6G 2E5
E-mail: ois@ualberta.ca

www.ualberta.ca/ois

205.15.1 General Information

The Comparative Literature Program offers programs leading to the degrees of Master of Arts and Doctor of Philosophy in Comparative Literature.
Entrance Requirements

Normally, minimum admission requirements for an MA in Comparative Literature are an undergraduate degree with an average of at least 3.0 in the last two years of undergraduate work at the University of Alberta, or an equivalent qualification from a recognized institution. Minimum requirements for a PhD are an MA with an average of at least 3.0 in the last two terms of graduate work. Exceptionally qualified students holding a BA degree can bypass the MA and be admitted directly into a doctoral degree program. In addition to these minimal requirements, a TOEFL score of 580 (or 237 computer-based, or 95 internet-based with at least 20 per section) where applicable is required. (see §203.2.4).

Graduate students in Comparative Literature are required to have one language, other than English, at the MA level and two languages, other than English, at the PhD level. Details regarding language requirements may be obtained by contacting the Graduate Coordinator.

Financial Assistance

Financial assistance in the form of fellowships and graduate assistantships may be available to qualified students. Students applying to the University's General Awards competition for the Province of Alberta Scholarships (available only to Canadian Citizens and Permanent Residents) should submit complete application materials to the Office of Interdisciplinary Studies, by December 15. For further information please contact the Graduate Coordinator of the Comparative Literature Program, Office of Interdisciplinary Studies and consult www.gradstudies.ualberta.ca.

205.15.2 The Degree of MA in Comparative Literature

Program Requirements

Students admitted to this program are expected to have a minimum of 30 credits in Comparative Literature, or equivalent courses approved by the Graduate Coordinator, beyond the 100 level in their undergraduate studies.

Students who satisfy this requirement and who wish to complete a thesis-based master's degree will be required to take C LIT 501, 502, 511 and 560. An additional 6 at the graduate level will be determined on an individual basis in conjunction with the Graduate Coordinator in the first year of their studies, and write and defend a thesis in their second year of the program.

Students who wish to complete the course-based master's degree will be required to take C LIT 501, 502, 511 and 560. An additional 18 at the graduate level will be determined on an individual basis in conjunction with the Graduate Coordinator, i.e. three terms of course work, and complete a capping exercise.

Students admitted with less than the 30 course prerequisite will be required to take up to 27 (thesis-based MA) or 36 (course-based MA). The exact number of extra courses will be determined individually by the graduate committee.

The minimum period of residence for the thesis-based MA is two four-month terms of full-time attendance at the University of Alberta. There is no residence requirement for the course-based MA.

Length of Program

A student's previous background and experience will determine the length of time required to complete an MA.

A candidate for the thesis-based MA, entering from a four-year specialized program and continuing work in the same field, is normally required to complete the equivalent of one calendar year of course work. The normal time of completion for the thesis-based program, including thesis, is two years. The maximum time allowed to complete the thesis-based program is four years. Other candidates are normally required to complete the equivalent of three terms of course work.

A candidate for the course-based MA is normally required to complete the equivalent of two calendar years of course work. The normal time of completion for the course-based program, including the capping exercise, is two years. The maximum time allowed to complete the course-based program is six years.

205.15.3 The Degree of PhD in Comparative Literature

Program Requirements

Students admitted to this program with an MA in Comparative Literature from the University of Alberta, or the equivalent, will be required to take C LIT 501, 502, 511, 512, 560, and an additional 3 at the graduate level to be determined, on an individual basis, with the approval of the Graduate Coordinator in their first year of studies. In the Fall term of their second year, students will complete two Field Papers related to their thesis topic. Normally during their second year but no later than April of their second year, students will complete the FGSR Candidacy Examination, and then write and defend a thesis in the area of Comparative Literature by the end of their fourth year. Students admitted with less than the background requirement will be required to take up to six additional graduate courses in Comparative Literature, with the exact number to be determined individually by the graduate committee.

Length of Program

The time necessary to complete the requirements for the PhD depends upon the student's background and progress. For students admitted to the program with an MA in Comparative Literature, the normal completion time is four years. The maximum time allowed for the completion of a PhD program is six years.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

205.15.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Comparative Literature (C LIT).

205.16 Computing Science

Department of Computing Science

221 Athabasca Hall
University of Alberta
Edmonton, Alberta T6G 2E8
E-mail: gradinfo@cs.ualberta.ca

205.16.1 General Information

The Computing Science Department offers programs leading to the degrees of Master of Science and Doctor of Philosophy in a number of fields, including Advanced Man-Machine Interfaces, Algorithmic, Artificial Intelligence, Bioinformatics, Communication Networks, Computer Games, Computer Graphics, Computer Vision and Multimedia Communications, Database Systems, Machine Learning, Robotics, Software Engineering, and Software Systems. The Department owns and operates a network of computers, including several CPU servers and a large number of workstations. All graduate student offices are wired with high speed and/or wireless network. In addition the research laboratories contain specialized equipment. Access to campus-wide and regional computing facilities is provided by computer networks.

Further information may be obtained from the Graduate Program Coordinator, Department of Computing Science.

Entrance Requirements

The Department's minimum admission requirements are a University of Alberta undergraduate degree with an average of 3.0 in the last two years of study, or an equivalent qualification from a recognized institution, and a TOEFL score of 600 (250 computer-based or 100 internet based) where applicable (see §203.2.4). Students entering the graduate program are expected to have adequate background in computing science, similar to a four-year undergraduate degree. This means that applicants should have credits for eight computing science courses at the 300/400 level, from the following areas: Software Engineering/Programming Languages; Operating Systems; Graphics/Artificial Intelligence/Database Systems; Numerical Methods; Computer Architecture; Theoretical Computer Science. At the University of Alberta these are represented by: CMPUT 325/425; CMPUT 379; CMPUT 411/466/468/391; CMPUT 340; CMPUT 420; and CMPUT 304/474.

A departmental admission requirement for non-Canadians, as well as Canadians with a degree from a non-Canadian university, is that they write the Graduate Record Examinations (verbal, quantitative, and analytical writing components) administered by the Educational Testing Service (Princeton, NJ) and have the results sent directly to the Computing Science Department. The GRE is also recommended for students with backgrounds unrelated to Computing Science. The examinations should be written early enough so that scores will be available by the time the applicant’s other supporting documents arrive.

MSC and PhD students will be expected to satisfy the requirements currently in force with respect to attendance at departmental colloquia and seminars, and the public presentation of students’ research results.

Financial Assistance

Financial assistance is available throughout the calendar year in the form of graduate teaching assistantships and research assistantships and is limited to students in the PhD program and the thesis-based MSc program. In order to be considered for assistance, students must maintain satisfactory academic performance.

205.16.2 The Degree of MSc

Entrance Requirements

Candidates for the MSc degree in computing science should have a four-year undergraduate degree or the equivalent from a recognized university, with adequate background in computing science and mathematics. Students who do
not meet these requirements must take additional courses to those required in
the MSc program, either concurrently with the graduate program or in a year
of study prior to admission as MSc candidates. The department does not admit
students directly to an MSc course-based program.

Program Requirements
Two routes to the MSc degree are available, a thesis-based route and a
course-based route. Students in the thesis-based MSc program are required
to complete a minimum of 15 in graduate courses including 603 and 9 at the
600-level and write a thesis. Students must have a background similar to the
University of Alberta BSc Specialization in Computing Science program. Students
in the course-based MSc program are required to complete 30 in graduate
courses, including 18 at the 600-level and a 6 essay course. Students who
do not obtain an average of 2.7 overall in the first year of study may be asked
to withdraw from the graduate program.

The minimum period of residence for the thesis-based MSc is two four-
month terms of full-time attendance at the University of Alberta. There is no
full-time residence requirement for a course-based MSc.

Length of Program
Master’s students are expected to complete their program in less than two
years. The maximum time limit for thesis-based students is four years and for
course-based students is six years.

205.16.3 The Degree of PhD

Entrance Requirements
To be admitted as a provisional candidate for the PhD, a student must
normally have an MSc degree in computing science or a related field. Unusually
qualified applicants having the equivalent of a First-Class Honors BSc degree, or
MSc candidates who perform unusually well in their first session (eight months)
of studies, may be admitted directly into the PhD program.

Program Requirements
A PhD candidate with an MSc degree will be required to take a minimum of
19 in graduate courses at the 600-level (excluding 603) and satisfy the
departmental breadth requirements. The background of the PhD candidate must
be similar to the University of Alberta BSc Honors program. A PhD candidate
who does not obtain an average of 3.3, with no grade lower than B, over the
best three courses in the first year of studies may be asked to withdraw from the
doctoral program, but may be admitted to the MSc program. The major part of
the student’s program will consist of original research, the result of which will be
presented in a doctoral thesis.

The minimum period of residence is two academic years of full-time
attendance at the University of Alberta.

Length of Program
The time required to complete the PhD will vary according to the previous
training of the applicant and the nature of the research undertaken; however,
a minimum of 32 months is normally required. Candidates must complete all
requirements for the degree within six years.

205.16.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject
heading Computing Science (CMPUT).

205.17 Dentistry

Department of Dentistry
2089 Dentistry Pharmacy
University of Alberta
Edmonton, Alberta T6G 2N8
E-mail: dentistry.gradstudies@ualberta.ca
www.dent.ualberta.ca

205.17.1 General Information

The Department of Dentistry offers the MSc and PhD in Medical Sciences
degrees (see §205.42) for post-DDS applicants or for those proceeding from a
BSc or equivalent degree. Research may be carried out in a variety of dentistry-
related disciplines for which faculty members in the department have active
research programs. Inquiries should be directed to the Graduate Coordinator,
Department of Dentistry (www.dent.ualberta.ca).

The Department offers the MSc in Medical Sciences program in the
following areas of specialty: Dentistry, Oral Biology, Orthodontics, and TMD/
Orofacial Pain. The PhD programs are offered in Dentistry, Oral Biology, and
Orthodontics. Inquiries for the Dentistry, Oral Biology, and TMD/Orofacial Pain
programs may be directed to the Graduate Studies and Research Office for the
Department of Dentistry. Inquiries for the Orthodontics program may be directed
to the Director of Orthodontics (www.ualberta.ca/ortho).

205.17.4 The Degree of MSc in Medical Sciences -
Temporomandibular Disorders/Orofacial Pain

Entrance Requirements
The Department’s normal requirements for admission of graduate students
are those of the Faculty of Graduate Studies and Research and a TOEFL score
of at least 580 (paper-based) or 237 (computer-based), or 95 with at least 20
per section (internet-based), where applicable (see §203.2.4). Admission is
dependent upon the recommendation of the Department of Dentistry, Graduate
Committee and the Medical Sciences Graduate Program Committee. Students
enrolled in the PhD in Medical Sciences - Orthodontics will not have the option
of transferring to the MSc in Medical Sciences - Orthodontics program.

Financial Assistance
Although funding from fellowships and studentships may be available on a
competitive basis candidates should be prepared financially for the program.

205.17.2 The Degree of MSc in Medical Sciences -
Dentistry and the Degree of MSc in Medical
Sciences - Oral Biology

The Department of Dentistry offers the degree of MSc in Medical Sciences -
Dentistry and the degree of MSc in Medical Sciences - Oral Biology. The general
description for the MSc program is as presented for all MSc programs in Medical
Sciences (see §205.42 Medical Sciences).

Financial Assistance
See §205.17.4.

General Information
The Department of Dentistry offers an MSc in Medical Sciences -
Orthodontics. Through a combination of didactic and clinical courses, the
program is structured to prepare the dental graduate for an orthodontic practice
and/or an educational appointment. This is a thesis-based program. The clinical
requirements involve successful completion of selected teaching cases (see
§205.42 Medical Sciences).

Application to this program should be made to the Director of Orthodontics
(4051 Dentistry/Pharmacy Centre, University of Alberta, Edmonton, Alberta
T6G 2N8) who responds to enquiries and requests for application packages.
Information about the program and the online application form may be found at
www.ualberta.ca/ortho. The deadline is October 1 for the following September
admission.

205.17.3 The Degree of MSc in Medical Sciences -
Orthodontics

Program Requirements
The requirements for the degree include coursework, seminars, a clinical
component and a thesis. The program of study is determined in consultation with
the Supervisor and Supervisory Committee.

Length of Program
The time required to complete the MSc will vary with the individual
candidate, but normally the program can be completed in three years.

205.17.4 The Degree of MSc in Medical Sciences -
Temporomandibular Disorders/Orofacial Pain

General Information
The Department of Dentistry offers a course-based MSc in Medical
Sciences which focuses on Temporomandibular Disorders (TMD) and Orofacial
Pain (OFP). The program normally commences each September. Lectures,
seminars, and clinical experiences provide an optimal, progressive learning
experience. The clinical program emphasizes participation in differential
Graduate Studies and Research

space, props shop, production offices, wardrobe, dressing rooms and a green
rooms. Students also have access to the University’s Timms Centre for the Arts—a
and to the Master of Arts in Drama degree.

The Department of Drama offers graduate programs leading to the Master
of Fine Arts degrees in Theatre Design, Directing, and Theatre Voice Pedagogy,

The Department of Drama is housed within the University’s Fine Arts
Building, which offers students the opportunity to study and work from a media
room, thrust stage, movement studio, sound studios and design studios.

In addition, the theatre collection in the library is extensive. It offers
particular opportunities for work in expressionism; German, French, and Spanish
drama; and includes a substantial collection of research materials on Canadian
theatre.

The aim of the MFA programs is to train candidates to a level of competency
sufficient to enter the profession.

The MA program, essentially research oriented, also offers training in
 dramaturgy as one of the means by which candidates may be actively involved
in the creative pursuits of the Department, and also prepares for further PhD
studies.

Inquiries should be addressed to the Graduate Coordinator, Department of
Drama.

Entrance Requirements

The Department’s minimum admission requirements are an undergraduate
degree with an average of 3.0 in the last two years of undergraduate work (or
graduate work) at the University of Alberta, or an equivalent qualification from a
recognized institution, and a TOEFL score of 550 where applicable (see §203.2.4).

Interested applicants should check further application details as they relate to
their intended area of specialization on the Department’s website (www.uofaweb.
ualberta.ca/drama/prospectivegrad.cfm).

Financial Assistance

Graduate assistantships are available to qualified students. Graduate
students are also eligible to compete for University and provincial scholarships.

205.18.2 The Degree of MFA

Entrance Requirements

The undergraduate degree (see “General Information: Entrance
Requirements”, above) must normally be a four-year degree in theatre studies
in order for the applicant to be considered eligible for the MFA program. In
addition, numerous practical theatre credits are required in the applicant’s
intended area of specialization along with three letters of recommendation on
the applicant’s professional promise.

Between the academic and the artistic requirements candidates must:

demonstrate a fundamental knowledge of the components of theatre art—acting,
design, and directing; have extensive training and experience in the area of their
intended specialization; and possess sufficient preparation in dramatic literature,
theatre history, and theatre aesthetics.

Program Requirements

Required courses depend on the area of specialization and the
undergraduate background of the student; however, the MFA program normally
consists of ★35. In addition, an acceptable creative thesis project must be
presented in performance.

No language other than English is required for the degree.

Length of Program

Candidates for the program in Directing are normally required to complete
two years of study in residence. In certain circumstances advanced standing
may be accorded in the candidacy program for previous theatre work accredited
by the Department. For the MFA Theatre Design only, the minimum period of
residency is one academic year for candidates holding a BFA Theatre Design
Degree from the University of Alberta, or equivalent; all other MFA Theatre
Design candidates require a minimum period of residency of two academic
years. The MFA in Theatre Voice Pedagogy candidates require a minimum period
of residency of two academic years.

205.18.3 The Degree of MA

Entrance Requirements

A candidate must hold a bachelor’s degree (or its equivalent) from a
recognized institution. To be accepted, the candidate must demonstrate to the
Department familiarity with the artistic and practical components of theatre art,
as well as sufficient preparation in theatre history and criticism. Candidates are
required to submit a sample of their expository writing.

Program Requirements

The Department offers a thesis-based and a course-based MA.

The thesis-based MA program normally consists of some practical training in
research skills and ★24 at the graduate level. Students are ordinarily required
to take DRAMA 601, 608, and 609 as part of these requirements. Candidates
must present an acceptable thesis and defend it orally.

The course-based MA consists of ★27 graduate-level courses, including:
DRAMA 601 (★3) and one of DRAMA 608 (★3) or DRAMA 609 (★3). With
the Department's approval, students may include up to a maximum of ♦️9 in graduate-level courses offered outside the Department as part of their MA coursework. Students are also required to make a public presentation of a major research paper (Drama 695).

Both thesis-based and course-based candidates must demonstrate a reading knowledge of one approved language other than English.

**Length of Program**

The thesis-based MA requires three academic terms of coursework and one additional term of thesis-related writing and research. The course-based MA requires one academic year. No full-time residency is required for the latter.

205.18.4 **Graduate Courses**

Graduate courses can be found in §231, Course Listings, under the subject heading Drama (DRAMA).

Graduate courses offered by other departments may be taken with the consent of the student’s Drama department advisor.

205.19 **Earth and Atmospheric Sciences**

Department of Earth and Atmospheric Sciences

1-28 Earth Sciences Building

University of Alberta

Edmonton, Alberta T6G 2E3

E-mail: EAS.Inquiries@ualberta.ca

www.ualberta.ca/EAS

205.19.1 **General Information**

The Department offers the degrees of Master of Arts (MA), Master of Science (MSc), and Doctor of Philosophy (PhD) in Earth and Atmospheric Sciences.

Active research fields, which are listed on the Department’s website (www.ualberta.ca/eas), include aquatic and sedimentary geochemistry; Arctic environments; atmosphere and ocean modelling; basin analysis; biogeography; carbonate sedimentology; clastic sedimentology; climatology; community, health and environment; diamond geology; economic geology; environmental values, attitudes and behaviors; environmental chemistry; environmental geology; experimental petrology; fluvial and glacial geomorphology; geochemistry; geochronology; geographic information systems; geomicrobiology; geotectonics; glaciology, glacier hydrology and glacier chemistry; global change; hot-springs; human-environment interactions; human dimensions of environmental hazards; hydrogeology; ichnology; igneous, sedimentary and metamorphic petrology; invertebrate and vertebrate paleontology; isotope geology; marine icing; meso-scale meteorology; metaliferous mineral deposits; micrometeorology; micropaleontology; mineralogy; paleoecology; palynology; phylloclimatology; Mg-calcite; microfacies analysis; mineralogy; stratigraphy; structural geology; tectonics; and volcanology.

The Department will approve only thesis topics which lie within the research expertise of one or more of its faculty members.

The Department of Earth and Atmospheric Sciences has research laboratories, instructional facilities, and technical support for numerous graduate students.

**Entrance Requirements**

The Department’s minimum admission requirements are a relevant undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §203.2.4).

**Financial Assistance**

In addition to scholarships administered by the University, a number of graduate assistantships and discipline specific scholarships are awarded by the Department.

205.19.2 **The Degrees of MA and MSc**

**Program Requirements**

Requirements for the MA and MSc degrees include satisfactory completion of a thesis and at least ♦️9 of course work at the University of Alberta, with not more than ♦️6 from the same instructor. More course work will be necessary if there is a significant change in discipline area from the undergraduate program. Normally not more than ♦️3 of the required course work may be at the 400-level within the Department and only one ♦️3 research or reading (directed studies) course may be counted towards the requirement, except with permission of the Department.

There is no language requirement for the degrees of MA and MSc.

Length of Program

An MA or MSc program should normally be completed in two academic years of work beyond an undergraduate degree.

205.19.3 **The Degree of PhD**

**Program Requirements**

The essential requirement for the degree of PhD is the planning, execution, and reporting of high quality research. A candidacy examination is taken normally within 20 months after admission to the program; to ensure that a student has the necessary knowledge, background, and ability to complete a PhD thesis. At least ♦️18 of course work beyond the undergraduate degree is required. At least ♦️9 of the required course work must be taken at the University of Alberta. Not more than ♦️6 of the University of Alberta courses may be taken from the same instructor, except with permission of the Department. Normally, not more than ♦️3 of course work may be at the 400-level within the Department and only one (♦️3) research or reading (directed studies) course may be counted towards the requirement.

A reading knowledge of foreign languages is not a formal requirement, although it may be required if appropriate to the particular program.

The minimum period of residence is one academic year of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of three years of study and research is normally required. A PhD program should normally be completed in four academic years of work beyond a master's degree or five academic years beyond an undergraduate degree if no master's degree has been completed.

205.19.4 **Graduate Courses**

Graduate course descriptions can be found in §231, Course Listings, under the following subject headings:

- Earth and Atmospheric Sciences (EAS)
- Paleontology (PALEO)

205.20 **East Asian Studies**

Department of East Asian Studies

400 Arts Building

University of Alberta

Edmonton, Alberta T6G 2E8

E-mail: eastasia.grad@ualberta.ca

205.20.1 **General Information**

The Department of East Asian Studies offers programs leading to the Master of Arts degree in Chinese literature, Japanese language and linguistics, Japanese literature, and East Asian Studies.

The application deadline for September admission is January 15. Applicants seeking assistantships are required to submit complete applications no later than December 1.

Requests for additional information should be addressed to the Graduate Coordinator, Department of East Asian Studies.

**Entrance Requirements**

The Department's minimum admission requirements are an undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 600 where applicable (see §203.2.4).

The specific requirements regarding language for the four areas:

1. Chinese literature: four years of university-level Chinese (or the equivalent) including one year of Classical Chinese.
4. East Asian Studies: four years of university-level study (or the equivalent) in either Chinese or Japanese.

The Department is prepared to accept a limited number of students who are otherwise well-qualified and show language aptitude (demonstrated to the satisfaction of the Department by passing an exam or some other form of assessment) but who have less than the above amount of preparation in language. Such students will be required to spend one or two extra years in
their MA program to meet this qualification and will be admitted initially as a qualifying graduate student.

Financial Assistance
The Department annually appoints a number of graduate research and teaching assistantships. Graduate students may also be eligible for various University fellowships and bursaries. For details consult www.gradstudies.ualberta.ca

Application forms, information about fellowships, bursaries, etc., may be obtained from the Graduate Coordinator, Department of East Asian Studies.

205.20.2 The Degree of MA

Program Requirements
In addition to the thesis, a minimum ★18 (normally six ★3 courses) will usually be required for the degree. The exact number of courses and their areas shall be determined on an individual basis.

For graduate students in Chinese, Japanese, and the East Asian Studies, graduate courses from other departments that can strengthen the degree may be counted as part of the program. For example, for students in literature, courses in Western literary theory such as Comparative Literature 547 and 548 or other appropriate graduate-level courses in Comparative Literature, Women's Studies, or English may be considered as part of the degree. The final choice and number of such courses to be counted will be at the recommendation of the student's advisor and at the discretion of the Department's Graduate Studies Committee.

Length of Program
The time required to complete the MA programs will vary with the individual candidate. It is assumed a candidate will normally complete the program requirements in two years. The time limit for completing the MA degree is four years from the date of registration in the program. Residency requirements involves full-time enrolment for two terms.

205.21 Economics

Department of Economics
8-1A Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4
E-mail: econapps@ualberta.ca

205.21.1 General Information

The Department of Economics offers programs leading to the Master of Arts and Doctor of Philosophy degrees.

Entrance Requirements
The Department's minimum admission requirements are an undergraduate degree with a grade point average of at least 3.0 in economics courses, and a TOEFL score of 580 where applicable (see §203.2.4). A GPA of 3.2 in MA work is required for admission to the PhD program.

Applicants whose most recent degree is from a non-Canadian university are required to write the Graduate Record Examinations (verbal, quantitative, and analytical sections) administered by the Educational Testing Service (Princeton, NJ). The examinations should be written early enough for scores to be available at the same time as the applicant's other supporting documents. No minimum cutoff score is specified, because GRE results are used only in conjunction with other indicators of potential academic success. The Graduate Program Committee will waive this requirement only in exceptional circumstances.

Students entering a graduate program in economics are required to have or to make up credit in a basic course in calculus and one in statistics.

Note: These courses are required in addition to the candidate's normal graduate program.

Inquiries regarding details of programs offered within the Department should be directed to the Graduate Program Office.

Financial Assistance
The Department automatically considers all applicants for graduate teaching assistantships. To ensure consideration the candidate's application and supporting documents must be received by the Department before February 1. Applications received after that date will be considered for assistantships only if funds are still available. Details of scholarships and other sources of financial assistance are included at www.gradstudies.ualberta.ca

205.21.2 The Degree of MA

The Department of Economics offers two programs: The MA in Economics and the MA in Economics and Finance. The MA in Economics is a course-based program consisting of at least ★27 including an independent research project (★3). The MA in Economics and Finance, offered collaboratively with the Department of Finance and Management Science of the School of Business is also a course-based program requiring ★42 including an independent research project (★3).

Except in special cases, no language other than English is required for the degree of MA.

The course-based MA in Economics and MA in Economics and Finance have no minimum residence period and can be completed on a purely part-time basis.

Length of Program
The time required to complete either of the MA programs will vary according to the previous training of the applicant. Under normal circumstances, the MA in Economics can be completed on a full-time basis in 12 months or less. The MA in Economics and Finance requires a minimum of four, four-month academic terms of full-time study and therefore requires 20 months to complete.

205.21.3 The Degree of PhD

Program Requirements
The PhD program consists of at least ★36 and a thesis. Detailed program requirements, including standards of performance, may be obtained by consulting the Department.

It should be noted that students in the PhD program can choose to specialize in Environmental and Natural Resource Economics where this specialization is offered collaboratively by the Department of Economics and the Department of Rural Economy.

Except in special cases, no language other than English is required for the PhD.

The minimum period of residence is three academic years of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the PhD will vary according to the individual candidate; however, a minimum of four years is normally required.

205.21.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Economics (ECON).

205.22 Educational Policy Studies

Department of Educational Policy Studies
7-104 Education North
University of Alberta
Edmonton, Alberta T6G 2G5
E-mail: ian.white@ualberta.ca
www.uofaweb.ualberta.ca/edpolicystudies/

205.22.1 General Information

The Department of Educational Policy Studies offers master’s and doctoral programs in the following specialized areas of study: Adult Education; Educational Administration and Leadership; Indigenous Peoples Education; and Theoretical, Cultural, and International Studies in Education.

The Department of Educational Policy Studies strives to develop critical and creative scholars who have a substantive understanding of the important systemic and contextual factors that bear upon Canadian and international education.

The Adult Education specialization provides advanced study for individuals who work with adults in the capacity of teaching, administration, or community leadership within a variety of institutional, community, and workplace settings throughout the world.

The Educational Administration and Leadership specialization prepares Canadian and international candidates for a broad range of administrative, supervisory, and leadership positions in schools, school systems, postsecondary institutions, departments of education, other government agencies, professional associations, and similar organizations.

The Indigenous Peoples Education specialization combines the conventional parameters and standards of university education with the collective efforts of Indigenous students, scholars, and elders to develop scholars who will preserve and respect the values, integrity, and knowledge of indigenous peoples worldwide.

The Theoretical, Cultural, and International Studies in Education specialization involves the study of cultural, economic, historical, philosophical, political, and social influences on education in local, national, and global contexts, and prepares students for various types of academic and professional work.

Graduate study in the above specializations is supported by a diverse group of full-time faculty, whose active research and publications (listed on the website at www.education.ualberta.ca) are in the following general areas: aboriginal
and indigenous perspectives in education; administration, leadership, and governance; careers and work; cultural, sociological, philosophical, historical, and political analysis of education; educational discourses and systems of thought; educational policy; educational reform; equity, diversity, and inclusivity in education; adult teaching and learning, professional development, and program evaluation; international and global education; and postsecondary education.

**Entrance Requirements**

The minimum admission requirements for the MEd are an undergraduate degree with a grade point average of 3.0 obtained during the last 60 at the University of Alberta, or an equivalent standing from another recognized institution.

The minimum admission requirements for the EdD and PhD are a master’s degree with a grade point average of 3.5 obtained during the last 60 at the University of Alberta, or an equivalent standing from another recognized institution.

In the case of both master’s and doctoral programs, international applicants from non-English speaking institutions must have a minimum TOEFL score of 580 (paper-based); 237 (computer-based); 93 (internet-based) with a minimum of 24 on the speaking and writing bands of the test. Other acceptable examinations include a minimum score of 70 on the CAEL exam, a minimum score of 88 on the MELAB and a score of 6.5 with a minimum score of 6.3 on each band on the IELTS.

**Financial Assistance**

The Department offers graduate teaching assistantships and research assistantships to some students based upon application and academic merit.

The University also offers support in the form of scholarships and awards to some students based upon application and/or nomination.

### 205.22.2 The Degree of MEd

**Program Requirements**

The MEd degree has two routes. The course-based route normally requires a minimum of 36 credits in graduate courses and a 3-credit capping exercise.

The thesis-based route normally requires a minimum of 24 credits in graduate courses and a thesis.

All students are admitted into the course-based route. There are limited spaces available in the thesis-based route to which students may make application following admission.

No language other than English is required for the degree.

**Length of Program**

There is no residence requirement for the MEd program. Normally, the thesis-based degree must be completed within four years and the course-based degree within six years.

### 205.22.3 The Degrees of EdD and PhD

**Program Requirements**

The EdD and PhD degrees require a minimum of 36 credits, which normally includes a minimum of 24 credits in graduate courses and a dissertation.

No language other than English is required for the degree.

**Length of Program**

Normally, doctoral degrees must be completed within six years.

**Patterns of Study**

When doctoral students register full-time, they must maintain full-time registration throughout the remainder of their program to completion.

The minimum period of residence for the PhD degree is two academic years of full-time study at the University of Alberta.

Students pursuing the EdD degree may choose one of the following patterns to ensure intensity of study and continuity of academic content:

- **Pattern A**: As part of the program, there will be a period of full-time study for a minimum of 12 continuous months. Students are encouraged to complete some courses before the period of full-time study.
- **Pattern B**: Students must complete at least 9 in each of the first three years. Students are expected to have significant contact with the University of Alberta during these three years through time spent on campus and through interactions with the faculty and graduate students at the University. The candidacy examination must be completed by the end of year four.

### 205.22.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the following subject heading:

- Education - Policy Studies (EDPS)

---

**205.23 Educational Psychology**

Department of Educational Psychology

6-102 Education North

University of Alberta

Edmonton, Alberta T6G 2G6

E-mail: edpygrad@ualberta.ca

[www.uofaweb.ualberta.ca/edpsychology](http://www.uofaweb.ualberta.ca/edpsychology)

---

**205.23.1 General Information**

The Department offers programs leading to the degree of PhD in the following specializations: Psychological Studies in Education (Research Stream or Professional School Psychology Stream); Counselling Psychology (CPA accredited); Special Education; Measurement, Evaluation and Cognition; and Studies in Teaching and Learning English as a Second Language. Programs leading to the degree of MEd are offered in the following specializations: Psychological Studies in Education (Research Stream or Professional School Psychology Stream); Counselling Psychology; School Counselling; Measurement, Evaluation and Cognition; General Special Education; and Teaching English as a Second Language (TESL). Included in the general Special Education program are two separate programs, a general program focusing on mild to moderate disabilities and one with a concentration on deaf studies. A course-based MEd program with a specialization in School Counselling is offered by the Department. Applicants following this program are selected based on their potential to serve as school counsellors.

The MEd and PhD programs are designed to provide specialized education and training for teachers, administrators, consultants, psychologists, academics, research personnel, and others requiring specialized training in the program areas. Normally, a student’s graduate program includes a combination of professional and research graduate-level courses offered by the Department, the Faculty of Education and other Departments and Faculties in the University.

**Entrance Requirements**

The Department’s minimum admission requirements are a four-year undergraduate degree with a minimum grade point average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and an internet-based TOEFL score of 88 where applicable (see §203.2.4). For details on alternate methods of assessing English skills, see §203.2.4.

The TESL program requires an internet-based TOEFL score of 98 with a minimum of 28 in speaking, and 24 in listening and writing components for individuals whose first language is not English. More details concerning admission requirements, including prerequisite courses, within each area may be found on the Department’s website at [www.uofaweb.ualberta.ca/edpsychology](http://www.uofaweb.ualberta.ca/edpsychology).

**Financial Assistance**

In addition to scholarships awarded by outside granting agencies such as the Social Sciences and Humanities Research Council of Canada and by the University such as the Faculty of Graduate Studies and Research Scholarships, the Department offers financial support to some students in the form of graduate research assistantships and graduate teaching assistantships. Assistantship applications are available to students admitted to the Department.

**205.23.2 The Degree of MEd**

**Program Requirements**

For the thesis-based MEd, students must complete a minimum of 24-27 in graduate-level courses in addition to a thesis. All candidates are required to demonstrate competence in research methods, and skills specific to their area of specialization. The required competence is usually demonstrated by completion of EDPY 501 and courses specific to each specialization area. For the course-based MEd, students must complete a minimum of 24 credits in graduate-level courses in addition to a capping exercise or project.

A course-based MEd in School Counselling has been developed requiring 98 credits in graduate-level courses. Students accepted into the program will be practising teachers, and the program is designed to be taken on a part-time basis. Applicants are accepted into this program in alternate, odd years. Interested students should contact the Department of Educational Psychology.

More details concerning required coursework within each area may be found within the Department’s website at [www.uofaweb.ualberta.ca/edpsychology](http://www.uofaweb.ualberta.ca/edpsychology). Each student, in consultation with the Faculty advisor assigned at the time of admission, will develop a program of study to suit the student’s specific background and area of interest.

**Length of Program**

Students have a maximum four years to complete a thesis-based MEd. The course-based MEd must be completed in a maximum of six years. Students who
are admitted to a MEd thesis-based degree program and who initially register as full-time students in these programs must register full-time for the remainder of their program.

205.23.3 The Degree of EdD

205.23.4 The Degree of PhD

Program Requirements
The PhD program consists of a minimum of 24 or more depending on the area of specialization, a written comprehensive examination, a candidacy examination, and the preparation and defence of a thesis on an approved topic.

No language other than English is required.

Students admitted to a PhD program must register full time throughout their program. Both the Counselling Psychology and School Psychology programs require a one-year supervised internship. More details concerning required coursework and the development of the thesis within each area may be found at the Department’s website: www.uofaweb.ualberta.ca/edpsychology. Each student, in consultation with the Faculty advisor assigned at the time of admission, will develop a program of study to suit the student’s specific background and area of interest. By the end of the first year of study, PhD students must have a supervisory committee consisting of at least three faculty members related to the student’s area of study.

Length of Program
Candidates in the PhD program have a maximum completion time of six years. A typical time for completion of the PhD degree is four years.

205.23.5 Graduate Courses
Graduate courses can be found on Bear Tracks, Course Listings, using the following subject headings:
- Education – Instructional Technology (EDIT)
- Education – Psychology (EDPY)

205.24 Educational Studies
Educational Studies Program
832 Education South
University of Alberta
Edmonton, Alberta T6G 2G5
E-mail: mesinfo@ualberta.ca
www.uofaweb.ualberta.ca/mes

205.24.1 General Information
The MEd in Educational Studies offers leadership development for educators and administrators through either of the program strands, Leadership and School Improvement (K–12) or Leadership and Educational Improvement in Post Secondary Education. Each program is designed to provide theory, skills, and insights into practice that can be readily applied in the workplace. Educators, educational managers, and administrators may use this degree to enhance their professional knowledge and improve their educational practice. The programs, designed for working professionals, are completed in a minimum of two years through a combination of summer residencies and online courses in a cohort model.

Entrance Requirements
Minimum admission requirements are a four-year baccalaureate degree or equivalent, with a minimum grade point average of 3.0 on a four-point scale or equivalent (based on the last 80 units of course work). Applicants are required to have at least two years of teaching experience and, where applicable, a TOEFL score of at least 580 (237 computer-based).

205.24.2 The Degree of MEd

Program Requirements
This is a course-based program that requires the completion of 30 in graduate-level course work, including 24 of required core courses. One of the core courses is a 3 research project. Students are required to attend two three-week summer residencies, one during their first year and one during their second year. Information on graduate courses is available at www.uofaweb.ualberta.ca/mes.

Students must maintain standards acceptable to the Faculty of Graduate Studies and Research to remain in the program. The program must be completed within six years from admission.

Length of Program
Core courses are scheduled to permit completion of the degree by part-time study within two years but can be extended up to six years from admission.

205.24.3 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject heading Educational Studies (EDU)

205.25 Electrical and Computer Engineering
Department of Electrical and Computer Engineering
Electrical and Computer Research Facility (ECERF)
University of Alberta
Edmonton, Alberta T6G 2V4
E-mail: ecegrad@ece.ualberta.ca
www.engineering.ualberta.ca/ece/

205.25.1 General Information
The Department of Electrical and Computer Engineering offers graduate courses leading to the MEng, MSc, and PhD degrees to qualified graduates of recognized universities.

Research is being carried out in a number of areas, including biomedical engineering; control systems; communication systems; computer, microelectronic devices, circuit and systems; digital signal and image processing; micro-electromechanical systems (MEMS) and nanosystems; electromagnetics, lasers, photonic, plasma; power engineering and electronics; software engineering and intelligent systems.

Entrance Requirements
The Department’s minimum admission requirements are an undergraduate degree with an average of 3.0 in the last two years of full-time study (or equivalent) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 580 where applicable (see §205.24.3).

Financial Assistance
Financial assistance is available on a competitive basis in the form of research assistantships, teaching assistantships, tuition scholarships and a variety of awards administered by the University and affiliated institutions. Details are found at www.gradstudies.ualberta.ca

205.25.2 The Degree of MSc

Program Requirements
Normal requirements for the MSc degree are 15 in graduate courses plus ENGG 600, ECE 601 and a thesis. MSc candidates take ECE 601 (Research Project Definition) in the second term of their program.

Students who do not obtain an average of 3.0 overall in the first year of study may be required to withdraw from the graduate program. Students whose average is above 2.7 but below 3.0 may be recommended for transfer into the MEng program.

The minimum period of residence is two consecutive four-month terms of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the MSc will vary according to the previous training of the applicant and the nature of the research undertaken; however, a typical time of two years is normally required.

205.25.3 The Degree of MEng

Program Requirements
The Master of Engineering program consists of one of two options:
Option 1: 24 at the graduate level plus a project which is equivalent to 6.
Option 2: 27 at the graduate level plus a project which is the equivalent to 3.
ENGG 600 is required. The minimum period of residence is one four-month term of full-time attendance at the University of Alberta.

Length of Program
A candidate may complete the Master of Engineering program in a minimum of nine months. The maximum time permitted for the completion of the program is four years from the date of the first registration.

205.25.4 The Degree of PhD

Program Requirements
For the PhD program, course requirements depend upon individual circumstances and must be approved by the Department. Emphasis is on research leading to a thesis of high calibre. The student’s supervisory committee will recommend courses to be taken by the student to make up for course...
deficiencies and to support thesis research. All PhD candidates must take ECE 602 and submit a research proposal. Completion of ENNG 600 is also required.

Students in the doctoral program are expected to maintain a course average of 3.3 or higher before proceeding to their candidacy examinations. Students whose average is above 3.0 but below 3.3 may be recommended for transfer into the MSc program.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the program will vary with the individual candidate.

### 205.25.5 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading:

- Electrical and Computer Engineering (ECE).

### 205.26 Elementary Education

**Department of Elementary Education**

591 Education South
University of Alberta
Edmonton, Alberta T6G 2G5
E-mail: educ.elem@ualberta.ca
FAX: (780) 492-7022
www.uofalberta.ca/education/

#### 205.26.1 General Information

The Department of Elementary Education offers graduate programs leading to the degrees of MEd, EdD, and PhD, in the following areas: Art; Curriculum Studies; Early Childhood Education; ESL; Second Language; Instructional Studies; Language Arts; Mathematics; Physical Education; Music; School Libraries (MEd only); Science; Social Studies; and Teacher Education (PhD only). These programs are designed to help prepare consultants and supervisors, master teachers, and personnel for teacher education institutions.

Application forms for admission to graduate programs can be secured at www.gradstudies.ualberta.ca

#### Entrance Requirements

The Department’s minimum admission requirements to the master’s program include a valid teaching certificate, and an undergraduate degree equivalent to a BEd degree from the University of Alberta with a minimum grade point average of 3.0 on the last 48 credits completed. Successful teaching experience is also required, and where applicable (see §203.2.4), candidates must have a TOEFL score of at least 580.

To be admitted to the EdD or PhD program a candidate is normally required to have the equivalent of a University of Alberta MEd degree, a minimum GPA of 3.3, as well as successful teaching experience. Under certain circumstances it is possible to enter with the equivalent of the BEd degree, but in such instances potential candidates may be required to complete additional course requirements. Candidates must have a TOEFL score of at least 580.

#### Financial Assistance

A limited number of graduate assistantships are available.

### 205.26.2 The Degree of MEd

**Program Requirements**

Two routes to the MEd degree are available: a thesis-based route and a course-based route. Requirements in the thesis-based route normally consist of 24 credits plus a thesis. Requirements for the course-based MEd degree normally include graduate coursework equivalent to 27 credits plus a capping experience (3 credits). There is no residence requirement for the thesis-based master’s program, but a one-year residency is recommended.

There is no residence requirement for the course-based master’s program.

#### Length of Program

The time required to complete the MEd program varies with the individual candidate and the route selected. The thesis-based MEd may be completed in two years and must be completed within four years. The course-based MEd may be completed in two years and must be completed within six years.

### 205.26.3 The Degree of EdD

**Program Requirements**

The EdD program requirements are individually defined and normally range from 24 to 48 plus a dissertation.

The residence requirement for the EdD program is met by the completion of 12 months of continuous full-time study.

#### Length of Program

The time required to complete the EdD program will vary with the individual candidate; however, normally four to five years are required and the program must be completed within six years.

### 205.26.4 The Degree of PhD

**Program Requirements**

The PhD program requirements are individually defined and normally range from 24 to 48 plus a dissertation.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta. This involves four (four-month) terms of full-time study with a minimum of 9 credits per term.

#### Length of Program

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, normally four to five years of study and research are required and the program must be completed within six years.

### 205.26.5 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Elementary Education (EDEL).

### 205.27 English and Film Studies

**Department of English and Film Studies**

3-5 Humanities Centre
University of Alberta
Edmonton, Alberta T6G 2E5
E-mail: EnglGrad@mail.arts.ualberta.ca

#### 205.27.1 General Information

The Department of English and Film Studies offers graduate work leading to the Master of Arts and Doctor of Philosophy degrees in English language, literature and culture.

The Department is large and various, and offers courses in all areas of the literature and culture of the English-speaking world, from Old English to contemporary writing. It is particularly strong in the areas of Renaissance, nineteenth-century, Canadian, and postcolonial literature, in cultural studies, in women’s writing, and in creative writing.

The University’s libraries contain a 6,000,000 volume equivalent, with holdings in English, Canadian, American, and postcolonial literature totalling more than 200,000 volumes. Special collections in English literature include early editions of Bunyan and Milton; facsimiles of the Dove Cottage Wordsworth papers; first and rare editions of Austen, Scott, Thackeray, Dickens (including serial parts); Emily Dickinson manuscript facsimiles; exceptionally large holdings in Lawrence, Yeats, and Joyce; and manuscripts and archives in the literature of Canada, including the manuscripts of the poetry of Dorothy Livesay from 1919-1974. Microfilm holdings include a rare complete run of both Early English Books series, and an important collection of over 28,000 nineteenth-century British and American playtexts.

#### Entrance Requirements

The normal requirements for admission to the MA program include an Honors degree in English or its equivalent in number of courses (60 credits), coverage (at least 9 in each of the major historical periods [Old and Middle English, Early Modern, Restoration and Eighteenth Century, Nineteenth Century, and Twentieth Century literature and culture]) and in Canadian, American, Aboriginal, and postcolonial literature and culture, as well as some grounding in literary and cultural theory), and high academic standing (a minimum 3.0 GPA in courses in English). Applications, complete with supporting documentation, must be submitted to the English and Film Studies Department by January 7.

#### Financial Assistance

The Department has regular provision for graduate assistantships. (Part-time MA students are ineligible for Department financial support.) Application should be made by January 7. Because of a generous bequest from a former student, the Department is able to offer travel bursaries to allow attendance at conferences or study in out-of-town libraries and archives (usually up to $1000 each). PhD and MA students are urged to apply, in the University’s General Scholarship competition, for awards such as the Province of Alberta Scholarships and Fellowships as well as for external funding such as from the Social Sciences and Humanities Research Council of Canada (SSHRC).
205.27.2 The Degree of MA

Program Requirements
For a student with an Honors BA in English (or its equivalent) the MA program will consist of one of two options: ★18 in graduate courses in the Department, some practical training in bibliography, a thesis equivalent to ★6, and an oral defence of the thesis; or ★21 in graduate courses in the Department, some practical training in bibliography and a project equivalent to ★3. The course-based option may be pursued on a part-time basis. The MA program of a student without an Honors BA in English may require more courses, depending upon the number of English courses that have been taken as an undergraduate.

Demonstrated proficiency in a language other than English will be required of all students. Students should consult the English Department’s annually published Graduate Guide for further information.

For full-time MA students the minimum period of residence is two four-month terms of full-time attendance at the University of Alberta for candidates with an Honors degree in English (or its equivalent); for candidates without an Honors BA in English the residence requirement may be somewhat longer.

Length of Program
The time required to complete the MA will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 12 months is normally required.

205.27.3 The Degree of PhD

Program Requirements
A student with an MA in English (or its equivalent) may be admitted as a provisional candidate for the PhD degree. The program of a provisional candidate will normally include ★18 in graduate courses (up to three of which may be taken outside the Department of English), as well as departmental examinations, and an oral candidacy examination. Before the departmental examinations, PhD students must demonstrate proficiency in two languages other than English or advanced knowledge of one. Students should consult the English Department’s annually published Graduate Guide for further information. After a student has passed all examinations, the student will become a candidate for the PhD and will then submit a thesis and make an oral defence of the thesis.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the PhD will vary with the individual candidate; however, a minimum of two years of study and research is normally required.

205.27.4 Graduate Courses

Graduate courses may be found in §231 Course Listings, under the subject heading English (ENGL).

205.28 Faculté Saint-Jean

Faculté Saint-Jean
8406, rue Marie-Anne Gaboury (91 St.)
E-mail: fsj@gpo.srv.ualberta.ca

205.28.1 General Information

Faculté Saint-Jean offers graduate work leading to a Master of Education degree specializing in Language and Culture and a Master of Arts degree specializing in Canadian Studies. These multidisciplinary programs recognize the uniqueness of the Faculté and enable students to pursue studies in French at the master’s level.

205.28.2 The Degree of MEd

This program proposes a multidisciplinary study of theories of language and culture and educational practices. The program is oriented to the school milieu and its practitioners and its instructional program is designed to develop competencies as master teachers, specialists in the field of immersion and Francophone education, and professional educators who are prepared to assume a leadership role in their educational milieu.

Prospective students should consult the Graduate Program Coordinator at Faculté Saint-Jean for further information on the program.

Entrance Requirements
Faculté Saint-Jean’s requirements for admission to the Master of Education program are as follows:

1. A baccalaureate degree with a cumulative average of 3.0 or equivalent in the last ★60 of a program with a substantial component from the areas of Education or the Social Sciences.
2. Two years of experience as a professional in the field of Education.
3. Successful completion of a French language proficiency examination with a grade of C+ or more in both oral and written components.
4. Acceptance by the Faculty of Graduate Studies and Research.

Program Requirements
Two routes to the MEd degree are available: a thesis-based route and a course-based route. The program consists of ★30. Students in the thesis-based MEd route must complete seven courses (★21), as well as submit and successfully defend a thesis. Students in the course-based MEd route must complete nine courses (★27) and present a final capping exercise (★3).

Structure of the Program
All students registered in the MEd program are required to take three compulsory courses (★9). Students in the thesis-based MEd program must complete a research seminar for an additional ★3. The remaining courses must be selected in consultation with the Graduate Program Coordinator of Faculté Saint-Jean.

Faculté Saint-Jean offers a number of optional courses to enable students to orient themselves in either educational administration or curriculum and learning.

1. Compulsory courses:
   - M EDU 500 or 501 (★3)
   - M EDU 520 or 521 (★3)
   - M EDU 580 (★3)
   - M EDU 582 (★3) compulsory only for students in the thesis-based route.

2. Optional courses:
   - thesis-based route (★9)
   - course-based route (★18)
   - Orientation in educational administration:
     - M EDU 540 (★3)
     - M EDU 560 (★3)
     - M EDU 561 (★3)
     - M EDU 562 (★3)
   - Orientation in curriculum and learning:
     - M EDU 511 (★3)
     - M EDU 531 (★3)
     - M EDU 532 (★3)
     - M EDU 541 (★3)

3. Thesis or Capping exercise (★3)

Length of Program
In order to obtain an MEd degree, students in the thesis-based route must complete all the requirements within four years of the time they first register as candidates in the MEd program. Candidates in the course-based route must complete all the requirements within six years.

Graduate Courses
Graduate courses may be found in §231 Course Listings, under the subject headings Maîtrise en sciences de l’éducation (M EDU) and Thesis (THES).

205.28.3 The Degree of MA

This program proposes a multidisciplinary and interdisciplinary study of Canada, including the study of Canada’s francophones. Emphasis is placed on culture and institutions in relation to socio-political conflicts, historical and social contexts. The program explores relations of identity/differences, sex/gender, race, language and class; nationalism, regionalism and globalization; economy, society and state.

Prospective students should consult the Graduate Program Coordinator at Faculté Saint-Jean for further information on the program.

Entrance Requirements
Faculté Saint-Jean’s requirements for admission to the Master of Arts program are as follows:

1. A baccalaureate degree with a cumulative average of 3.0 (or equivalent) in the last ★60 of a program with at least ★30 of senior undergraduate courses, or the equivalent, in Canadian Studies or courses related to Canadian Studies (courses recognized by the academic institution of the student).
2. Three letters of reference sent directly to the Faculté Saint-Jean.
The Faculty of Arts offers a series of courses for teaching assistantship or in curriculum and pedagogy.

(1) Mandatory courses:
- MEU 500 or 501 (•3)
- MEU 520 or 521 (•3)
- MEU 580 (•3)
- MEU 582 (•3) mandatory only for students enrolled in the course with a thesis.

(2) Optional courses:
- course with a thesis (•9)
- course without a thesis (•12)

Orientation in educational administration:
- MEU 540 (•3)
- MEU 550 (•3)
- MEU 561 (•3)
- MEU 562 (•3)

Orientation in curriculum and pedagogy:
- MEU 511 (•3)
- MEU 531 (•3)
- MEU 532 (•3)
- MEU 541 (•3)

(3) Thesis or synthesis activity (•3)

Duration of the program:
To obtain the diploma of MEd, candidates enrolled in the course with a thesis must complete all the requirements of the program within four years. Those in the course without a thesis must complete all the requirements of the program within six years.

La liste des cours
The courses of the program of MA in arts in sciences of the education appear in the 5237, Course Listings, under the categories Maitrise in sciences of the education (MEU) and Thesis (THES).

205.28.6 Maîtrise en arts
This program proposes a multidisciplinary and interdisciplinary study of Canada, including the study of francophones and Canadians. It is interested in particular in the culture and institutions in relation to the conflicts of socio-political, historical and social contexts. The orientations of the program include the relations of identities/differences, of sex/gender, of race, language and classes, nationalism, regionalism and globalization, relations of economy, society and state.

The candidates must consult the Coordinator of the program of the studies of the Faculty of Saint-Jean, in order to obtain more information.

Conditions of admission
The conditions of admission to the program of MA in arts in sciences of the education are as follows:

(1) The acquisition of a baccalauréat universitaire with a cumulative minimal of 3.0, or the equivalent, in the 60 courses of an program mainly in the language of instruction or sciences sociales.

(2) A minimal experience of at least two years as a professional in education.

(3) The success in an examination of competence in French (oral and written) with a minimal note of C+ in each examination.

(4) The approval of the School of Graduate Studies and Research.
205.29 Health Promotion Studies
Centre for Health Promotion Studies
School of Public Health
University of Alberta
5-10 University Terrace
8303-112 Street
Edmonton, Alberta T6G 2T4
E-mail: health.promotion@ualberta.ca
www.chps.ualberta.ca

205.29.1 General Information
The graduate programs in Health Promotion (course-based and thesis-based) respond to the demand from individuals in the health sector to provide integrated multidisciplinary programs focused on the new knowledge and skills needed to successfully engage in health promotion activities. Strategies for health promotion are comprehensive and include research, teaching, advocacy, community development, social marketing, program development, delivery and evaluation, and policy development and implementation.

Health Promotion activities are widely recognized as essential for improving the health of the public. Such activities are particularly important as the health system moves toward a wellness perspective and individuals and communities are encouraged to take increased responsibility for their health. The types of health promotion workers who would benefit from the graduate programs include health educators, community nurses, dietitians and nutritionists, occupational and physiotherapists, fitness and lifestyle counsellors, dental hygienists, occupational health workers, workers in drug and alcohol prevention, sexuality educators, and smoking cessation counsellors, among others.

Students graduating with the Postgraduate Diploma will acquire the theoretical foundation for health promotion practice.

Students graduating with the MPH in Health Promotion (course-based) degree will acquire the knowledge and skills in health promotion that will allow them to function effectively in a variety of public, private, and not-for-profit agencies in a reformed health system.

Students graduating with the MSc (thesis-based) degree will acquire a strong research orientation that will prepare them for doctoral study, or positions, which involve research and evaluation in health promotion.

The Postgraduate Diploma and MPH in Health Promotion (course-based) programs are available through distributed learning (distance education). Applicants who wish to enrol in either of these programs must have access to specific computing equipment as defined on the Health Promotion Studies website at www.chps.ualberta.ca. In addition all students are required to participate in an online Pre-orientation and an on-campus four-day Orientation Program at the beginning of their studies.

The deadline for all applications is January 31. Applicants who are Canadian citizens or permanent residents who wish to be considered for a Queen Elizabeth II Scholarship must submit their applications by December 20.

Entrance Requirements
The graduate programs in Health Promotion Studies are designed to build on the existing professional/discipline base of degree holders in health sciences or health related fields. Minimum admission requirements are those set out as minimum acceptable standards by the Faculty of Graduate Studies and Research. These include a minimum of a four year undergraduate degree in a health-related field with a grade point average of at least 3.0 on a 4 point scale over the last ★60; at least one year of relevant experience in a health-related field; and a satisfactory score on an approved English language examination as described below: a minimum acceptable score of 580 (paper-based) or 237 (computer-based) on the TOEFL with a minimum of 50 for each of the three components; or a total score of 92 with a score of at least 20 on each of the individual skill areas (internet-based); or a minimum of 82 on the MELAB, or a minimum overall band score of 7.0, with at least 6 on each test band, on the IELTS, or an overall minimum score of 70 with at least 70 on each subtest on the CAEL, for those whose first language is not English. Applicants should arrange for their English language test results to be sent directly to the department. Applicants are required to provide

(1) A current curriculum vitae
(2) Three letters of reference, at least one of which is from an academic source.
(3) A letter of intent signed by the applicant indicating the program route (course-based or thesis-based), which provides a summary of the applicant’s background (academic and work experience), how this pertains to health promotion studies, goals, areas of interest and/or ideas for a possible thesis topic.
(4) Official transcripts of all postsecondary education completed.

Admission will be based on the Admissions Committee’s assessment of the following factors: academic record, accomplishments and related experience, letter of intent, awards and other evidence of scholarly achievement and letters of reference. The Centre’s supervisory capability, instructional resources, the number of students already in the program, and availability of financial support will also be taken into account.

Program Requirements
All students in degree programs (including those students who are involved in fellows and bursaries listed at www.gradstudies.ualberta.ca

205.29.2 The Postgraduate Diploma

Program Requirements
Postgraduate Diploma students must complete six required ★3 graduate level courses (HPS 501, HPS 503 or PHS 630, HPS 504, HPS 510, HPS 512, PHS 596 and four ★3 elective courses.

The minimum total requirements for the program is ★30.

Length of Program
Students may undertake the Diploma program on a part-time or full-time basis. All Diploma requirements must be completed within four years.

205.29.3 The Degree of MPH in Health Promotion (course-based)

Program Requirements
Consideration will be given to the student’s previous graduate level course work, experience and career plans. Students with insufficient background in undergraduate statistics and research methods will be required to complete qualifying courses in those areas. Students must complete the following:

(1) Core courses (★24): PHS 531 or EDPY 500 or equivalent; PHS 510; PHS 596; HPS 507 or PHS 600; HPS 501; HPS 513 or HPS 506 (★9).
(2) Required courses (★12): HPS 508; HPS 603, INT D 560; EDPY 503 or PHS 540; HPS 504 or PHS 631; HPS 505.
(3) Electives (★6): two of: HPS 506; HPS 510; HPS 606; HPS 618; HECOL 682; INT D 570; INT D 670; NURS 512; NURS 535; PERLS 541; PERLS 582; PHS 541, or other courses appropriate to the student’s program of studies. The minimum total for the program is ★42.

Length of Program
Students may undertake the MPH on a part-time or full-time basis. All degree requirements must be completed within six years.

Financial Information
Some graduate courses that are offered directly by the Centre have a higher than normal instructional fee index. Please refer to specific course listings for more details.

A number of graduate research assistantships (GRA) are available. These are awarded on a competitive basis and preference is given to full-time students in the master’s program (thesis-based) who have completed sufficient course work, and who will be employed for the GBA experience to be mutually beneficial for both students and researchers.

Graduate assistantships are awarded in September and January of each academic year. Graduate students are also eligible for general awards, fellowships and bursaries listed at www.gradstudies.ualberta.ca
205.29.4 The Degree of MSc (thesis-based)

Program Requirements
Consideration will be given to the student’s previous graduate level course work, experience and career plans. Students with insufficient background in undergraduate statistics and research methods will be required to complete qualifying courses in those areas. Students must complete the following:
1. Required courses (6 credits): HPS 501, HPS 502 (6 credits); HPS 508; one of PHS 531, HPS 603 or other approved equivalent; and PHS 596.
2. Electives (6 credits): two courses appropriate to the student’s program of studies.
3. Thesis (6 credits): represents research activity equivalent to 6 credits for registration status and fee assessment purposes.
The minimum total for the program is 30 credits.

Length of Program
Students may undertake the MSc (thesis-based) on a part-time or full-time basis. All degree requirements must be completed within four years.

205.30 History and Classics

Department of History and Classics
2-28 Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4
E-mail: Lydia.Dughazah@ualberta.ca

205.30.1 General Information
The Department of History and Classics offers programs leading to the degrees of Master of Arts and Doctor of Philosophy in both History and Classics.

The MA may be earned in Classics (Greek, Latin, and classical studies) where some concentration is possible in classical literature or ancient history, or in Classical Archaeology, which offers an opportunity to pursue archaeological fieldwork. The PhD affords opportunities for specialization in language and literature, ancient history, and classical archaeology.

MA and PhD programs in History are offered in the following areas: Medieval Europe, Early Modern Western Europe, Modern Western Europe, Russia and Eastern Europe, Medieval England, Early Modern England, Modern Britain, British Empire, Canada, the United States, China, Japan and Korea, Latin America, Africa, Women’s History, and the History of Science, Medicine, and Technology.

The application deadline for September admission is normally the first Friday in January.

Requests for additional information should be addressed to the Graduate Chair, Department of History and Classics.

Entrance Requirements
The Department’s minimum admission requirements are an undergraduate degree with an average of 3.5 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 95 (internet-based), 240 (computer-based) or 580 (paper-based) as applicable (see §203.2.4).

All candidates for the MA in History and all provisional candidates for the PhD in History must demonstrate competence in reading a language other than English by passing an examination administered by the Department or by taking and passing 6 credits in second-year or higher language coursework, with at least a grade of B+. Candidates for the MA in History must satisfy the language requirement before being permitted to proceed to the thesis examination; provisional candidates for the PhD in History must satisfy the language requirement before being permitted to take the candidacy examination. Exemptions from language examinations may be granted under certain specific conditions. Further details on language requirements are found in the Higher Degrees Brochure available from the Department.

Financial Assistance
The Department annually appoints a number of graduate research and teaching assistants. At the time of application, prospective graduate students should indicate whether they wish to be considered for an assistantship, but no appointment will be offered to any student until he/she has been formally admitted to graduate studies. Graduate students are also eligible for various University fellowships and bursaries. For details see www.gradstudies.ualberta.ca

205.30.2 The Degree of MA in Classics

The Department offers two Classics MA’s, an MA in Classical Languages and an MA in Classical Archaeology, which have different entrance and program requirements.

205.30.2.1 MA in Classical Languages

Entrance Requirements
In addition to general Departmental requirements, students must have a BA with a major in Classics, with the equivalent of GREEK 101/102 and 301/302 and LATIN 101/102 and 301/302 and Œ9 at the 400-level in Greek and/or Latin.

Students who have less preparation in the languages, but are otherwise well qualified for graduate study, may be considered for admission as qualifying students.

Program Requirements
Students must take and pass a minimum of seven graduate-level courses (21 credits) in CLASS, GREEK, and/or LATIN, including at least three (9 credits) in Greek or Latin and two (6 credits) in the other language [one (3 credits) may be taken outside Classics]; successfully complete two consecutive registrations in CLASS 900 (3 credits), which requires an examination on primary and/or secondary sources relevant to the research topic and a research paper of 40-50 pages: CLASS 501 (6 credits), and fulfill the modern language requirement in French, German or Italian.

Length of Program
Students should be able to complete the program in three or four terms depending on preparation and course selection.

205.30.2.2 MA in Classical Archaeology

Entrance Requirements
In addition to general Departmental requirements, students must have a BA with a major in Classics, with at least six (18 credits) of Greek or Latin at the 100-level and with eight courses (24 credits) in Classics at the 200-level or above, at least two (6 credits) of which must be at the 400-level. Students with a major in Archaeology, Anthropology, History, or Art History may also be accepted, provided they have taken at least six courses (18 credits) in Classics at the 200-level or above.

Program Requirements
Students must take and pass a minimum of six (18 credits) graduate-level courses, of which at least three (9 credits) must be in Classics (others will normally be in Anthropology or in a discipline such as History, Art History, Museum Studies that has been approved by the Department; take and pass two consecutive registrations in CLASS 900 (3 credits), which requires an examination on primary and/or secondary sources relevant to the research topic and a research project of 40-50 pages (examination and project are assessed by the supervisor and an outside reader); CLASS 501 (6 credits); and fulfill the modern language requirement in French, German or Italian.

Length of Program
Students should be able to complete the program in three or four terms (one of which may be the spring or summer term) depending on preparation and course selection.

205.30.3 The Degree of MA in History

Entrance Requirements
Students holding a four-year Honors or Special BA in History from the University of Alberta, or a comparable degree from another university, may be admitted to the status of candidate for the MA degree. Students who lack the above qualification, but who hold an acceptable bachelor’s degree (or its equivalent), may be admitted as a qualifying graduate student; as such, the student will be expected to complete additional courses before proceeding to the MA program proper.

Students admitted as a qualifying graduate student must normally take 30 credits, at least 18 being History courses. The courses, usually senior undergraduate courses at the 300- or 400-level, will be chosen in consultation with the Graduate Chair. Students must attain a grade point average of 3.5, with no single grade below B-. Students should also plan to complete the language requirement by the end of their qualifying year; advancement to candidacy status may be delayed until they have passed the language examination.

Program Requirements
There are two programs available to students admitted to the MA in History. Either may be subsequently used as a qualification for application to the PhD program. Students must declare which program they intend to follow at the beginning of their graduate studies. Any students wishing to change their program must seek the approval of the graduate committee.

(1) Thesis MA in History: Students entering this program must take and pass one of HIST 601 (3 credits), 603 (3 credits), 604 (3 credits), 605 (3 credits), or 610 (3 credits), or SOC 519 (3 credits); and take and pass HIST 602 (1 credit); and take and pass HIST 609 (3 credits); and take and pass three additional 600-level 3 credits courses, no more than two of which should be in the area of concentration (with the approval of the student’s supervisor and the graduate committee arrangements may be made for the student to obtain credit for a maximum of 6 credits in another department excluding courses taken to achieve second language proficiency; only...
one HIST 699 reading course may be taken, with the written permission of the graduate chair, in fulfillment of this requirement; fulfill the language requirement if this has not already been done; and write a thesis, the text of which should normally be not more than 100 pages in length.

(2) Course-based MA in History: Students entering this program must: take and pass one of HIST 601 (3), 603 (3), 604 (3), 605 (3), or 610 (3), or SOC 519 (3); take and pass HIST 602 (1); take and pass five additional 600-level 3 courses; arrangements may be made for the student to obtain credit for a graduate course in another department, excluding courses taken to achieve second-language proficiency; only two HIST 699 reading courses may be taken, with the written consent of the graduate chair, in fulfillment of this requirement; fulfill the language requirement if this has not already been done; complete a research paper which normally should not exceed 50 pages in length but which should reflect a significant use of primary materials and research. The paper will be assessed by two readers normally from the Department. Both must approve the project. For project work students should take and pass two registrations in HIST 900 (3). It is expected that this degree will be completed in one to two years. The Department will not provide supervisory services for more than two registrations in HIST 900.

Successful completion of the MA program does not guarantee admission to the doctoral program. Students wishing to go on to a PhD must make formal application.

Additional information on language requirements for the degree of MA in History are outlined above, under “General Information.”

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the MA will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 12 months is normally required.

205.30.4 The Degree of PhD in Classics

Program Requirements

Course requirements, language proficiency and length of program depend to some extent on the student’s previous training and on the student’s anticipated needs for the chosen area of specialization.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

205.30.4.1 PhD in Classical Languages

The PhD in Classical Languages is a broadly-based program leading to a general qualification in Classics. Students are encouraged to explore all aspects of the ancient Greek and Roman cultures in courses, preparation for qualifying exams, and the thesis. Four to six years are normally required to complete the program.

Entrance Requirements (in addition to general Departmental requirements)

An MA in Classics or the equivalent.

Program Requirements

Courses:

Nine courses at the graduate level (27), including at least three in Greek and three in Latin and two in History and/or Art and Archaeology (one (3) may be a directed study in the proposed area of research and one (3) may be taken outside Classics); take and pass CLASS 501 (1).

Modern language requirement:

Students must fulfill modern language requirements in German and in French or Italian. (Completion of a language requirement for a recent MA degree will satisfy the requirement for the PhD.)

Comprehensive examinations:

Three written examinations, one in Greek language and literature; one in Latin language and literature, and one in a special field of the student’s choosing that is not directly related to the general field of research. The language and literature examinations are based on the Departmental reading list and consist of two parts, one testing translation skills and the other testing general knowledge of the development of the relevant literature. The third written examination is based on a reading list drawn up by the student and assessors, and consists of one to three broad questions. Preparation for the third examination will be supervised by a faculty member other than the thesis supervisor, who may not be one of the assessors of it. After the written examinations have been taken, there is an oral examination that covers all three fields.

It is expected that students will take the qualifying examinations by the middle of their third year.

Candidacy examination:

An oral examination on the student’s general field of research for the thesis, including consideration of the student’s thesis proposal. This examination is designed to assess whether the student has (1) an adequate knowledge of the discipline and of the subject matter relevant to the thesis, and (2) the ability to pursue and complete original research at an advanced level.

It is recommended that students take the oral candidacy examination by the end of their third year.

Thesis and final oral examination:

The final oral examination will be on the student’s thesis, the text of which should normally be 200–300 pages in length.

205.30.4.2 PhD in Classical Archaeology

For a PhD in Classics Archaeology the entrance requirement is an MA in Classics or equivalent.

The length of the program is four to six years, depending on previous preparation. Course work can normally be completed in one year, but for students deficient in a required language an additional year may be necessary.

Program Requirements

Courses:

Six courses at the graduate level (18), of which at least three (9) must be in the Department of History and Classics at the 500-600 level and one (3) of which must be fieldwork or the equivalent. Students must also take two (6) at the 500-level in Greek or Latin (as is appropriate to the field of study); these courses may be included among those satisfying the preceding requirement.

Modern Language requirement:

Students must fulfill the Departmental language requirements in two modern languages relevant to the student’s field of study.

Comprehensive examinations:

Two written comprehensive examinations, one on the major ancient literary and archaeological sources relevant to the study of Classical or Hellenistic Greek art, monuments and topography, and one on the major ancient literary and archaeological sources relevant to the study of Roman Republican or Imperial art, monuments and topography. After the written examinations have been taken, there is an oral examination that covers both fields. It is recommended that students take the oral candidacy examination by the middle of their third year.

Candidacy examination:

An oral examination on the student’s general field of research for the thesis, including consideration of the student’s thesis proposal. This examination is designed to assess whether the student has (1) an adequate knowledge of the discipline and of the subject matter relevant to the thesis, and (2) the ability to pursue and complete original research at an advanced level.

It is recommended that students take the candidacy examination by the end of their third year.

Thesis and final oral examination:

The final oral examination will be on the student’s thesis, the text of which should normally be 200–300 pages in length.

205.30.5 The Degree of PhD in History

Entrance Requirements

Students proposing to enter a PhD in History program are expected to hold an acceptable MA degree or its equivalent. In exceptional cases a student admitted as a candidate for the MA may subsequently be permitted to enter the PhD program without writing a master’s thesis.

Program Requirements

A candidate must: take and pass two of HIST 601 (3), 603 (3), 604 (3), 605 (3), 610 (3), or SOC 519 (3); if the student does not hold credit in equivalent courses acceptable to the Department; take and pass 602 (1) or 612 in 600-level history courses, depending on previously taken courses offered in satisfactory of the preceding section; students who have already satisfied the preceding section must take and pass 12 in 600-level history courses; those who offer one previously taken course in satisfaction of the preceding section must take and pass an additional 9 in 600-level history courses; take and pass HIST 602 (1) if the student has not previously done so; fulfill the language requirement. In addition, the student may be required to pass a second language examination, but the Department never requires any student to pass examinations in more than two languages other than English; and submit a thesis proposal of 10-20 pages based on some preliminary research.
When the candidate has completed the requirements outlined above (normally not later than 18 months after entering the program), the candidate will be expected to pass comprehensive examinations in three fields. The construction of the fields is flexible and explained fully in the Departmental brochure Higher Degrees in History and Classics. These fields will be: (1) general field; (2) special thesis field; and (3) thematic, theoretical, methodological and/or comparative field. These fields must be approved by the graduate committee of the Department. Students write an examination in each field, and then take an oral examination that covers all the fields.

If the candidate passes the comprehensive examinations, the candidate will be permitted to proceed to the candidacy examination. Upon successful completion of the candidacy examination, students will advance to formal candidacy for the PhD.

A student who has been admitted to candidacy for the PhD may proceed to the degree by completing a thesis, the text of which should normally be 250-400 pages in length.

The minimum period of residence for the PhD is two academic years of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, four to six years are normally required.

### 205.30.6 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the following subject headings:
- Classics (CLASS)
- Greek (GREEK)
- History (HIST)
- Latin (LATIN)

### 205.31 Human Ecology

#### 205.31.1 General Information

The Department of Human Ecology offers a PhD in Human Ecology, master’s degrees in Textiles and Clothing, Family Ecology and Practice, and Aging. Students come from a variety of academic backgrounds and upon graduation have taken employment in a wide range of careers in social service agencies, museums and cultural agencies, government, research and teaching.

#### Entrance Requirements

Applicants to the PhD program must possess a master’s degree from a recognized institution and have achieved a minimum grade point average of 3.0 on a 4 point scale, or its equivalent, in the last 90 credits. Applicants who have the equivalent of an honor’s baccalaureate degree in a related field from a recognized institution, and who present a minimum grade point average of 3.7 on a 4 point scale, or its equivalent, in the last 60 credits, may also be considered for admission to the doctoral program. Applicants also will be required to provide evidence of research potential as demonstrated by previous scholarly work.

Candidates for the MSc or MA degrees should hold a four-year bachelors degree with a minimum grade point average of 3.0 in the last 60 credits at the University of Alberta, or an equivalent qualification from a recognized institution. An applicant proceeding from either a three-year program in a related field, or a four-year program in a different field, may be admitted as a qualifying student.

Applicants to all programs will also be required to present three letters of reference from individuals knowledgeable about their academic and research capabilities, and may be required to present a minimum TOEFL score of 580 (paper-based), 237 (computer-based), or 92 (internet-based) where applicable (see §203.2.4).

#### Financial Assistance

A limited number of teaching and research assistantships are available for well qualified students.

### 205.31.2 The Degrees of MA and MSc in Textiles and Clothing

#### Program Requirements

Both thesis-based and course-based master’s programs are offered by the Department of Human Ecology.

Requirements for the thesis-based master’s degree include 24 to 36 including HECOL 601, 680, 681, 6 in qualitative research methods, quantitative research methods and/or statistics, and 9 to 21 of additional coursework depending on undergraduate background and the nature of the research problem under investigation. All candidates for the thesis-based master’s degree are required to conduct thesis research, and to make a minimum of two professional research presentations, at least one of which must be oral. For students in the thesis-based program, there is a residence requirement of two, four-month terms of full-time attendance at the University of Alberta.

Requirements for the course-based master’s degree include two years of prior relevant work experience and 30 to 33 including HECOL 601, 680, 681, 900 and 15 of additional coursework depending on undergraduate background, work experience and the nature of the applied project to be undertaken. All students in the course-based master’s program are required to complete an applied project. For students in the course-based program there is no residence requirement.

#### Length of Program

The time to complete the master’s degree will vary with the individual candidate; however, a minimum of two years is normally required.

### 205.31.3 The Degree of MSc in Family Ecology and Practice

#### Program Requirements

Both thesis-based and course-based master’s programs are offered by the Department of Human Ecology.

Requirements for the thesis-based master’s degree include 24 to 36 including HECOL 601, 610, 611, 6 in qualitative research methods, quantitative research methods and/or statistics, and 9 to 21 of additional coursework depending on undergraduate background and the nature of the research problem under investigation. All candidates for the thesis-based master’s degree are required to conduct thesis research, and to make a minimum of two professional research presentations, at least one of which must be oral. For students in the thesis-based program, there is a residence requirement of two, four-month terms of full-time attendance at the University of Alberta.

Requirements for the course-based master’s degree include two years of prior relevant work experience and 30 to 33 including HECOL 601, 610, 611, 900, and 15 of additional coursework depending on undergraduate background, work experience and the nature of the applied project to be undertaken. All students in the course-based master’s program are required to complete an applied project. For students in the course-based program there is no residence requirement.

#### Length of Program

The time required to complete the MSc will vary with the individual candidate; however, a minimum of two years is normally required.

### 205.31.4 The Degree of MSc in Aging

#### Program Requirements

Both thesis-based and course-based master’s programs are offered by the Department of Human Ecology.

Requirements for the thesis-based master’s degree include 27 to 36 including HECOL 601, 604, 610 or 680, 611 or 681, 613 and 615, 6 in research methods and/or statistics, and one of NURS 542, PERLS 544 or SOC 675. Students may be required to take 3 to 9 of additional coursework depending on undergraduate background and the nature of the research problem under investigation. All candidates for the thesis-based master’s degree are required to conduct thesis research, and to make a minimum of two professional research presentations, at least one of which must be oral. For students in the thesis-based program, there is a residence requirement of two, four-month terms of full-time attendance at the University of Alberta.

Requirements for the course-based master’s degree include two years of prior relevant work experience and 27 to 36 including HECOL 601, 604, 610 or 680, 611 or 681, 900, one of NURS 542, PERLS 544 or SOC 675. Students may be required to take 3 to 12 of additional coursework depending on undergraduate background, work experience and the nature of the applied project to be undertaken. For students in the course-based program there is no residence requirement.

### 205.31.5 The Degree of PhD in Human Ecology

#### Program Requirements

On completion of the PhD program all students are expected to possess minimum competencies in:

1. the discipline of Human Ecology: this normally would be acquired during master’s level work. Students entering without a closely related master’s degree would be expected to acquire these basic competencies during the doctoral program.
The Humanities Computing program addresses several different computer-based technologies. It does not require previous experience in these, but offers seminars to aid students in gaining the desired range of technical skills.

Financial Assistance

Participating Departments may consider applicants for graduate assistantships. Deadlines for consideration for financial assistance vary by department. Students applying to the University’s General Awards competition for the Province of Alberta Scholarships (available only to Canadian Citizens and Permanent Residents) must submit complete admission applications to the Office of Interdisciplinary Studies by December 15.

205.32.2 The Degree of MA

Program Requirements
The MA in Humanities Computing program consists of ★12 in required courses in Humanities Computing, ★6 in options in Humanities Computing and ★9 in courses approved by the student’s home department, in addition to a thesis. It is normally expected that students will take two Humanities Computing courses and one course in their home department in each of the first three terms and complete their thesis in the fourth term. The required Humanities courses are HUCO 500 and 520, usually offered in the Fall term, and HUCO 510 and 530, usually offered in the Winter term. Note that successful progress through the program depends on satisfaction of both Humanities Computing and home department requirements. It is normally expected that a representative of both the Humanities Computing program and the home department will sit on the thesis supervisory committee.

Length of the Program
The time required to complete the MA may vary according to the previous training of the applicant and the nature of research undertaken; however, the program is designed to be completed within 24 months.

205.33.3 The Degrees of MA/MLIS

The Humanities Computing Program, and the School of Library and Information Studies offer an inter-faculty combined MA in Humanities Computing/MLIS that students can complete within three years. Students pursuing the joint degrees must take ★12 in required Humanities Computing courses (HUCO 500, 510, 520, and 530) and ★6 in Humanities Computing options. They must also take ★18 in required Library and Information Studies courses (LIS 501, 502, 503, 504, 505, and 506) and ★9 in LIS options. Students are strongly encouraged to take the required Humanities Computing courses during their first year. Students must also complete a thesis. The student’s thesis committee shall normally include faculty members from both programs.

Students wishing to apply for the inter-faculty combined degrees need only to fill out one online application form by selecting “MA/MLIS” as the program. The application will be directed to the Humanities Computing portal and then forwarded to the School of Library and Information Studies if the applicant is successful in being accepted into the Humanities Computing program first. Students must satisfy the entrance requirements for both programs. Administrators of the two programs will consult regarding admission to the combined degrees.

205.32.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject heading Humanities Computing (HUCO).

205.33 Internetworking

Master of Science Internetworking Program
221 Athabasca Hall
University of Alberta
Edmonton, Alberta T6G 2E8
E-mail: mntinfo@cs.ualberta.ca
mint.kee.ualberta.ca or mint.kee.ualberta.edu

205.33.1 General Information

The MSc in Internetworking program offers a theoretical and practical grounding in the principles of data communications and internetworking. The degree is designed for individuals seeking to develop their understanding of the principles and practice of internetworking, and to develop their ability to manage technical projects and/or companies operating in this area.

Course work consists of core courses plus options covering protocols and protocol suites, application programming, modelling and simulation, security, etc., a laboratory course to integrate the course material, and a final project to demonstrate the use of skills in these areas.
Entrance Requirements

Minimum admission requirements for this program are a four-year undergraduate degree with a grade point average of at least 3.0 on a 4 point scale, or the equivalent, in the last two years of previous relevant studies. Where applicable, a TOEFL score in excess of 600 is required. Students must hold a bachelor's degree in Computing Science, Electrical Engineering or Computer Engineering, or in a related field in Science or Engineering with some relevant experience. Industrial experience may also be considered as a factor when considering admission of students close to these boundaries. It should be noted that these are minimum requirements only.

205.33.2 The Degree of MSc

Program Requirements

This is a course-based program that requires the completion of ★30 in graduate-level course work, including six core courses and three electives. One of the core courses is a ★6 capping project. The core courses are scheduled regularly, and are conducted in intensive evening / weekend format. Elective courses are scheduled according to instructor availability, and follow the same intensive format.

Students must maintain standards acceptable to the Faculty of Graduate Studies and Research to remain in the program. While there is no full time residency requirement, the program must be completed within six years from admission.

Length of Program

Core courses are scheduled to permit completion of the degree by part-time study within two academic years.

205.33.3 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Master of Internetworking, MINT.

205.34 Laboratory Medicine and Pathology

Department of Laboratory Medicine and Pathology

University of Alberta

Edmonton, Alberta T6G 2R7

E-mail: lmmpgrad@ualberta.ca

205.34.1 General Information

The Department of Laboratory Medicine and Pathology provides a program leading to the degree of Master of Science (MSc) or Doctor of Philosophy (PhD) in Laboratory Medicine and Pathology jointly with the Medical Sciences Program. Further information on these two programs can be found below and in the Medical Sciences Section.

Research may be carried out in a variety of Laboratory Medicine and Pathology related disciplines. These include cancer research, cell biology, cryobiology, environmental monitoring, microbiology, molecular anthropology, pathology, etc.

Inquiries should be directed to the Graduate Coordinator of the Department of Laboratory Medicine and Pathology.

Entrance Requirements

Candidates must hold a baccalaureate or its academic equivalent to enter this program. The Department generally does not accept students with an overall grade point average of less than 3.1 in their undergraduate years at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §203.2.4), candidates must obtain a TOEFL score of at least 570 (paper-based) or 230 (computer-based) or 95 (internet-based), or equivalent IELTS, MELAB or CAEL scores. Prerequisite courses will be specified at the time of arrangement of the candidate’s program, although some biological sciences, particularly microbiology, biochemistry and physiology should have been studied.

Financial Assistance

Funding from fellowships and studentships is available from external agencies on a competitive basis. Supervisors may support students from operating grants.

205.34.2 The Degree of MSc

Program Requirements

The MSc degree program in the Department is jointly administered by the Department of Laboratory Medicine and Pathology and the Medical Sciences Graduate Program Committee. The requirements for the degree include coursework, seminars and an approved research project. Approved courses offered by other Departments may be included in the candidate’s program. Please refer to Medical Sciences for more information regarding the degree of MSc in the Department of Laboratory Medicine and Pathology.

205.34.3 The Degree of PhD

The PhD degree program in the Department is jointly administered by the Department of Laboratory Medicine and Pathology and the Medical Sciences Graduate Program Committee. The requirements for the degree include coursework, seminars, and approved research project. Approved courses offered by other Departments may be included in the candidate’s program. Please refer to Medical Sciences for more information regarding the degree of PhD in the Department of Laboratory Medicine and Pathology.

205.34.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject headings Laboratory Medicine and Pathology (LABMP). LABMP 520 is a required course for all graduate students in the Department of Laboratory Medicine and Pathology. Graduate students must enrol in this course during their first year. Graduate courses in other departments may be acceptable in Laboratory Medicine and Pathology. Please inquire with the Graduate Coordinator.

205.35 Law

Faculty of Law

4th Floor, Law Centre

University of Alberta

Edmonton, Alberta T6G 2H5

E-mail: lawadmissions@ualberta.ca

205.35.1 General Information

The Faculty of Law offers programs of graduate study leading to the degrees of Doctor of Philosophy (PhD), Master of Laws (LLM), and a postgraduate diploma in laws. The Faculty also offers programs of joint study with the Faculty of Business leading to a combined MBA-LLB program.

Entrance Requirements

The minimum admission requirements of the Faculty of Law are an undergraduate LLB degree with an average of 3.0 in the last two years of the LLB at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 600 (250 computer-based or 100 internet-based) where applicable (see §203.2.4). Specific requirements are found below, under the appropriate degree heading.

Financial Assistance

Financial assistance, including graduate research assistantships, may be available to suitably qualified candidates. Such assistance will involve candidates in the performance of certain research duties in the Faculty of Law, although such duties will not impede candidates in the pursuit of their own studies.

For PhD students, Law offers two PhD Fellowships of $20,000, renewable for one year. For LLM students, Law offers the following entrance scholarships: four Alberta Law Foundation scholarships of $15,000 each awarded annually on the basis of academic performance (grade point average of 3.0 or greater), with preference for one of the awards being given to a student working in Constitutional Law and preference for another of the awards being given to a student working in Health Law. If it is deemed that there are no suitable candidates working in these areas, all of the Alberta Law Foundation scholarships may be offered to students working in other research areas. The Faculty also offers two Honourable ND McDermid Graduate Scholarships at $10,000; the Honourable Lucien Dubuc Memorial Scholarship at $10,000 (awarded to an LLM or LLB student with superior academic standing and practical knowledge of English and French); an Edmonton Bar Association Scholarship at $4,000; and the Honourable ND McDermid Scholarship at $10,000 (awarded to a student working in Health Law). If it is deemed that there are no suitable candidates working in these areas, all of the Alberta Law Foundation scholarships may be offered to students working in Health Law. If it is deemed that there are no suitable candidates working in these areas, all of the Alberta Law Foundation scholarships may be offered to students working in Health Law.

In addition, the University of Alberta offers certain scholarships to LLM or LLB student with superior academic standing and practical knowledge of English and French; an Edmonton Bar Association Scholarship at $4,000; and the Faculty of Law Annual Fund Graduate Scholarships (amounts awarded at the discretion of the Graduate Committee).

205.35.2 The Degree of LLM

Entrance Requirements

Applicants for this program must hold the degree of LLB or its equivalent from this or another university, of sufficient standard to satisfy the Graduate Studies Committee of the Faculty of Law that they will be capable of undertaking and profiting by the program.
Program Requirements

To obtain the degree of Master of Laws (LLM), candidates must successfully defend a thesis on a topic selected in consultation with the candidate’s supervisor and with the approval of the Associate Dean (Graduate Studies and Research), Faculty of Law. In addition, candidates are required to successfully complete a minimum of #9 normally consisting of the graduate seminar (LAW 699), and two other courses, often including a graduate-level directed research course. However, candidates may take courses in the LLB program or other faculties instead of, or in addition to, these courses with the approval of the candidate’s supervisor and the Associate Dean (Graduate Studies and Research), Faculty of Law, after consideration of the candidate’s needs and experience and the availability of courses.

Residency

All candidates must complete at least one academic year (ie, Fall and Winter terms) in residence at the University.

Length of Program

The time required to complete the LLM will vary according to the previous education and experience of the applicant and the nature of the research undertaken; however, a minimum of 12 months of study is normally required, and candidates must complete requirements within four years. Extensions may be granted in exceptional circumstances.

205.35.3 Graduate Courses

Both the PhD and LLM graduate course work requirements will normally include the Graduate Seminar on Specialized Legal Topics (LAW 699). The seminar (LAW 699) offers an advanced analysis of different orientations to doctrinal, empirical, and fundamental research. Particular emphasis varies with the expertise of the instructor with current emphasis being on exploration of liberal and illiberal views of law and legal scholarship. It also provides participants with an opportunity to exchange ideas on their own developing theoretical and technical approaches to a legal topic.

The Faculty also offers the Graduate Student Directed Research course (LAW 695) which is open to both PhD and LLM candidates. The Graduate Seminar on Specialized Legal Topics (LAW 699) is a variable topics course and can be taken more than once, provided new subject matter is being offered. PhD and LLM candidates may also take courses in the LLB Program or in other faculties instead of, or in addition to, graduate courses in law with the approval of the PhD candidate’s supervisory committee or the LLM candidate’s supervisor as well as by the Associate Dean (Graduate Studies and Research), Faculty of Law, after consideration of the candidate’s experience and needs and the availability of courses during the candidate’s year of residency.

205.35.4 MBA-LLB Joint Program

The Faculty of Business and the Faculty of Law offer a program of joint study which permits students to earn both the MBA and LLB degrees in four years.

Students in the first year of either the regular MBA program or the Faculty of Law, as well as new entrants, are eligible to apply for the joint program. Refer to §205.9.3 under Business for program details.

205.35.5 Postgraduate Diploma Program

The postgraduate diploma program offered by the Faculty of Law during the fall and winter terms may be of interest to members of Canadian law societies and other legally qualified persons.

The program was designed to provide an extensive exposure to a limited area of the law and to help prepare candidates as specialists in that area. The program will also provide candidates with an opportunity to become familiar with the most modern developments and to bring practitioners and other members of the legal profession up to date.

Inquiries regarding programs, courses and admissions should be made to the Faculty of Law.

Entrance Requirements

Applicants for the diploma program must hold the degree of LLB or its equivalent from a recognized academic institution, with a minimum average of 3.0 in the last two years of LLB work, and must have had a minimum of two years experience in the practice of law or in a related field. Admission to the program will be determined by the Faculty of Graduate Studies and Research in consultation with the Graduate Studies Committee of the Faculty of Law.

Program Requirements

The diploma program requires the satisfactory completion of a minimum of #6 and a research paper, which must be of a calibre suitable for publication in a law journal. The #6 will normally be single-term courses offered by the Faculty of Law, selected through consultation between the candidate and the Chair of the Graduate Studies Committee. The courses normally should reflect a concentration in one area of the law.

Candidates for the postgraduate diploma will not normally be permitted to take courses they completed for the degree of LLB. This will apply to graduates of other universities as well as to graduates of the University of Alberta. With the permission of the Associate Dean (Graduate Studies and Research), Faculty of Law, however, a candidate may be permitted to take certain courses (e.g. taxation, land use planning) where the content has changed significantly since the candidate completed his or her LLB degree.

No language other than English is required for the diploma.

Length of Program

The time required to complete the diploma program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of one year is normally required, and candidates must complete all the requirements within four years.

205.35.6 The Degree of PhD

Entrance Requirements

Applicants for this program must normally hold the degree of LLM or its equivalent from this or another university, of sufficient standard to satisfy the Graduate Studies Committee of the Faculty of Law, as well as the Faculty of Graduate Studies and Research, that they will be capable of undertaking and profiting by the program. On an exceptional basis, students enrolled in the Faculty’s LLM program can seek permission from their supervisory committee and the Associate Dean (Graduate Studies and Research), Faculty of Law, to by-pass the LLM requirement and enroll as a candidate for the PhD degree.

Program Requirements

The program will normally include a minimum of #9, normally consisting of the graduate seminar (LAW 699) and two other courses, often including a graduate-level directed research course (see 205.35.3). However, candidates may take courses in the LLB program or other faculties, instead of, or in addition to these courses, with the approval of the candidate’s supervisory committee and the LLM candidate’s supervisor as well as by the Associate Dean (Graduate Studies and Research), Faculty of Law, after consideration of the candidate’s needs and experience and the availability of courses. As well, candidates must write a detailed dissertation description and outline on a dissertation topic selected in consultation with the candidate’s supervisory committee and with the approval of the Associate Dean (Graduate Studies and Research), Faculty of Law. This is followed by an oral candidacy examination concerning the dissertation description and outline. A candidate is normally required to complete all course work before taking the oral candidacy exam. After the candidate passes the oral candidacy exam, the candidate will then submit a dissertation and make an oral defence of the dissertation.

Residency

The residence period will ordinarily be one academic year (ie, Fall and Winter terms), assuming an LLM upon entry from a university other than the University of Alberta. Candidates who hold a University of Alberta LLM may secure a waiver of residency, upon recommendation of the supervisory committee and approval of the Associate Dean (Graduate Studies and Research), Faculty of Law.

Length of Program

The time required to complete the PhD will vary according to previous education and experience of the applicant and the nature of the research undertaken; however, a minimum of two calendar years of full-time study is normally required, and candidates must complete requirements within six years. Extensions may be granted in exceptional circumstances.

205.35.7 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Law (LAW).

205.36 Library and Information Studies

School of Library and Information Studies
3-20 Rutherford South
University of Alberta
Edmonton, Alberta T6G 2J4
E-mail: sils@ualberta.ca

205.36.1 General Information

The School of Library and Information Studies, the only graduate professional library program in the prairie provinces, offers the Master of Library and Information Studies degree.

As a professional degree, the MLIS represents a program designed to develop the knowledge, understanding, attitudes, and skills that will prepare graduates for positions of responsibility in school, public, academic, and special libraries, and in information centres.
The MLIS program is accredited by the Committee on Accreditation of the American Library Association. This accreditation is also recognized by the Canadian Library Association.

**Mission of the School of Library and Information Studies**

As an academic unit of the University of Alberta, the School of Library and Information Studies seeks to fulfill the mission of the University. The University’s mission is to serve the community by the dissemination of research through teaching and the discovery of knowledge through research. In support of the University’s mission, the School of Library and Information Studies provides and promotes regional, national, and international leadership for the advancement of education, research, and service in the discipline of library and information studies. The School’s mission is informed by multidisciplinary perspectives on user-centred issues of information access and equity. The School’s mission is articulated through the following series of education, research, and service goals.

**Goals of the School**

**Education Goals**

(1) To prepare individuals for positions of responsibility in the profession of library and information services through the accredited graduate professional degree, the Master of Library and Information Studies (MLIS) program.

(2) To provide teaching and supervision to students in undergraduate, postgraduate diploma, other master’s, and doctoral programs in both library and information studies and other disciplines.

(3) To offer opportunities for individual PhD programs to students with exceptional professional background and strong potential for research and scholarship.

**Research Goals**

(1) To carry out scholarly study and research that advances the knowledge base of library and information studies.

(2) To disseminate research and scholarship to both academic and professional communities of library and information studies.

**Service Goals**

(1) To participate in the collegial administration of the University of Alberta.

(2) To support the profession of library and information services through consultation, leadership, and continuing education.

(3) To contribute to the community at large through the dissemination of research and scholarship.

**Goals of the MLIS Program**

(1) To provide the knowledge, understanding, and skills sufficient for the practice of library and information service at a basic professional level, including the foundation on which further competence and specialization may be built.

(2) To examine the cultural and informational role in society of library and information services.

(3) To emphasize, where appropriate, the Canadian geographic, cultural, social, and governmental context in which libraries and information agencies operate.

(4) To stress the professional obligation to keep informed of social and technological developments, with particular emphasis on Canadian issues.

**Objectives of the MLIS Program**

Upon completion of the program:

(1) Students will be familiar with the history, the philosophy, and the service orientation of libraries and librarianship.

(2) Students will have an understanding of concepts of knowledge and concepts of information and of the methods of preservation and transmission of cultural records.

(3) Students will be aware of the responsibility of librarians and information specialists with respect to the free flow of ideas and access to information.

(4) Students will have an understanding of the functions of librarians and information specialists within the larger societal framework, and of the factors influencing the creation, dissemination, and use of knowledge and information.

(5) Students will be knowledgeable about basic principles of selection, acquisition, organization, storage, retrieval, and use of recorded knowledge and information resources of all kinds.

(6) Students will be knowledgeable about the theories and concepts of administration and organizational behavior and their application to the management of libraries and information agencies.

(7) Students will possess the skills necessary to evaluate library and information systems and services.

(8) Students will have an understanding of the principles of systems analysis and systems design for libraries and information agencies.

(9) Students will understand current information technology as an integral part of the operations and services of libraries and information agencies.

(10) Students will be able to evaluate published research in library and information studies and to apply basic principles and techniques of research in library and information studies.

(11) Students will be aware of the links between library and information studies and other disciplines, including shared methodologies and common concerns.

(12) Students will understand the importance of cooperation among libraries and information agencies and of the development and maintenance of collegial relationships with their fellow professionals.

(13) Students will be aware of the need for continuing professional education and be ready to play an active role in associations and engage in other professional activities.

(14) Students will be aware of the culturally diverse composition of society, and of the responsibility to serve all client groups with respect and understanding.

**Student Organizations**

The Library and Information Studies Students’ Association represents all students enrolled in the MLIS program. Students elect their own officers, with the presiding officer representing them at meetings of the School Council. LISSA provides liaison between students and faculty and encourages participation in a variety of academic, professional, and extracurricular activities.

**Entrance Requirements**

An applicant with a four-year undergraduate degree from the University of Alberta, or a comparable degree from another accredited university, who has obtained a minimum grade point average of 3.0 (or its equivalent) in the last 20 half-courses of academic studies may be admitted as a candidate for the MLIS degree. Applicants who lack these qualifications are advised to make up any deficiency in consultation with the School of Library and Information Studies in order to be considered for admission as a candidate for the MLIS.

All non-Canadians for whom English is not the major language must write and pass satisfactorily either the Michigan English Language Assessment Battery (MELAB) or the Test of English as a Foreign Language (TOEFL), before formal admission is granted (see §203.2.4). The passing score for the MELAB is 90 and for the TOEFL is 600 (paper score) or 250 (computer score).

Applicants without a degree from a Canadian university may be required to take the Graduate Record Examination aptitude tests administered by the Educational Testing Service. Students should arrange for the testing agency to report results to the School of Library and Information Studies, which will judge whether or not the results are satisfactory. Acceptable scores are 600 in the Verbal Section, 525 in the Quantitative Section, and 600 in the Analytical Section.

Applicants are judged not only on their academic record but also by their professional promise as indicated in three letters of reference and in the personal statement required in the application form. A personal interview, arranged at a time and place convenient to the applicant, may also be requested by either party.

Admission offers are made from a review of complete applications received by the School by February 1st. A complete application includes the application form and its supporting materials, transcripts, and three letters of reference. All must be received before applications can be reviewed for admission to the MLIS program. Applicants considered will receive notification of a decision on their application no later than March 31st. Once the School’s acceptance limit is reached, subsequent acceptable applicants may be placed on a waiting list.

Applicants who wish to be considered for all available awards should submit complete applications by December 1st. Final decisions on scholarships and awards are normally made by June 1st. Students are encouraged to seek out opportunities for scholarships and awards and to apply for these prior to and during the course of their programs.

Students who are offered admission to the MLIS program may have their admissions deferred to the following fall term if the School is notified in writing before the beginning of the fall term.
Financial Assistance
Inquiries regarding program and course details, and financial assistance should be made to the School of Library and Information Studies. Details about University awards are found at www.gradstudies.ualberta.ca

205.36.2 Academic Standing
The pass mark for any course taken for credit towards the Master of Library and Information Studies degree is a grade of C+. A student who does not achieve a pass mark in any required course must repeat the course. A student who does not achieve a pass mark in an elective course must repeat the course or substitute another elective course.

An overall average of 2.7 must be maintained throughout the program. If the School decides that a graduate student is not making satisfactory progress in either coursework or research, the School may recommend to the Dean of the Faculty of Graduate Studies and Research that the student be required to withdraw.

Reexaminations
Graduate students are not permitted to take reexaminations.

205.36.3 Appeals and Grievances
Students who have grievances related to academic judgements inherent in marks or grades awarded in any course should follow the grievance procedures set out by the School of Library and Information Studies and the Faculty which offers the course.

Students who have grievances related to a decision of the Faculty of Graduate Studies and Research (FGSR) affecting the student’s academic program should first exhaust the appeal and grievance procedures of the School and then, if desired, may pursue the appeal procedures of the Faculty of Graduate Studies and Research. These procedures are available from the School and the Faculty of Graduate Studies and Research.

205.36.4 Time Limits for Completion of Program
Candidates in the course-based route must have completed all the requirements within six years of the time they are first registered as a probationary graduate student or candidate in the Master’s program. Candidates in the thesis-based route must have completed all requirements within four years of the time they first registered.

205.36.5 The Degree of MLIS
Program Requirements
The minimum requirement for the MLIS degree is either ★39 in graduate courses and a thesis, or ★48 in graduate courses and a capping exercise. Students may, with approval, include up to ★10 offered by a department other than the School of Library and Information Studies.

The following courses are required for both the thesis and course-based routes of the MLIS program: LIS 501, 502, 503, 504, 505, and 506. LIS 501, 502, and 503 are normally prerequisites to the rest of the program.

Two terms of full-time attendance as defined by the Faculty of Graduate Studies and Research (at least ★5 during one term) are required to complete the residence requirement for the thesis route. There is no residence requirement for the course-based route.

Credit for courses taken elsewhere may be granted as transfer credit by the Dean of the Faculty of Graduate Studies and Research, on the recommendation of the School of Library and Information Studies. Contact the School for details.

205.36.6 The Degrees of MA/MLIS
The School of Library and Information Studies and the Humanities Computing Program offer a combined MA in Humanities Computing/MLIS program that students can complete within three years. Students pursuing the combined degree must take ★12 in required Humanities Computing courses (HUCO 500, 510, 520, and 530) and ★6 in Humanities Computing options. They must also take ★18 in required Library and Information Studies courses (LIS 501, 502, 503, 504, 505, and 506) and ★9 in LIS options. Students are strongly encouraged to take the required Humanities Computing courses during their first year. Students must also complete a thesis. The student’s thesis committee should normally include faculty members from both programs.

Students wishing to apply for the combined degree need only complete one online application form by selecting “MA/MLIS” as the program. The application will be reviewed by both programs. Students must satisfy the entrance requirements for both programs. Administrators of the two programs will consult regarding admission to the combined degree.

Length of Program
A full-time student who is registered for the MLIS program normally will be able to complete the degree requirements in two years. A full-time student who is registered for the joint MA/MLIS degree normally will be able to complete the degree requirements in three years.

205.36.7 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject headings Library and Information Studies (LIS).

205.37 Linguistics
Department of Linguistics
4–32 Assiniboia Hall
University of Alberta
Edmonton, Alberta T6G 2E7
E-mail: linggrad@ualberta.ca

205.37.1 General Information
The Department of Linguistics offers graduate programs in linguistics leading to the degrees of Master of Science and Doctor of Philosophy.

The Department maintains extensive laboratory and computer facilities for a wide range of research in experimental phonetics and phonology; psycholinguistics and neurolinguistics; language acquisition and bilingualism; field linguistics and typology; corpus linguistics; cognitive linguistics; morphology, syntax and semantics.

General Entrance Requirements
The Department’s minimum admission requirements are an undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or equivalent qualifications from a recognized institution.

English Language Proficiency: The minimum acceptable score on the Test of English as a Foreign Language (TOEFL) is 550 (paper-based) or 213 (computer-based); on the Michigan Language Assessment Battery (MELAB) is 85. The minimum acceptable score on the IELTS is an overall band score of 6.5, with a score of at least 5 on each test band. The minimum acceptable score on the CAEL is no less than 60 with at least 60 on each subtest. Applicants should arrange for their English language test results to be sent directly to the department.

The GRE General Test is recommended for all applicants from North America and other areas where the test is available.

Financial Assistance
Graduate assistantships are normally available for a limited time for students in full-time study who make satisfactory progress toward a degree. Students will be expected to apply for competitive awards. Exceptionally qualified applicants seeking the PhD degree may be nominated by the Department for a University of Alberta PhD Scholarship or an FS Chia PhD Scholarship. Support for dissertation research is available on a competitive basis through internally administered research grants. Information is available at www.gradstudies.ualberta.ca

205.37.2 The Degree of MSc
Entrance Requirements
Candidates for the MSc must have completed, to the satisfaction of the Department, certain core courses in linguistics or their equivalents. Candidates who lack this preparation may be expected to undertake a year of qualifying studies before being admitted to the degree program.

Program Requirements
Two routes to the MSc are available: a thesis-based and a course-based route.

Requirements for the thesis-based MSc include a minimum of ★21 including two required courses (LING 601 and 602) plus a thesis. Course options must be chosen in consultation with the graduate coordinator and the student’s supervisor. The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Requirements for the course-based MSc consist of a minimum of ★27 at the graduate level including two required courses (LING 601 and 602) and a directed research project (LING 900). Course options must be chosen in consultation with the graduate coordinator and the student’s supervisor. The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students must demonstrate knowledge of a language other than English.
Length of Program
The time required to complete the MSc will vary according to the applicant's previous training and the nature of the research undertaken; however, a minimum of three terms should be expected.

205.38.3 The Degree of PhD

Entrance Requirements
Candidates for the PhD must normally hold the equivalent of an MSc degree in Linguistics at the University of Alberta.

Program Requirements
Requirements for the PhD include completion of the MSc degree in Linguistics or its equivalent and a minimum of 21 credit hours including: (a) two general papers, (b) a dissertation, and (c) special papers in areas of syntax and phonology, and any other general papers that may be required under the regulations. In any case, the student must satisfy a minimum course requirement specified by the Regulations and Guidelines for Graduate Programs in the Department of Mathematical and Statistical Sciences. These entries are meant to enhance the interdisciplinary nature of the program.

205.38.4 Programs in Mathematical Physics

The Master of Science and Doctor of Philosophy degrees in Mathematical Physics may be taken in the Department of Mathematical and Statistical Sciences. The program emphasizes interdisciplinary investigations of the mathematical and physical aspects of theories and mathematical models used in physics.

Entrance Requirements
The entrance requirement for the Master of Science degree in Mathematical Physics is a four-year degree in Mathematical and Statistical Sciences or Physics with a GPA of 3.0 or better, or equivalent. The MSc degree may be obtained in a course-based or thesis-based program. For the course-based program, ★24 in graduate courses at the 500-level or higher from a list of approved courses must be taken, and a project is required. For the thesis-based program, ★18 in graduate courses at the 500-level or higher from a list of approved courses must be taken, and a thesis is required. The course work must include courses in both the Departments of Physics and Mathematical and Statistical Sciences.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required after the BSc or two years after the MSc.

205.38.5 The Degree of MSc in Biostatistics

Entrance Requirements
A four-year degree with STAT 141 or 151, 252 or 337, 368 or 378, and 432, or their respective equivalents, with a GPA of 3.0 or better, in the final two years. Students without the above listed courses may be admitted as qualifying or probationary students.

Program Requirements
Students in the thesis-based MSc program are required to take at least ★18 at the 500 or higher level and to complete a thesis. Students in the course-based MSc program are required to take at least ★24 at the 500 or higher level and to complete the project course STAT 900. The minimum acceptable grade in any course is C- and the student must maintain a minimum cumulative GPA of 2.7. All students must also complete a Practicum.

Length of Program
The program will normally be completed in 24 months; however, it may be completed in as few as 12 months.
205.38.6 The Postgraduate Diploma in Statistics

Entrance Requirements
A four-year undergraduate degree from the University of Alberta with a grade point average of 3.0 in the work of the final two years, or the equivalent qualification from another institution.

Program Requirements
The Postgraduate Diploma in Statistics requires the successful completion of ★21 statistics courses from the Department of Mathematical and Statistical Sciences. At least ★12 must be at the 500-level or higher; any remaining courses must be at the 400-level or higher. Any courses taken at the 300-level or any courses other than Statistics courses that may need to be taken in order to acquire the appropriate background, may not be counted toward the Diploma. The selection of courses must be approved by the Graduate Committee of the Department of Mathematical and Statistical Sciences. There is no residence requirement.

Length of Program
The Postgraduate Diploma must be completed within four years from the time of admission.

205.38.7 Programs in Mathematical Finance

The Master of Science and Doctor of Philosophy degrees in Mathematical Finance may be taken in the Department of Mathematical and Statistical Sciences.

The entrance requirement for the Master of Science degree in Mathematical Finance is a university degree that lasts four years or longer. The MSc degree may be obtained in a course-based or thesis-based program. For the course-based program ★24 graduate courses at the 500-level or higher from a list of approved courses must be taken, and a project is required. For the thesis-based program ★18 graduate courses at the 500-level or higher from a list of approved courses must be taken, and a thesis is required. The course work must include courses from both the Faculty of Business and the Department of Mathematical and Statistical Sciences. The entrance requirement for the PhD program in Mathematical Finance is normally an MSc degree, or equivalent. The PhD program requirements are essentially the same as those for the PhD in Mathematical Sciences with certain modifications in the required course work, advisory examination and entrance year as outlined in the Faculty of Graduate Studies and Research Regulations. These modifications are meant to enhance the interdisciplinary nature of the program.

205.38.8 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the following subject headings:
- Mathematics (MATH)
- Mathematical Physics (MA PH)
- Statistics (STAT)

205.39 Mechanical Engineering

Department of Mechanical Engineering
4-9 Mechanical Engineering Building
University of Alberta
Edmonton, Alberta T6G 2G8
www.mech.ualberta.ca

205.39.1 General Information
The Department of Mechanical Engineering offers graduate courses and provides research facilities for well qualified students of recognized universities who wish to pursue advanced studies leading to the MEng, MSc, and PhD degrees in Mechanical Engineering. In addition, the Department offers a program in Engineering Management to graduate engineers of any discipline, leading to the MEng and MSc degrees in Engineering Management.

The general fields of study include solid mechanics, dynamics, vibration, thermodynamics, fluid mechanics, heat transfer, combustion, biomedical engineering, manufacturing engineering, and engineering management.

While the general guidelines for entrance and program requirements are listed below, specific details for each of the degrees are found in the documents Program Manual for Graduate Study in Mechanical Engineering and Program Manual for Graduate Study in Engineering Management, available from the Department. As well, the currently active areas of research are documented on the Department’s home page on the Internet.

Entrance Requirements
The Department’s minimum admission requirements for degrees in Mechanical Engineering are an undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 580 where applicable (see §203.2.4).

The Department’s minimum admission requirements for degrees in Engineering Management are an undergraduate degree in an engineering discipline, with an average of 3.0 in the last two years of undergraduate work, and a TOEFL score of 580 where applicable (see §203.2.4).

Financial Assistance
Financial assistance is available in the form of scholarships and fellowships (see Awards section of this Calendar) and through the Department in the form of graduate assistantships and contract research (available for Canadian students and students holding valid work permits). The assistantships are normally available to students registered full time in thesis programs; funding is not normally provided for students registered part time or in MEng programs. Summer assistance can usually be arranged for students without scholarship support who continue their research full time through the summer months. Further information is available on the Department’s home page.

205.39.2 The Degree of MSc in Mechanical Engineering

Program Requirements
The Master of Science in Mechanical Engineering is nine single term graduate courses, including ENGG 600, plus a thesis acceptable to the Department of Mechanical Engineering and the Faculty of Graduate Studies and Research. One ★3 course (of the ★15) must be a course in applied mathematics, numerical analysis, or finite element methods. Either a maximum of one MEC E 700-level course and one MEC E 500-level course, or a maximum of two MEC E 700-level courses and no MEC E 500-level courses can be credited towards the minimum course requirement of the MSc in Mechanical Engineering. Note that all courses must be approved by and additional courses may be required by the Graduate Coordinator and Thesis Supervisor.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally, it will take 18 to 24 months to complete the MSc. The maximum time permitted is four years.

205.39.3 The Degree of MEng in Mechanical Engineering

Program Requirements
For the Master of Science in Engineering Management program the candidate must have satisfactorily completed a minimum of ★15 in graduate courses, including ENGG 600, plus a thesis acceptable to the Department of Mechanical Engineering and the Faculty of Graduate Studies and Research. One ★3 course (of the ★15) must be a course in applied mathematics, numerical analysis, or finite element methods. Either a maximum of one MEC E 700-level course and one MEC E 500-level course, or a maximum of two MEC E 700-level courses and no MEC E 500-level courses can be credited towards the minimum course requirement of the MSc in Mechanical Engineering. Note that all courses must be approved by and additional courses may be required by the Graduate Coordinator and Thesis Supervisor.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally, it will take 18 to 24 months to complete the MSc. The maximum time permitted is four years.

205.39.4 The Degree of MEng in Mechanical Engineering

Program Requirements
The minimum requirement for a Master of Engineering in Mechanical Engineering program is nine single term graduate courses (the weight of each course must be greater or equal to ★3) plus a project equivalent to ★3. Of the required nine graduate courses, five must be in the candidate’s major field (i.e. MEC E courses). A maximum of three courses in any combination of MEC E 500- and MEC E 700-level courses can be credited towards the requirements of the degree of MEng in Mechanical Engineering. ENGG 600 is required. Note that all courses must be approved by and additional courses may be required by the Graduate Coordinator.

There is no residence requirement for the degree of MEng in Mechanical Engineering.
205.39.6 The Degree of PhD

Program Requirements
The Department normally requires candidates to satisfactorily complete approved courses in one major field and at least one minor field. The minimum requirements after a bachelor’s degree are 27 in graduate courses, 15 of which must be in the major field, including MEC E 680, plus research leading to a thesis of high caliber. For those students entering the PhD program after a master’s degree the minimum course requirement is 12 in graduate courses including MEC E 680. Either a maximum of two MEC E 700-level and one MEC E 500-level courses, or a maximum of three MEC E 700-level and no MEC E 500-level courses can be credited toward the 27 and a maximum of one MEC E 700-level course and no 500-level Mechanical Engineering courses can be credited toward the 12 in a post-master’s program. Alternative courses for MEC E 680 may be selected with the consent of the Graduate Coordinator.

Candidates may complete the program in nine to 12 months. The maximum time permitted is six years.

Length of Program
The time required to complete the PhD will vary with the individual candidate; however, a minimum of 30 months is normally required. The maximum time permitted is six years.

205.40.3 The Degree of PhD

Program Description
The general description for the PhD in Medical Sciences (Medical Genetics) will be as presented for all PhD programs in Medical Sciences (see §205.42.2).

205.41 Medical Microbiology and Immunology

Department of Medical Microbiology and Immunology
1-41 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2H7
www.ualberta.ca/~mmi/
E-mail: mmi.mail@ualberta.ca

205.41.1 General Information
The Department of Medical Microbiology and Immunology offers programs leading to the degrees of Master of Science and Doctor of Philosophy. Students may specialize in the following areas: bacteriology, immunology, mycology, parasitology, virology, macromolecular crystallography, or clinical microbiology. Both programs require coursework, completion of a research project, and preparation of a thesis.

The staff of the Department of Medical Microbiology and Immunology is currently carrying out research in various aspects of cellular, molecular, reproductive, and tumour immunology; microbial pathogenesis; and the development of novel methods for the diagnosis and treatment of infectious diseases. The Department is well equipped with the modern facilities required for research in medical microbiology and immunology. Prospective students are invited to consult with the Graduate Coordinator for further information and to visit the Department’s home page on the worldwide web.

Entrance Requirements
The Department generally does not accept students with less than an honors grade (3.3 at the University of Alberta) in the last two years of their undergraduate degree, or an equivalent qualification from another recognized institution. Where applicable, a minimum TOEFL score of 600 (or 250 computer-based) is required. GRE scores in the 75th percentile or above in all three areas are also required for foreign applicants, as is a Master’s degree in a related area of Basic Science.

Financial Assistance
Exceptionally qualified applicants may be nominated for the University of Alberta PhD Scholarship. Students accepted into a graduate program are encouraged to apply for a studentship through the Department to outside agencies such as the Alberta Heritage Foundation for Medical Research and the Canadian Institutes of Health Research. In addition, a very limited number of graduate assistantships are available.

205.41.2 The Degree of MSc

Program Requirements
Course requirements depend on the area of specialization and the undergraduate background of the student; however, a minimum of 6 in graduate-level courses is required. Each student must participate each year and must register once for credit during the program in the Medical Microbiology and Immunology seminar course, MMI 801.

Terminal MSc students are required to maintain a program GPA of at least 2.7; however, students wishing to proceed to a later PhD in the Department must maintain a program GPA of at least 3.0.

A candidate for the MSc degree must submit an acceptable thesis and defend it orally before a committee formed according to Faculty of Graduate Studies and Research guidelines.

No language other than English is required for the degree.
The minimum period of residence is two years of full-time attendance at the University of Alberta.

**Length of program**
The time required to complete the program depends on the student’s background and the nature of the thesis project. Normally, a minimum of two years of full-time study and research is required for the MSc degree.

205.42.3 The Degree of PhD

**Program Requirements**
Course requirements depend on the area of specialization and the undergraduate background of the student; however, a minimum of ★9 in graduate-level courses—one of which must be MMI 601—is required. In addition, each student must participate each year and must register once for credit during the program in the Medical Microbiology and Immunology seminar course, MMI 601.

Students are required to maintain a GPA of at least 3.0.

After completion of required coursework, students must pass an oral candidacy examination in order to continue in the program.

A candidate for the PhD degree must submit an acceptable thesis and defend it orally before a committee formed according to Faculty of Graduate Studies and Research guidelines.

No language other than English is required for the degree.

The minimum period of residence is three years of full-time attendance at the University of Alberta.

**Length of program**
The time required to complete the program depends on the student’s background and the nature of the thesis project. Normally, a minimum of four years of full-time study and research is required for the PhD degree.

205.43.2 The Degree of MSc

**Program Requirements**
The Departments of Anesthesiology and Pain Medicine, Dentistry, Laboratory Medicine and Pathology, Medical Genetics, Obstetrics and Gynecology, Ophthalmology, Paediatrics, and Radiology and Diagnostic Imaging participate in an interdisciplinary MSc program in Medical Sciences.

Admission to the MSc in Medical Sciences program is dependent on the recommendation of the Medical Sciences Graduate Program Committee. The requirements for this degree consist of coursework, completion of a research project, and preparation of a thesis. Course requirements are recommended by the Supervisor and Supervisory Committee based on the background of the student and the area of specialization to be undertaken. A minimum of ★9 in graded graduate level courses listed in the Medical Sciences Graduate Program Approved Course Listing, or approved equivalent is required.

The MSc in Medical Sciences program follows the Faculty of Graduate Studies and Research residency guidelines. No language other than English is required for the degree.

**Length of Program**
The minimum length of the MSc program is two years, and a maximum length is four years, depending on the research undertaken.

205.42.4 Graduate Courses

Graduate courses can be found in Course Listings, under the subject heading:

Medical Microbiology and Immunology (MMI)

205.42 Medical Sciences

**Office of Research**
Faculty of Medicine and Dentistry
22J.11 Walter MacKenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2R7
E-mail: janis.davis@ualberta.ca

205.42.1 General Information
The Medical Sciences Graduate Program consists of nine member departments in the Faculty of Medicine and Dentistry and offers programs leading to the degrees of Master of Science and Doctor of Philosophy. This Program has a long history within the Faculty, and continues to provide excellence in graduate education relating to basic and clinical sciences.

**Entrance Requirements**
The minimum requirements a student must have for admission into the MSc or PhD in Medical Sciences programs are as follows: 1) an undergraduate degree with a GPA of at least 3.1 in the last two years of undergraduate or graduate study at the University of Alberta, or equivalent qualification from another institution, 2) a minimum TOEFL score of 570 (paper-based), or 230 (computer-based), or 95 with at least 20 per section (internet-based); MELAB minimum score of 91; CAEL minimum score of 70 with at least 70 on each subtest; or IELTS minimum score of 7.5 with at least 6 on each band, and 3) meet departmental criteria over and above the minimal requirements of the Medical Sciences Graduate Program.

**Financial Assistance**
Students accepted into the program are encouraged to apply for scholarships from outside agencies such as the Alberta Heritage Foundation for Medical Research or the Canadian Institutes of Health Research. Exceptionally qualified students may be nominated for University of Alberta PhD Scholarships.
205.43.2 The Degree of MSc

Program Requirements

Such coursework is required as may be necessary for the proper understanding and carrying out of research and preparation of the thesis. Normally a minimum of 18 of coursework is required. Students must also complete and successfully defend a thesis.

There is no second language requirement for the MSc.

Candidates for the MSc degree have a minimum residence requirement of one calendar year of full-time attendance at the University of Alberta. For some candidates who require more preparation for the MSc, a qualifying year will be required at the start of the program. This qualifying year does not count toward the one-year residency requirement.

Length of Program

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. A minimum of 18 months is normally required.

205.43.3 The Degree of PhD

Program Requirements

Such coursework is required as may be necessary for the proper understanding and carrying out of research and preparation of the thesis. Normally a minimum of 21 of coursework is required if a previous graduate degree is held. If not, a total of 36 of coursework is required. Students must also complete and successfully defend a thesis.

There is no second language requirement for the PhD.

There is a minimum residency requirement for the PhD. There are two types of residency requirements: a) a minimum of two years of full-time attendance at the University of Alberta. For some candidates, an additional year may be required at the start of the program, depending on the applicant’s preparation and training. b) A minimum of 18 months is normally required.

Length of Program

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. A minimum of three years is normally required.

205.43.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Medicine (MED). Most graduate students of the Department of Medicine also take graduate courses offered by other Departments.

205.44 Mining and Petroleum Engineering

School of Mining and Petroleum Engineering
Department of Civil and Environmental Engineering
University of Alberta
Edmonton, Alberta T6G 2G7

For complete details of Graduate Studies in Mining and Petroleum Engineering, see §205.13 (Civil and Environmental Engineering).

205.45 Modern Languages and Cultural Studies

Department of Modern Languages and Cultural Studies
200 Arts Building
University of Alberta
Edmonton, Alberta T6G 2E6
E-mail: mlcsgrad@ualberta.ca

205.45.1 General Information

The Department of Modern Languages and Cultural Studies confers Master of Arts and Doctor of Philosophy degrees in French, German, Italian, Russian, Spanish, and Ukrainian. All MA programs, except for Humanities Computing, are available either as thesis- or course-based.

The Department focuses on individual language areas such as Studies in French, German, Italian, Russian, Spanish, and Ukrainian as well as offers interdisciplinary possibilities.

The Graduate programs cover a broad spectrum of research on the Francophone, Germanic, Spanish, and Slavic worlds from a multiplicity of chronological and theoretical perspectives. Specific interests include literary and cultural studies, language pedagogy, applied linguistics, translation, folkloric, postcolonialism, women’s studies, medieval and early modern studies, modernism, postmodernism, the avant-garde, and humanities computing. MLCS has a unique competence to emphasize multidisciplinary and cross-linguistic approaches both within and without the department, while at the same time retaining the capacity to deliver complete individualized programs in discrete fields and languages.

Requests for information should be addressed to the Graduate Programs Office, Department of Modern Languages and Cultural Studies.

Entrance Requirements

The Department’s minimum admission requirement for the MA program is a four-year undergraduate degree with an average of at least 3.0 in the last two years of undergraduate work at the University of Alberta, or an equivalent qualification from a recognized institution. The requirement for the PhD program is an MA degree in the area of specialization. Where applicable, a TOEFL score of 550 (paper-based) or 213 (computer-based), or other acceptable English language proficiency test is required (see §203.2.4).

Applicants for graduate work must have a competent reading knowledge of at least one language other than English in order to undertake graduate programs.

Financial Assistance

Financial assistance in the form of scholarships and graduate assistantships are available to qualified students. For further information contact the Graduate Programs Office of the Department, www.mlcs.ca, and www.gradstudies.ualberta.ca. In order to be considered for Teaching or Research assistantships complete applications should be submitted no later than April 2. Applicants seeking support through university administered awards/scholarships must apply before January 15.

205.45.1.1 Areas of Specialization

Applied Linguistics (French, German, Russian, Spanish, Ukrainian)
French Language, Literatures, and Linguistics
Germanic Languages, Literatures, and Linguistics
Humanities Computing
Italian Studies
Slavic Languages and Literatures (Russian, Ukrainian)
Slavic Linguistics (Russian, Ukrainian)
Spanish and Latin American Studies
Translation Studies
Ukrainian Folklore

205.45.2 The Degree of MA

Thesis-based MA Programs

Over the duration of their program, students must register in a minimum of 24 credits. In addition to the thesis, a minimum of 18 credits must be in course work.

Course-based MA Programs

Over the duration of their program, students must register in a minimum of 27 credits, depending on their academic background. In addition to the project (Œ3), a minimum 24 credits must be in course work.

Length of Program

For the MA, the normal time to completion is two years; the maximum allowed time to complete the program is four years.

205.45.3 The Degree of PhD

Over the duration of their program, students must register in a minimum of 36 credits. In addition to the thesis, a minimum of 27 credits must be in course work.

The Doctoral Candidacy in MLCS is a two-part written and oral examination that must be completed by the end of the first term of a student’s third year. The written examination consists of three parts, each based on topics different from that of the proposed dissertation. All examinations must be completed within 21 days. The oral examination is ordinarily held two weeks after the written examination.

Language Requirement

PhD students must demonstrate a reading knowledge of one foreign language other than the language of their specialization. Credits taken to satisfy the language requirements do not count toward the degree.

Length of Program

The time necessary to complete the requirements for the PhD depends upon the student’s progress. The minimum requirement is two years of study and research in residence at the University of Alberta. The maximum allowed time to complete the program is six years.
205.45.4 Programs in Germanic Languages, Literatures, and Linguistics

205.45.4.1 General Information—Germanic Languages, Literatures, and Linguistics

MLCS offers graduate work leading to the MA and PhD degrees with specializations in Germanic Languages, Literatures, and Linguistics. The library houses approximately 50,000 volumes in the areas of German literature, language and Germanic linguistics and philology, and subscribes to over 130 periodicals and serials. The holdings are particularly strong in the areas of eighteenth-century literature, Age of Goethe, Romanticism, Naturalism and Expressionism. The university has an impressive collection of Naturalist and Expressionist periodicals, and materials on the reading circles of the “Vormärz.” German women’s literature is one of the areas of strength of current collection development. The Bruce Peel Special Collections houses the largest collection in North America of archival material by and about Georg Kaiser, with holdings that combine the Kaiser archives in Berlin and Switzerland.

The Germanic programs are especially well qualified in the following areas: Germanic language and linguistics, applied linguistics, second language acquisition, cultural ecology, cultural identity construction, eighteenth-century literature, the Age of Goethe, Romanticism, nineteenth- and twentieth-century literature and culture, women’s writing, Austrian studies, drama, artist story, narratology, aesthetics, literary and cultural theory.

205.45.5 Programs in French, Italian, and Spanish Language, Literatures, and Linguistics

205.45.5.1 General Information—French, Italian, and Spanish Language, Literatures, and Linguistics

MLCS offers graduate work leading to MA and PhD degrees with a specialization in (1) French Language, Literatures and Linguistics; (2) Spanish and Latin American Studies; (3) Italian Studies (MA only).

The library holdings to support research in French, Italian, and Spanish are extensive. Materials include eighteenth-century French fiction and poetry, French books before 1601, French books from 1601 to 1700, and three centuries of French drama. Apart from the main library, the Bibliothèque de la Faculté Saint-Jean has extensive holdings in French language books in many disciplines. In Italian the holdings contain the Cornell Petrarch Collection, Italian books before 1601, Italian books from 1601 to 1700, and Italian drama. The Library has a comprehensive book and periodicals collection permitting research in a wide range of fields in the disciplines covering Spain, Spanish America and Brazil. Notably, there are several thousand items not held anywhere else among major North American university libraries especially in the areas of Spanish literature to 1700 and 1888-1960, as well as literature and Latin American Studies from Argentina, Brazil, Chile, Mexico, and Uruguay.

Major research areas in French include: modern and postmodern French novel, literature in the nineteenth and twentieth centuries, women’s writing, literature and science, semiotics, Québec and French Canadian literature, children’s literature, literature and cinema, Caribbean literature, Creoles and creolization, L2 pedagogy and acquisition, discourse analysis, Canadian French, and translation.

Italian Studies cover the following areas: Dante, Vico, Romanticism, prose, translation, avant-garde, Postmodernism, popular culture and Canadian-Italian literature.

Although Spanish and Latin American Studies are able to support research in a number of areas in the literature and culture of Spain, the program is oriented principally to Latin America. The strengths are in the following geographic and literary/cultural areas: Cuba, Caribbean, Brazil, Mexico, Argentina, Uruguay, Chile; avant-garde, modern and contemporary Brazilian poetry, comparative American studies and cultural politics, narrative, cinema, music, women writers, visual arts, contemporary fiction, poetry, popular culture; Latin American film; colonial and transatlantic studies, indigenous studies, literary translation; L2 pedagogy and acquisition, and sociolinguistics.

205.45.6 Programs in Slavic Languages, Literatures, Linguistics, and Ukrainian Folklore

205.45.6.1 General Information—Slavic Languages, Literatures, Linguistics, and Ukrainian Folklore

MLCS offers graduate work leading to the MA and PhD degrees with specializations in (1) Slavic Languages and Literatures (Russian, Ukrainian); (2) Slavic Linguistics (Russian, Ukrainian); and (3) Ukrainian Folklore.

The holdings of the library in the area of Slavic languages and literature comprise some 40,000 volumes. Together with some 25,000 volumes in the fields of history, economics, ethnography and political science, the collection in languages and literatures make Alberta the third largest research library in terms of Slavic studies in Canada. Over four hundred microfilm copies of old printed books obtained from the library of the Ukrainian Academy of Sciences add to the research potential of the collection. The library’s collection in Ukrainian language and literature is the third largest in Canada and is growing at the rate of several hundred volumes per year. The holdings in literature encompass all periods in the history of Ukrainian literature, including émigré writings. Russian holdings are especially strong in the nineteenth-century literary classics and twentieth-century literature, but medieval and eighteenth-century Russian literature is also well represented. The holdings in language include the following: Russian, Ukrainian, literary translation, avant-garde, Postmodernism, popular culture and Canadian-Italian studies.

Research interests in Slavic include the following: In literature: Russian and Ukrainian medieval, eighteenth, nineteenth, and twentieth-century literatures, especially Romanticism, modernism and the avant-garde; hagiography, Russian Imperial ideology, historiography and court culture, Post-Soviet performance arts and visual culture, documentary genre; Ukrainian modernism and futurism; mysticism and iconography; also Polish literature and culture. In linguistics: synchronic phonology, especially Russian and Ukrainian; Russian syntax; L2 pedagogy and acquisition; discourse analysis and Slavic sociolinguistics. In folklore: folk ritual, oral folklore, dance and Ukrainian-Canadian topics.

205.45.7 Programs in Applied Linguistics

205.45.7.1 General Information—Applied Linguistics

MLCS offers graduate work leading to the MA with specialization in French, German, Russian, Spanish or Ukrainian.

The holdings of the library in Applied Linguistics are an area of strength of current collection development. Works on second language acquisition and foreign language pedagogy are particularly well represented. All research areas of departmental staff are supported with extensive monograph holdings and journals.

Research interests in Applied Linguistics include the following: sociolinguistics, especially Romance and Slavic; second language acquisition and foreign language pedagogy, with special interest in writing and reading; pragmatics, discourse analysis, bilingualism.

205.45.8 Combined Programs in MLCS and Humanities Computing

205.45.8.1 General Information—Combined Programs in MLCS and Humanities Computing

The Office of Interdisciplinary Studies in the Faculty of Arts offers a two-year MA program in conjunction with existing graduate programs in the Faculty of Arts and the School of Library and Information Studies. It integrates computing and its underlying technologies with disciplines such as literature, language, and cultural studies. For specializations available to students pursuing an MA degree in MLCS and Humanities Computing see 205.45.1.1.

205.45.9 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the following subject headings:

- French (FREN)
- German (GERM)
- Italian (ITAL)
- Modern Languages and Cultural Studies (MLCS)
- Russian (RUSL)
- Scandinavian (SCAND)
- Slavics (SLAV)
- Spanish (SPAN)
- Ukrainian (UKR)

205.46 Music

Department of Music
3-82 Fine Arts
University of Alberta
Edmonton, Alberta T6G 2C9
Phone: (780) 492-3263
Fax: (780) 492-9248
E-mail: musicgs@ualberta.ca

www.ualberta.ca/music/
include work in the areas of Musicology, Music Theory, Ethnomusicology, and interdisciplinary music studies. Areas of concentration within the MMus program include Applied Music (keyboard instruments, piano pedagogy, orchestral instruments, wind band conducting, and voice), Choral Conducting, and Composition. The DMus program is offered in piano and organ performance, in choral conducting, and in composition, and is considered on an individual basis for applicants in other performance areas.

Application forms, brochures, and further information can be obtained from the Department of Music website, address above. To receive full consideration for funding and to be assured of an audition date, applications must be received by January 5. All supporting documentation, including transcripts, composition portfolios, writing samples, and taped audition materials (in programs for which they are acceptable) must be received by January 15. For further information email queries to musicgs@ualberta.ca.

Financial Assistance
Graduate assistantships are available within the Department; the deadline for application for graduate assistantships is January 15. Additional financial assistance is outlined on the department’s website, address above.

205.46.2 The Degrees of MA and MMus

Entrance Requirements
The Department’s minimum admission requirements are a BMus degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and where applicable, satisfactory completion of English language proficiency prior to admission (see §203.2.4). In the case of the MA an Honors BA or equivalent is acceptable in place of the BMus. An audition, preferably in person, is required as part of the admission procedure for applicants in Applied Music and Choral Conducting; sample papers must be submitted by applicants to the MA, and a portfolio of compositions (together with tapes if possible) by applicants in Composition. Applicants must also submit a one-page statement of purpose.

Program Requirements
The MMus program in Applied Music will include MUSIC 505, 621 or 632, 639 and ★12 in music options; ★3 in electronic music (or equivalent) in which a major research paper is required. All MMus Applied Music students specializing in band or orchestral instruments are required to participate in a large ensemble for one year (MUSIC 641). All MMus students in organ performance may complete ★3 in an approved music option in lieu of MUSIC 639. Of the music option courses, up to ★6 may be taken in a Department other than Music, subject to approval by the student's supervisor. A juried recital will be considered the equivalent of the final oral examination.

The MMus program in Composition will include MUSIC 545, 581, 651, 660, 661 and ★6 in music options. Students who have not taken at least ★3 in electronic music (or equivalent) in their undergraduate training will be required to take MUSIC 445 outside of the program requirements; students who have not taken the bibliographic and research methods course (or equivalent) will be required to take MUSIC 505 as a program requirement. A portfolio of works composed and performed during the student’s course of study in the MMus program must be presented to a jury and will be considered the equivalent of the thesis and final oral examination.

The MMus program in Choral Conducting will include MUSIC 505, 630, 633, 634, 640, and ★6 in music options. In addition, a juried recital and an essay on some aspect of choral literature, conducting or pedagogy will be considered the equivalent of the thesis and final oral examination.

There are two programs available to the student admitted to the MA. Students must declare which program they intend to follow at the beginning of their graduate studies. Any student wishing to change program must seek the approval of the graduate committee.

(1) Thesis-based MA: The thesis-based program consists of a minimum of eight graduate-level courses (★24), including MUSIC 614, 650 and 665, ★15 in options, and a thesis.

(2) Course-based MA: The course-based program consists of a minimum of nine graduate-level courses (★27), including MUSIC 614, 650 and 665, and ★18 in options, and in addition, an oral research presentation in the Department of Music (MUSIC 903, 906, or 909 Directed Research Project).

In addition to the above requirements, MUSIC 505 may be required of entering students in both program routes if they have not demonstrated competency in bibliographic and research-methods skills in their previous studies.

All MA and MMus Choral Conducting students are required to demonstrate a reading knowledge of French or German, or another language other than English, appropriate to the area of research and approved by the student’s supervisor. This requirement will normally be completed before the thesis or capping project is undertaken. In the case of the MMus Choral Conducting, this requirement will normally be completed before the essay is undertaken. Coursework undertaken to satisfy this requirement will not be credited toward the program.

The minimum period of residence for the MA (thesis-based) and the MMus degree is two four-month terms of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is normally required.

205.46.3 The Degree of DMus

Entrance Requirements
The entrance requirement is an MMus degree or equivalent and evidence of outstanding ability and accomplishment in the area of specialization, and where applicable, satisfactory completion of English language proficiency prior to admission (see §203.2.4).

Program Requirements
Programs of study for DMus students will be formulated by the Department according to individual need; however, ★30 to ★36 are normally required. Candidates will be required to take at least ★3 of graduate-level theory, ordinarily selected from MUSIC 555, 556, or 581, and ★3 of graduate-level musicology.

DMus students will be required to demonstrate reading proficiency in one approved language other than English before being admitted to candidacy. Coursework undertaken to satisfy this requirement will not be credited toward the program.

Students in the DMus program in keyboard are required to present three juryed recitals: normally a solo recital, a collaborative recital and a lecture recital.

All DMus programs require qualifying and candidacy examinations, normally taken at the end of the second, or beginning of the third year. Examination requirements are different for each area of study.

In lieu of a formal dissertation, DMus candidates in keyboard will carry out a project comprising three components: a final solo recital; a compact disc recording of the final solo program, submitted prior to the performance of the final recital; and comprehensive scholarly notes accompanying the compact disc.

In lieu of a formal dissertation, DMus candidates in choral conducting will write a scholarly essay and present two public concerts.

In lieu of a formal dissertation, DMus candidates in composition will write a scholarly essay and compose one substantial work either for large acoustic ensemble, mixed acoustic and electroacoustic media, or electroacoustic media.

The final examination for the DMus degree in keyboard will include a defense of the solo final recital and CD; the final examination for the DMus degree in choral conducting will include a defense of the essay and the required performances; the final examination for the DMus degree in composition will include a defense of the composition.

In addition to the regulations outlined above, the general regulations for the PhD degree stated in §204.2.1 also apply.

Length of Program
The time required to complete the program will vary with the individual candidate; however, a minimum of three years of study and research is normally required.

205.46.4 The Degree of PhD

Entrance Requirements
The entrance requirement is an MA or MMus degree or equivalent and evidence of outstanding ability and accomplishment in the area of specialization, and where applicable, satisfactory completion of English language proficiency prior to admission (see §203.2.4). Applicants who hold a BMus or BA (Hon) in Music must complete the core of courses relevant to the MA.

Program Requirements
Courses of study for PhD students will be formulated by the Department according to individual need; however, at least ★18 will be required, including MUSIC 699. MUSIC 699, Directed Research, involves the preparation of a potentially publishable essay, in an area distinct from that addressed in the dissertation. Students who have completed a master’s thesis may be exempt from this requirement if the student’s supervisory committee determines that the thesis is acceptable as a substitute. All course work must be completed prior to the qualifying and candidacy examinations.
Students are required to demonstrate proficiency in two approved languages other than English appropriate to the area of research and approved by the student’s supervisory committee. Ordinarily one of those languages will be French or German. Course work undertaken to satisfy this requirement will not be credited toward the program. Any language proficiency established in the course of previous graduate work will be credited toward this requirement. Students must satisfy the language requirement prior to the qualifying (written) and candidacy (oral) examinations.

Once the student has successfully completed the candidacy examination, the student may begin the dissertation. The dissertation requirement concludes with an oral examination of the completed document.

In addition to the regulations outlined above, the general regulations for the PhD degree stated in §204.2.1 also apply.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the program will vary with the individual candidate; however, a minimum of three years of study and research is normally required.

205.46.5 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject heading Music (MUSIC). In addition, the following undergraduate courses are available for graduate credit: MUSIC 320, 413, 433, 434, 445, 501, 502, 505, 507, 508, 525, 533, 534, 535, 542, 545, 555, 556, 560.

205.47 Neuroscience
Centre for Neuroscience
6-13 Heritage Medical Research Centre
University of Alberta
Edmonton, Alberta T6G 2S2
E-mail: neurosci@ualberta.ca

205.47.1 General Information
The Centre for Neuroscience at the University of Alberta is a group of more than 70 neuroscientists from 15 departments and five Faculties. The Centre offers a graduate program that is designed for students who desire a broad training in various experimental and theoretical aspects of neuroscience while maintaining a research program that may be more specialized. This can be achieved by drawing on the expertise of specialists (members of the Centre) from various departments throughout the University who have research interests in neuroscience. The graduate program in Neuroscience offers both degrees of PhD and MSc through thesis research. Applicants not having the MSc degree will initially be admitted to the MSc program for the first year, after which they may transfer to the PhD program, provided their thesis proposal has been accepted and appropriate courses passed. Applicants already possessing an MSc degree, or an exceptionally strong undergraduate record in neuroscience, may be accepted directly into the PhD program.

Entrance Requirements
Applicants are expected to have graduated with a four-year degree, which will normally be in a biological science. The minimum grade-point average for students having a degree from the University of Alberta is 3.3, while applicants from other institutions are expected to have equivalent qualifications. Students already possessing a master’s degree will be considered for the PhD program provided they meet the minimum requirements for the MSc degree in Neuroscience. Applicants whose first language is not English must obtain a score of at least 600 (paper-based) or 250 (computer-based) on the TOEFL examination.

Applicants wishing to transfer to the program from other graduate programs within the University of Alberta will be considered on receipt of a letter from the student outlining the reasons for the transfer, letters of reference, transcripts, and a letter of support from the proposed supervisor. Students who have already completed the PhD candidacy examination in another program will not normally be considered.

Financial Assistance
A limited number of graduate research assistancies are available through the Centre. In addition, graduate teaching assistancies and research assistancies may be available through one of the departments participating in the graduate program in Neuroscience or from research grants. Other funding is provided by scholarships awarded to students by the Canadian Institutes of Health Research, Natural Sciences and Engineering Research Council, Alberta Heritage Foundation for Medical Research, and the Provincial Government of Alberta. Students will usually be expected to apply for such external funding.

205.47.2 The Degree of MSc
A total of 6 and a thesis are required for the MSc degree. Students are expected to have completed undergraduate courses such as PMCOL 371 and PHYSL 372 or their equivalent. Students deficient in this area will be expected to take these courses soon after admission.

An important feature of both the MSc and PhD programs is the requirement that students participate in a lab rotation course, typically during the first year. Students must choose either NEURO 500 (two terms; 6) or NEURO 501 (one term; 3). NEURO 500 involves rotations through three laboratories during their first year. This course is intended to provide students with a broad appreciation of research in neuroscience. Each rotation involves two months of research experience (six months in total). One rotation may be in the laboratory of the primary supervisor. Although this course is 6, an additional lecture-based, graduate-level course will be required to meet the course requirements if students register in NEURO 501. NEURO 501 involves rotation through one laboratory outside of the primary supervisor.

In addition, students will be expected to attend weekly Neuroscience seminars. Students, in consultation with their supervisory committees, may also select courses in other areas important to their research programs. No language other than English is required for the MSc. The minimum period of residence is four-month terms of full-time attendance at the University of Alberta. The time required to complete the MSc from the previous training of the applicant and the nature of the research undertaken. However, a minimum of three years is normally required. Course work will generally be completed early in the program.

205.47.3 The Degree of PhD
The course requirements for the PhD degree are as for the MSc degree but with a total of 9 and a thesis required. In addition, students will be expected to attend weekly Neuroscience seminars. Students, in consultation with their supervisory committees, may also select courses in other areas important to their research programs. No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta. The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken. However, a minimum of three years is normally required. Course work will generally be completed early in the program.

205.47.4 Graduate Courses
The core courses for the neuroscience programs are BME 530; CELL 515; CMPUT 499/BME 530; INT D 554 and 654; NEURO 500, 501, 572, and 603; PHYSL 527; PMCOL 509 and 512; PSYCI 511 and PSYCO 576. Descriptions of these courses can be found in §231, Course Listings, under the relevant subject headings:

- Biomedical Engineering (BME)
- Computer (CMPUT)
- Cell Biology (CELL)
- Neuroscience (NEURO)
- Pharmacology (PMCOL)
- Physiology (PHYSL)
- Psychiatry (PSYCI)
- Psychology (PSYCO)

205.48 Nursing
Faculty of Nursing, Graduate Studies Office
4-111 Clinical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2G3
Telephone: (780) 492-9546
FAX: (780) 492-2551
E-mail: graduate@nurs.ualberta.ca

205.48.1 General Information
The Master of Nursing program prepares nurses for leadership roles including advanced nursing practice. Graduates gain skills in the ability to articulate and use theoretical, experiential, and research bases for practice as well as demonstrate specialized clinical competence in complex situations with a defined population. There are opportunities to acquire skills in program development, program evaluation, research utilization, and the policy process. Leadership skills, evidence-based practice, case management principles, and ethics will be strong threads throughout the program. Full-time or part-time study options are available.

The Faculty of Nursing offers a PhD in Nursing program designed to educate for excellence in the development and testing of nursing knowledge. The number and types of courses included in the program will vary according to the individual needs of the student.
The Faculty is committed to the principle of research based nursing practice. The Faculty research development program includes visits by leading nurse scientists, research support services, nursing research seminars, and assistance in the communication of nursing research.

205.48.2 The Degree of MN

The Master of Nursing (MN) program prepares nurses to fulfill leadership roles in advanced practice nursing; provide health promotion, prevention and specialized care in a variety of health care settings; teach in academic and clinical settings; and contribute to the development of health programs and policies. The MN program also provides a solid academic and practice foundation for pursuing a PhD in Nursing.

Program Information

Courses and practicum experiences are intended to enhance knowledge and skills in five main areas:
- clinical and community practice
- research and evidence-based practice
- leadership/management
- teaching/learning
- inter-professional practice

While each student will develop some knowledge in all five areas, the choice of electives and practica will determine the degree of emphasis in selected areas. Students will also have opportunities for inter-professional work. Within each practice focus, students can choose either a thesis-based or a course-based option.

Students entering the MN program will select from the following:
- Technology and Innovation
- Foundations, Statistics in Nursing Research, Transforming Practice and Program Planning. In addition, students will choose from either Pharmacotherapeutics or Health Care Technology and Innovation.

Students in the individual focus or group focus will take the same five core courses: Nature of Nursing Knowledge, Research Foundations, Statistics in Nursing Research, Transforming Practice and Program Planning. In addition, students will choose from either Pharmacotherapeutics or Health Care Technology and Innovation.

Students in the specialization in aging will take the following core courses: Fundamentals of Aging, Nature of Nursing Knowledge, Research Foundations, Statistics in Nursing Research, Transforming Practice and either Pharmacotherapeutics or one of Health Care Technology and Innovation and Program Planning. The remaining electives and practica will vary depending on the student’s program goals and whether he/she is completing a thesis-based or a course-based program.

Students may complete the course and practice requirements to apply to the College and Association of Registered Nurses of Alberta (CARNA) for Nurse Practitioner (NP) licensure. Students must meet the following criteria:
- Completion of a baccalaureate degree in nursing satisfactory to the Registration Committee
- Completion of 4500 hours (approximately three years) of registered nursing practice satisfactory to the Registration Committee
- Successful completion of a nurse practitioner education program approved by the Council
- Registration on the registered nurse register
- Passed any examination respecting nurse practitioner practice approved by the Council

Entrance Requirements

The Faculty’s minimum admission requirements are

(1) A baccalaureate degree in Nursing with an average of at least 3.0 in the work of the final two years (or an equivalent qualification from a recognized institution).

(2) Three letters of reference (criteria described on the application form).

(3) An undergraduate course in each of statistics and research methods, preferably completed within the past six years.

(4) Normally a minimum of one year of clinical nursing experience in the specialty area to which the student is applying. (Students with insufficient clinical experience in their selected specialty area will be required to undertake an additional practicum either prior to entering or during their program.) NOTE: Students interested in the Neonatal Intensive Care Nursing specialty area, must meet the following special admission requirements: a minimum of two years of recent clinical experience in a Level III NICU; possess a current NRP Certificate.

(5) A TOEFL score of at least 550 (paper-based), or 213 (computer-based), or a total score of 88 with a score of at least 20 on each of the individual skill areas (internet-based), or equivalent where applicable (see §203.2.4 of this Calendar).

Upon acceptance into the MN program, the following additional requirements must be met by each student:

(1) Students admitted to the master’s program must be up-to-date in their immunizations. To determine if the immunizations are up-to-date, contact the University of Alberta Health Centre, 2-200 Students Union Building, Tel: (780) 492-2612; email: uhc@ualberta.ca; website: www.uofaweb.ualberta.ca/healthcentre/index.cfm

(2) Evidence of active registration in the College and Association of Registered Nurses of Alberta (CARNA) or possession of a courtesy or temporary permit from CARNA to practice nursing in Alberta.

(3) All students entering the MN program must provide evidence of cardiopulmonary resuscitation (CPR) certification at the Basic Rescuer’s Level on admission to the program. In addition, students who choose an individual focus in the MN program in order to obtain licensure as a Nurse Practitioner with CARNA must provide evidence of certification in Advanced Life Support (Adult/Older Adult), Pediatric Advanced Life Support (Child), Neonatal Resuscitation Program (NRP) (Neonate) or both ALS and PALS (Full/Adult ages). Annual recertification in CPR while in the MN program must meet the requirements of whatever agency(ies) with which the student is involved.

Financial Assistance

Information regarding assistantships and other forms of financial assistance will be supplied on request.

Program Requirements

Student programs are designed on an individual basis within the MN curriculum framework and in light of the student’s career goals, clinical interests, and research interests of relevance to nursing practice. Students must normally complete a minimum of ten courses plus thesis (thesis-based program) or eleven courses plus NURS 900 (course-based program) over the duration of their program.

The Faculty of Nursing requires that all MN students register in at least 9 credits in each September to August period. Thesis-based students who register full-time in their first full year (minimum 9 Fall Term and minimum 9 Winter term) will be required by the Faculty of Graduate Studies and Research to continue with full-time registration throughout the program.

No language other than English is required for the MN.

Length of Program

The Master’s program has been designed to allow for completion within a two-year period. However, the time required to complete the program varies according to the candidate’s undergraduate preparation and career experience, and the nature of the research undertaken. All requirements for the degree must be completed by thesis-based MN students within four years, and by course-based MN students within six years.

205.48.3 The Degree of PhD

Entrance Requirements

The program seeks applicants with an excellent scholastic record, sound nursing practice background, and a strong commitment to nursing research. Applicants are selected by an admission committee and potential supervisor(s) on the basis of academic and research potential as evidenced in past grades; letters of reference; synopsis of academic, research, and professional plans/expectations; scholarly work; and current curriculum vitae. The minimum requirements for entrance are (1) a Master’s degree in nursing from the University of Alberta (or its equivalent) with a GPA of 3.0 on the 4-point scale; (2) appointment of an appropriate supervisor; (3) satisfactory letters of reference; (4) academic, research, and professional plans which are acceptable, logically developed, and congruent with the PhD program and the supervisor’s research program; and (5) where applicable, evidence of proficiency in the English language (e.g., a satisfactory score on an approved English language test, i.e., TOEFL score of 550).

Program Requirements

Student programs are designed under the direction of a supervisor/ advisory committee in relation to the student’s background, dissertation interests, career goals, and learning needs in the areas of nursing theory, nursing research, nursing practice, and nursing history. The only required course is the Dissertation Seminar (NURS 699) which is compulsory for two terms. The Faculty of Nursing requires that all PhD Nursing students register in at least 18 credits in each September to August period. However, to maintain full-time status by the Faculty of Graduate Studies and Research (FGSR) criteria, the 18 credits...
must be taken during Fall (minimum ★9) and Winter (minimum ★6) terms. Once a student has begun full-time study, continued full-time registration in each Fall and Winter term will be required. In total, students must register in a minimum of ★18 (a combination of courses and thesis research) over the duration of their program.

Students will progress through (1) a written comprehensive examination at the end of their coursework; (2) an oral PhD candidacy examination (including defense of their thesis proposal); and (3) a final oral examination.

The minimum period of residence on campus is one Fall or Winter Term, or two Spring or Summer Terms. English is the only language requirement for the degree.

Length of Program

The time required to complete the program will vary according to the student’s coursework requirements and the extent of the research project. Normally, a minimum of three years is required. All requirements for the degree must be completed within six years of the student’s registration for the degree.

205.48.4 Course Offerings

Courses vary from term to term depending upon student enrolment and availability of suitable instructors. A current listing is available on Bear Tracks: https://www.beartracks.ualberta.ca/

Graduate courses can be found in §231, Course Listings, under the subject heading Nursing (NURS).

205.49 Obstetrics and Gynecology

227 HMRC
University of Alberta
Edmonton, Alberta T6G 2S2
E-mail: beymitch@ualberta.ca

205.49.1 General Information

The Department of Obstetrics and Gynecology offers the MSc degree in Medical Sciences-Obstetrics and Gynecology either as part of a post-MD residency training program or as an independent degree program for those proceeding from an undergraduate degree. Research may be carried out in any of the department laboratories or clinical facilities in a variety of disciplines related to reproductive sciences. Current research activities are focused in the areas of: perinatal medicine. Areas of research are:

- Control of parturition / Preterm labour
- Hypertension / Preeclampsia
- Immunology of Pregnancy
- Placental development and function
- Role of bioactive lipids in pregnancy
- Prostaglandins in the control of birth in women
- Sex steroids receptors
- Vascular function
- Viral Infection and Pregnancy

Inquiries should be directed to the Graduate Coordinator at the above address.

Financial Assistance

Funding from fellowships and studentships is available from external agencies on a competitive basis.

205.49.2 The Degree of MSc

Program Description

The general description for the MSc in Medical Sciences-Obstetrics and Gynecology is as presented for all MSc programs in Medical Sciences (see §205.42.2).

205.50 Occupational Therapy

Department of Occupational Therapy
2-64 Corbett Hall
University of Alberta
Edmonton, Alberta T6G 2G4
Thesis-based MS/OT E-mail:angers.libutti@ualberta.ca
Course-based MS/OT E-mail: margaret.wood@ualberta.ca

205.50.1 General Information

The Department of Occupational Therapy offers two programs leading to the degree of MSc: (1) a Master’s with thesis as an independent degree for those proceeding from a BScOT, and (2) a course-based master’s as part of the accelerated professional program in occupational therapy. The MSc programs (thesis and course-based with project) are designed to address practice and theoretical issues within a broad range of settings. Upon completion of their degree, students will be able to evaluate programs, participate in collaborative research, critically appraise current assessment and intervention options, and will have developed a specialized body of knowledge. Those in the thesis route can also gain experience in teaching undergraduate students and obtain the necessary preparation for studying at the doctoral level.

An Interprovincial Training Agreement between the Province of Alberta and the Province of Saskatchewan exists for the Department of Occupational Therapy. Contact the Department for further information.

Entrance Requirements

Applicants should refer to the English Language Requirement for the Faculty of Graduate Studies and Research (§203.2.3).

Specific entrance requirements for each program are outlined below.

(1) MSc with thesis – There will be no further admissions to this program. Applicants are recommended to consider the MSc in Rehabilitation Science program. See §205.66.2.

(2) MSc course-based (Last admission January 2008)

The deadline for receipt of applications is October 15 for January admission.

The program is open to applicants who entered the BScOT program with an undergraduate degree and sufficiently high academic standing at the end of year 3.

The department generally does not accept students with an overall GPA of less than 3.0 in their last two undergraduate years (includes year 3 of the BScOT program). Applicants are required to submit three letters of reference (at least one from an academic source), a letter of intent, and a resume.

(3) MSc course-based (Effective 2007)

The deadline for receipt of applications is March 1 for September admission. Minimum requirements include a four-year baccalaureate degree (see Note) or equivalent from a recognized academic institution with a grade point average of at least ★3.0 in the most recent ★60. Activity courses in Physical Education, studio courses in Fine Arts, and practicum courses are not considered part of the required ★60 admission requirements and are not included in the calculation of the admission GPA. One Statistics course (★3) is a required prerequisite.

Applicants are required to submit a curriculum vitae in a pre-set format including a list of referees who may be contacted via telephone, and a personal statement letter describing the applicant’s knowledge of occupational therapy and what the applicant can bring to the program.

The selection process is competitive and will be based on the GPA in the most recent ★60 taken prior to January of the admission year. Applicants are initially rank ordered according to their Admission GPA. Applicants who have completed ★30 over two consecutive terms will be ranked above those who have taken fewer than ★30.

All aspects of a student’s record, including failures and withdrawals, are considered by the Admissions Committee. Students who have received a failing grade in any postsecondary course or courses may submit a letter to the Admissions Committee explaining the extenuating circumstances which contributed to an unsatisfactory standing.

Students with a cumulative GPA of 3.5 or greater will normally be recommended for acceptance or conditional acceptance by April 15th of the admission year. The remaining applicants will be advised of their status by June 30 of the admission year.

Applicants who are admitted into the program but choose to defer their admission due to extenuating circumstances may be granted this request for a period of one academic year. A written request must be sent to the Graduate Admissions Chair by August 15 of the academic year in which they are admitted. These students must also notify the Graduate Admissions Chair of their intention to confirm their admission by June 15 following the deferred year.

Note: Courses completed 10 or more years prior to application will be reviewed.

Financial Assistance

Financial assistance may be available in the form of teaching or research assistantships. Other sources of funding may be sought as described at www.gradstudies.ualberta.ca, from provincial bursaries, professional associations, private foundations, etc.

205.50.2 The Degree of MSc

Program Requirements

(1) MSc with thesis requirements will normally consist of courses equivalent to ★24 (including OCCTH 505, 521; REHAB 500; EDLP 500; and a research
Clinical placement courses are practical requirements associated with clinical placements. To be eligible for admission to clinical placements, the student must meet the following requirements:

1. Orientation Program: The program requires that each student, after acceptance into the program, attend a department orientation program immediately before the beginning of the first term. Dates are confirmed on admission. Attendance at the orientation program is a prerequisite for OCCTH 524.

2. Course requirements:
   - **Year 1**
     - INT D 410 (32.5 hours)
     - OCCTH 501 (26 hours)
     - OCCTH 502 (39 hours)
     - OCCTH 503 (26 hours)
     - OCCTH 504 (26 hours)
     - OCCTH 510 (13 hours)
     - OCCTH 518 (52 hours)
     - OCCTH 520 (13 hours)
     - OCCTH 524 (4 weeks)
     - OCCTH 544 (19.5 hours)
     - OCCTH 562 (39 hours)
     - OCCTH 563 (39 hours)
     - OCCTH 583 (39 hours)
   - **Spring/Summer**
     - OCCTH 525 (6 weeks)
     - OCCTH 584 (26 hours)
   - **Year 2**
     - OCCTH 519 (26 hours)
     - OCCTH 526 (6 weeks)
     - OCCTH 530 (13 hours)
     - OCCTH 540 (13 hours)
     - OCCTH 543 (65 hours)
     - OCCTH 545 (26 hours)
     - OCCTH 553 (39 hours)
     - OCCTH 554 (26 hours)
     - OCCTH 557 (78 hours)
     - OCCTH 558 (26 hours)
     - OCCTH 559 (26 hours)
     - OCCTH 564 (26 hours)
     - OCCTH 565 (13 hours)
   - **Spring/Summer**
     - OCCTH 527 (6 weeks)
     - OCCTH 528 (6 weeks)
     - OCCTH 900 (variable hours)

All students must complete and pass a minimum of five distinct OCCTH 586 modules. The modules are designed to be intensive and interactive. It is imperative that registered students attend all listed hours of instruction. Students with absences will receive a grade of NC (failure, no grade point value assigned).

All costs associated with obtaining a professional degree are the responsibility of the student and this includes costs associated with the project. 

Clinical Placement Courses: Clinical placement courses are practical placements at approved facilities.

Policies and Procedures: The procedures governing clinical placements are binding and will be provided in a procedures manual.

Clinical Placement Sites: Students will attend required clinical placements at approved institutions and will follow the administrative procedures and regulations of the institutions. Placements may be located regionally, nationally and/or internationally. Students must travel in order to meet the clinical education component of the program. Students are responsible for the costs associated with clinical placements.

To be eligible for admission to clinical placements, the students must meet the following requirements:
205.51.2 The Degree of MSc

Program Requirements
Admission to the MSc in Oncology is dependent on the recommendation of the Graduate Coordinating Committee. The requirements for this degree consist of course work, completion of a research project, and preparation of a thesis. Course requirements are recommended by the supervisor and supervisory committee based on the background of the student and the area of specialization to be undertaken. A minimum of 9 in graded graduate-level courses chosen from the approved course listing, or equivalent, is required. Students are required to enrol in ONCOL 520 (normally during the first or second year) and ONCOL 661/660 (normally during the second year). Students are also required to attend ONCOL 661/660 during all years of their program.

The MSc follows the Faculty of Graduate Studies and Research residency requirements. No language other than English is required for the degree.

Length of Program
The minimum length of program is two years, depending on the research undertaken. The maximum length is four years.

205.51.3 The Degree of PhD

Program Requirements
Admission to the PhD in Oncology is dependent on the recommendation of the Graduate Coordinating Committee. The requirements for this degree consist of course work, completion of a research project, and preparation of a thesis. Course requirements are recommended by the supervisor and supervisory committee based on the background of the student and the area of specialization to be undertaken. A minimum of 12 in graded graduate-level courses chosen from the approved course listing, or equivalent, is required. Students entering the PhD program after a BSc degree, the minimum course requirement is 12 in graded graduate-level courses chosen from the approved course listing, or equivalent. Students entering the PhD program after a MSc degree, in the same discipline the minimum course requirement is 6 in graded graduate-level courses chosen from the approved course listing, or equivalent. Students are required to enrol in ONCOL 520 (normally during the first or second year) and ONCOL 661/660 (normally during the second year). Students are also required to attend ONCOL 661/660 during all years of their program and to give at least three seminars (usually one per year) through ONCOL 660.

Students in the PhD program will take a candidacy exam consisting of a written grant proposal and an oral defence of the proposal including peripheral areas. Students must prepare a thesis describing the results of their research, and be examined orally by a committee formed according to Faculty of Graduate Studies and Research regulations.

The PhD follows the Faculty of Graduate Studies and Research residency guidelines. No language other than English is required for the degree.

Length of Program
The time required to complete the PhD will vary according to previous training and the nature of the research undertaken. A minimum of four years of full-time study and research is normally required. The maximum length is six years.

205.52 Ophthalmology

Department of Ophthalmology
Faculty of Medicine and Dentistry
University of Alberta T6G 2R7
E-mail: lydynuik@ualberta.ca

205.52.1 General Information

The Department of Ophthalmology offers the MSc and PhD in Medical Sciences (Ophthalmology) degrees (see §205.42) either as part of a postgraduate training program for post-MD applicants or as an independent degree program for those proceeding from a BSc. Research may be carried out in a variety of ophthalmology-related disciplines for which staff in the Department have active research programs. Major research initiatives are in the areas of retinal imaging, retinal physiology, clinical outcome studies, molecular biology of the eye and ocular genetics. Inquiries should be directed to the Director of Graduate Education of the Department of Ophthalmology.

Entrance Requirements
The Department's normal requirements for admission of graduate students are those of the Faculty of Graduate Studies and Research but stipulating a minimum GPA of 3.0 or equivalent during each of the previous two years of university and a TOEFL score of at least 580, where applicable (see §203.2.4).

Financial Assistance
Funding from fellowships and studentships is available from external agencies on a competitive basis. Supervisors may support students from operating grants and financial assistance is also available from the Department.

205.52.2 The Degree of MSc

Program Description
The general description for the MSc in Medical Sciences (Ophthalmology) is as presented for all MSc programs in Medical Sciences (see §205.42.2).

205.52.3 The Degree of PhD

Program Description
The general description for the PhD in Medical Sciences (Ophthalmology) is as presented for all PhD programs in Medical Sciences (see §205.42.3).

205.53 Paediatrics

Department of Paediatrics
2C200 MacKenzie Health Sciences Centre
University of Alberta, Edmonton, Alberta T6G 2R7
E-mail: gary.lopaschuk@ualberta.ca

205.53.1 General Information

Facilities exist within the Department of Paediatrics for students who wish to proceed to the Master of Science degree. Inquiries should be directed to the Graduate Coordinator in the Department of Paediatrics.

In addition, Paediatrics is one of several departments working jointly to offer a PhD in medical sciences (see §205.42). Highly qualified candidates with an MSc or MD, who wish to proceed to a PhD will be considered. Inquiries about this program should be directed to the Graduate Coordinator in the Department of Paediatrics.

Entrance Requirements
Candidates who wish to apply for either the MSc or PhD program must have a BSc, MSc or MD with an average of at least 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (see §203.2.4), applicants must obtain a minimum score of 550 on the TOEFL test.

Financial Assistance
Financial assistance may be available from the Alberta Heritage Foundation for Medical Research and from other sources.

205.53.2 The Degree of MSc

Program Requirements
Required courses depend on the area of specialization and the undergraduate background of the student; however, the MSc program normally consists of 9 and a thesis. A number of courses will be compulsory (or at the discretion of the supervisor or Department), but the major portion will be dictated by the area of research undertaken by the student.

There is no second language requirement for the degree.

Length of Program
The time required to complete the MSc will vary with the individual candidate; however, a minimum of 12 months is normally required.

205.53.3 The Degree of PhD

Program Requirements
See §205.42 for information on the Paediatrics PhD program.

205.54 Pharmacology

Department of Pharmacology
9-70 Medical Sciences Building
University of Alberta
Edmonton, Alberta T6G 2H7
E-mail: gperc@pmcoul.ualberta.ca

205.54.1 General Information

The Department of Pharmacology offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in pharmacology.

The Department offers a wide range of opportunities to investigate problems in the physiological, biochemical and molecular aspects of pharmacology. Expertise is available in many state-of-the-art in vivo and in vitro methodologies.

Graduate studies in pharmacology may be of interest to candidates with general degrees in the biological sciences, physics, chemistry, pharmacology, biochemistry, physiology, pharmacy, neuroscience, medicine, and dentistry.
Inquiries should be directed to the Graduate Coordinator of the Department of Pharmacology.

**Entrance Requirements**

The Department’s minimum admission requirements are an undergraduate degree with an average GPA of 3.3 in the last two years of undergraduate work at the University of Alberta, or an equivalent qualification from a recognized institution, and a minimum TOEFL score of 600 where applicable (see §203.2.4).

**Financial Assistance**

Financial support is available for a limited number of students in the form of graduate assistantships.

### 205.54.2 The Degree of MSc

**Program Requirements**

Individual programs vary depending on the student’s background, but are designed to provide students with an appropriate graduate education in pharmacology. At least 8 in graduate pharmacology courses are normally required, in addition to the preparation and defence of a thesis on an approved research topic.

No language other than English is required for the degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the MSc will vary with the individual candidate; however, a minimum of 24 months is normally required.

### 205.54.3 The Degree of PhD

**Program Requirements**

Individual programs vary according to the student’s background, but are designed to provide students with an appropriate graduate education in pharmacology. At least 9 in graduate pharmacology courses are normally required, in addition to the preparation and defence of a thesis on an approved research topic.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of 30 months is normally required.

### 205.55 Pharmacy and Pharmaceutical Sciences

Faculty of Pharmacy and Pharmaceutical Sciences
3126 Dentistry-Pharmacy Centre
University of Alberta
Edmonton, Alberta T6G 2N8
E-mail: joyce.johnson@ualberta.ca

#### 205.55.1 General Information

The Faculty of Pharmacy and Pharmaceutical Sciences offers programs leading to the Master of Pharmacy, Master of Science and Doctor of Philosophy degrees; a limited number of graduate students can be accommodated in modern well-equipped laboratories.

Research may be undertaken in fields such as pharmaceutics, biopharmaceutics, physical pharmacy, biopharmaceutics, radiopharmacy, medicinal chemistry, pharmacoepidemiology, pharmaceutical chemistry, drug analysis, drug metabolism, microbiology, pharmacology, hospital pharmacy, clinical pharmacy, toxicology, pharmacy administration, and pharmaceutical biotechnology.

**Entrance Requirements**

The minimum admission requirements of the Faculty are an undergraduate degree in pharmacy with an average of 3.0 in the last two years of undergraduate (or graduate) work at the University of Alberta or an equivalent qualification from a recognized institution. Individuals with previous degrees in such fields as biology, microbiology, biochemistry, pharmacology or chemistry will be considered. Where applicable (see §203.2.4), applicants must obtain a minimum score of 550 (paper-based), 213 (computer-based), or a total score of 88 with a score of at least 20 on each of the individual skill areas (internet-based) on the TOEFL test, or a minimum overall band score of 6.5, with at least 5 on each band on the International English Language Testing System (IELTS).

**Financial Assistance**

The Faculty of Pharmacy and Pharmaceutical Sciences does provide minimal financial support to students who have no other funding when admitted. Further, there are campus-wide recruitment scholarships available for applicants who have superior academic standing in their undergraduate degree. The Faculty will evaluate and identify such candidates for nomination of one of these scholarships.

#### 205.55.2 The Degree of MPharm

#### 205.55.3 The Degree of MSc

**Program Requirements**

Required courses depend on the area of specialization and the undergraduate background of the student; however, the MSc program normally consists of a minimum of 12 and a thesis.

The degree specialization is in Pharmaceutical Sciences or Pharmacy Practice.

There is no language requirement for the degree. The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the MSc will vary with the individual candidate; however, a minimum of two years is normally required.

#### 205.55.4 The Degree of PhD

**Program Requirements**

The PhD program normally consists of 12 and the preparation and defence of a thesis on an approved topic.

The degree specialization is in Pharmaceutical Sciences or Pharmacy Practice.

There is no language requirement for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

**Length of Program**

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of two years is required.

#### 205.55.5 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Pharmacy (PHARM).

### 205.56 Philosophy

Department of Philosophy
4-115 Humanities Centre
University of Alberta
Edmonton, Alberta T6G 2E5
E-mail: gphil.dept@ualberta.ca

#### 205.56.1 General Information

The Department offers programs leading to the Master of Arts and Doctor of Philosophy degrees.

The fields in which advanced study may be pursued include ethics; social and political philosophy; aesthetics; feminist philosophy; logic; decision theory; philosophy of science, including philosophy of physics, biology, and cognitive science; epistemology; philosophy of language; philosophy of mind; metaphysics; ancient philosophy; modern philosophy from the 17th to the 20th century; and contemporary European and Anglo-American philosophy. Inquiries concerning possible subjects for research should be directed to the Graduate Coordinator.

**Entrance Requirements**

The Department’s minimum admission requirements are an undergraduate degree with an average of 3.3 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §203.2.4).

**Financial Assistance**

Graduate students in the Department are eligible to compete for the general graduate awards listed at www.gradstudies.ualberta.ca and are encouraged to
do so. Graduate assistantships are available within the Department; inquiries should be addressed to the Graduate Coordinator.

205.56.2 The Degree of MA

Program Requirements
Required courses depend on the area of specialization and the undergraduate background of the student; however, the MA program normally consists of ★18 and a thesis.

There is no language requirement for the degree of MA. There is no residency requirement for the degree of MA.

Length of Program
Candidates who have completed training equivalent to that of graduation with Honors in philosophy from this Department will normally require four terms to complete the master’s program. Other candidates for the MA degree may take up to two years to complete the requirements for the degree. Students with very little background in philosophy may be required to enrol in a qualifying year, or as a special student before being considered eligible for admission to a graduate degree program.

205.56.3 The Degree of PhD

Program Requirements
The PhD program normally consists of ★18 and the preparation and defence of a thesis on an approved topic.

Before taking the oral candidacy examination a student in the PhD program must have passed comprehensive examinations in three areas of the student’s choice and satisfied the logic requirement.

Students whose field of research involves primary-source material in a language other than English shall in addition be required to pass an appropriate language examination.

There is a residency requirement of one year of full-time attendance at the University of Alberta for the PhD program.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three and a half years is normally required.

205.56.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the subject heading Philosophy (PHIL).

205.57 Physical Education and Recreation

Faculty of Physical Education and Recreation
Integrated Student Services
4th Floor East Wing, Room E-475
Van Vliet Centre
University of Alberta
Edmonton, Alberta T6G 2J9
E-mail: anne.jordan@ualberta.ca

205.57.1 General Information
The Faculty of Physical Education and Recreation offers programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy. The areas available for study are listed below. For detailed information refer to www.phyedandrec.ualberta.ca
Adapted Physical Activity
Analysis of Human Movement
Athlete Health
Exercise Physiology and Biochemistry
Behavioural Medicine
Coaching
Sport Psychology
Sport and Leisure Organizations
Recreation and Leisure Studies
Sociological and Cultural Studies of Sport and Leisure
The Faculty of Business, in conjunction with the Faculty of Physical Education and Recreation, offers an MBA with specialization in Leisure and Sport Management.

Students wishing to be considered for scholarships must apply before January. The deadline for applications is March 1. Normally students are expected to start their program in September.

Entrance Requirements
The Faculty’s minimum admission requirements are an undergraduate degree with an average of at least 3.0 in the last ★60 of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution.

In addition to the above, all non-Canadian students who did not complete an undergraduate degree from an English language institution must pass, with a minimum score of 600, paper test or 250 computer test on the Test of English as a Foreign Language (TOEFL) or 90 on the Michigan English Language Assessment Battery (MELAB), before formal admission approval can be given. (See §203.2.4 of the Calendar for further information on English language examinations.)

The requirements for entry into the relevant master’s program is the BPE or BA Recreation Administration degree from the University of Alberta or its equivalent. All students not meeting this entrance requirement will be considered on an individual basis. The normal requirement for admission to the PhD is the MA, MSC, or MA Recreation and Leisure Studies degree with a thesis from the Faculty, or the equivalent.

Financial Assistance
A number of graduate assistantships and scholarships are available each year to graduate students. Graduate assistantship funding is not available to course-based degree students.

205.57.2 The Degree of MA

Both a thesis-based and a course-based option are available in the MA degree program. While both are research-oriented programs, the thesis program requires fewer courses and places more emphasis on the development of research skills.

Students entering the course-based MA route must possess a bachelor of physical education or recreation degree or equivalent.

Program Requirements
The minimum requirements for the thesis-based MA are the completion of ★12 in addition to the thesis. All students must successfully complete either PEDS 580 or PERLS 581, as well as an ethics and integrity training requirement of eight hours.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students enrolled in the course-based MA degree program must complete as a minimum, the equivalent of ★24. Students must successfully complete at least one of PEDS 580 or PERLS 581. In addition, students must successfully complete a capping exercise. This will take the form of a completed research project, an internship within the Faculty, or successful completion of a comprehensive examination.

There is no residency requirement for the course-based degree program.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally a minimum of two years is required to complete the program. The maximum time permitted is four years from the date of the first registration.

205.57.3 The Degree of MA in Recreation and Leisure Studies

Both thesis-based and course-based options are available in the MA(RLS) program. While both are research-oriented programs, the thesis program requires fewer courses and places more emphasis on the development of research skills.

Program Requirements
The minimum requirements for the thesis-based MA(RLS) are the completion of ★12 in addition to the thesis. All students must successfully complete RLS 510 and a graduate level research course, PERLS 581 recommended. In addition students will complete an ethics and integrity training requirement of eight hours.

Students must complete a residence requirement of two four-month terms of full-time attendance at the University of Alberta.

Students enrolled in the course-based MA(RLS) degree program must complete as a minimum, the equivalent of ★24. All students must successfully complete RLS 510 and a graduate level research course, PERLS 581 recommended. In addition, students must successfully complete a capping exercise. This will take the form of a completed research project or successful completion of a comprehensive examination.

There is no residency requirement for the course-based degree program.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally a minimum of two years is required to complete the program. The maximum time permitted is four years from the date of the first registration.
205.57.4 The Degree of MSc

Program Requirements
The minimum requirements for the MSc degree are the completion of 12 credit hours in addition to the thesis. As part of the degree requirements, students must successfully complete PEDS 580 and an ethics and integrity training requirement of eight hours.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally a minimum of two years is required to complete the program. The maximum time permitted is four years from the date of the first registration.

205.57.5 The Degree of MBA with Specialization in Leisure and Sport Management

The Faculty of Business in conjunction with the Faculty of Physical Education and Recreation, offers a program leading to an MBA with specialization in Leisure and Sport Management. The purpose of this applied administrative studies Master’s program is to prepare graduate students to become practicing managers/leaders in leisure and sport management. For further details please refer to $205.8 under Business.

205.57.6 The Degree of PhD

Program Requirements
The PhD degree is a research degree; however, a number of specific courses may be required within the various areas of specialization. Please consult the staff within each specified area for further details. All courses must be approved by the Faculty of Physical Education and Recreation. Emphasis is on research leading to the dissertation rather than on coursework. All students will complete an ethics and integrity training requirement of at least eight hours.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken. Normally a minimum of three years is required to complete the program. The maximum time permitted is six years from the date of the first registration.

205.57.7 Graduate Courses
Graduate courses can be found in §231, Course Listing, under the following headings:
- Physical Education and Sport (PEDS)
- Physical Education, Recreation and Leisure Studies (PERLS)
- Recreation and Leisure Studies (RLS)

205.58 Physical Therapy
Department of Physical Therapy
2-50 Corbett Hall
University of Alberta
Edmonton, Alberta T6G 2G4
MScPT (thesis-based) E-mail: angela.libutti@ualberta.ca
MSc (course-based) E-mail: jamie.nishaug@ualberta.ca

205.58.1 General Information
The Department of Physical Therapy offers two programs of graduate work leading to the Master of Science degree in Physical Therapy (MScPT).

The course-based MScPT program is designed to provide students with the clinical and evaluative skills necessary for the practice of physical therapy. This course-based master’s degree is for students who hold undergraduate degrees in a variety of fields. The thesis-based MSc program is designed for further study for therapists with an entry level degree in Physical Therapy.

205.58.2 The Degree of MSc in Physical Therapy (course-based)

Entrance Requirements
The minimum admission requirements include a baccalaureate degree from the University of Alberta with a grade point average of at least 3.0 in the most recent 60 credit hours or its academic equivalent from a recognized academic institution. Prerequisite courses are required and include the following: Human Anatomy (3), Human Physiology (3), English (3), Statistics (3), Psychology (3). Where applicable refer to the English language requirement for the Faculty of Graduate Studies and Research ($203.2.4). Applicants must have a TOEFL score of 580 (237 computer-based or 92 internet-based) or higher.

Activity courses in Physical Education, studio courses in Fine Arts, and practicum courses are not considered part of the required 60 credits admission requirements and are not included in the calculation of the academic score.

A minimum of 30 hours of volunteer or paid work is required. Work must include direct contact involving interaction with persons with cognitive, emotional or physical disabilities at no more than two facilities. Applicants are required to submit a letter from the primary work supervisor verifying the volunteer/paid work experience.

The deadline date for submitting applications for admission (including a listing of prerequisites completed and/or in progress) is February 1. Please contact the Department of Physical Therapy for further admission information.

Admission is limited to 74 positions. The selection process is competitive and will be based mainly on the GPA in the most recent 60 taken prior to January of the admission year. The grade point average of the prerequisite courses may be included in the admissions evaluation process.

Licensing by Professional Associations: Graduates from the course-based MScPT in Physical Therapy program may apply for membership in the Canadian Physiotherapy Association, 9th Floor, 880 Yonge Street, Toronto, ON, M4W 3P4, and the College of Physical Therapists of Alberta, 1350, 5555 Calgary Trail South, Edmonton, AB, T6H 5P9.

Provincial Licensing: In order to be a practising physical therapist in the Province of Alberta, graduates from the course-based MScPT program at the University of Alberta are required to take the Physiotherapy Competency Examination which consists of both written (Qualifying Examination) and clinical (Physiotherapy National Examination) examinations. The fee for the examination is the responsibility of the student. Information on the cost of the examination can be obtained from the College of Physical Therapists of Alberta (CPTA). Successful completion of the PCE will enable graduating physical therapists to practice in Alberta. Contact (780) 438-0338 for more information.

Financial Assistance
Fellowships and scholarships may be obtained from a number of external sources (e.g., Alberta Government, CPA, IODE, Arthritis Society, and others). More detailed information on these and other awards can be obtained in §210, Graduate Financial Aid.

Program Requirements
Requirements for the course-based MScPT degree include successful completion of all components of the required course of study (88), including 1,100 hours in clinical placements and a major project. The major project has two components:

(1) a practical examination of clinical skills, and
(2) a written group evaluative project.

Students must successfully complete both components of the major project to pass this major project.

Course-based MScPT courses are organized in blocks, with time periods different from the usual university terms. The start and finish dates for the blocks will vary from year to year. These block dates are available annually from the Department Office. Normally, block classes will begin one week before the usual term. The last day of Block classes may extend past the last day of classes for a term. Refer to the academic schedule (§111.1) for specific dates for each Block during the year.

Each Block will include lecture, lab, and seminar time. Students are advised that self-directed learning is an expectation of graduate students and will maximize their learning.

Academic Standing: Refer to section §203.8 for policies on Academic Standing in the Faculty of Graduate Studies and Research. The Department of Physical Therapy has established procedures governing academic standing. They are available on admission in two procedure manuals: Student Academic Handbook and Student Clinical Practice Handbook. The Department of Physical Therapy has established appeal procedures so that students who encounter special problems relating to academic standing, grade or course concerns and program requirements are reviewed in an equitable manner. Regulations regarding appeals will be included in the procedures manual provided on admission. Deadlines exist for submission of appeals. Contact the Department for details.

Clinical Placement Courses: Clinical placement courses are practical placements at approved facilities and occur over the length of the program. The first clinical placement is a one-week full-time placement. The remaining five courses are full-time with three courses five weeks in length and two courses six weeks in length.
Clinical Policies and Procedures: The procedures governing clinical placements are binding and will be provided in the Student Clinical Practice Handbook.

To be eligible for admission to clinical placements the students must meet the following requirements:

1. Licensure with the College of Physical Therapists of Alberta as Registered Practitioners
2. CPR Certification
3. Security Clearance Check
4. Medical Examination and Immunization Requirements
5. Fit Testing for Respirator Mask, as required

Details on these clinical requirements are available in the Student Clinical Practice Handbook. Please refer to the Handbook for details. Note that all fees and costs for these clinical requirements are the student's responsibility.

A student who fails a clinical placement may appeal that decision. Information regarding appeal procedures is available in the Student Clinical Practice Handbook.

Practicum Placements, Professional Practice and the Public Interest: The Dean, or supervisor acting on behalf of the Dean, may immediately deny assignment of a student to, withdraw a student from, or vary terms, conditions, or site of practicum/clinical placement if the Dean or supervisor has reasonable grounds to believe that this is necessary in order to protect the public interest.

Refer to §23.8.2 Practicum Placements, Professional Practice and the Public Interest, and 967 of the GPC Policy Manual for additional information.

Length of the Program
A minimum of 25 calendar months will normally be required to complete the program. Dependent on clinical placement availability, completion of the program may be 31 months. The time required to complete the program may be varied for individual candidates but cannot exceed the statutory limits of the program. Dependent on clinical placement availability, completion of the program may be 31 months. The time required to complete the program may be varied for individual candidates but cannot exceed the statutory limits of the Faculty of Graduate Studies and Research as set out in §203.14.

The following is a listing of course-based MScPT program requirements:

Block 1 (15 weeks)
PTHER 515 (44 hrs)
PTHER 516 (84 hrs)
PTHER 517 (1 week)
PTHER 524 (16 hrs)
PTHER 528 (100 hrs)
PTHER 529 (35 hrs)
PTHER 539 (35 hrs)
PTHER 541 (40 hrs)

Block 2 (15 weeks)
INT D 410 (32 hrs)
PTHER 504 (52.5 hrs)
PTHER 511 (10 hrs)
PTHER 534 (32 hrs)
PTHER 538 (120 hrs)
PTHER 544 (52.5 hrs)
PTHER 545 (33 hrs)
PTHER 551 (8 hrs)
PTHER 555 (37.5 hrs)

Block 3 (13 weeks)
Spring/Summer
PTHER 518 (5 weeks)
PTHER 525 (24 hrs)
PTHER 542 (12 hrs)
PTHER 554 (variable hrs)
PTHER 558 (20 hrs)

Block 4 (15 weeks)
PTHER 520 (6 weeks)
PTHER 535 (24 hrs)
PTHER 543 (20 hrs)
PTHER 546 (75 hrs)
PTHER 551 (6 hrs)
PTHER 563 (50 hrs)
PTHER 565 (28 hrs)
PTHER 567 (40 hrs)

Block 5 (15 weeks)
PTHER 521 (5 weeks)
PTHER 526 (25 hrs)
PTHER 536 (25 hrs)
PTHER 548 (120 hrs)
PTHER 552 (13 hrs)
PTHER 549 (27 hrs)

Block 6 (13 weeks)
Spring/Summer
PTHER 522 (5 weeks)
PTHER 527 (20 hrs)
PTHER 537 (24 hrs)
PTHER 557 (80 hrs)
PTHER 559 (32.5 hrs)
PTHER 593 (12 hrs)

Block 7 (15 weeks)
PTHER 523 (5 weeks)
PTHER 558 (18 hrs)
PTHER 900 (variable hrs)

Notes:
1. The above PATHER courses are open to course-based MScPT students only or consent of the Department.
2. INT D 411 can be combined with a 2nd or 3rd year clinical placement for a total weighting of 0.4.
3. Students entering the program in 2008-09 must complete approved elective course work totaling 3. Students courses completed prior to the MScPT course-based program will not be considered for the 3 elective requirement.

205.58.3 The Degree of MSc in Physical Therapy (thesis-based)

Entrance Requirements
To meet the minimum entrance requirements of the Department of Physical Therapy, applicants must have a grade point average of 3.0 in the last two years of their physical therapy baccalaureate program at the University of Alberta or an equivalent qualification from another institution. Where applicable (see §203.2.A) applicants must have a minimum TOEFL score of 580. Applicants to the program will be judged not only on their academic record, but also on their research potential as indicated in letters of reference and other supportive material. Clinical experience may be required by some supervisors. The deadline for receipt of applications for the graduate program in Physical Therapy is March 1 for September admission and July 1 for January admission.

Financial Assistance
It is strongly recommended that students undertake one term as a teaching assistant and one term as a research assistant. The student will receive remuneration as a graduate assistant at the prescribed University rate. Fellowships and scholarships may be obtained from a number of external sources (e.g., NHRDP, MRC, AHFMR, Alberta Government, CPA, IODE, Arthritis Society, and others). More detailed information on these and other awards can be obtained at www.gradstudies.ualberta.ca.

Program Requirements
Students are required to complete a minimum of four (12) graduate-level courses. Two of these courses must be REHAB 500 (Conducting Rehabilitation Research) and an approved graduate-level statistics course. The remaining two courses can be chosen from other graduate courses offered by the home department or other departments in the University. Students must also successfully defend their research proposal and complete and defend a thesis.

No language other than English is required for the MSc. There is no residence requirement.

Length of Program
The program normally takes two years to complete if the student is registered full-time. Students must complete the program within four years.

205.58.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the following subject headings:
- Physical Therapy (PTHER)
- Rehabilitation Medicine (REHAB)

205.59 Physics
Department of Physics
238 CEB, 11322 89 Ave
University of Alberta
Edmonton, Alberta T6G 2G7
E-mail: grad-program@phys.ualberta.ca

205.59.1 General Information
Programs leading to the degrees of Master of Science and Doctor of Philosophy are open to suitable graduates in physics, engineering physics, geophysics, or equivalent programs.

The Department’s focus areas of research, each of which includes experimental, observational, computational and theoretical components, are the following:

1. Astrophysical Sciences: astronomy, cosmology, general relativitv and black hole physics, computational plasma physics, fusion, laboratory plasmas, magnetic confinement, auroral, magnetostricpheric and space physics, radiation, belt physics.
(2) Condensed Matter Physics and Material Science: acoustics, biophysics, dynamic processes at surfaces, electron and scanning probe microscopy, high Tc superconductivity, magnetism, nanoscale physics, phase, transitions in porous media, ultrafast laser spectroscopy, ultrafast microscopy.
(3) Particle Physics: high energy particle physics, particle astrophysics, nuclear astrophysics, string theory and supersymmetry, precision tests of the standard model. (Experimental work is conducted at CERN, Fermilab, Sandia, TRIUMF.)
(4) Geophysics: fluids in porous media, geodynamics, magneto-telluric methods, paleomagnetism, rock magnetism, rock physics, seismology.

The Department also offers, together with adjunct faculty in the Faculty of Medicine and Dentistry, graduate programs in medical physics: diagnostic imaging, NMR spectroscopy and MRI imaging, nuclear medicine and radiation treatment.

Individual programs will be arranged in consultation with the Associate Chair of the Department of Physics and members of the Department. Information, including more detailed program requirements, may be obtained by contacting the Associate Chair of the Department of Physics.

Entrance Requirements
The Department’s admission requirements are an undergraduate degree in physics, engineering physics, geophysics or an equivalent program, normally with an average of 3.2 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. Where applicable (refer to §203.2.4), candidates must pass the TOEFL test with a score of 550 (213 computer-based; 88 internet-based, with a minimum of 20 on each subtest) or better.

Financial Assistance
A number of graduate assistantships are available. For the year 2006-2007, these stipends range from $20,991 to $25,794 per annum depending upon the degree program and year of study. Applicants are automatically considered for this assistance when they are accepted into the graduate program.

205.59.2 The Degree of MSc
Program Requirements
A minimum of ★12 is generally required of students in the thesis based MSc program. Of these, two must be taken in the Department of Physics, and two must be at the 500 level or above. Specific course requirements are determined by the focus area in which the student is studying. The student’s supervisory committee may also make additional requirements. A research project, the results of which are to be presented in a thesis and an oral examination, is also required.

Students are required to participate in Department colloquia. Details are available from the graduate coordinator.

A supervisory committee of three faculty members is appointed for each graduate student. Within the first year of registration in the program, the committee makes a formal recommendation on the candidate’s potential for graduate work. At this time students may in certain cases be permitted to transfer directly to a PhD program if their progress should warrant such a transfer.

There is no language requirement for the degree of MSc.

The minimum period of residence for the thesis MSc is two four-month terms of full-time attendance at the University of Alberta.

For the course-based MSc in Geophysics, a minimum ★30 at the graduate-level is required. These courses must include GEOPH 521, 623 and one or more of GEOPH 612, 615, 616 or 620. In addition a project course (GEOPH 900) is required. Each student’s program of study is supervised by an academic advisor. In a final “capping exercise” the results of the project course are presented in oral and written form to an examining committee of two academic staff members. There is no residence requirement for the course-based MSc.

Length of Program
The time required will vary according to the previous training of the candidate and the nature of the research undertaken; however, an average of two years is normally required to complete the MSc program.

For the course-based MSc in Geophysics, the program will normally require 12-18 months of full-time study for its completion. The maximum allowable time for completion is four years.

205.59.3 The Degree of PhD
Program Requirements
Students in the PhD program are required to take a minimum of ★24 after the equivalent of the Honors BSc degree from the University of Alberta. These include the courses required for the MSc program. Specific course requirements may be determined by the focus area in which the student is studying. The student’s supervisory committee may also make additional requirements. All students in the PhD program are advised to take at least ★6 in fields of study different from their own research areas. When the course requirements are successfully completed, the student’s research is presented orally and in written (thesis) form to an examining committee. No language other than English is required for the degree.

Students are required to participate in Department colloquia and seminars. The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program
The minimum time for completion of a PhD degree is three academic years of study and research after the Honors BSc degree or two academic years after the equivalent of the MSc degree at the University of Alberta. Normally the PhD degree is completed within five years of the BSc, or within four years of the MSc.

205.59.4 Graduate Courses
Graduate courses can be found in §231, Course Listings, under the following subject headings:
Geophysics (GEOPH)
Oncology (ONCOL)
Physics (PHYS)

205.60 Physiology
Department of Physiology
7-55 Medical Sciences Building
University of Alberta, Edmonton, Alberta T6G 2H7
E-mail: grad.physiology@med.ualberta.ca
www.physiology.ualberta.ca

205.60.1 General Information
Facilities are available for graduate training leading to the Master of Science and Doctor of Philosophy degrees. The Department is well equipped for most fields of physiological research, including various areas of endocrinology, cellular physiology, neurophysiology, and biophysics.

Information and requests for application forms for admission may be obtained from the Department. Students may also write to the Chair of the Department in regard to their special interests and related matters.

Entrance Requirements
The Department’s minimum admission requirements are an undergraduate degree with an average of at least 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 580 for paper-based exams or 237 for computer-based exams where applicable (see §203.2.4).

Financial Assistance
Financial assistance in the form of graduate assistantships is usually available for graduate students.

205.60.2 The Degree of MSc
Program Requirements
Required courses depend on the area of specialization and the undergraduate background of the student; however, the program generally consists of ★9 (three single-term courses) and a thesis.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the MSc will vary with the individual candidate; however, a minimum of 18 months is normally required.

205.60.3 The Degree of PhD
Program Requirements
The PhD program generally consists of ★9 (three single-term courses) and the preparation and defence of a thesis on an approved topic. An oral candidacy examination in the student’s area of research must also be passed, at least six months prior to the final defence.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program
The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.
205.61.1 General Information

The Department of Political Science offers programs leading to the Master of Arts and Doctor of Philosophy degrees.

The following fields of specialization are offered in the master’s and doctoral programs: Canadian politics, comparative politics, Developing or Industrialized, gender and politics, international relations and political philosophy/theory.

Entrance Requirements

The Department’s minimum admission requirements are an undergraduate degree with an average of 3.3 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 250 (computer) or 600 (paper) where applicable (see §203.2.3). A number of graduate assistantships are available for qualified students.

205.61.2 The Degree of MA

Program Requirements

Two MA routes are available: a) a thesis-based MA and b) a course-based MA for both full- and part-time students.

For the thesis-based MA, normally 18 of graduate-level courses and a thesis (registering in a minimum of 6 of thesis registrations) are required. For the course-based MA, 24 of graduate-level courses and a project (POL S 900) are required.

There is no language requirement for the MA degree.

The minimum period of residence for full-time programs is two four-month terms of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the MA will vary with the program and candidate. Full-time students in the MA thesis-based program will normally complete the program within 18 months. Full-time students in the MA course-based program will normally complete the program within 12 months. A part-time MA student must maintain continuous registration and complete the program in four years.

205.61.3 The Degree of PhD

Program Requirements

A PhD student with an MA or equivalent in political science is normally required to complete a minimum of 18 at the graduate level. Students will normally be required to complete the core courses in each of their two chosen fields of concentration. Students must take and pass written comprehensive examinations in any two of the following five fields: Canadian politics; comparative politics; gender and politics; international relations; political philosophy/theory. The student’s supervisor or supervisory committee may also determine that a special skill or area is essential to the student’s program and may require additional coursework. It is normally expected that all coursework will be complete within two terms and that students would take comprehensive exams and defend their dissertation proposals during the second year in the program.

Students will also be expected to prepare a thesis proposal for oral candidacy examination. This normally occurs within eight months of passing the comprehensive exams, i.e., within the third year of the program. The thesis proposal must be approved and the oral candidacy examination passed before students become full doctoral candidates.

Before defending the thesis each student must demonstrate proficiency in a language other than English. Students taking Canadian politics as a field will normally be required to take French.

All candidates for the PhD must prepare an acceptable thesis embodying the results of their research. Candidates will be examined orally on their thesis results.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program

A minimum of four years is normally required to complete the PhD.
from a recognized institution (see §203.2.1). If the undergraduate degree was not granted by a recognized English-language institution, English-language proficiency must be demonstrated by a total score of 88 with a score of at least 20 on each individual skill area on the internet-based TOEFL. An acceptable score on another approved English language proficiency exam will suffice where the internet-based TOEFL is not available (see §203.2.4).

The Department requires that applicants submit a statement of their research interests, three letters of recommendation, and scores on the Graduate Record Exam General Test.

**Financial Assistance**

Graduate assistantships for research and teaching are normally available for students who maintain satisfactory performance in their assistantship duties and make satisfactory progress toward a degree. In addition, a certain number of assistantships are available during the summer. Supplementary funding for students holding external awards is available.

### 205.63.2 The Degrees of MA and MSc

**Program Requirements**

Normally, students are admitted into the master’s program with a bachelor’s degree. It is expected that students will generally continue in the PhD program after completing their master’s. The requirements for the master’s degree include:

1. a first-year research project,
2. the successful defense of a master’s thesis, and
3. the completion of a minimum of 17 graduate-level courses.

The required courses normally include: PSYCO 502 (2); PSYCO 531 (3); PSYCO 532 (3); one 500- or 600-level course (3) in the student’s research focus; and two 500- or 600-level courses (3 each) in related areas of psychology. Focal and related courses are determined by the student’s supervisory committee.

No language other than English is required for the master’s degree.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

### 205.63.3 The Degree of PhD

Normally, students are admitted into the PhD program after completing either a bachelor’s or a master’s degree program.

**Program Requirements for Students with a Bachelor’s Degree**

Requirements for the PhD for students entering with a bachelor’s degree include:

1. a first-year research project,
2. a second-year research project,
3. a written qualifying exam as determined by their supervisory committee,
4. an oral candidacy exam,
5. a written dissertation proposal,
6. the successful defense of a doctoral dissertation, and
7. the completion of a minimum of 17 graduate-level courses.

The required courses normally include: PSYCO 502 (2); PSYCO 531 (3); PSYCO 532 (3); one 500- or 600-level course (3) in the student’s research focus; and two 500- or 600-level courses (3 each) in related areas of psychology. Focal and related courses are determined by the student’s supervisory committee.

Additional course work may be required by the supervisory committee, in consultation with the Associate Chair for Graduate Studies and Research, to ensure that a student is adequately prepared for research in his or her areas of concentration.

No language other than English is required for the degree.

The minimum period of residence is three academic years of full-time attendance at the University of Alberta.

**Program Requirements for Students with a Master’s Degree**

Requirements for the PhD for students entering with a master’s degree include:

1. a written qualifying exam as determined by their supervisory committee,
2. an oral candidacy exam,
3. a written dissertation proposal, and
4. the successful defense of a doctoral dissertation.

Students entering the PhD program with a master’s degree from another university are required to take PSYCO 502 (2).

Additional course work may be required by the supervisory committee, in consultation with the Associate Chair for Graduate Studies and Research, to ensure that a student is adequately prepared for research in his or her areas of concentration. Students normally are expected to take their candidacy exam and to submit their dissertation proposal no later than the end of their first year in the PhD program.

No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

### Length of Program

Students are normally expected to complete the program in four years when entering with a bachelor’s, three years when entering with a master’s from another institution, and two years when entering with a master’s from the University of Alberta. However, the time required to complete the program will vary with the individual candidate. Students are evaluated annually with respect to progress in the program.

### 205.63.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Psychology (PSYCO).

### 205.64 Public Health Sciences

**Public Health Sciences**

13–103 Clinical Sciences Building

University of Alberta

Edmonton, Alberta T6G 2G3

E-mail: grad.prin@phs.med.ualberta.ca

### 205.64.1 General Information

The Department of Public Health Sciences currently offers a two-year program leading to the course-based degree of Master of Public Health with several specializations and a two-year program leading to the thesis-based degree of Master of Science and a in Public Health Sciences with several specializations. A PhD in Public Health Sciences is also offered.

**Entrance Requirements**

The Department’s minimum admission requirements are those set out as minimum acceptable standards by the Faculty of Graduate Studies and Research. These include a four-year baccalaureate degree with a grade point average of at least 3.0 on the 4-point letter grading system in the work of the last two years of university education at the University of Alberta, or an equivalent qualification from another institution, and a minimum TOEFL score of 570 (paper-based) or 230 (computer-based) or an IELTS score of 6.5, where applicable (see §203.2.4).

The Department also requires the following:

1. A current curriculum vitae.
2. Three letters of reference.
3. a. Course-based applicants – A letter of not more than 800 words that outlines a synthesis of the applicant’s background (scholastic/academic training and work experience), motivation for applying to this degree and career goals.
4. b. Thesis-based applicants – A letter of not more than 800 words that outlines the anticipated research topic(s) or areas of thesis research. The applicant should also identify appropriate faculty members from the Department of Public Health Sciences as a potential supervisor.

(4) Educational Test Scores, the GRE and/or GMAT and/or MCAT, are required for all applications for the MPH in Health Policy and Management degree. The MPH and MSc in Environmental Health Sciences requires the GRE or GMAT for applicants with qualifications from outside Canada. The GRE or GMAT is recommended for all other degrees. No minimum cut-off is used to evaluate test scores, but successful applicants generally score above the 70th percentile in most categories.

(5) A prerequisite for admission is a recent course in introductory statistics such as STAT 141 or STAT 151. Admission may be granted provisionally pending successful completion of one of these courses, or equivalent. Applicants with prior statistics training may have this prerequisite waived by demonstrating satisfactory knowledge.

### Financial Assistance

All students admitted to the Department of Public Health Sciences must establish their own funding prior to their admission.
Graduate students can finance their studies at the University of Alberta in several ways. Some financial programs are administered by the Faculty of Graduate Studies and Research, and others are administered by other campus offices or outside organizations.

Students in public health sciences are eligible to compete for the general graduate awards listed at www.gradstudies.ualberta.ca. The Graduate Research Assistantship Fund Awards are available to full-time students in the MSc and PhD degree programs. Applications are evaluated based on the student’s academic record, publications, presentations, letters of reference, and the applicant’s statement of personal goals, by the Awards Committee. Students are urged to seek awards from other agencies, such as SSHRC, NSERC, CIHR, AHFMR, etc.

Support may be available to some students from research grants held by individual staff members. The amount of support will vary with the nature of the research grant and the regulations of the granting agency.

205.64.2 The Degree of MPH in Clinical Epidemiology
(course-based)

Program Requirements
(1) Required Courses:
   a. PHS 505, 596, 598, 696, 698
   b. Field Practicum: PHS 509 or Project in Public Health Sciences: PHS 701
(2) Two of:
   a. PHS 685, 692, 693, 697, MED 600.
(3) Elective Courses: Students are required to complete four (★12) graduate-level courses approved by the Department.

Students are expected to participate in the Departmental Grand Rounds/Colloquia series.

Length of Program
The minimum time to complete the program is 12 months. The maximum time permitted for completion of the program is six years.

205.64.3 The Degree of MPH in Global Health (course-based)

Program Requirements
(1) Required courses:
   a. HPS 501, PHS 510, 531, 596, 600, 631, 640, 641
   b. Field Practicum: PHS 509 and PHS 702
(2) Elective Courses: Students are required to complete four (★12) graduate-level courses from the following list or courses approved by the Department: PHS 506, 540, 542, 544, 550, 581, 692, 697

(3) Students are expected to participate in the School’s Colloquium Seminar series.

Length of Program
The minimum time to complete the program is 16 months. The maximum time permitted for completion of the program is six years (part- or full-time).

205.64.4 The Degree of MPH in Health Policy and Management (course-based)

Program Requirements
(1) Required courses:
   a. HPS 501, LAW 599, PHS 500, 510, 531, 550, 570, 580, 596, 600, 709
   b. Field Practicum: PHS 509 and 701
(2) Elective Courses: Students are required to complete three (★9) graduate-level courses approved by the Department.

Students are expected to participate in the School’s Colloquium series.

Length of Program
The minimum time to complete the program is 20 months. The maximum time permitted for completion of the program is six years (part- or full-time).

205.64.5 The Degree of MPH in Health Technology Assessment (course-based)

Program Requirements
(1) Required courses:
   a. PHS 505, 531, or 598, 596, 671, 673, 685
   b. Field Practicum: PHS 509 or Project in Public Health Sciences: PHS 701
   c. HPS 507, 513, 520, 521, 540, 543, 593, 640, 693, 695, 697.
(2) Elective Courses: Students are required to complete four (★6) graduate-level courses approved by the Department.

Students are expected to participate in the Department Grand Rounds/Colloquia series.

Length of Program
The minimum time to complete the program is 12 months. The maximum time permitted for completion of the program is six years.

205.64.6 The Degree of MPH in Environmental and Occupational Health (course-based)

Program Requirements
(1) Required courses:
   a. HPS 510, PHS 506, 510, 511, 512, 522, 531, 596, 600
   b. Field Practicum: PHS 509 and 701
(2) Elective Courses: Students are required to complete two (★9) graduate-level courses from the following list or courses approved by the Department: PHS 607, 513, 520, 521, 540, 543, 593, 640, 693, 695, 697.

Students are expected to participate in the School’s Colloquium series.

Length of Program
The minimum time to complete the program is 16 months. The maximum time permitted for completion of the program is six years (part- or full-time).

205.64.7 The Degree of MPH in Public Health Leadership (course-based)

Program Requirements
(1) Required Courses:
   a. HPS 501, PHS 506, 510, 512, 531, 580, 581, 596, 600
   b. Field Practicum: PHS 509 and 702
(2) Elective Courses: Students are required to complete at least two (★9) graduate-level courses from the following list or courses approved by the Department: PHS 507, 520, 540, 550, 582, 593, 685, 687

Students are expected to participate in the School’s Colloquium series.

Length of Program
The minimum time to complete the program is 16 months. The maximum time permitted for completion of the program is six years (part- or full-time).

205.64.8 The Degree of MPH in Quantitative Methods
(course-based)

Program Requirements
(1) Required Courses:
   a. HPS 501, PHS 510, 531, 596, 600, 692 or 693, 696, 698, 799
   b. Field Practicum: PHS 509 and 701
(2) Elective Courses: Students are required to complete three (★9) graduate-level from the following list or courses approved by the Department. MED 600, PHS 685, SOC 609, 616, STAT 532, 561, 568

Students are expected to participate in the Departmental Grand Rounds/Colloquia series.

Length of Program
The minimum time to complete the program is 16 months. The maximum time permitted for completion of the program is six years.

205.64.9 The Degree of MSc in Public Health Sciences in Clinical Epidemiology

Program Requirements
(1) Required Courses:
   a. PHS 505, 596, 598, 696, 698
   b. Two of: MED 600, and PHS 685, PHS 692, PHS 693, PHS 697
(2) Elective Courses: Students are required to complete at least one (★3) graduate-level courses approved by the Department.
(3) Thesis students will successfully complete and defend a thesis on a research topic in the area, defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.
The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are required to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part-or full-time).

**205.64.10 The Degree of MSc in Public Health Sciences in Environmental Health Sciences**

**Program Requirements**

Students admitted to this program will be expected to have an advanced-level course in environmental chemistry.

(1) **Required Courses:** PHS 505, 511, 512, PHS 522 or equivalent, PHS 596

(2) **Elective Courses:** Students are required to complete at least one 3-credit graduate-level course approved by the Department.

(3) Thesis students will successfully complete and defend a thesis on a research topic in the area, defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are expected to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part-or full-time).

**205.64.11 The Degree of MSc in Public Health Sciences in Epidemiology**

**Program Requirements**

(1) **Required Courses:**
   a. PHS 505, 596, 598, 696, 698
   b. One of: PHS 693, PHS 697

(2) **Elective Courses:** Students are required to complete at least two 12-credit graduate-level courses approved by the Department.

(3) Thesis students will successfully complete and defend a thesis on a research topic in the area defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are required to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part-or full-time).

**205.64.12 The Degree of MSc in Public Health Sciences in Global Health**

**Program Requirements**

(1) **Required Courses:** PHS 505, 541, 596, 598, 640, 641, 697

(2) **Elective Courses:** Students are required to complete at least one 3-credit graduate-level course approved by the Department.

(3) Thesis students will successfully complete and defend a thesis on a research topic in the area, defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are required to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part-or full-time).

**205.64.13 The Degree of MSc in Public Health Sciences in Health Policy Research**

**Program Requirements**

(1) **Required Courses:** PHS 500, 505, 531 or 598, and 596

(2) **Elective Courses:** Students are required to complete four 12-credit graduate-level courses approved by the Department.

(3) Thesis students will successfully complete and defend a thesis on a research topic in the area, defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are expected to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part-or full-time).

**205.64.14 The Degree of MSc in Public Health Sciences in Occupational Health**

**Program Requirements**

(1) **Required Courses:** PHS 500, 505, 520, 521, 596, 598

(2) **Elective Courses:** Students are required to complete at least two 3-credit graduate-level courses approved by the Department.

(3) Thesis students will successfully complete and defend a thesis on a research topic in the area, defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.

The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are expected to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part-or full-time).

**205.64.15 The Degree of MSc in Public Health Sciences in Population Health**

**Program Requirements**

(1) **Required Courses:** PHS 500, 505, 540, 596 and PHS 531 or 598 or SOC 588

(2) **Elective Courses:** Students are required to complete at least one 3-credit graduate-level course approved by the Department.

(3) Thesis students will successfully complete and defend a thesis on a research topic in the area, defined in consultation with the student’s supervisory committee. The scope and quality of the thesis should be appropriate to form the basis for a refereed journal publication.
The minimum period of residence is two four-month terms of full-time attendance at the University of Alberta.

Students are expected to participate in the School’s Colloquium and Student Seminar series.

**Length of Program**

The time required to complete the program will vary according to the previous training of the applicant and the nature of the research undertaken; a minimum of two years is normally required. The maximum time permitted for completion of the program is four years from the date of first registration (part- or full-time).

**205.64.16 The Degree of PhD in Public Health Sciences**

**Program Requirements**

1. **Course Requirements**: The course options are those outlined under the MSc sections (§205.64.10, 205.64.11, 205.64.12, 205.64.14, and 205.64.15). These requirements serve as a guide for the PhD programs, but the specific requirements will be tailored to individual student background and the needs for their doctoral research. A Candidacy Examination is typically planned for sometime after the first year of the program, once all course work is completed. The Candidacy Examination should occur by the end of the second year of the PhD program. The Candidacy Examination will be administered in two parts, a Written Examination, which is primarily intended to comprehensively examine the student on her or his area of research interest, and an Oral Examination, which is primarily intended to assess the student’s ability to conduct independent research.

2. **Dissertation**: Students in the program will successfully complete and defend a dissertation on a research topic in the program area defined in consultation with the student’s supervisory committee. The scope and quality of the dissertation must represent an advance in knowledge of the candidate’s field of study and should be appropriate to form the basis for at least one refereed journal publication describing the methodology and results of the research.

   The minimum period of residence is four four-month terms of full-time attendance at the University of Alberta.

   Students are expected to participate in the School’s Colloquium series.

**Length of Program**

The doctoral program has an expected four-year minimum duration for full-time students from the bachelor’s level. The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken. The maximum time permitted for completion of the program is six years from the date of first registration (part- or full-time).

**205.64.17 Graduate Courses**

Graduate courses can be found in §231, Course Listings, under the subject heading Public Health Sciences (PHS).

**205.65 Radiology and Diagnostic Imaging**

Department of Radiology and Diagnostic Imaging
2A2 42 Mackenzie Health Sciences Centre
Edmonton, Alberta T6G 2B7
E-mail:jmdawson@cha.ab.ca

**205.65.1 General Information**

Facilities exist within the Department of Radiology and Diagnostic Imaging, University of Alberta, for students who wish to obtain either a Master of Science or a PhD degree.

Research may be carried out in medical imaging, radiological and health physics, or radiation biology and biophysics.

The Department of Radiology and Diagnostic Imaging participates with other departments of the Faculty of Medicine and Dentistry in offering these interdisciplinary programs in medical sciences. Details of the entrance requirements and terms of the MSc and PhD programs are defined in §205.42 of this Calendar.

Inquiries regarding graduate work in the Department of Radiology and Diagnostic Imaging should be directed to the Department Chair or to the Graduate Coordinator, Department of Radiology and Diagnostic Imaging, 2A242 Mackenzie Health Sciences Centre.

**Entrance Requirements**

The Department’s minimum entrance requirements are graduation in medicine for the clinical research areas, and in the appropriate scientific disciplines for the other research studies, with an average of 3.0 (or equivalent) in the last two years of undergraduate (or graduate) work at the University of Alberta. Applicants with an equivalent qualification from a recognized institution will be considered for graduate studies. Where applicable (see calendar §203.2.4), applicants must obtain a minimum score of 250 on the TOEFL test.

**Financial Assistance**

Support may be obtained from several grant-awarding agencies for work in these areas.

**205.65.2 The Degree of MSc**

**Program Requirements**

Appropriate coursework will be decided upon in conjunction with the Chair of the Department, the Graduate Coordinator, or the Medical Sciences Graduate Program Committee. Under normal circumstances candidates for the master’s degree would be expected to complete 9 credits at the graduate-level and to prepare and defend a thesis on an approved topic. Additional courses may be required depending on the student’s background.

The minimum period of residence is three four-month terms of full-time attendance at the University of Alberta.

**Length of Program**

The length of the program is two to three years.

**205.65.3 The Degree of PhD**

**Program Requirements**

Appropriate coursework will be decided upon in conjunction with the Chair of the Department, the Graduate Coordinator or the Medical Sciences Graduate Program Committee. Under normal circumstances candidates for the degree would be expected to complete 12 credits at the graduate-level and to prepare and defend a thesis on an approved topic. Additional courses may be required depending on the student’s background.

The minimum period of residence is four four-month terms of full-time attendance at the University of Alberta.

**Length of Program**

The length of the program is three to four years.

**205.65.4 Graduate Courses**

Graduate courses can be found in §231, Course Listings, under the subject heading Radiology and Diagnostic Imaging (RADDI).

**205.66 Rehabilitation Medicine**

Faculty of Rehabilitation Medicine
3-48 Corbett Hall
University of Alberta
Edmonton, Alberta T6G 2G4
E-mail:angela.libutti@ualberta.ca

**205.66.1 General Information**

The Faculty of Rehabilitation Medicine offers interdisciplinary programs leading to the degrees of Master of Science and Doctor of Philosophy in Rehabilitation Science. The programs are designed to prepare students for research in Rehabilitation Science and the systematic study of psychosocial, communication, neurological, and musculoskeletal disorders in humans of all ages. Students will specialize in one of those four general content areas which represent broad interdisciplinary bodies of knowledge.

Inquiries concerning the MSc and PhD programs in Rehabilitation Science should be directed to:

Associate Dean for Graduate Studies and Research
Faculty of Rehabilitation Medicine
3-48 Corbett Hall
University of Alberta
Edmonton, Alberta
Canada T6G 2G4

**Entrance Requirements**

The minimum requirements for admission into the programs are:

1. For the MSc, a bachelor’s degree or equivalent or a previous graduate degree in a rehabilitation discipline or related field from a recognized post-secondary institution. For the PhD, a master’s degree in a rehabilitation discipline or a related field from a recognized academic institution or an Honors BSc degree (or equivalent) in rehabilitation or a related field from a recognized academic institution;
205.66.3 The Degree of PhD

Program Requirements

Normally, a student’s plan of study will be interdisciplinary in focus (i.e., not department-based). However, there may be instances in which the plan of study is focused primarily in one of departments in the Faculty (Occupational Therapy, Physical Therapy, Speech-Language Pathology and Audiology). Admission to the PhD in Rehabilitation Science program is dependent on the recommendation of the Graduate Programs Committee which is composed of representatives of each department and the non-departmentalized staff in the Faculty and chaired by the Associate Dean for Graduate Studies and Research.

Students will be required to complete at least five graduate-level courses or the equivalent plus thesis and successfully propose, implement, and report their master’s thesis research according to Faculty standards. Required courses will include REHAB 500 – Conducting Rehabilitation Research, REHAB 512 – Issues in Rehabilitation Science, and at least one graduate-level course in statistics or research design. Elective courses will be different for each student and will be determined by individual students in consultation with their supervisors and based in part on the student’s research interests. Students and their supervisors will develop a plan of study for the entire program and submit that plan of study for approval by the Graduate Programs Committee.

Students who possess a recognized clinical practice credential at the time of admission or who, after admission and prior to graduation, acquire such a credential on the basis of their work in a previous degree program will be able to denote their area of emphasis on their MSc Rehabilitation Science degree with the following specific designations under field of specialization: Aging, Audiology, Occupational Therapy, Physical Therapy, Speech-Language Pathology. In addition, students who have not acquired the approved clinical practice credential as described above will have no designation under field of specialization. The specialization in Aging is tailored to the needs of students who are interested in aging-related focus in Rehabilitation Science.

Length of Program

The time required to complete the PhD program will vary according to the plan of study and continuing work in the same field is normally required to complete the equivalent of two years’ work.

205.67 Religious Studies

Programs in Religious Studies are governed by an Advisory Council with representatives from multiple Departments in the Faculty of Arts and beyond. The programs are administered by the Office of Interdisciplinary Studies, established in 2003 to provide administrative support to interdisciplinary programs in the Faculty of Arts. Information on the programs and contact information for the Graduate Coordinator are available from the Office of Interdisciplinary Studies.

Entrance Requirements

The minimum admission requirements are an undergraduate degree with an average of at least 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta or an equivalent qualification from a recognized institution, and a TOEFL score of 580 (or 237 computer-based or 92 internet-based) where applicable (see §203.2.4).

Financial Assistance

Financial assistance in the form of fellowships and graduate assistantships may be available to qualified students. Students applying to the University’s General Awards competition for the Province of Alberta Scholarships (available only to Canadian Citizens and Permanent Residents) shall submit complete application packages to the Office of Interdisciplinary Studies, by December 15. For further information contact the Graduate Coordinator of the Religious Studies Program, Office of Interdisciplinary Studies and consult www.gradstudies.ualberta.ca.

205.67.1 The Degree of MA in Religious Studies

Students admitted to this program are expected to have 30 credits in Religious Studies (from among the 100-level in the undergraduate studies. Students who satisfy this requirement and who wish to complete a thesis-based master’s degree will be required to take 18 graduate courses in Religious Studies or in courses relevant to their particular focus and write and defend a thesis in the area of Religious Studies. Students are also required to demonstrate reading competence in a language relevant to their proposed area of research.

Students admitted with less than the above prerequisites will be required to take a qualifying term or a qualifying year. The option to be chosen and the exact amount of additional courses will be determined by the graduate committee on an individual basis.

Length of Program

A candidate for the thesis-based MA entering from a four-year specialized program and continuing work in the same field is normally required to complete the equivalent of one year of work. Other candidates are normally required to complete the equivalent of two years’ work.

The normal time for completion of course work is one year, with a further year for completion of the thesis.
205.68.1 General Information

The Department of Renewable Resources offers programs leading to the course-based degrees of Master of Agriculture, Master of Forestry, and thesis-based degrees of Master of Science, and Doctor of Philosophy.

The Faculty of Agricultural, Life and Environmental Sciences and the School of Business offer two course-based programs of joint study that enable students to earn both the Master of Business Administration and Master of Agriculture degrees or both the Master of Business Administration and Master of Forestry degrees, after two calendar years of full-time study.

Graduate studies in the Department of Renewable Resources encompass a broad spectrum of scientific and management applications in natural and managed landscapes. Graduate studies in the Department of Renewable Resources fall within the four major research themes of the Department briefly defined as:

(1) **Biodiversity Conservation**, which aims at understanding how biological diversity is affected by land use practices and human actions;

(2) **Enhanced Forest Management**, which focuses on intensive and ecological management practices to promote wood production and other non-timber values from forests;

(3) **Environmentally Sustainable Agriculture**, which evaluates and develops agricultural and forestry practices that ensure the sustainability of soil and water resources;

(4) **Land Reclamation, Remediation, and Restoration**, which focuses on the impact of a variety of land use activities on ecosystem function and techniques to return landscapes to a functional use. Details are provided in the Department website.

Thesis research is conducted within the four major research themes, however, the following eight fields of study are the approved specializations for the thesis-based programs: 1) Agroforestry 2) Conservation Biology 3) Forest Biology and Management 4) Land Reclamation and Remediation 5) Protected Areas and Wildland Management 6) Soil Science 7) Water and Land Resources 8) Wildlife Ecology and Management. Inquiries should be directed to the Associate Chair (Graduate Programs), Department of Renewable Resources.

Prospective students should note that the Renewable Resources program is integrated within the Faculty of Agricultural, Life and Environmental Sciences. Opportunities for graduate study are also available in such fields as agroforestry, agronomy, and forest economics in cooperation with the Departments of Rural Economy and Agricultural, Food, and Nutritional Science. Courses and programs of study offered through these departments are listed under their respective headings in this Calendar. General inquiries should be sent to the appropriate department.

**Entrance Requirements**

The Department of Renewable Resources’ minimum admission requirements are an appropriate undergraduate degree with a GPA of 3.0 in the last two years (**•**60) of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution. All applicants seeking admission to Renewable Resources whose native language is not English must obtain a TOEFL score of 550 (paper-based) or 213 (computer-based) or an equivalent score on an approved English Language examination (see §202.3.4).

**Note:** To remain in a graduate program in the Department of Renewable Resources students are expected to maintain a minimum GPA of 3.0 with no grade less than C+.

**Financial Assistance**

Most students are either on scholarships or funded by research grants obtained by professors in the Department. A limited number of graduate teaching and research assistantships, administered by the Department, are available to well-qualified candidates. Exceptional applicants will be nominated by the Department for MSc and PhD research scholarships offered by the Faculty of Graduate Studies and Research.

205.68.2 The Degree of MSc

**Program Requirements**

Course requirements for the MSc are based on the student’s previous training and the anticipated needs in the student’s area of specialization. Minimum requirements are REN R 603 and REN R 604 plus **•**12 acceptable for graduate credit of which **•**6 must be at the 500 level or above. Courses at the 400-level are acceptable for graduate credit with the approval of the supervisory committee. (or lower)-level courses may be required as part of a student’s program but will not count towards the **•**12 requirement. Course work should include at least **•**3 in research methods, statistics, and/or experimental design. Courses may be drawn from those listed for the Department of Renewable Resources, and from other Departments within the University.

In addition, candidates for the degree of MSc must prepare an acceptable thesis presenting results of research conducted. Candidates will be examined orally on their thesis results by committees formed according to §204 of this Calendar.

There is no language requirement other than English for the degree of MSc.

The minimum period of residence is two, four-month terms of full-time attendance at the University of Alberta.

**Length of Program**

Normally, at least two academic years of research are required to complete the MSc.

205.68.3 The Degree of MF

**Program Requirements**

This program is designed for practising foresters. The normal admission requirement is a BSc in Forestry. Applicants are expected to have completed two years of professional forestry-related experience. The program consists of **•**30 with a minimum weight of **•**24 at the graduate level (500 number or higher). The student’s program will be developed around the concept of integrated resource management and sustainable development. Course work must include REN R 601, 602, and at least **•**3 in each of the following four areas: forest resources management, forest biology, statistics/experimental design, forest policy/sociology/human resources. Upon completion of the coursework, students will be required to take, and successfully complete, an oral examination on relevant issues. This examination will be designed to evaluate the student’s knowledge and understanding of the broad area of integrated resource management. There is no residence requirement for the MF program.

205.68.4 The Degree of MAg

**Program Requirements**

The normal admission requirement is a BSc in an agricultural-related discipline. Applicants are normally expected to have completed three years of relevant professional experience. Requirements for the Master of Agriculture degree consist of **•**30 with a minimum of **•**24 at the graduate level (500 number or higher). Each program will include REN R 900 (a project equivalent to **•**6) plus a well-defined series of courses relevant to the topic of the project and within the realm of agriculture such as soil science, agronomy, hydrology, agrometeorology.

There is no residence requirement for the MAg degree.

**Length of Program**

Normally, a minimum of 12 months of study and research is needed to complete the requirements for the degree.

205.68.5 The MBA/MF Joint Program

The Faculty of Agricultural, Life and Environmental Sciences and the School of Business offer a program of joint study that permits students to earn both the MBA and MF degrees in two years of full-time study. Students in the first year of either the regular MBA program or the MF regular program, as well as new entrants, are eligible to apply for the joint program. Applicants are expected to have completed two years of professional forestry-related experience. Refer to §205.6.6 under Business for program details.

205.68.6 The MBA/MAg Joint Program

The Faculty of Agricultural, Life and Environmental Sciences and the School of Business offer a program of joint study that permits students to earn both the MBA and MAg degrees in two years of full-time study. Students in the first year of either the regular MBA program or the regular MAg program, as well as new entrants, are eligible to apply for the joint program. Applicants are normally expected to have completed three years of relevant professional experience. Refer to §205.9.4 under Business for program details.

205.68.7 The Degree of PhD

**Program Requirements**

Course requirements for the PhD will be based on the student’s previous training and anticipated needs in the student’s area of specialization, the total course load being at the discretion of the student’s supervisory committee. All students in the PhD program must take REN R 603 (exemptions may apply) and REN R 604. Otherwise there is no fixed minimum course requirement for students who hold a master’s degree. Students entering the PhD program, who do not have a master’s degree, will be expected to fulfill the MSc coursework requirement (see §205.6.2). In addition to REN R 603 and REN R 604.

Students in the PhD program must pass an oral pre-candidacy assessment within six months of registration and an oral candidacy exam, supervised by a committee formed according to Faculty of Graduate Studies and Research regulations within two years of initial registration.
All candidates for the PhD must prepare an acceptable thesis presenting the results of their research. Candidates will be examined orally on their thesis results by committees formed according to §204. There is no language requirement other than English for the PhD. The minimum residence requirements are three academic years of study and research for a student with a bachelor’s degree, and two academic years of study and research for those with a master’s degree.

**Length of Program**

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years is normally required.

### 205.68.8 Graduate Courses

Graduate courses can be found in §231, Course Listings. Courses offered by the Department of Renewable Resources include those under the following subject headings:

- Environmental and Conservation Science (ENCS)
- Forest Science (FOR)
- Forest Engineering (FOREN)
- Renewable Resources (REN R)
- Soil Science (SOILS)

### 205.69 Rural Economy

Department of Rural Economy

515 General Services Building

University of Alberta

Edmonton, Alberta T6G 2H1

E-mail: rural.economy@ualberta.ca

### 205.69.1 General Information

The Department of Rural Economy offers programs leading to the Master of Agriculture, Master of Science and Doctor of Philosophy degrees in Agricultural and Resource Economics, Forest Economics, and Rural Sociology. A joint program leading to dual degrees of Master of Business Administration and Master of Agriculture is also offered. Areas of emphasis in graduate programs include: the economics of agricultural markets and price behavior; production economics and agricultural business management; economics of agricultural and rural development; economics of policy intervention; environmental and natural resource economics, forest economics, rural sociology, environmental and resource sociology, resource policy analysis, and agroforestry.

**Entrance Requirements**

The Department’s minimum admission requirements for each master’s program are an undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §203.2.4). Admission requirements for the doctoral program are an approved master’s degree with an average of at least 3.3 or equivalent or an approved bachelor’s degree with an average of at least 3.7 or equivalent, and a TOEFL score of 550 where applicable (see §203.2.4).

**Financial Assistance**

Information about details of program requirements and the availability of financial assistance may be obtained from the Department.

### 205.69.2 The Degree of MAg

Applicants for this program are normally expected to have completed three years of satisfactory professional experience in agriculture.

**Program Requirements**

Master of Agriculture programs consist of 18 semester credit units (minimum) or 60 credit units (maximum) over a period of at least one academic year. Students are expected to participate in the department seminar series through attendance and presentation of their research project results. No language other than English is required for the degree.

**Length of Program**

A candidate with adequate undergraduate prerequisites and appropriate professional experience should complete the program in one academic year (12 months).

### 205.69.3 The MBA/MAg Joint Program

The Faculty of Business and the Faculty of Agricultural, Life and Environmental Sciences offer a program of joint study which permits students to earn both the MBA and the MAg degrees in two years.

### 205.69.4 The Degree of MSc

**Program Requirements**

Master of Science programs consist of at least 18 graduate courses plus a thesis normally equivalent in weight to 12 to 18. Students are expected to participate in the department seminar series through attendance and presentation of their research results. No language other than English is required for the degree. Candidates must spend a minimum of two single terms (eight months) in full-time attendance at the University of Alberta to meet the residence requirement.

**Length of Program**

The time required to complete the MSc will vary with the individual candidate; qualified candidates should be able to complete the program in 24 months.

### 205.69.5 The Degree of PhD

**Program Requirements**

Doctor of Philosophy programs include, in addition to the Master of Science course requirements, preparation for candidacy examinations in theory, quantitative techniques, the field of specialization and a supporting field. Fields of specialization are agricultural and resource economics, forest economics, and rural sociology and include a joint specialization in environmental and natural resource economics offered collaboratively by the Departments of Rural Economy and Economics. All candidates for the PhD must prepare and defend a thesis on an approved topic. Students are expected to participate in the department seminar series through attendance and presentation of their research results. Programs depend on academic background and typically consist of 36 in graduate courses, with 18 from the Department of Rural Economy.

No language other than English is required for the degree.

**Length of Program**

The time required to complete the PhD will vary according to the academic background of the applicant and the nature of the research undertaken; however, a minimum of 36 months is normally required.

### 205.69.6 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the following subject headings:

- Agricultural and Resource Economics (AREC)
- Forest Economics (FOREC)
- Interdisciplinary (INT D)
- Rural Sociology (R SOC)

### 205.70 Secondary Education

Department of Secondary Education

341 Education South

University of Alberta

Edmonton, Alberta T6G 2G5

E-mail: educ.sec@ualberta.ca

www.uofaweb.ualberta.ca/secondaryed

### 205.70.1 General Information

The Department of Secondary Education offers programs leading to the Master of Education, Doctor of Philosophy and Doctor of Education degrees. Graduate instruction in these programs is designed to develop competencies as master teachers, educators in the specific disciplines, curriculum and instruction specialists, and curriculum and instruction scholars.

Graduate programs in the Department normally include advanced studies in the following areas: subject matter specialization, curriculum theory, pedagogical theory, teaching, teacher education, cultural studies, and inquiry into curriculum perspectives and educational practices. Programs of an interdisciplinary nature are possible. Programs for each student are designed in consultation with an advisor.

Before applying for admission, it is strongly recommended that applicants ascertain whether the intended area of study is congruent with those of the department. It is also recommended that prospective students contact professors in their area of interest to determine availability and interest. This information may be found at the Department of Secondary Education’s web page (www.uofaweb.ualberta.ca/secondaryed).

Applications for admission are conducted on line through the Faculty of Graduate Studies and Research web page (www.gradstudies.ualberta.ca)
Entrance Requirements

The Department’s minimum admission requirement for the master’s program is an undergraduate degree with an average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, a teaching certificate, representing at least two years of teaching experience, and a TOEFL score of 550 (paper-based) or 213 (computer-based) where applicable (see §203.2.4). Admission requirements for the doctoral programs are an approved master’s degree with an average of at least 3.0 or equivalent and a TOEFL score of 550 (paper-based) or 213 (computer-based) where applicable (see §203.2.4).

Financial Assistance

A number of graduate assistantships are available to qualified candidates for the MEd, EdD or PhD in Secondary Education for services rendered in the Department’s research and teaching programs. These assistantships do not provide full support.

205.70.2 The Degree of MEd

Normally, a teaching certificate representing at least two years of teaching experience, and an undergraduate degree of appropriate quality are required for admission to MEd programs.

Both thesis-based and course-based Master of Education programs are available through the Department.

Program Requirements

Students in the course-based MEd program normally must successfully complete 27 of graduate-level courses and a final capping exercise (equivalent to §5). Students in the thesis-based MEd program normally must successfully complete 31 of graduate-level courses, as well as preparing and defending a thesis.

There is no formal residency requirement for the course-based MEd. A period of residence of one academic year (fall and winter terms) is recommended for the thesis-based program.

Length of Program

The time taken to complete the program will vary according to the education and experience of the applicant and the nature of the research undertaken. A minimum of two years is usually required. The maximum time allowed for completion of MEd programs is four years for the thesis-based program and six years for the course-based program.

205.70.3 The Degrees of EdD and PhD

Program Requirements

The EdD and PhD programs normally consist of coursework and the preparation and defense of a dissertation on an approved topic.

The minimum period of residency for the EdD program is 12 continuous months of full-time study at the University of Alberta. The PhD program requires two academic years of full-time attendance to meet the residence requirement; this involves four (four-month) terms of full-time study.

Length of Program

The time taken to complete the EdD or PhD program will vary with the individual candidate. A minimum of two years of full-time study and research is usually required. The maximum time allowed for completion of a doctoral program is six years.

205.70.4 Courses for Graduate Credit

Graduate courses can be found in §231, Course Listings, under the subject heading Secondary Education (EDSE, EDES, and EDCT).

205.71 Sociology

Department of Sociology
5-21 Tory Building
University of Alberta
Edmonton, Alberta T6G 2H4
E-mail: lynn.vanreede@ualberta.ca

205.71.1 General Information

The Department of Sociology offers programs leading to the degrees of Master of Arts and Doctor of Philosophy. Four MA programs are available: (1) a course-based MA; (2) a thesis-based MA; (3) a course-based MA in criminal justice; and (4) a thesis-based MA in demography.

The PhD in Sociology strives to educate scholars with a breadth of knowledge of the discipline and specialized in-depth knowledge of particular fields within the discipline.

The Department of Sociology encourages all outstanding applicants to submit a completed application before December 15 in order to be considered for recruitment scholarships and other university awards. Furthermore, all applications completed before February 1 will be considered for admission and graduate assistantship funding.

Application forms for admission are available on-line at www.gradstudies.ualberta.ca. Detailed graduate program information is available on the Department’s homepage at https://www.arts.ualberta.ca/~socweb.

Entrance Requirements

The Department’s minimum admission requirements for the course-based and thesis-based MA programs in sociology and demography are a four-year undergraduate degree majoring in Sociology (honors preferred), or a related discipline, and a minimum grade-point average of 3.5 in the last two years of undergraduate study at the University of Alberta (20 single-term courses), or equivalent qualifications from a recognized institution. The Department requires as part of the application package a clearly defined statement of research interests that will be developed into a research proposal as partial fulfilment of the MA degree.

Minimum admission requirements for the MA in criminal justice (course-based) are a four-year BA (Criminology), or equivalent, or a four-year undergraduate degree in sociology or a related discipline and a minimum of one year of full-time work experience in the criminal justice system. Students must have completed introductory courses in criminology, criminal justice administration, statistics and research methodology prior to admission. The minimum average is 3.2 (on the 4-point letter grading system), or equivalent, in the last two years of undergraduate study.

For admission to the PhD program, the minimum requirements are a master’s degree with an average of 3.5 on all graduate courses and undergraduate coursework taken in the final two years (20 single-term courses) at the University of Alberta, or equivalent qualifications from a recognized institution.

Where applicable (refer to §203.2.4), applicants require a TOEFL score of 250 (computer-based) or 600 (paper-based) or higher to be considered for admission.

Financial Assistance

Graduate assistantships are available on a highly competitive basis for students in full-time study who make satisfactory progress toward a degree. Students will be expected to apply for competitive awards. Exceptionally qualified PhD applicants may be nominated by the Department for a University of Alberta PhD Scholarship or an FS Chia PhD Scholarship (see www.gradstudies.ualberta.ca). Support for dissertation research is available on a competitive basis through internally administered Sociology Doctoral Research Grants.

205.71.2 The Degree of MA

Program Requirements

Required courses (normally at the 500-level) depend on the area of specialization and the undergraduate background of the student.

The course-based MA program in sociology is an intensive year of study, a fast-track route, for outstanding students planning advanced work at the doctoral level. Required coursework consists of 24, including core courses in classical and contemporary theory, research design, research methods and statistics, SOC 900 (research project), and completion of the mandatory ethics training requirement.

The Department assigns, or students may select, a Supervisor who directs a course of independent study (SOC 503, Fall Term) leading to a critical appraisal of the literature and formulation of a research topic in the subject area of interest. During the Winter Term, and concurrent with a course in research design (SOC 533), the topic is developed into a research proposal which demonstrates both the student’s ability to work in a scholarly manner and the promise of an original contribution to the field. The capping exercise consists of an oral examination in which the student successfully defends the proposed research project.

Thesis MA programs require registration in a combination of coursework and thesis research comprising a minimum of 24, and completion of the mandatory ethics training requirement. For the thesis MA in sociology, coursework consists of at least 18, including core courses in theory, research design, methods and statistics. For the thesis MA in demography, coursework consists of at least 18, including core courses in statistics, methods, theory, demographic analysis, and two of fertility, mortality, and migration. Candidates will be examined orally on their completed thesis.

The MA in criminal justice program is designed for students who are pursuing a career in one of the components of the criminal justice system. The program requires 24 at the graduate-level, plus a project equivalent to 3, and completion of the mandatory ethics training requirement. Depending on the student’s background, two full-time field placements of four months each may be required. Coursework must include SOC 525 and an additional 9 in criminology. Coursework in related disciplines is encouraged.
There is no language requirement for the MA degrees.

The minimum period of residence for the MA course-based degree in sociology is two four-month terms of full-time attendance at the University of Alberta. The other MA programs do not have a residence requirement.

Length of Program

The time required to complete an MA program will vary according to the previous education of the applicant and the nature of the research undertaken. Normally, the course-based MA degree will be completed in one academic year, the thesis MA (normally through full-time study) in four terms and the MA in criminal justice (normally through part-time study) within four years.

205.71.3 The Degree of PhD

Program Requirements

The PhD requires registration in a combination of coursework and thesis research comprising a minimum of 9 credits, and completion of the mandatory ethics training requirement. PhD candidates are required to complete 18 beyond the foundational courses of the course-based MA at the University of Alberta, or equivalent. At least 15 of the required coursework (normally taken in the first year) consists of graded 600-level courses (or in special cases at the 500-level). 12 sociology courses and a 3 course or equivalent taken outside the Department. The outside course may be approved at the 500-level. At least 3 of ungraded sociology seminars at the 600-level are normally required (1.5 each). Ungraded seminars are usually taken in the second year. Students must also complete a Seminar in Teaching and Professional Skills. Specific courses taken to meet the requirements are chosen in consultation with the Associate Chair (Graduate) and the student’s supervisor. In addition to coursework, candidates must demonstrate reading proficiency in a second language or pass a 600-level quantitative course; pass a specialization area examination in an area distinct from the thesis; and pass an oral candidacy examination taken in the subject field of the thesis research. Depending on the supervisory committee or student preference, a written examination may also be taken in the thesis subject, prior to the oral candidacy examination. The above requirements are normally completed within the first two years.

Candidates proceed to the completion of the degree, normally within two years, by conducting thesis research and related scholarly activity leading to conference presentations and publication. Candidates present their thesis research to the Department in the form of a public seminar prior to the thesis defence. Finally, the thesis is defended at an oral examination (see §203.12).

The normal period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the PhD degree will vary according to the previous education of the applicant and the nature of the thesis research; however, four years is normally required. Candidates must complete their degree program within six years of the time they first register.

205.71.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the subject heading Sociology (SOC).

205.72 Speech Pathology and Audiology

Department of Speech Pathology and Audiology

270 Corbett Hall
University of Alberta
Edmonton, Alberta T6G 2G4
E-mail: mscslp.info@rehabmed.ualberta.ca
www.ualberta.ca/grads/rehabmed/msclsp.cfm

205.72.1 General Information

The Department of Speech Pathology and Audiology offers graduate work leading to the Master of Science degree in Speech-Language Pathology (MScSLP).

The MSc program is designed to develop competencies in the prevention, evaluation, treatment, and management of articulation, language, fluency, voice, and resonance disorders as well as in the fundamental practices of audiology. Developed for students who hold an undergraduate degree in a variety of fields other than speech-language pathology, this entry-level program offers a course-based master’s and an optional thesis-based track and is designed to provide students with the academic and clinical education required for certification by provincial and national professional associations.

The thesis-based MSc in Speech-Language Pathology program is designed to provide speech-language clinicians with the research skills needed to study the etiology, prevention, diagnosis, and management of speech, language, and hearing disorders. Students will undertake thesis research to enhance their abilities to take leadership roles in academic, clinical, and laboratory settings.

The Department maintains laboratory, instrumentation, and clinical facilities for a wide range of research interests (e.g., speech science, motor speech disorders, voice, language development and disorders, craniofacial anomalies, hearing disorders, and clinical supervision).

More detailed information on the program may be obtained at www.ualberta.ca/grads/rehabmed/msclsp.cfm

PRACTICUM PLACEMENTS, PROFESSIONAL PRACTICE AND THE PUBLIC INTEREST

The Dean, or Supervisor acting on behalf of the Dean, may immediately deny assignment of a student to, withdraw a student from, or vary terms, conditions, or site of practicum/clinical placement if the Dean or Supervisor has reasonable grounds to believe that this is necessary in order to protect the Public Interest.

Refer to §23.8.2 Practicum Placements, Professional Practice and the Public Interest, and §87, GFC Policy Manual for additional information.

PRACTICUM PLACEMENTS, PROFESSIONAL PRACTICE AND THE PUBLIC INTEREST

Students in the Department of Speech Pathology and Audiology are required to adhere to the professional code of ethics of their professional/licensing bodies. Refer to the Code of Student Behavior in the GFC Policy Manual for additional information.

Criminal Records Check

Students should be aware that under the Protection for Persons in Care Act, they may be required to satisfy a criminal records check before being allowed to serve a period of internship, practicum placement or work experience. Refer to §23.8.3.

Immunization Requirements and Blood-Borne Pathogens Policy

Speech Pathology and Audiology students are health care professionals who will be exposed to patients during the course of studies at the University. To ensure that, so far as possible, both student and patient safety, the Faculty requires immunization, or proof of immunity, to polio, mumps, rubella, tetanus, measles, mumps, rubella and hepatitis B. As well, varicella titre, hepatitis C and TB testing are required. A two-step tuberculin skin test is required in the first year of the program and should be performed by the University of Alberta Health Centre.

The University of Alberta recognizes its duty to minimize the risk of transmission of blood-borne pathogens to/ by individuals studying or working at this University. The Blood-borne Pathogens Policy limits the possibility of blood-borne pathogens within the educational setting. The University recognizes, however, that it is not possible to completely eliminate the risk of infection. Refer to the GFC Policy Manual, §108.12, for additional information.

The Faculty of Rehabilitation Medicine, in accordance with University policies and other available guidelines, has developed the following policies concerning blood-borne pathogens. These policies will be reviewed and adapted as further information becomes available.

Hepatitis B: Hepatitis B surface antigen testing will be performed by the University of Alberta Health Centre. For those students who test negative for hepatitis B surface antigen (HBsAg), hepatitis B vaccination will be required. An exception will be made for those individuals who have proof of prior vaccination and test positive for anti-body to hepatitis B surface antigen (anti-HBs). After vaccination, students will receive a second test to determine if they have converted to produce the appropriate antibody titre. If they have not converted they will receive a second vaccination and again be tested. Those students who then fail to convert will be counselled as to their potential risk status during training and future practice.

For those students who test positive for HBsAg, their “e” antigen (HBeAg) status and the presence of hepatitis B viral DNA will be determined. If they are found to be positive for the “e” antigen or the viral DNA they will be counselled as to their risk of infecting patients.

Hepatitis C: Hepatitis C antibody testing will be performed by the University of Alberta Health Centre. Those found to be positive will be counselled as to how to minimize their risk of transmission to patients and how to manage their own health.

Human Immunodeficiency Virus (HIV):

The data relating to transmission of HIV from a health care worker to a patient in a health care setting are limited. Transmission from patients to a health care worker is more common. All students accepted into the Faculty should be aware that under the Protection for Persons in Care Act, they may be required to satisfy a criminal records check before being allowed to serve a period of internship, practicum placement or work experience. Refer to §23.8.3.

The data relating to transmission of HIV from a health care worker to a patient in a health care setting are limited. Transmission from patients to a health care worker is more common. All students accepted into the Faculty are encouraged to undergo HIV testing at any time during their program when concerns about infection have arisen. Testing for HIV is not mandatory.

Immunization/blood-borne pathogen requirements must be fulfilled by November 30 of the current academic year. Students must sign a waiver if they are unable to meet these requirements due to medical contra indication.

Criminal Records Check

Students should be aware that under the Protection for Persons in Care Act, they may be required to satisfy a criminal records check before being allowed to serve a period of internship, practicum placement or work experience. Refer to §23.8.3.

Immunization Requirements and Blood-Borne Pathogens Policy

Speech Pathology and Audiology students are health care professionals who will be exposed to patients during the course of studies at the University. To ensure, so far as possible, both student and patient safety, the Faculty requires immunization, or proof of immunity, to polio, mumps, rubella, tetanus, measles, mumps, rubella and hepatitis B. As well, varicella titre, hepatitis C and TB testing are required. A two-step tuberculin skin test is required in the first year of the program and should be performed by the University of Alberta Health Centre.

The University of Alberta recognizes its duty to minimize the risk of transmission of blood-borne pathogens to/ by individuals studying or working at this University. The Blood-borne Pathogens Policy limits the possibility of blood-borne pathogens within the educational setting. The University recognizes, however, that it is not possible to completely eliminate the risk of infection. Refer to the GFC Policy Manual, §108.12, for additional information.

The Faculty of Rehabilitation Medicine, in accordance with University policies and other available guidelines, has developed the following policies concerning blood-borne pathogens. These policies will be reviewed and adapted as further information becomes available.

Hepatitis B: Hepatitis B surface antigen testing will be performed by the University of Alberta Health Centre. For those students who test negative for hepatitis B surface antigen (HBsAg), hepatitis B vaccination will be required. An exception will be made for those individuals who have proof of prior vaccination and test positive for anti-body to hepatitis B surface antigen (anti-HBs). After vaccination, students will receive a second test to determine if they have converted to produce the appropriate antibody titre. If they have not converted they will receive a second vaccination and again be tested. Those students who then fail to convert will be counselled as to their potential risk status during training and future practice.

For those students who test positive for HBsAg, their “e” antigen (HBeAg) status and the presence of hepatitis B viral DNA will be determined. If they are found to be positive for the “e” antigen or the viral DNA they will be counselled as to their risk of infecting patients.

Hepatitis C: Hepatitis C antibody testing will be performed by the University of Alberta Health Centre. Those found to be positive will be counselled as to how to minimize their risk of transmission to patients and how to manage their own health.

Human Immunodeficiency Virus (HIV):

The data relating to transmission of HIV from a health care worker to a patient in a health care setting are limited. Transmission from patients to a health care worker is more common. All students accepted into the Faculty are encouraged to undergo HIV testing at any time during their program when concerns about infection have arisen. Testing for HIV is not mandatory.

Immunization/blood-borne pathogen requirements must be fulfilled by November 30 of the current academic year. Students must sign a waiver if they are unable to meet these requirements due to medical contra indication.

Criminal Records Check

Students should be aware that under the Protection for Persons in Care Act, they may be required to satisfy a criminal records check before being allowed to serve a period of internship, practicum placement or work experience. Refer to §23.8.3.
Financial Assistance

A limited number of teaching and research assistantships may be available within the Department. Successful candidates selected for the program(s) will be provided applications for limited department assistance. Students should review www.gradstudies.ualberta.ca/ for current information on available awards and other possible sources of funding.

205.72.2 The Degree of MSc in Speech-Language Pathology (SLP)

Program Requirements

Requirements for the course-based MScSLP will normally include successful completion of a minimum of 48, plus a research project equivalent to 3, and a minimum of 350 supervised clinical hours (300 direct contact). The prerequisite courses will typically be a portion of a more extensive undergraduate knowledge base which is relevant to graduate study in speech-language pathology. The program requirements will ensure that students meet standards required for membership/certification in provincial and national professional associations. Prerequisite courses and the required program of study may be obtained from the Department of Speech Pathology and Audiology website. Requirements for the thesis-based MScSLP include all of the academic and clinical requirements outlined above for the course-based track. However, instead of the SPA 900 project, thesis-based students will complete a thesis and an additional one-credit practical course in methods of data analysis. Additional coursework in research design, statistics, or specialized content may be recommended by the supervisor and thesis committee.

The period of residency is two four-month terms of full-time attendance during the regular session at the University of Alberta.

Length of Program

A minimum of two calendar years will normally be required to complete the program. Students in the thesis-based track will most likely require at least one additional term to complete the program. The time required to complete the program may vary for individual candidates but cannot exceed the statutory limits of the Faculty of Graduate Studies and Research as set out in §203.14.

205.72.3 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the headings Rehabilitation Medicine (REHAB) and Speech Pathology and Audiology (SPA)

205.73 Surgery

Department of Surgery
2D1.02 MacKenzie Health Sciences Centre
University of Alberta
Edmonton, Alberta T6G 2E7
E-mail: tachurch@ualberta.ca

205.73.1 General Information

The Department offers research facilities in the Surgical-Medical Research Institute, the Alberta Diabetes Institute, the Heritage Medical Research Building and the Cross Cancer Institute for graduate students who wish to register for the degree of MSc or PhD in experimental surgery.

The Department has several core facilities including surgical suites, an electron microscopy unit, clinical biochemistry and histology laboratory, and computer graphics and photography with technical staff in these laboratories who are able to assist graduate students who wish to carry out research projects. These facilities are well equipped to meet all the requirements of both the basic and clinical investigators from the Department of Surgery.

Facilities are available for the following projects which are presently being carried out: islet transplantation, the immunology of diabetes, periural pathology, burns/wound healing, cross-species transplantation, stem cells, tolerance induction and immunoregulation, virology, neurological oncology, orthopaedics, surgical education, urological oncology and metabolic aspects of organ preservation for transplantation.

Inquiries should be directed to the Graduate Student Coordinator prior to admission into the MS or PhD program.

Entrance Requirements

Normally, an MD degree will be considered an entrance requirement for the MSc program; however, consideration will be given to suitable candidates holding an appropriate Bachelor of Science degree. Applicants for the PhD program must be medical graduates or hold a master’s degree. The minimum requirements include a grade-point average of 3.0 in the last two years of undergraduate work (or graduate work) at the University of Alberta, or an equivalent qualification from a recognized institution, and a TOEFL score of 550 where applicable (see §203.2.4). Applicants who are graduates of programs, including MD programs, where grades are not assigned will be assessed on an individual basis.

Financial Assistance

Candidates are encouraged and fully supported in applying to major granting agencies for financial assistance. Limited funds are available in the Department of Surgery for the support of additional candidates.

205.73.2 The Degree of MSc

Program Requirements

Requirements for the MSc degree include preparation and defence of a thesis based on research performed by the candidate; in addition, all candidates must include some coursework specified by their supervisory committee in the program. A minimum of 24 are required for the MSc, of which 18 will be graduate level courses. There is no language requirement for the degree of MSc. The minimum residence requirement is one full calendar year of research.

Length of Program

The time required to complete the MSc will vary according to the candidate’s previous training and the nature of the research undertaken; however, a minimum of 12 months is normally required.

205.73.3 The Degree of PhD

Program Requirements

Requirements for the PhD degree include preparation and defence of a thesis and successful completion of courses taken for graduate credit, as specified by the supervisory committee. No language other than English is required for the degree.

The minimum period of residence is two academic years of full-time attendance at the University of Alberta.

Length of Program

The time required to complete the PhD will vary according to the previous training of the applicant and the nature of the research undertaken; however, a minimum of three years of study and research is normally required.

205.73.4 Graduate Courses

Graduate courses can be found in §231, Course Listings, under the heading Surgery (SURG).

196–199 Reserved

210 Graduate Financial Aid

The Faculty of Graduate Studies and Research (FGSR) administers several graduate awards programs and distributes information on sources of graduate student funding.

The FGSR is neither aware of, nor administers every award available. Although the FGSR tries to provide comprehensive information on financial support, the following material is not exhaustive. Students should continue to explore other avenues of funding.

210.1 Financing Graduate Education

Graduate students can finance their studies at the University of Alberta in several ways. Some financial assistance programs are administered by the FGSR,
and others are administered by other campus offices or outside organizations.

Graduate Teaching or Research Assistantships

Other Departmental Support

University-Administered Awards

Awards Administered by Other Agencies

Loans and Bursaries

Funds for Study Abroad/International Student Exchanges

For information on University-administered awards and awards from outside agencies refer to www.gradstudies.ualberta.ca.

The University of Alberta reserves the right to make changes without prior notice to the information contained on the web site, including alterations to the conditions and stipends of awards and fellowships.

210.2 Graduate Teaching or Research Assistantships

Graduate Assistantships involve teaching or research duties and are administered according to a central policy of the University. Students must apply directly to their chosen department and should contact the graduate coordinator of that department for details and deadlines. Assistantships are awarded by departments primarily on the basis of academic standing and ability to perform the required duties.

Most departments suggest that students apply by March 1 before the Winter Term (beginning in September) in which the student hopes to receive an assistantship. Full-time assistantships require an equivalent of 12 hours of work per week over the four-month term of appointment. Part-time assistantships are available in some departments. More detailed information is found in the Regulations Governing Graduate Assistantships, at www.gradstudies.ualberta.ca.

210.2.1 Other Departmental Support

Some departments offer other opportunities for graduate student support. Departments may elect to offer students a Tuition Supplement. One full Graduate Intern Tuition Supplement is equal to 42 units of graduate fee index over the Fall and Winter terms. Contact the department directly regarding such support.

210.2.2 Research Grant Support

Support may be available to some students from research grants made to departments or staff members. The amount of support will vary with the nature of the research grant and the regulations of the granting agency. Students should contact their supervisor for more information.

210.3 University-Administered Awards

General Information

Through the Graduate Scholarship Committee (GSC), the FGSR adjudicates many awards. The GSC also administers and adjudicates the annual general awards competition, approves new awards, and develops graduate awards policy. There are other graduate awards in specific fields, which are administered by individual departments and Faculties. To be eligible for graduate scholarships, a First Class academic standing (3.5-4.0 GPA) must be maintained. Unless otherwise stated in the award description, to take up an award, students must be registered full-time in a graduate degree program at the University of Alberta.

Students applying for, or nominated for, awards administered by the FGSR who are registered in master’s programs are eligible to hold awards during the first two years of their program unless stated otherwise in the terms of reference. Consideration for funding for the third year of a master’s program will only be considered if accompanied by an explanation and a strong letter of support from the department. Students who are registered in doctoral programs are eligible to hold awards up to and including the fifth year of their program unless stated otherwise in the terms of reference. Consideration for funding for the sixth year will only be considered if accompanied by an explanation and a strong letter of support from the department.

In the general awards competition, graduate awards are offered primarily based on superior academic standing and demonstrated potential for advanced study and research. Applicants are assessed according to a combination of departmental evaluation and recommendation, grade point average, reference letters, statement of program, research potential and productivity where it has been demonstrated, and evidence of publications or other scholarly achievement. In all cases, the GSC only considers applicants who have been nominated by the department.

Applicants must either be continuing in a degree program in the FGSR or have been recommended for admission to a degree program in FGSR at the University of Alberta. Students admitted as Qualifying graduate students are not eligible for scholarships and fellowships.

Students must contact their department directly for information on applying for these general awards and to ascertain whether they are eligible to receive an application form or to apply. Strong competition exists for these general awards, and all departments have a limit on the number of applicants who can be nominated for these general awards. Students who have been supplied with an “Application for General Awards” should send all documentation to the department to which they are applying or in which they are registered.

The FGSR has a deadline of February 1 for receipt of applications for general awards from departments; however, students should contact their department regarding internal deadlines for receipt of documents and application forms.

For information on University-administered awards, refer to www.gradstudies.ualberta.ca

210.4 Awards Administered by Other Agencies—General Information

Students are urged to seek awards from other agencies (such as SSHRC, NSERC, etc.). Information is available on the NSERC and SSHRC websites.

NSERC website: www.nserc.ca
SSHRC website: www. SSHRC.ca

210.5 Loans and Bursaries

See §25.4.
