191 The Professors

191 Programs of Study

191.1 BSc in the Honors, Specialization, and General Programs

191.2 Biochemistry

191.3 Biological Sciences

191.4 Cell Biology

191.5 Chemistry

191.6 Computing Science

191.7 Earth and Atmospheric Sciences

191.8 Geophysics

191.9 Immunology and Infection

191.10 Marine Science

191.11 Mathematics

191.12 Neuroscience

191.13 Northern Studies

191.14 Paleontology

191.15 Pharmacology

191.16 Physics

191.17 Physiology

191.18 Psychology

191.19 Statistics

194 Details of Courses

194.1 Course Listings

194.2 Prerequisites

194.3 Course Exceptions

194.4 Graduate Courses
192 Faculty Regulations

192.1 Faculty Overview

An Industrial Internship option is available in BSc Honors and Specialization programs. Students enrolled in the Honors or Specialization program have an opportunity to enhance their studies with an Industrial Internship. The Faculty of Science offers an Industrial Internship Program designed to provide the honors and specialization students a relevant industrial experience. Students must complete an 8-, 12- or 16-month work experience term at the end of their third year to receive Industrial Internship designation on their degree certificate. For more details, please see individual departmental listings.

192.2 Degrees

The Faculty offers three programs leading to the Bachelor of Science (BSc) degree: Honors, Specialization, and General.

The Faculty also offers a Bachelor of Science with Specialization in Science Education which is part of a five year BSc/BEd combined degrees program.

The four-year Honors programs are primarily for students who seek careers in scientific research. In addition, they prepare students for admission to graduate school, leading to a Master of Science (MSc) or a Doctor of Philosophy (PhD) degree.

The four-year Specialization programs do not concentrate on one subject to the same extent as the Honors programs. This allows students to choose from a broader range of courses and to take a greater number of courses in a secondary area of interest. They can provide the background necessary for admission to graduate schools, in some cases, and permit attainment of professional status in others.

The four-year General program provides a general education with a scientific emphasis for students who seek careers in business, teaching, medicine, dentistry, etc.

In many cases, transfer from one degree program to another can be easily arranged to suit students’ changing ambitions, needs, or academic qualifications.

Regulations governing the Honors, Specialization, and General degree programs are found in §193.1, followed by descriptions of each degree program under the subject headings (§193.1 to 193.19).

192.3 Admission

General admission requirements for the University are set out in §13 and 14. Specific admission information for the Faculty of Science is detailed in §15.15.

192.4 Definitions

The following terms, definitions, and abbreviations are used throughout this section of the Calendar. Also see the Calendar’s Glossary.

1. Approved Option

In the Faculty of Science section, the term “approved option” appears only within the description of Honors and Specialization programs. For students registered in an Honors or Specialization BSc program, an “approved option” is a course from Arts, Science, or another Faculty approved in writing by the department directing the student’s program.

General program students interested in taking courses from Faculties other than Arts or Science should see §192.6(1).

2. Arts Option

Those courses offered by the Faculty of Arts for which the student is eligible, Christian Theology courses and Native Studies courses listed in §231, Course Listings. Note: Students registered in the Faculty of Science may not take SOC 210, 315 for degree credit.

3. Courses Attempted

Refers to university or university transfer courses completed with a final grade and excludes courses from which a student has withdrawn with permission.

4. Courses Successfully Completed

Refers to university with a final grade of D or higher.

5. Course Weight

A unit of course weight indicates the instructional credit assigned to a course and is designated by the ★ symbol after the course number and name. Units of course weight form a part of the degree requirements and are also used to calculate a student’s Grade Point Average (GPA).

6. Fall/Winter

The instructional period of September to April.

7. Two-term Course

A two-term course is a single course with ★6.

8. Term

The instructional periods from September to December (Fall) and January to April (Winter). In Spring/Summer, the instructional periods of May/June (Spring) and July/August (Summer).

9. Single-term Course

A single-term course is a single course with ★3.

10. Junior Courses

Those courses numbered 199 or lower.

11. Normal Course Load

A normal, full academic course load is ★30 during Fall/Winter.

12. Option

The term “option” where it appears in programs means a course chosen by the student from offerings by the Faculties of Arts or Science if the necessary prerequisites have been met.

13. Science Option

Those courses offered by the Faculty of Science for which the student is eligible. Note: Not all courses offered by the Faculty of Science are available to students registered in the Faculty of Science.

14. Spring/Summer

The instructional periods of May/June (Spring Term) and July/August (Summer Term).

15. Year of Program

Year of program, as referred to throughout the Science section, is defined below. Students who are applying to, or continuing in, the Faculty of Science are considered to be in

a. Year 1 if they have successfully completed up to ★29 of their degree program;

b. Year 2 if they have successfully completed between ★30 and ★59 of their degree program;

c. Year 3 if they have successfully completed between ★60 and ★89 of their degree program;

d. Year 4 if they have successfully completed at least ★90 of their degree program.

192.5 Academic Standing

In all programs in the Faculty of Science, academic standing is assessed on the basis of Grade Point Average. An assessment of academic standing is conducted for each student at the end of the student’s registration in the Fall/Winter on a minimum ★9, regardless of whether the student registered in one or both terms, except those in a BSc Honors (see §192.5.1) or Specialization (see §192.5.2) degree. If a student attempted fewer than ★9 since the last assessment, the review is deferred and the academic standing assigned at the last review remains in effect until the next Fall/Winter. Decisions regarding academic standing will be based on all courses attempted during the previous Fall/Winter only. Spring and Summer work does not impact academic standing assessment. See §23.4(6) and 23.9.2 for information on the calculation of GPAs and the academic record.
192.5.1 Continuation in an Honors Program

Continuation in an Honors Program is by recommendation of the department concerned and depending on the department requires a minimum GPA of 3.0 on a course load of 124 or 3.3 on a course load of 120 in the preceding Fall/Winter. See the description of Honors programs in individual department sections for specific information regarding GPA and course load.

Those Honors students who do not meet the continuation requirements of their program may apply to transfer to a BSc Specialization program or to the BSc General program, provided they meet the continuation requirements of those programs. Students whose GPA is between 1.7 and 1.9 (and who have not previously been on Academic Warning or Probation) may be permitted to continue in the BSc General program on Academic Warning.

Students in an Honors program whose GPA at the end of Fall/Winter is below 1.7 will be required to withdraw from the Faculty.

192.5.2 Continuation in a Specialization Program

Continuation in a Specialization program is by recommendation of the department concerned and depending on the department requires a GPA of at least 2.3 on 118, 2.3 on 124 or 2.7 on 124 in the preceding Fall/Winter. See the description of Specialization programs in individual department sections for specific information regarding GPA and course load.

Those Specialization students who do not meet the continuation requirements of their program may apply to transfer to the BSc General program if they meet the minimum continuation requirements of the BSc General program. Students whose GPA is between 1.7 and 1.9 (and who have not previously been on Academic Warning or Probation) may be permitted to continue in the BSc General program on Academic Warning.

Students in a Specialization program whose GPA at the end of Fall/Winter is below 1.7 will be required to withdraw from the Faculty.

192.5.3 Continuation in the General Program

Continuation in good standing in the General program requires a GPA of at least 2.0 in the preceding Fall/Winter. Students in the General program who have not previously been on Academic Warning or Probation and whose GPA at the end of Fall/Winter is between 1.7 and 1.9 will be permitted to continue on Academic Warning. See §192.5.5.

192.5.4 Unsatisfactory Standing—Required to Withdraw

This section is applicable to students in the Honors, Specialization, BSc/BEd Combined or General programs whose GPA at the end of Fall/Winter is below 1.7.

(1) Students who have completed less than ★60 applicable to a BSc degree

Students, whether in an Honors, Specialization, BSc/BEd Combined or the General program, who have completed less than ★60 applicable to a BSc degree (including the work completed during the Fall/Winter under review) and whose GPA at the end of Fall/Winter is below 1.7 will be required to withdraw from the Faculty.

a. Students, whether in an Honors, Specialization, BSc/BEd Combined or the General program, who have completed less than ★60 applicable to a BSc degree (including the work completed during the Fall/Winter under review) and whose GPA at the end of Fall/Winter is between 1.3 and 1.6 will be recommended for admission and permitted to apply to the Fresh Start program at the University of Alberta. Students who have previously been on Academic Warning, Probation or their equivalents, or who have been sanctioned for any academically-related disciplinary offence at this University or in any other postsecondary program will not be recommended to the Fresh Start program. In referring students to the Fresh Start program, the Faculty may specify course requirements that must be fulfilled before the student will be considered for readmission to the Faculty of Science. If successful in the Fresh Start program and if all specified course requirements have been fulfilled, such students may apply for readmission to the Faculty of Science as transfer students as described in §15.15.7.

b. Students who complete ★18 of postsecondary courses transferable to the Faculty of Science with an AGPA of 2.7 or complete ★24 of postsecondary courses transferable to the Faculty of Science with an AGPA of 2.0 may reapply for admission to the Faculty.

c. Students may discontinue studies for a minimum one year period and apply for Fall readmission. Students who choose this option should note that any course work completed at any institution during this period will not be accepted as credit towards their Science degree. Students who are readmitted will be placed on Probation as described in §192.5.5 subject to the terms specified by the Faculty at the time of readmission.

(2) Students who have completed ★60 or more applicable to a BSc degree

Students, whether in an Honors, Specialization, BSc/BEd Combined or the General program, who have completed ★60 or more applicable to a BSc degree (including the work completed during the Fall/Winter under review) and whose GPA at the end of Fall/Winter is below 1.7 will be required to withdraw.

a. Students who complete ★18 of postsecondary courses transferable to the Faculty of Science with an AGPA of 2.7 or complete ★24 of postsecondary courses transferable to the Faculty of Science with an AGPA of 2.0 may reapply for admission to the Faculty.

b. Students may discontinue studies for a minimum one year period and apply for Fall readmission. Students who choose this option should note that any course work completed at any institution during this period will not be accepted as credit towards their Science degree. Students who are readmitted will be placed on Probation as described in §192.5.5 subject to the terms specified by the Faculty at the time of readmission.

192.5.5 Probation and Academic Warning

(1) Probation

Students who have been required to withdraw and who have successfully appealed that decision, or who have discontinued studies for a minimum one year period and have been readmitted as outlined in §192.5.4, will be placed on Probation in the BSc General program. (See also §23.6.2.) Probationary students are given one Fall/Winter in which to clear Probation and are not eligible for any extension of Probation beyond one Fall/Winter.

Probationary students must successfully complete ★24 during their one Probationary Fall/Winter session. Probationary students will also be subject to specific course and program requirements.

Probationary students who fail to successfully complete ★24 with at least a 2.0 GPA on all work attempted during that Fall/Winter and/or who fail to fulfill all specified conditions of Probation will fail Probation and will be required to withdraw from the Faculty for a five year period. After five years applicants may petition to the Senior Associate Dean for readmission. Applicants who are readmitted will be placed on Probation for a further Fall/Winter period in the Faculty of Science. Note that readmission is not guaranteed. Students who fail a second period of Probation will not be readmitted to the Faculty of Science.

Students who have cleared Probation and whose GPA at the end of a subsequent Fall/Winter falls below 2.0 will not be permitted to continue on Academic Warning and will be required to withdraw from the Faculty of Science for a five year period. After five years applicants may petition to the Senior Associate Dean for readmission. Applicants who are readmitted will be placed on Probation for a further Fall/Winter period in the Faculty of Science. Note that readmission is not guaranteed. Students who fail a second period of Probation will not be readmitted to the Faculty of Science.

(2) Marginal Standing—Academic Warning

Students, whether in an Honors, Specialization, BSc/BEd Combined or the General program, whose GPA at the end of Fall/Winter is between 1.7 and 1.9 will be deemed to have a Marginal Standing. Subject to the next paragraphs, they will be allowed to continue in the BSc General program for one further Fall/Winter on Academic Warning.

Only one period of attendance on Academic Warning will be allowed while registered in the Faculty of Science. Students who have received an Academic Warning in any previous Fall/Winter, or its equivalent at any other postsecondary institution, and whose current Fall/Winter GPA is between 1.7 and 1.9 will be required to withdraw from the Faculty. Such students can only apply for readmission after:

a. Completing ★18 of postsecondary courses transferable to the Faculty of Science with an AGPA of 2.7 or completing ★24 of postsecondary courses transferable to the Faculty of Science with an AGPA of 2.0 may reapply for admission to the Faculty.

b. Discontinuing studies for a minimum one year period and petitioning to the Senior Associate Dean for Fall term readmission without presenting subsequent postsecondary course work. Students who choose this option should note that any course work completed at any institution during this period will not be accepted as credit towards their Science degree.
degree. Students who are readmitted will be placed on Probation as described in §102.5.5 subject to the terms specified by the Faculty at the time of readmission.

**Note:** Students under Academic Warning are only permitted to interrupt their programs with the prior written approval of the Senior Associate Dean. Students with marginal standing who wish to interrupt their programs must first request that request in writing by August 15 immediately following the ruling that placed them on Academic Warning. If students on Academic Warning interrupt their programs for more than 12 months without prior approval, readmission will not be granted unless the student meets the current readmission criteria. (This provision regarding permission to interrupt their program does not apply to students with marginal standing who attend another postsecondary institution in the interim. Such students must reapply as transfer applicants, see §15.15.7).

192.5.6 Continuation in the BSc (Specialization in Science and Education) and BEd (Secondary) Combined Degrees Program

Continuation in the BSc Specialization in Science and Education/Bed (Secondary) combined degrees program requires a Grade Point Average (GPA) of at least 2.3 in the Fall/Winter. [See §23.4(S) regarding the rules for calculating Grade Point Average].

A student who does not meet the requirement to continue in the combined degrees program must withdraw from the program and may apply for admission to either a BSc General program or a BEd program, if eligible. Refer to §73.4 for academic standing regulations for admission to the BEd program and to §193.1.3 for academic standing regulations for admission to the BSc General program.

192.5.7 Scholarship, First-Class Standing

(1) **Scholarship**

The basis for scholarship consideration is passing grades in all courses on load of at least ★30.

(2) **First-Class Standing**

First-class standing in a given Fall/Winter is awarded to any student who obtains a GPA of not less than 3.5 and successfully completes a minimum of ★24 during that Fall/Winter. Students who attend only one term of Fall/Winter as a result of enrolment in ABROAD, EXCH or WKEXP are eligible if they successfully complete at least ★12 with a minimum GPA of 3.5. This is also referred to as the Dean’s Honor Roll.

192.5.8 Graduation Year

Students who have completed ★120 or more and who have either not applied to graduate, or who have applied but have not met graduation requirements, are permitted to register only in those courses necessary to complete their current program as quickly as possible. Such students must have the written approval of the Associate Dean of Science for every course beyond ★120 in which they register. Students in Honors or Specialization programs must also have the written approval of their Departmental Advisor.

192.5.9 Reexamination

Reexaminations are not normally permitted in the Faculty of Science. Students registered in the Faculty of Science wishing to be considered for a reexamination must, in addition to meeting the requirements set out in §23.5.5, also meet the following conditions:

(1) Students must provide evidence of a medical condition or similarly compelling circumstance existing at the time of the writing of the final examination; and

(2) provide evidence that the student’s performance in the final examination was so affected by circumstances as shown in (a) that there was a substantial difference between the final examination results and the term work; and

(3) excluding the final exam, must have completed at least one-half of the term work.

**Note:** Registrants in BSc degree programs in the Faculty of Science who fail to meet the graduation requirements may be granted a reexamination in one passed or failed Science course taken in the final Fall/Winter or Spring/Summer (last ★30 or less) provided the maximum number of reexaminations (★12) has not been previously taken. Such courses must qualify for reexamination, according to §23.5.5.

192.6 Courses

(1) **Selection of Courses**

Students are responsible for familiarizing themselves with program requirements and limitations as specified in the Calendar, for ensuring their programs are properly planned in accordance with degree specifications, and for the completeness and accuracy of their registration. Please read the Calendar carefully before registering in courses, and if you are in doubt about any regulations pertaining to your program, consult the Faculty of Science Office (1-001 CCIS) for clarification.

Students registered in the Faculty of Science must select courses offered by the Faculty of Arts or by the Faculty of Science. In some instances, courses from other Faculties may be permitted by permission of the Dean or designee. Written approval from the Faculty of Science is required if more than ★30 are taken in a Fall/Winter, except in those Honors and Specialization programs requiring more than ★30 in a given year.

(2) **Selection of First-Year Courses**

Beginning first-year students who have completed no credits toward their programs normally restrict their registration to junior courses. First year students contemplating taking senior level courses should be careful to ensure that they have completed any prerequisites.

(3) **Withdrawal from Courses**

Courses from which the student withdraws up to and including the last day for registration in the Fall and Winter Terms will not appear on the student’s record. Courses from which the student withdraws after the last day of registration and up to and including the last day for dropping courses will appear with a grade of “W” (Withdrawn with permission) on the transcript.

Deadlines for withdrawing from courses are listed in §11.

(4) **Prerequisites**

Courses with prerequisites may only be used for degree credit if the prerequisite requirements are met.

A grade of D is the minimum grade acceptable in a course which is to be used as a prerequisite.

Where a prerequisite is stated, it is understood that equivalent courses may be used to satisfy the requirement. In addition, the department offering a course with prerequisite requirements may waive the prerequisite in writing. (Prerequisite waiver forms are available from the Faculty of Science office and the Department offices).

Students who are unsure if they meet the prerequisite requirements in a course, or who wish to obtain permission to have a prerequisite waived, should consult the department offering the course.

(5) **Repeating Courses**

No student will be permitted to repeat any University course, whether a failed course or a course having a grade of W, more than once except for reasons deemed sufficient by the Council of the Faculty in which the student is enrolled. For Science students, the Faculty will withhold credit or indicate the course is extra to degree on any course that contravenes this regulation.

Normally, a student will not be permitted to repeat a course in which a grade of D or more has been received.

Only two exceptions are permitted, and each requires written approval of the Dean or designee:

a. When a higher grade is necessary for a course that is required in one of the degree programs

b. When a student in Satisfactory Standing in the last year of a degree program repeats one course to raise the GPA to the level required by the degree program

A student who repeats a course in which a grade of D or more has been received, without written permission of the Faculty of Science, will have the grade attained on the initial passing of the course used for the purpose of meeting degree requirements, and no credit will be assigned to the repeated course.

192.7 Graduation

(1) **Application for Graduation**

Students who intend to receive a BSc (General, Specialization, or Honors) Degree or Special Certificate must apply for the Degree or Certificate on Bear Tracks (https://www.beartracks.ualberta.ca) by February 1 for Spring Convocation or by September 1 for Fall Convocation. All official
transcripts from other postsecondary institutions are due by May 1 for Spring Convocation or by October 1 for Fall Convocation.

Students who intend to apply for admission to an alternate degree program in the Faculty of Science for convocation purposes only must meet all of the admission, continuation, residency and graduation criteria for that BSc program.

(2) Degree Requirements

All BSc Degrees require a minimum of 120. Courses with weights of 0 are offered for credit only, and, although they may be required in specific degree programs, cannot be used to meet the minimum units of course weight requirement in any degree program.

(3) Convocation

All requirements for graduation at Spring Convocation must be met by the end of Fall/Winter. Those completing degree requirements during Spring/Summer will graduate at the Fall Convocation.

(4) First-Class Honors

First-class Honors Degrees are awarded to any student in an Honors program who obtained:

a. A GPA of at least 3.5 in each of the last two Fall/Winters of the program; and

b. A GPA of at least 3.5 on the last 60 of the program. If determination of the last 60 requires consideration of one or more courses from a given term then all work from that term is included in the calculation for the purposes of qualifying for First-class Honors.

(5) With Distinction

The notation “With Distinction” is inscribed on the parchment of a candidate for a General or Specialization degree if the candidate has obtained a GPA of not less than 3.5 over the last 60 and if the student successfully completed 24 or more in each of the last two Fall/Winters. If determination of the last 60 requires consideration of one or more courses from a given term then all work from that term is included in the calculation for the purposes of qualifying for With Distinction.

Further regulations regarding academic standing, promotion, and graduation vary from program to program within the Faculty of Science, and are therefore given in §193 below. Regulations for Honors, Specialization, and General programs are found in §193.1.

192.8 Appeals and Grievances

A copy of Faculty of Science regulations regarding appeals on grades, academic standing and practicum intervention may be obtained from the Faculty of Science Student Services Office (1-001 CCIS) and on the Faculty of Science website. Certain academic standing decisions made by the Faculty Academic Appeals Committee may be appealed to the General Faculties Council Academic Appeals Committee. Appeals of decisions made by the Faculty Practice Review Committee may be appealed to the General Faculties Council Practice Review Board. See §23.8.

Note: Deadlines exist for submission of appeals and are described in the appeals policy document.

192.9 Visiting Student Status

Permission to attend another institution as a Visiting Student depends on the student remaining in good academic standing in the Faculty of Science at the University of Alberta.

A student while registered in the Faculty of Science cannot attend two postsecondary institutions at the same time and will not receive permission to register as a Visiting Student at another institution if the equivalent course is given on campus in the same term, except in the case of formal exchange programs. Transfer credits will not be awarded if a student attends another postsecondary institution without first obtaining a current Letter of Permission from the Faculty of Science.

192.10 Study Abroad

The Faculty of Science encourages all full-time students who have completed at least 15 credits at the University of Alberta, who are in satisfactory standing in their program with a CGPA of at least 2.5 and have a GPA of at least 2.7 in their most recently completed term, to consider a period of study abroad. This program is administered by University of Alberta International and details of this competitive program can be found on their website www.international.ualberta.ca/studyabroad.

Where possible, credit for courses successfully completed in study abroad programs will be granted transfer credit by the Faculty of Science. However, there may be courses required in a program where there is no substitute available elsewhere. Thus a period of study abroad may extend the time required to complete a BSc degree. Science students should maintain satisfactory standing during study abroad however they will not be held to the course load and GPA expectations of their individual programs. The thesis-based independent research project required in many honors programs must be completed at the University of Alberta.

193 Programs of Study

193.1 BSc in the Honors, Specialization, and General Programs

193.1.1 Honors Programs

A minimum of 120 normally taken in no more than five consecutive academic years is required to complete the Honors program for the degree of BSc with Honors. Some departments require that an Honors program be completed in four years, others permit five. See individual departments for details. These programs provide specialization in the chosen subject or subjects as well as the higher standard implied by the term “Honors.”

Honors programs are available in the Departments of Biochemistry, Biological Sciences, Cell Biology, Chemistry, Computing Science, Earth and Atmospheric Sciences, Mathematical and Statistical Sciences, Neuroscience, Pharmacology, Physics, Physiology, and Psychology. Honors is the preferred program for students who plan graduate study.

Admission

See §15.15.3 for admission requirements.

Selection of Courses

The following regulations govern Honors programs:

(1) In each year, an Honors student’s program must be approved by an Honors Advisor in the student’s Department and by the Faculty Office.

(2) A minimum of 72 in Science is required in most Honors programs. Certain Departments may require more than 72 in Science courses.

(3) A student normally must take at least 18 in Arts courses as part of the requirements for the Honors degree.

(4) Normally, no more than 42 in junior (100-level) courses are permitted in Honors programs.

(5) Certain non-Arts and non-Science courses appropriate to the program may be permitted in Honors programs with the written approval of the Department directing the student’s program. Applicants to the BSc Honors program who have taken non-Arts and non-Science courses before application will have the potential to transfer credit for such courses assessed at the time of admission to the program.

Course Load Requirements

Students in Honors programs must complete 24 or more during the Fall/Winter of each year of the program. In some Departments, Honors students are required to complete 30 each Fall/Winter. See individual Departments for details. Exceptions to course load requirements must be approved in advance each year by the Department and the Faculty Office.

Academic Standings and Graduation

The following regulations govern Honors programs:

(1) Continuation in an Honors program is by recommendation of the department concerned and requires a GPA of at least 3.0 on a course load of 24 or more in the preceding Fall/Winter periods. See description of Honors programs of individual departments for additional requirements relating to continuation in the Honors program. Students must be in good standing in the Honors program in order to graduate.

(2) A student who fails to attain the standard necessary for continuance in Honors must withdraw from the Honors program. In so doing, the student may transfer to a Specialization program with the appropriate department’s approval or to the General program in the Faculty of Science. Students applying to transfer from an Honors program to Specialization or General must meet the continuation standards for the program concerned.
A student who fails to complete the requirements for a degree with Honors in the fourth year may be granted the Specialization degree or the General degree on application if the courses taken and the standing attained are satisfactory. Such students must apply to transfer to a Specialization or General program.

(4) Degrees with First Class Honors are awarded as per §192.7(4)a. and b.

**Residence Requirement**

A student transferring to the Faculty of Science with advanced standing must complete at least 60 applicable to the BSc program while registered at the University of Alberta. Normally, at least 30 of the last 60 must be completed while registered in the Faculty of Science.

**Time Limits for Program Completion**

All BSc Honors programs are designed to be four-year programs. However, in some cases the minimum course load requirements have been reduced to allow students the flexibility to complete the degree over a longer time period. Students wishing to extend their programs beyond the time frame dictated by the minimum course load requirement for their program must first obtain the written approval of the Department and the Senior Associate Dean of Science or designate.

**193.1.2 Specialization Programs**

Four-year programs, comprising a minimum of 120, provide education to a professional level and lead to the degree of BSc with Specialization.

Specialization programs are available in the Departments of Biochemistry, Biological Sciences, Cell Biology, Chemistry, Computing Science, Earth and Atmospheric Sciences, Mathematical and Statistical Sciences, Pharmacology, Physics, and Psychology.

A five-year (150) BEd/BSc (Specialization in Science and Education) program with majors and minors in Biological, Mathematical, and Physical Sciences is also available (see §§15.15.6 and 75.6).

**Admission**

See §15.15.4 for admission requirements.

**Selection of Courses**

The following regulations govern Specialization programs:

1. In each year, a Specialization student’s program must be approved by a Specialization advisor in the appropriate Department and by the Faculty Office.
2. A minimum of 72 in Science is required in most Specialization programs. Certain Departments may require more than 72.
3. A student must take at least 18 in Arts courses as part of the requirements for most Specialization degrees.
4. Normally, no more than 42 in junior courses are permitted in Specialization programs.
5. Certain non-Arts and non-Science courses appropriate to the program may be permitted in Specialization programs with the prior written approval of the Department directing the student’s program.

**Course Load Requirements**

To graduate in four years normally requires that BSc Specialization students take the usual full course load of 30 each Fall/Winter of the program. Students who wish to extend their programs are still expected to complete at least 24 in each Fall/Winter of the program. Exceptions to course load requirements must be approved in advance each year by the Department and the Faculty Office. (See Time Limits for Completion of Program below.)

**Academic Standings and Graduation**

The following regulations govern Specialization programs:

1. Continuation in a Specialization program is by recommendation of the Department concerned and requires a GPA of at least 2.3 in each of the preceding Fall/Winter periods. See description of Specialization programs of individual departments for additional requirements relating to promotion in the Specialization program. Students must be in good standing in the Specialization program in order to graduate.
2. A student who fails to attain the standard necessary for continuation in the Specialization program will be required to withdraw from that program. In so doing, the student may apply to transfer to the General program in the Faculty. Students applying to transfer from a Specialization to the General program must meet the continuation GPA of 2.0.
3. A student who fails to complete the requirements for a Specialization degree in the fourth year may be granted the General degree forthwith on application if the courses taken and the standing attained are satisfactory. Such students must apply to transfer to the General program.
4. For graduation, a program of at least 120 credited to the degree.
5. BSc Specialization degrees with Distinction are awarded when students achieve a GPA of at least 3.5 on the last 24 if the student was enrolled in a normal course load (minimum 24) during each Fall/Winter of the last two years.

**Residence Requirement**

A student transferring to the Faculty of Science with advanced standing must complete at least 60 applicable to the BSc program while registered at the University of Alberta. Normally, at least 30 of the last 60 must be completed while registered in the Faculty of Science.

**Time Limits for Completion of Program**

All BSc Specialization programs are designed to be four-year programs. However, in some cases the minimum course load requirements have been reduced to allow students the flexibility to complete the degree over a longer time period. Students wishing to extend their programs beyond the time frame dictated by the minimum course load requirement for their program must first obtain the written approval of the Department and the Senior Associate Dean of Science or designate.

**193.1.3 General Programs**

The BSc General program provides students with a diverse education in more than one branch of study and includes a major and minor subject or area of concentration. Students must major in a Science subject or area of concentration. Students may elect to minor in a Science subject or area of concentration, an Arts subject of concentration, an Agricultural, Life and Environmental Sciences minor, or a Business minor. In addition to providing a BSc General Degree, this program allows for subsequent transfer to Specialization and Honors programs. Students who intend to transfer to Honors programs in Biochemistry, Neuroscience, Pharmacology or Physiology must complete 30 in each Fall/Winter preceding admission to the Honors program. All other students who intend to transfer to Honors programs must complete 24 in each Fall/Winter preceding admission to the Honors program. Students enrolled in the General program who intend to transfer to another program should consult the appropriate admission requirements for the particular program of interest in §15.15 and carefully select their first-year core courses in accordance with the requirements of the specific program.

Students who tentatively plan to transfer to an honors or specialization program should initially complete courses toward a Science or Arts minor in accordance with BSc General regulations.

**Admission**

See §15.15.1 for admission requirements for the BSc (General) programs.

**Selection of Courses**

The following regulations govern the General program:

1. A student’s program must be approved by an advisor in the Faculty Office each academic year.
2. To obtain a BSc General Degree, a student must receive credit in 120. At least 72 and not more than 102 must be in Science. At least 18 and not more than 48 must be in Arts.
3. Each student must complete a Science major. A minimum of 36 and a maximum of 48 are required in the major, with no more than 18 at the junior level. At least 12 must be 300-level or higher courses taken while registered in the Faculty of Science at the University of Alberta. Each student must also either
   a. complete a second Science major. Students who complete a second Science major do not have a minor. The Double Majors will be recorded on their transcripts and diplomas; or
   b. complete a minor. The minor may be in Science, or in Agricultural, Life and Environmental Sciences, Arts or Business. For a list of Agricultural, Life and Environmental Sciences minors, see §193.1.4. For a list of Arts subjects available as a minor, refer to “Minors”. For information about admission to the Business minor, see §15.15.2. Requirements for a Business minor appear in §193.1.5. At least 24 and not more than 36 are required in the minor with no more than 12 at the junior level. If the minor is a Science minor, at least 6 must be in 300-level or higher courses taken while registered in the Faculty of Science at the University of Alberta. If the minor is an Arts minor, additional requirements as specified by the Arts Department may be required. Students are responsible for meeting any additional departmental requirements as specified by the Faculty of Arts.
Minors

A Science minor consists of Science courses taken from one of the following nine subject areas:
- Biological Sciences (see Note 1): Choose courses from BIOCH (see Note 2), BIOIN (see Note 3), BIOL, BOT, CELL, ENT, GENET, IMIN, MA SC, MICRB, MMI (with the exception of 133), NEURO, PALEO (see Note 4), PHYSL (with the exception of 600), PMCOL (with the exception of 300), ZOOL.
- Chemistry: Choose courses from BIOCH (see Note 2), CHEM.
- Computing Science: Choose courses from CMPUT.
- Earth and Atmospheric Sciences: Choose courses from Science EAS courses (see Note 5), GEOPH, PALEO (see Note 4).
- Mathematical Sciences: Choose courses from BIOIN (see Note 3), CHEM, MA PH (see Note 6), MATH, STAT.
- Mathematics: Choose courses from MATH.
- Physical Sciences: Choose courses from BIOCH (see Note 2), CHEM, GEOPH, MA PH (see Note 6), PHYS.
- Physics: Choose courses from ASTRO, GEOPH, MA PH (see Note 6), PHYS.
- Science Psychology: Choose courses from Science PSYCO courses.
- Statistics: Choose courses from STAT.

Notes

(1) For additional Biological Sciences courses and information see §§193.3.6, 194 and 194.3.
(2) All BIOCH courses will be counted either as Biological Sciences or Physical Sciences or Chemistry. (Courses may not be split or divided.)
(3) All BIOIN courses will be counted either as Biological Sciences or Mathematical Sciences or Computing Sciences. (Courses may not be split or divided.)
(4) All PALEO courses will be counted either as Biological Sciences or Earth and Atmospheric Sciences. (Courses may not be split or divided.)
(5) All MA PH courses will be counted either as Mathematical Sciences or Physical Sciences or Physics.
(6) EAS 323 may be used as a Physical Science or Chemistry.

Minors

A Science minor consists of Science courses taken from one of the following areas: Biological Sciences, Chemistry, Computing Science, Earth and Atmospheric Sciences (Science EAS), Mathematical Sciences, Mathematics, Physical Sciences, Physics, Psychology (Science PSYCO), or Statistics. For information about the BSc General – minor in Agricultural, Life and Environmental Sciences, see §193.1.4. For information about the BSc General – minor in Business, see §193.1.5.

If the minor is from the Faculty of Arts, further requirements as specified by the Arts Department must be met. See Faculty of Arts §§43.1 to 44.33 for specific requirements for minors, by Department. The following Arts subjects may be taken as a minor: Anthropology; Art and Design; Biblical Hebrew; Central/East European Studies; Chinese; Christian Theology; Classical Studies; Classical Languages; Comparative Literature; Creative Writing; Drama; East Asian Studies; Economics; English; Film Studies; French; Human Geography (see Note); German; History; Ancient or Medieval History; History of Art, Design and Visual Culture; International Studies; Italian; Japanese; Latin American Studies; Linguistics; Middle Eastern and African Studies; Music; Native Studies; Philosophy; Polish; Political Science; Arts Psychology (see Note); Religious Studies; Russian; Scandinavian; Science, Technology and Society; Sociology; Spanish; Ukrainian; Women's Studies.

Note: The major and minor may not share courses from the same department. The following combinations are not allowed:
- Arts Geography/Earth Sciences
- Arts Psychology/Science Psychology

Courses in the major and minor may not overlap. For example, if the major is Mathematical Sciences, and the minor is Statistics, the major may be made up of Mathematics courses and Computing Science courses, but no Statistics courses. The minor would consist exclusively of Statistics courses.

The General program features a first-year core of courses which must include the following:

- a. 6 from among junior Science courses offered by the departments of Computing Science, Mathematical and Statistical Sciences (CMPUT 101 or 114 or 174; CMPUT 115 or 175; MATH 113 or 114 or 117; MATH 115 or 118; MATH 125; MATH 153; STAT 141 or 151
- b. 6 from among junior courses offered by the Departments of Computing Science, and Mathematical and Statistical Sciences (CMPUT 101 or 114 or 174; CMPUT 115 or 175; MATH 113 or 114 or 117; MATH 115 or 118; MATH 125; MATH 153; STAT 141 or 151
- c. 6 from among junior courses in the Departments of Chemistry or Physics (ASTRO 120, 122; CHEM 101, 102, 164; PHYS 114, 124, 126, 144, 146)
- d. 6 from among junior Science courses titled Biology, Earth and Atmospheric Sciences, or Science Psychology (BIOL 107, 108; EAS 100, 105; PSYCO 104)

- Normally, at least 30 at the junior level must be successfully completed before a student may register in senior-level courses.
- Not more than 62 of all courses taken can be at the junior level.
- Each student must successfully complete a minimum of 12 at the 300-level (or higher) in the major and, in addition, at least 6 at the 300-level (or higher) in the minor while registered in the Faculty of Science at the University of Alberta.

Subject to receiving written approval from the Faculty of Science Office before registration, a maximum of 12 may be taken from Faculties other than Arts or Science. For applicants to the BSc General who have already taken courses from Faculties other than Arts or Science, potential transfer credit for such courses will be assessed at the time of admission to the program.

Such subjects are not included as part of the major or minor, nor toward the minimum requirement of 18 in Arts, nor toward the minimum requirement of 72 in Science.

Note: In Women’s Studies minor, courses not in Arts or Science but in the list of “cross-listed courses” may count toward the minor in Women’s Studies (see §44.33).

Course Load Requirements

Students in the General program should normally take 30 during the Fall/Winter of each year of the program.

Academic Standing and Graduation

The following regulations govern General Programs:

(1) To obtain a BSc General degree, a minimum 2.0 GPA must be attained on the last 60 credits credited to the degree. Moreover, a minimum 2.3 GPA must be attained in all courses in the major. Students must be in Satisfactory Standing in the General program in order to graduate (a minimum 2.0 GPA in the final Fall/Winter).

(2) BSc General degrees with Distinction are awarded when students achieve a GPA of 3.5 or higher over the last 60 if the students have satisfactorily completed at least a normal academic load of a minimum of 24 during the Fall/Winter periods of the last two years at the University of Alberta.

Residence Requirement

A student transferring to the Faculty of Science with advanced standing must complete at least 60 applicable to the BSc program while registered at the University of Alberta. Normally, at least 30 of the last 60 must be completed while registered in the Faculty of Science.

Time Limits for Program Completion

The Faculty of Science may permit a student to complete the requirements for a General degree over a period longer than four years or meet the requirements in a shorter time by attending Spring/Summer.

193.1.4 BSc General—Minor in Agricultural, Life and Environmental Sciences

Students may choose a minor in Agriculture, Human Ecology or Nutrition. All other restrictions and requirements of the BSc General program, as outlined in §193.1.3 apply.

Minor in Agriculture

The minor in Agriculture consists of at least 24 and no more than 30 in Agriculture courses as follows:

(1) AN SC 200
(2) AREC 200 (Prerequisite of ECON 101 or consent of Department)
(3) PL SC 221
(4) SOILS 210 (Prerequisite: Must have completed a university-level course in life or natural sciences. A university-level chemistry course is strongly recommended.)

(5) 12 to 18 in additional courses at the 300-level or higher to be chosen from AN SC, AREC, ENCS, PL SC or SOILS.

Minor in Human Ecology

The minor in Human Ecology consists of at least 24 and no more than 30 in Human Ecology as follows:

(1) HECOL 100
(2) HECOL 170 or 250
(3) 3 from HECOL 212, 310 or 313
Minor in Nutrition

The minor in Nutrition consists of at least ★24 and no more than ★30 in Nutrition with no more than ★12 at the 100-level, as follows: NU FS 305, 352, 356; NUTR 100

★12 from the following: NU FS 223, 200, 373, 377, 400, 401; NUTR 480

Biochemistry is a recommended prerequisite.

193.1.5 BSc General—Minor in Business

Note: For requirements, see §193.1.3. Students admitted to the program lacking one or more prerequisites will be required to make up the deficiency during the first Fall/Winter in the Business minor program.

BSc General program students admitted to the minor in Business quota must complete the following:

(1) ECON 101, 102
(2) ★18 to ★30 in courses offered by the Faculty of Business including ACCTG 311; SMO 301; two of FIN 301, MARK 301, MGTS 352, SMO 321

Notes:

(1) Several of the above courses have one or more Arts or Science courses as prerequisites. These prerequisites must be met.
(2) Students completing a minor in Business must still choose a major in Science and must satisfy the requirement that at least ★72 of the ★120 credited to the degree be in Science.
(3) Students minoring in Business must still complete at least ★18 in Arts.

ECON 101 and ECON 102 constitute six of those required Arts units.

Once admitted to the minor in Business, students in the BSc General program will be allowed to continue in the Business minor as long as they remain in good standing in the BSc General program. BSc General program students who have been admitted to the minor in Business and who subsequently apply to transfer to a Specialization or Honors program which has a Business component controlled by quota will have to apply and compete for admission to that quota.

193.1.6 BSc (Specialization in Science and Education)/BEd (Secondary) Combined Degrees Program

The Faculties of Science and Education offer a combined degrees program that is more highly structured than a BSc followed by a BEd After Degree (a six year route). It provides less flexibility in course choice and scheduling than taking the degrees sequentially because it is designed to meet the minimum requirements of both degrees in five years. In addition, it must meet teacher certification requirements within this time frame.

To accommodate the variety in subject studies needed in secondary school teaching, students in the BSc (Specialization in Science and Education)/BEd (Secondary) program will select both a major/minor from the following areas:

- **Biological Sciences**: Biology, Botany, Entomology, Genetics, Immunology and Infection, Marine Science, Microbiology, Neuroscience, Paleontology, Pharmacology, Physiology, Zoology.
- **Physical Sciences**: Astronomy, Chemistry, Mathematical Physics, Physics.

**Admission**

Students apply to the Faculty of Science for admission to the BSc (Specialization in Science and Education)/BEd (Secondary) program and normally spend the first two years of the five-year combined degrees program registered in the Faculty of Science. (See §15.15.6)

**Selection of Courses**

The following regulations govern the BSc (Specialization in Science and Education)/BEd (Secondary) program:

(1) A student's program must be approved by an advisor in the appropriate Faculty prior to the start of each Fall/Winter.
(2) Within the ★150 program, a student must complete a minimum of ★72 in Science and ★48 in Education and ★18 in Arts.
(3) In the major, at least ★12 must be in 300-level or higher courses taken while registered in the BSc (Specialization in Science and Education)/BEd (Secondary) program at the University of Alberta.
(4) In the minor, at least ★6 must be in 300-level or higher courses taken while registered in the BSc (Specialization in Science and Education)/BEd (Secondary) program at the University of Alberta.
(5) No more than ★42 at the 100-level are permitted in the BSc (Specialization in Science and Education)/BEd (Secondary) program.

**Course Load Requirements**

To complete the ★150 and graduate in five years, students must take a full course load of ★30 in each Fall/Winter of the program. The minimum load for students in the BSc (Specialization in Science and Education)/BEd (Secondary) program is at least ★24 in each Fall/Winter. A course load of less than ★24 requires annual approval by both the Dean of Education and the Dean of Science.

---

### Academic Standing and Graduation

The following regulations govern the combined degrees program:

1. (1) Continuation in the combined degrees program requires a GPA of at least 2.3 on the 24 in each Fall/Winter of the five-year program.
2. (2) Graduation from the combined degrees program requires a GPA of 2.7 in the declared major.
3. (3) Students who fail to achieve a GPA of 2.7 in their major at the end of Year 2 in the program will not be promoted to the Faculty of Education.
4. (4) A student who fails to attain the standard necessary for continuation or graduation may appeal to the Dean to achieve the required standing and the written approval of the Dean of Science and the Dean of Education.
5. (5) A student who does not meet the standards for continuation or graduation in the combined degrees program will not be promoted to the program. In doing so, the student may apply to transfer to a BSc program in the Faculty of Science or the BEd program in the Faculty of Education, provided they meet the necessary admission GPA.
6. (6) Normally, a student transferring from the combined degree program to a BEd program after Year 2 or 3 should be able to complete the degree in one or two years. However, transfer to a BSc program must be made after Year 2 at the latest to avoid loss of credit.
7. (7) The BSc (Specialization in Science and Education) degree With Distinction is awarded if students achieve a GPA of at least 3.5 on the last 60 if the student was enrolled in at least 24 during each Fall/Winter of the last two years.

### Residence Requirement

A student transferring into the combined degrees program with transfer credit normally will be required to complete at least 90 (normally the last 90) while registered in the combined degree program.

### Time Limits for Completion of Program

The combined degrees program is a five-year program. A student may complete the requirements of the combined degree over a period longer than five years or meet the requirements in a shorter time by attending Spring/Summer. An extension beyond six years is not normally permitted and requires the written approval of the Dean of Science and the Dean of Education.

#### 193.1.7 The BSc after a BSc from the Faculty of Science at the University of Alberta

An applicant holding a BSc degree from this Faculty may qualify for a second degree by completing a minimum of an additional 30 subject to the following provisions.

1. (1) All admission, program, academic standing and graduation requirements of the second degree program must be met. Admission to a BSc Honors or Specialization program as a second degree requires the approval of the appropriate Department(s) and the Faculty Office.
2. (2) A graduate holding a BSc General degree from this Faculty may qualify for a second BSc General degree provided the major in the second degree is not the same as either the major or minor in the first degree. The only exception is that students who wish to upgrade their previous minor to be the major in their second degree may do so. However, their original minor must have been in Science and the new minor cannot overlap either the major or minor of their previous degree. At least 9 senior units of the major and at least 6 senior units of the minor for the second degree must be completed while registered in the second degree program.
3. (3) Students must declare a major and minor on application to the program. Students must follow the program to which they have been admitted and must achieve a GPA of 2.3 or higher in their major, in each Fall/Winter period, to be able to continue in good standing. Subsequent changes in major or minor may be possible according to merit.
4. (4) A graduate holding a BSc Specialization or BSc Honors degree from this Faculty may qualify for a second BSc Specialization or BSc Honors degree by completing a minimum of 30. The specific course requirements for a BSc Specialization or BSc Honors degree as a second degree are determined at the time of admission by the appropriate Department(s) and the Faculty Office. At least 15 senior units in the subject discipline of the degree must be completed while registered in the second degree program.
5. (5) A graduate holding a BSc Specialization or BSc Honors degree from this Faculty may qualify for a second BSc Specialization or BSc Honors degree by completing a minimum of 30 and provided the second degree is in a different subject or area. At least 15 senior units in the subject discipline of the degree must be completed while registered in the second degree program.
6. (6) Students in a second degree program who do not maintain satisfactory standing will be required to withdraw and will not be eligible for Academic Warning or Probation.
their original minor must have been in Science and the new minor cannot overlap either the major or minor of their previous degree. Students must declare a major and minor on application to the program.

(2) Students who present the equivalent of a BSc Honors or Specialization degree from another institution may complete a second BSc Honors or Specialization degree in a different discipline, from this Faculty.

(3) Satisfactorily complete a minimum of an additional 60 while registered at the University of Alberta with at least 30 while registered in the Faculty of Science second degree program.

(4) For students completing a BSc General After degree, at least 18 senior units in the student’s major and at least 12 senior units in the student’s chosen minor must be completed while registered in the After Degree program in the Faculty of Science at the University of Alberta.

(5) In the BSc Specialization or Honors After Degree, at least 24 senior units of the course requirements in the subject discipline of the degree must be completed while registered in the After Degree program in the Faculty of Science at the University of Alberta.

(6) Students in a second degree program must maintain satisfactory standing in each Fall/Winter. Such students in a second degree program who do not maintain satisfactory standing will be required to withdraw and will not be eligible for Academic Warning or Probation.

(7) Satisfy all admission requirements (see §15.15), as well as program, academic standing, and graduation requirements of the particular degree program (See §193.1.1 for Honors, §193.1.2 for Specialization, and §193.1.3 for General Program.)

(8) Admission to a Specialization program and an Honors program requires approval of the appropriate Department and the Faculty Office. The specific course requirements for a degree program are determined, at the time of admission, by the appropriate Department (for Specialization and Honors) and the Faculty Office. For further information, consult the Faculty of Science Student Services Office.

193.1.9 Industrial Internship Program

The Industrial Internship program (IIP) offers undergraduate students extended work experience in industry in addition to their academic courses. The work experience is normally undertaken after completion of a minimum of 75, and not more than 105, units of course weight of an Honors or Specialization degree program. Students who have maintained good academic standing in an Honors or Specialization program are eligible for the program. Department IIP Advisors will provide approved position descriptions from companies wishing to employ IIP students. Companies are responsible for interviewing and selecting students for the positions. The internship may begin in May, September or January and must be of at least 8 months duration, but may extend to up to 16 months; a 16-month internship normally includes a four-month probationary period. Work during the internship period is full time, for which the student is paid by the employer at competitive rates. The student, employer, and the department must agree to terms of the internship. Following completion of the work experience, students return to the university to complete their degree program of studies. It is not possible to guarantee that all students wishing to obtain an internship will be able to do so.

During the period of the internship, the student registers in a work experience (WKEXP) course each term and is considered a full-time student at the University of Alberta. Work experience courses are assigned units of course weight and are graded credit/no credit. All students must register in a minimum of two WKEXP courses that have associated fees. These fees are used to cover Department costs of job recruitment, supervision and site visits during the internship period, and program administration costs.

During the first term following completion of the internship and return to the university, students must complete the academic requirements of the Industrial Internship. This normally takes the form of a report to the appropriate Advisor and/or Committee as well as to other students as part of a graded seminar course.

Detailed information about the Industrial Internship is available from the IIP Advisor in each Department in the Faculty of Science.

193.1.10 Transfers Between Programs

A student may transfer from an Honors program to either the corresponding Specialization program or to the General program, or from a Specialization program to the General program at any time in the program, by submitting a readmission form to the Faculty Office subject to appropriate deadlines. Transfers from the General program to a Specialization program or an Honors program or from one Specialization program to another or to an Honors program may be made according to the dates listed in §12. Also, transfers to Honors and Specialization programs require approval of the Department responsible for the new program.

Note that transfer from BSc/BEd program to any of the BSc programs must take place no later than Year 2 to avoid loss of credit.

193.1.11 Completion of a BSc Degree After Transfer to Another Faculty

Students who transfer to another Faculty after completing part of a BSc program may reapply to the Faculty of Science after completing the degree from the other Faculty. A former student transferring to the Faculty of Science normally must complete at least 60 while registered in the Faculty of Science at the University. Courses completed in the Faculty of Science before transfer may count toward the minimum 60 that must be completed while registered in the Faculty of Science. Science or Arts courses taken while in another Faculty, which are clearly noted as “extra-to-degree” on the transcript, may fulfill specific subject requirements of a degree program in Science but will not fulfill the minimum residence requirement of the program.

193.2 Biochemistry

193.2.1 Honors in Biochemistry

Continuation in the Honors in Biochemistry program requires successful completion of 90 with a minimum 3.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum grade of B- or higher on a minimum of 39 BIOCH courses credited toward the degree.

Year 1

BIO1 107
CHEM 101, 102 and 261 (or 164)
PHYS 124 and 126 (or equivalent)

Year 2

BIOCH 200 (Fall), and BIOCH 320, 330 (Winter)

Year 3

BIOCH 310 (Fall), and BIOCH 401

Year 4

* 9 in senior-level BIOCH courses
* 6 in Group A options
* 3 in senior-level MATH or STAT option
* 6 in approved Arts options

Notes

(1) Students must receive a grade of not less than B- in all Biochemistry courses credited toward the minimum number required for the degree.

(2) Students must consult the Department of Biochemistry regarding selecting options throughout the course of the program.

(3) Group A options are selected from CHEM, PHYS, MATH, STAT, CMPUT.

(4) Credit in Science 100 will be considered equivalent to BIOL 107; CHEM 101, 102, 164; MATH 114; junior-level MATH/STAT option; PHYS 124, 126; WRS 101; * Science options.

193.2.2 Specialization in Biochemistry

Continuation in the Specialization in Biochemistry program requires successful completion of at least 24 with a minimum 2.7 GPA in the previous Fall/Winter. In addition, graduation requires a minimum grade of B in BIOCH 200, 310, 320 and 330 and a minimum grade of C in all other BIOCH courses credited toward the degree.
193.3.2 Specialization in Biological Sciences

Admission to the BSc Specialization in Biological Sciences program see Admission Chart 5, §15.15.

Continuation in the Specialization in Biological Sciences program requires successful completion of at least 24 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on all courses credited to the degree.

193.3.3 First-Year Core for BSc Honors and Specialization in Biological Sciences

The following courses are common to all programs:

- BIOL 107, 108; CHEM 101, 164 or 261; MATH 113 or 114 or 120; STAT 151;
- 6 in Arts options (junior level ENGL or WRS recommended);
- 6 in program-specific courses (see individual programs for requirements and recommendations), SCI 100 may be used in lieu of BIOL 107, 108; CHEM 101, 164; and MATH 114.

193.3.4 Course Sequence in Biological Sciences

See Science Chart 2.

193.3.5 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Biological Sciences (see §193.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program and who have also successfully completed BIOL 400.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May, September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately four-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 955 and 956 plus BIOL 400. BIOL 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in BIOL 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in BIOL 400.

Interested students should see the Industrial Internship Advisor in the Department of Biological Sciences for more information.

193.3.6 General Program in Biological Sciences

A major or a minor area of concentration in the Biological Sciences is available in the BSc General program.

Courses which may be used toward a Biological Sciences major or minor include BIOCH; BIOIN; BIOL; BOT; CELL; ENT; GENET; IMIN; MA SC; MICRB; MMI (with the exception of MMI 133); NEURO; NU FS 363; PMCOL (with the exception of PMCOL 300); PALEO; PHYSL (with the exception of PHYSL 600) and ZOOI.

Courses in Biochemistry may be used for a concentration in Biological Sciences or Physical Sciences or Chemistry but not in more than one concentration.

Courses in Paleontology may be used in a concentration in Biological Sciences or Earth and Atmospheric Sciences but not in both.

Courses in Bioinformatics may be used in a concentration in Biological Sciences or Mathematical Sciences or a Computing Sciences minor but not in more than one concentration.

**Note:** It is not possible to combine a major or minor in the Biological Sciences with a minor or major in one of the specific subject disciplines in the Biological Sciences. For example, students may not select a major in the Biological Sciences and a minor in Microbiology.

Notes
1. Honors students are required to take BIOCH 401 and reduce approved options by ★6.
2. Honors students are required to take one of the following discussion courses and reduce approved options by ★3: BOT 403, 445, 450, 455, or MICRB 405 (if appropriate topic). Credit in SCI 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 261; MATH 114; ★6 Science options and ★3 Approved options.

193.4 Cell Biology

193.4.1 Honors in Cell Biology

Continuation in the Honors in Cell Biology program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on all courses credited towards the degree.

Year 1
BIOL 107, 108
CHEM 101, 102
CHEM 164 or 261
MATH 113 or 114
PHYS 124, 126
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS

Year 2
BIOCH 200
BIOL 207
CELL 201 or BIOL 201
CHEM 263
GENET 270
MICRB 265
STAT 141 or 151
★3 in an Arts option
★6 in approved Science options

Year 3
BIOCH 320 or CHEM 371
CELL 300, 301
★6 from Group A Cell Biology options (BIOCH 401 recommended)
★6 in approved Science options
★6 in Arts options

Notes
1. Cell Biology students should take BIOCH 320 in Winter Term of Year 2 if selecting BIOCH 401 option; BIOCH 330 is not required for Cell Biology students.
2. CHEM 371 requires MATH 115 to be taken as a Science option in Year 2

Year 4
CELL 499
★3 from a 400-level CELL course
★6 from Group A Cell Biology options
★12 in approved Science options
★3 in an Arts option

Notes
1. Students are required to consult the Department of Cell Biology for selection and approval of all options.
2. Students are encouraged to select approved Science options from the Cell Biology Group A or recommended options list, but may also follow a course of study tailored to their interests.
3. Credit in SCI 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 164; MATH 114, 115; PHYS 124, 126; WRS option

Group A: Cell Biology Options
BIOCH 401, 420, 425, 441, 450, 481, 482
BIOCH 430 or GENET 304
BIOL 421
CELL 310, 398, 402, 405, 410, 415, 425, 445, 498

193.4.2 Specialization in Cell Biology

Continuation in the Specialization in Cell Biology program requires successful completion of at least ★24 with a minimum 2.3 GPA in the preceding Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on all courses credited towards the degree.

Year 1
BIOL 107, 108
CHEM 101, 102
CHEM 164 or 261
MATH 113 or 114
PHYS 124, 126
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS

Year 2
BIOCH 200
BIOL 207
CELL 201 or BIOL 201
CHEM 263
GENET 270
MICRB 265
STAT 141 or 151
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS

Year 3
BIOCH 320 or CHEM 371
CELL 300, 301
★3 from Group A Cell Biology options (BIOCH 401 recommended)
★6 in approved Science options
★3 in an Arts option
★6 in approved Science options

Year 4
CELL 300, 301
★3 from BIOCH 310, 320 or 330
★3 from Group A Cell Biology options (BIOCH 401 recommended)
★6 in approved Science options
★6 in Arts options

Notes
1. Students are required to consult the Department of Cell Biology for selection and approval of all options.
2. Students are encouraged to select approved Science options from the Cell Biology Group A or recommended options list, but may also follow a course of study tailored to their interests.
3. Credit in SCI 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 261; MATH 114; ★6 Science options and ★3 Approved options.

Notes
1. Honors students are required to take BIOCH 409 and reduce approved options by ★6. Honors students are required to take one of the following discussion courses and reduce approved options by ★3: BOT 403, 445, 450, 455, or MICRB 405 (if appropriate topic). Credit in SCI 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 261; MATH 114; ★6 Science options and ★3 Approved options.
Notes
(1) Students are required to consult the Department of Cell Biology for selection and approval of all options.
(2) Students are encouraged to select approved Science options from the Cell Biology Group A or recommended options list, but may also follow a course of study tailored to their interests.
(3) Credit in Science 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 164; MATH 114, 115; PHYS 124, 126: WRS option

Senior Courses in Chemistry
- Œ6 in Arts options
- Œ12 in Science options
- Œ18 in senior chemistry courses (with at least Œ6 taken at the 400-level).

CHEM 400 or 401

BIOCH 200 or BIOL 107

CHEM 313, 361, 371, 373, 398

193.5 Chemistry

193.5.1 Honors in Chemistry

Honors students in Chemistry must take a core of Chemistry and auxiliary courses. The core consists of ★45 in Chemistry courses, ★12 in Mathematics courses, ★6 in Physics courses, ★3 in Biology or Biochemistry courses, ★3 in either CHEM 400 or 401, ★6 in a junior ENGL or ★3 in ENGL and ★3 in Arts option, and ★12 in Arts options. In addition to the core courses, honors students must complete at least ★18 in senior courses in Chemistry from the courses listed below, with ★6 of these taken at the 400-level. Finally, the honors student must include ★15 in options in the third and fourth years of the program. These are normally chosen from offerings within the Faculty of Science. All options must be selected in consultation with the Department of Chemistry.

Continuation in the Honors in Chemistry program requires successful completion of at least ★24 with a minimum 3.0 GPA and a minimum 3.0 GPA on all CHEM courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★90 credited to the degree.

The Honors Chemistry degree is accredited by the Canadian Society for Chemistry.

Year 1

CHEM 101, 102, 261 (or 164)
MATH 113 (or 114), 115
PHYS 144, 146
a junior course in ENGL or ★3 in ENGL and ★3 in an Arts option
★3 in Science option

Year 2

CHEM 211, 241, 243, 261, 282, 298
MATH 214 and either 125 or 215 or STAT 151 (if PHYS 124 and 126 are taken in Year 1, then PHYS 230 or 281 is also required)
★6 in Arts options

Years 3 and 4

CHEM 313, 361, 363, 371, 373, 398
BIOCH 200 or BIOL 107
CHEM 400 or 401
★12 in senior chemistry courses (with at least ★6 taken at the 400-level).
★12 in Science options
★6 in Arts options

Senior Courses in Chemistry

CHEM 303, 305, 333, 400 (if not taken as a requirement), 401 (if not taken as a requirement), 403, 405, 419, 424, 425, 434, 436, 437, 438, 439, 443, 444, 461, 462, 463, 477, 478, 483, 489, 493, 495

Notes
(1) Approved options are normally chosen from offerings within the Faculty of Science.
(2) All options must be selected in consultation with the Department of Chemistry.
(3) Credit in Science 100 will be considered equivalent to CHEM 101, 102, 164; MATH 114, 115; PHYS 144, 146; BIOL 107 and ★3 Science option.

193.5.2 Specialization in Chemistry

Continuation in the Specialization in Chemistry program requires successful completion of at least ★18 with a minimum 2.3 GPA and a minimum 2.3 GPA on all CHEM courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★90 credited to the degree.

The Specialization Chemistry degree is accredited by the Canadian Society for Chemistry.

Year 1

CHEM 101, 102, 261 (or 164)
MATH 113 (or 114), 115
PHYS 144, 146
★6 in junior level ENGL or WRS or ★3 junior ENGL and ★3 in Arts option
★3 in Science option

Year 2

CHEM 211, 241, 243, 261, 282, 298
MATH 214 and either 125 or 215 or STAT 151 (if PHYS 124 and 126 are taken in Year 1, then PHYS 230 or 281 is also required)
★6 in Arts options

Years 3 and 4

CHEM 313, 361, 371, 373, 398
BIOCH 200 or BIOL 107
★9 in senior chemistry courses (with at least ★3 taken at the 400-level).
★12 in Science options
★6 in Arts options
★15 in approved options

Senior Courses in Chemistry

BIOCH 200, 310, 320, 330

193.5.3 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Chemistry (see §193.5.1 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May, September, or January. During the program, students are considered full-time students in the Specialization or Honors programs in Chemistry (see §193.1.9 for students in the Specialization or Honors programs in Chemistry. (see §193.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May, September, or January. During the program, students are considered full-time students in the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 955 and 956, plus CHEM 400. CHEM 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in CHEM 400.

Interested students should see the Industrial Internship Advisor in the Department of Chemistry for more information.

193.6 Computing Science

For admission requirements, see §15.15.

There are many routes to the study of Computing Science. Students should visit our website at www.cs.ualberta.ca. Each student is expected to develop their program of study in consultation with an advisor. All Honors and Specialization programs require annual approval by the department.
### 193.6.1 Honors in Computing Science

The Honors program is directed to highly-motivated students with exceptional ability. It provides the opportunity for students to design their program for in-depth study of topics of interest. The Honors program has few specified requirements. Honors students must complete a minimum number of upper level courses (300-level or greater). This implies that they must take the required prerequisites in CMPUT, MATH, and other subjects. There is no set of required 200-level courses, and prerequisites in CMPUT courses can be waived for demonstrated competence in the subject. Programs that cross discipline and faculty boundaries are possible and encouraged.

Because the Honors program is very flexible, all students must obtain departmental guidance in developing their program. All course selections and changes require annual approval by a departmental advisor.

Honors students should keep in mind the degree requirements for Specialization in case they can no longer continue in Honors.

Continuation in the Honors in Computing Science program requires successful completion of at least ★24 with a minimum 3.0 GPA and a minimum 3.0 GPA on all CMPUT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★60 and a minimum 3.0 GPA on all CMPUT courses credited towards the degree.

Graduation requires a GPA of 3.0 on the last ★60 credited to the degree, and 3.0 on all CMPUT courses credited to the degree.

Honors students must complete a minimum of ★24 in CMPUT courses at the 300- or 400-level or greater offered at the University of Alberta.

#### Year 1

CMPUT 174 and 175  
★6 in junior ENGL or ★3 in junior ENGL and ★3 junior WRS  
★9 in Science options  
★9 in approved options

#### Year 2

★9 in Science options  
★6 in Arts options  
★15 in approved options

#### Year 3

★15 in CMPUT at the 300-level or 400-level (see Note 3)  
★9 in Science options  
★9 in Arts options  
★9 in approved options

#### Year 4

★15 in CMPUT at the 300-level or 400-level (see Note 3)  
★9 in Arts options  
★9 in approved options

#### Notes

1. Options consist of Science options, Arts options, and other approved options. The options must satisfy at least ★21 from Science and at least ★12 from Arts; ★30 can be chosen from Science, Arts or another Faculty. At least ★9 in options must be at the 300-level or higher.
2. Higher level CMPUT courses may require specific CMPUT, MATH or STAT courses as prerequisites. Therefore, prerequisites for higher level CMPUT courses must be considered when choosing options.
3. Students must have ★6 in introductory statistics and probability. This can be satisfied by selecting (STAT 151 or 235) and STAT 252; or the more advanced sequences of (STAT 221 and 222); or (STAT 265 and 266);
4. At least ★6 in CMPUT must be at the 400-level.
5. Credit in SCI 100 will be considered equivalent to CMPUT 174; MATH 114, 115 and ★18 Science options.

### 193.6.2 Specialization in Computing Science

The Specialization in Computing Science program is designed for students to pursue the concentrated study of Computing Science, or to combine the study of Computing Science with another discipline. Students should consider the Industrial Internship Program.

Continuation in the Specialization in Computing Science program requires successful completion of at least ★18 with a minimum 2.3 GPA and a minimum 2.3 GPA on all CMPUT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★60 and a minimum 2.3 GPA on all CMPUT courses credited towards the degree.

Specialization students must complete a minimum of ★24 in CMPUT courses at the 300- or 400-level offered at the University of Alberta.

Students can take a maximum of ★24 in 100-level courses.

Course selections in other departments and Faculties may be subject to enrolment management and GPA requirements.

#### Year 1

CMPUT (114 and 115) or (174 and 175)  
MATH 114, 115  
★6 in junior ENGL or ★3 in junior ENGL and ★3 junior WRS  
★12 in options (see Notes 1, 2)

#### Year 2

★6 from CMPUT 201, 204, 229, 272, 291  
MATH 129 or 125  
★6 in Statistics (see Note 3)  
★15 in options (see Notes 1, 2)

#### Year 3

★12 in CMPUT at the 300-level or 400-level (see Note 4)  
★18 in options (see Notes 1, 2)

#### Year 4

★12 in CMPUT at the 300-level or 400-level (see Note 4)  
★18 in options (see Notes 1, 2)

#### Notes

1. Options consist of Science options, Arts options, and other approved options. The options must satisfy at least ★21 from Science and at least ★12 from Arts; ★30 can be chosen from Science, Arts or another Faculty. At least ★9 in options must be at the 300-level or higher.
2. Higher level CMPUT courses may require specific CMPUT, MATH or STAT courses as prerequisites. Therefore, prerequisites for higher level CMPUT courses must be considered when choosing options.
3. Students must have ★6 in introductory statistics and probability. This can be satisfied by selecting (STAT 151 or 235) and STAT 252; or the more advanced sequences of (STAT 221 and 222); or (STAT 265 and 266);
4. At least ★6 in CMPUT must be at the 400-level.
5. Credit in SCI 100 will be considered equivalent to CMPUT 174; MATH 114, 115 and ★18 Science options.

### 193.6.3 Specialization in Computing Science—Minor in Business

The minor in Business program is for students interested in a career that combines Computing Science and Business. Students in the program have access to a limited number of reserved places in Business courses. Business minor students should consider the Industrial Internship Program.

Continuation in the Specialization in Computing Science - Minor in Business program requires successful completion of at least ★18 with a minimum 2.3 GPA and a minimum 2.3 GPA on all CMPUT and Business courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★60 and a minimum 2.3 GPA on all CMPUT and Business courses credited towards the degree. (Note that ECON courses are not counted as Business courses.)

Specialization with Business minor students must complete a minimum of ★24 in CMPUT courses at the 300- or 400-level offered at the University of Alberta.

Students can take a maximum of ★24 in 100-level courses.

Course selections in other departments and Faculties may be subject to enrolment management policies and GPA requirements.

Students who choose not to continue in the Specialization Computing Science program lose their status as “pursuing a Business Minor”. Upon reapplication, students may be able to pursue the Business minor in the General Program if they meet the competitive admission GPA for this minor.

#### Year 1

CMPUT (114, 115) or (174, 175)  
MATH 114, 115  
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS  
★6 in options (See Note 1)

#### Year 2

CMPUT 201, 204, 229, 272, 291  
MATH 129  
★6 in Statistics (See Note 2)  
★6 in options (See Note 1)

#### Year 3

CMPUT 300, 301, 379  
★6 in CMPUT at the 300-level or higher (see Notes 3 and 4)  
ACCTG 311  
★9 in options (See Note 1)

#### Year 4

★9 in CMPUT at the 300-level or higher (see Notes 3 and 4)  
★6 from FIN 301, MARK 301, MGTSIC 352, SMO 321  
★6 approved Business options  
★6 in options (See Note 1)
Notes
(1) Options consist of Science options, Arts options, Business options, and approved options from any Faculty. The options must satisfy at least 12 from Science and 3 from Arts, and an additional 12 that may be chosen from Science, Arts or another Faculty. Higher level CMPUT courses may require specific CMPUT, MATH or STAT courses as prerequisites. Therefore, prerequisites for higher level CMPUT courses must be considered when choosing options.
(2) Students must have 6 in introductory statistics and probability. This can be satisfied by selecting (STAT 151 or 235) and STAT 252; or the more advanced sequences of (STAT 221 and 222); or (STAT 265 and 266);
(3) Students must take 3 in Group A courses which include CMPUT 304, 325, 340 and 474. A complete list of Group A courses to be offered in a given year is available from the department.
(4) Students must take 3 in Group B project courses which include CMPUT 400, 401, 410, 412, 414, 415, 422, and 466. The department may approve variations in the above requirement on application.
(5) Credit in SCI 100 will be considered equivalent to CMPUT 174; MATH 114, 115 and 18 options.

193.6.4 Computing Science Specialization in Software Practice

The Software Practice program is for students interested in a career as a software professional. It gives students the ability to focus on topics in Computing Science that are most relevant to software professionals while pursuing relatively broad interests in Computing Science and in other disciplines. Students use the required Arts and approved options to build a foundation in disciplines related to, or influenced by, Computing Science. Course selections in other departments and Faculties may be subject to enrolment management policies and GPA requirements.

The Software Practice program includes the Industrial Internship Program component. Therefore, students are eligible to apply for ISP (Information Systems Professional) certification upon completing 24 months of work experience in the software industry and IIP experience counts towards this work experience. The ISP is a registered designation under the Professional and Occupational Associations Registration Act in Alberta. It was registered in February 1997, and is administered by the Registrar of CIPS Alberta.

Continuation in the Specialization in Computing Science in Software Practice program requires successful completion of at least 24 with a minimum 3.0 GPA and a minimum 2.3 GPA on all CMPUT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last 60 and a minimum 2.3 GPA on all CMPUT and Business courses credited towards the degree. (Note that ECON courses are not counted as Business courses.)

Specialization students in the Software Practice program must complete a minimum of 24 in CMPUT courses at the 300- or 400-level offered at the University of Alberta.

193.6.5 Computing Science Honors Stream in Bioinformatics

The discipline of bioinformatics has developed out of the need for recording and analyzing very large sets from genome and DNA sequencing projects. The goal of the Bioinformatics program is to train students to understand, develop and use computational tools and large sets of sequence data to answer questions in biology and medicine.

The graduate will be able to understand problems embraced in bioinformatics and collaborate effectively with biologists in the construction and use of new bioinformatics tools. Interested students should select their first year science options according to the recommendations given below.

Continuation in the Computing Science Honors Stream in Bioinformatics program requires successful completion of at least 24 with a minimum 3.0 GPA and a minimum 3.0 GPA on all CMPUT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last 60 and a minimum 3.0 GPA on all CMPUT courses credited towards the degree.

Students must complete a minimum of 24 in CMPUT courses at the 300- or 400-level offered at the University of Alberta.

Each Fall and Winter term throughout their program, all Honors students must register in the Honors seminar CMPUT 495 (★0, 1hr/week). This seminar provides honors students with the opportunity to interact with faculty members and honors students from all years of the program to explore topics of interest.

Year 1

BIOL 107
CMPUT 174, 175 (Honors sections if offered), 272 (see Note 1) |
MATH 114, 115 (see Note 2) |
★3 in a BIOL or CHEM option |
★6 in junior ENGL or ★3 in junior ENGL and ★3 junior WRS |
★3 in a Science option |

Year 2

BIOL 207
CMPUT 201, 204, 229, 291 |
GENET 270 |
MATH 125 and one of MATH 225, 228, 229 |
★6 in Statistics (See Note 3) |

Year 3

BIOM 301
CMPUT 301, 325, 379, 391 |
★3 in an Arts option |
★3 in a BIOL option (see Note 4) |
★3 in CMPUT at the 300-level or higher |
★3 in a GENET Option (see Note 4) |
★3 in a Science option |

Year 4

BIOM 401
CMPUT 366 |
★9 in an Arts option |
★9 in CMPUT at the 300-level or higher |
★9 in a GENET Option (see Note 4) |
★3 in a Science option |

Notes
(1) Students are strongly encouraged to take CMPUT 272 in Year 1. |
(2) Students are strongly encouraged to take the Honors version of the MATH courses, beginning in the first year. |
(3) Students must have ★6 in introductory statistics and probability. This can be satisfied by selecting (STAT 151 or 235) and STAT 252; or the more advanced sequences of (STAT 221 and 222); or (STAT 265 and 266); note
that MGSC 312 can be taken as an alternative to STAT 252, but is not counted as a Science option.

(4) The 6 in GENET options must be chosen from GENET 275, 301, 302, 304 or 390. The 3 in a BIOL option may be chosen from BIOL 321, 380 or BIOCH 200. Note: students interested in GENET 390 and BIOCH 200 are advised to take CHEM 101 and 261 in year 1.

(5) Credit in SCI 100 will be considered equivalent to BIOL 107; CMPUT 174; MATH 114, 115; CHEM 101, 164 and 6 Science options.

193.6.6 Computing Science Specialization Stream in Bioinformatics

Continuation in the Computing Science Specialization Stream in Bioinformatics program requires successful completion of at least 18 with a minimum 2.3 GPA and a minimum 2.3 GPA on all CMPUT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last 90 and a minimum 2.3 GPA on all CMPUT courses credited towards the degree.

Students must complete a minimum of 24 in CMPUT courses at the 300- or 400-level offered at the University of Alberta.

Year 1 (Recommended Course Sequence)

| BIOL 107 |
| CMPUT (114 and 115) or (174 and 175); 272 (see Note 1) |
| MATH 114 and 115 |
| 3 in a BIOL or CHEM option |
| 6 in Statistics (See Note 2) |
| 3 in an Arts option |

Year 2

| BIOL 207 |
| CMPUT 201, 204, 229, 291 |
| GENET 270 |
| MATH 125 |
| 6 in Statistics (See Note 2) |
| 3 in a BIOL or CHEM option |
| 3 in a Science option |

Year 3

| BIOLN 301 |
| CMPUT 301, 325, 379 |
| 3 in a BIOL option (see Note 3) |
| 6 in CMPUT at the 300-level or higher |
| 3 in a GENET Option (see Note 3) |
| 3 in Science options |
| 3 in an Arts option |

Year 4

| BIOLN 401 |
| 3 in a GENET Option (see Note 3) |
| 3 in a CMPUT option at the 300-level or higher |
| 6 in Arts options |
| 3 in approved options |

Notes

(1) Students are strongly encouraged to take CHEM 101 and 261 in Year 1.

(2) Students must have 6 in introductory statistics and probability. This can be satisfied by selecting (STAT 151 or 235) and STAT 252; or the more advanced sequences of (STAT 221 and 222); or (STAT 265 and 266); note that MGSC 312 can be taken as an alternative to STAT 252, but is not counted as a Science option.

(3) The 6 in GENET options must be chosen from GENET 275, 301, 302, 304 or 390. The 3 in a BIOL option must be chosen from BIOL 321, 380 or BIOCH 200. Note: students interested in GENET 390 and BIOCH 200 are advised to take CHEM 101 and 261 in year 1.

193.6.7 Industrial Internship Program

Industrial Internship Program (IIP), similar to a co-op program, is offered to students in the Specialization or Honors programs in Computing Science (see §193.1.9 for program guidelines). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May, September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact with the student and the person designated by the employer to be responsible for the student’s progress. The student’s progress is reviewed at approximately three-month intervals. If the review is unsatisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity.

The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 955 and 956 plus CMPUT 400. CMPUT 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in CMPUT 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in CMPUT 400.

Interested students should see the Industrial Internship Advisor in the Department of Computing Science for more information.

193.6.8 BSc Program in Computer Engineering

A four-year program in Computer Engineering is offered jointly by the Faculty of Science and the Faculty of Engineering (see §82.6), and administered by the Department of Electrical and Computer Engineering. Students in the program will be registered in the Faculty of Engineering. Admission requirements are specified in §15.7. Promotion and Graduation regulations are found in §83.3.

193.6.9 BSc Specialization or Honors in Computing Science After an Undergraduate Degree (other than a BSc from the Faculty of Science at the University of Alberta)

In addition to the requirements set out in §193.1.8, a student pursuing this designation must also complete a minimum of 24 in CMPUT courses at the 300- or 400-level offered at the University of Alberta as part of their 60.

193.7 Earth and Atmospheric Sciences

Earth and Atmospheric Sciences encompass the study of the atmosphere, surface and interior of the earth. The Department administers 12 academic programs: Honors and Specialization in Atmospheric Sciences, Honors and Specialization in Environmental Earth Sciences, Honors and Specialization in Geology, Honors and Specialization in Paleontology, BSc Specialization in Planning, BA Major and Minor in Human Geography, and BA Major in Planning. For details on the BA Major and Minor in Human Geography and on the BA Major in Planning, see Faculty of Arts listing.

193.7.1 Honors in Atmospheric Sciences

Atmospheric science is the study of atmospheric composition, state and motion, from the small scale (e.g., the environment of a single leaf) through medium scales (e.g., a cumulus cloud) to the global scale (global pollution and warming). Most atmospheric scientists in Canada work for Environment Canada, providing weather forecasts or environmental information. Opportunities also arise with provincial governments and in the private sector.

Continuation in the Honors in Atmospheric Sciences program requires successful completion of at least 24 with a minimum of 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last 60 credited to the degree.

A student enrolling in the Honors program should consult the Atmospheric Sciences advisor before registration each year.

Year 1

| CMPUT 101 or 114 or 174 |
| EAS 100 |
| 6 junior ENGL or 3 junior ENGL and 3 junior WRS |
| MATH 113 or 114, 115 and 125 |
| PHYS 144 and 146 |
| STAT 141 or 151 |

Year 2

| EAS 212, 221 and 270 |
| EAS 294 or HGP 250 |
| MATH 214 and 215 |
| PHYS 244 and 281 |
| 3 Science option |
| 3 Arts option |

Year 3

| EAS 327, 370, 371, 372 and 373 |
| PHYS 234 |
| 6 in Arts options |
| 6 in Science options (see Note below) |

Year 4

| EAS 426 |
| EAS 470, 471 and 475 |
| 15 in Science options (see Note below) |
Notes
(1) Science options include but are not limited to CHEM 101, 102, 211, 213, 261, 263, 303; CMPUT 201, 204, 301, 304, 306, 340; EAS 105, 202, 208, 225, 250, 324, 325, 326, 352, 427, 451, 453, 454, 455, 457; ENCS 360; FOR 340, 372; GEOPH 210, 429; MATH 201, 334, 337, 372; PHYS 211, 261, 264, 361, 381, 481; SOILS 210, 440.
(2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
(3) Recommended Arts options include any EAS X9X courses or any HGP courses.
(4) Credit in Science 100 will be considered equivalent to CMPUT 174, EAS 100, MATH 113, 115, PHYS 144, 146, and ★9 Science options equivalent to CHEM 101, 102, and EAS 105, for students entering Atmospheric Science Honors.

193.7.2 Specialization in Atmospheric Sciences

Continuation in the Specialization in Atmospheric Sciences program requires successful completion of at least ★18 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★60 credited to the degree.
A student enrolling in the Specialization program should confer with the Atmospheric Sciences program student advisor before registration each year.

Year 1
CMPUT 101 or 114 or 174
EAS 100
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRs
MATH 113 or 11A, 115 and 129
PHYS 144 and 146
STAT 141 or 151

Year 2
EAS 212, 221, and 270
EAS 294 or HGP 250
MATH 214 and 215
PHYS 244 and 281
★3 in an Arts option
★3 in a Science option

Year 3
EAS 327, 370, 371, 372 and 373
PHYS 234
★6 in Arts options
★6 in Science options (see Note below)

Year 4
EAS 470, 471 and 475
★21 in Science options

Notes
(1) Science options include but are not limited to CHEM 101, 102, 211, 213, 261, 263, 303; CMPUT 201, 204, 301, 304, 306, 340; EAS 105, 202, 208, 225, 250, 324, 325, 326, 352, 427, 451, 453, 454, 455, 457; ENCS 360; FOR 340, 372; GEOPH 210, 429; MATH 201, 334, 337, 372; PHYS 211, 261, 264, 361, 381, 481; SOILS 210, 440.
(2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
(3) Recommended Arts options include any EAS X9X courses or any HGP courses.
(4) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, and PHYS 144, 146 for students entering Environmental Earth Science Honors.

193.7.3 Honors in Environmental Earth Sciences

Environmental Earth Science is the study of interactions between humans and Earth’s natural environment. It encompasses the influence of human activities on the local and global environment, as well as how our actions are shaped and controlled by the geologic and geomorphic processes occurring around us. Environmental Earth Scientists are typically employed by consulting companies, large resource and industrial firms, and government organizations.
Continuation in the Honors in Environmental Earth Sciences program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★60 credited to the degree.
A student enrolling in the Honors program should confer with the Environmental Earth Sciences Program student advisor before registration each year.

Year 1
CHEM 101 and 102
EAS 100 and 105
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRs
MATH 113 or 114 and 115
PHYS 124 and 126 or PHYS 144 and 146

Year 2
BIOL 108
EAS 221, 222, 224, 225, 233, 234, and either 212 or 270
EAS 294 or HGP 250
STAT 141 or 151

Year 3
BIOL 208
EAS 250, 320, 323, 324 and 354
★6 of EAS 327 or 351 or 451
GEOPH 223
★3 Arts option

Year 4
EAS 425 or 468
EAS 426
★6 of EAS 457 or 458
★6 Arts options
★9 Science and related options

Notes
(1) EAS 458 may be taken more than once for credit. Science and related options require the approval of the Environmental Earth Sciences advisor.
(2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
(3) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, and PHYS 144, 146 for students entering Environmental Earth Science Honors.

193.7.4 Specialization in Environmental Earth Sciences

Continuation in the Specialization in Environmental Earth Sciences program requires successful completion of at least ★18 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★60 credited to the degree.
A student enrolling in the Specialization program should confer with the Environmental Earth Sciences Program student advisor before registration.

Year 1
CHEM 101 and 102
EAS 100 and 105
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRs
MATH 113 or 114 and 115
PHYS 124 and 126 or PHYS 144 and 146

Year 2
BIOL 108
EAS 221, 222, 224, 225, 233, 234, and either 212 or 270
EAS 294 or HGP 250
STAT 141 or 151

Year 3
BIOL 208
EAS 250, 320, 323, 324 and 354
★6 of EAS 327 or 351 or 451
GEOPH 223
★3 Arts option

Year 4
EAS 425 or 468
★6 of EAS 457 or 458
★6 Arts options
★9 Science and related options

Notes
(1) EAS 458 may be taken more than once for credit. Science and related options require the approval of the Environmental Earth Sciences advisor.
(2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
(3) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, and PHYS 144, 146 for students entering Environmental Earth Science Specialization.

193.7.5 Honors in Geology

Geology is the study of the planet Earth—the materials it is made of, the processes which affect these materials, and the origin and evolution of...
life. Geologists are employed by companies engaged in exploration for and production of minerals and fuels, by government agencies, by companies engaged in engineering and environmental projects, and by universities.

Continuation in the Honors in Geology program requires successful completion of at least 24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last 60 credited to the degree.

A student enrolling in the Honors program should consult the Geology program student advisor before registration each year.

**Year 1**

- **CHEM 101 and 102**
- **EAS 100 and 105**
  - 6 junior ENGL or 3 junior ENGL and 3 junior WRS
  - MATH 113 or 114 and 115
  - PHYS 124 and 126 or PHYS 144 and 146

**Notes**

- (1) Recommended Arts options include any EAS X9X courses or any HGP courses.
- (2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
- (3) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, PHYS 144 and 146, for students entering Geology Specialization.

### 193.7.7 Honors and Specialization in Paleontology

See §193.14, Paleontology, for details on the Honors and Specialization Paleontology programs.

### 193.7.8 Specialization in Planning

The Planning program educates students in the scientific, aesthetic, and orderly disposition of land, resources, facilities and services with a view to securing the physical, economic and social efficiency, health and well-being of communities. Planners work for all levels of government and in professional planning consultancies.

The Department of Earth and Atmospheric Sciences offers a BA major in Planning and a BSc Specialization in Planning. Students interested in focusing on natural science elements of planning, including environmental management and the use of geographic information sciences, should consider the BSc program and those interested in the aesthetic, economic, and social issues of planning should consider the BA program (see §44.24 of the Calendar).

Continuation in the Specialization in Planning program requires a minimum 2.3 GPA on at least 18 in the previous Fall/Winter. To graduate in four years, a student needs 30 per year.

Graduation requires a minimum 2.3 GPA on the last 60 credited to the degree. A student enrolling in the Specialization program should confer with the Planning program student advisor before registration.

**Year 1**

- **BIOL 108**
- **EAS 100 and 105**
  - 6 junior ENGL/WRS
  - HGP 100
  - MATH 113 or 114 or 120
  - STAT 141 or 151
  - 3 Junior Arts option
  - 3 Science options

**Year 2**

- **EAS 204, 205, 270, 354; HGP 252, 341, 342, 343, 443, 450, 452, 470, 485, 497**

**Notes**

- (1) Recommended Arts options include any EAS X9X courses or any HGP courses.
- (2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
- (3) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, PHYS 144 and 146, for students entering Geology Honors.

### 193.7.6 Specialization in Geology

Continuation in the Specialization in Geology program requires successful completion of at least 18 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last 60 credited to the degree.

A student enrolling in the Specialization program should consult the Geology program student advisor before registration each year.

**Year 1**

- **CHEM 101 and 102**
- **EAS 100 and 105**
  - 6 junior ENGL or 3 junior ENGL and 3 junior WRS
  - MATH 113 or 114 and 115
  - PHYS 124 and 126 or PHYS 144 and 146

**Notes**

- (1) Recommended Arts options include any EAS X9X courses or any HGP courses.
- (2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
- (3) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, PHYS 144 and 146, for students entering Geology Honors.

**Year 2**

- **EAS 221, 222, 224, 225, 230, 232, 233 and 234**
  - 3 Arts option
  - 3 Science option

**Notes**

- (1) Recommended Arts options include any EAS X9X courses or any HGP courses.
- (2) For students in the Industrial Internship Program: EAS 401, WKEXP 955, 956.
- (3) Credit in Science 100 will be considered equivalent to BIOL 108, CHEM 101, 102, EAS 100, 105, MATH 113, 115, PHYS 144 and 146, for students entering Geology Specialization.

### 193.7.9 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Earth and Atmospheric Sciences (see §193.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May,
September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 955 and 956 plus EAS 401. EAS 401 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in EAS 401 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in EAS 401.

Interested students should see the Industrial Internship Advisor in the Department of Earth and Atmospheric Sciences for more information.

193.7.10 Professional Registration

Graduates of EAS programs may qualify for registration as professional geologists (P. Geol.). The practice of geology in Alberta is governed by provincial law in the interest of public protection against unskilled practice. The right to practice independently (meaning that you are legally able to accept responsibility for your work and sign for it), and the right to use the title of professional geologist (P. Geol.), are restricted to individuals registered by the Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA). Members of the PS Warren student society are automatically student members of APEGGA and as such are introduced to the professional association.

Individuals who are planning to meet the knowledge requirements for P. Geol. while also completing their degree at the University of Alberta should plan their program course selection carefully. Attention is drawn in particular to the science subject requirements, additional to calculus, physics and chemistry. APEGGA verifies that specific knowledge requirements are met, by reviewing academic credentials course-by-course. Holders of degrees that do not cover the APEGGA syllabus may be assessed examinations in missing subjects by the APEGGA Board of Examiners before being accepted for registration. Current syllabus and registration information is available at the Departmental Office or from APEGGA. Full information is available at www.apegga.com/

Specific questions about programs of study or individual courses applicable to professional registration can also be directed to the Departmental APEGGA Liaison.

193.8 Geophysics

The Department of Physics offers two programs dealing with solid earth physics. The Honors in Geophysics program (see §193.16.5) prepares students for graduate work in geophysics. The Specialization in Geophysics program prepares students with the conceptual and laboratory background required for employment at the BSc level in industry, government and technical schools. Also see §193.16 (Physics).

193.8.1 Professional Association

The practice of geophysics in Alberta is regulated by the Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA).

The right to practise geophysics in Alberta and accept professional responsibility for such work as well as the right to use the geophysicist title is limited to those registered with APEGGA. Members of the Geophysics Student Society are automatically student members of APEGGA. Graduates are encouraged to join APEGGA as Geophysicists-in-training. Acceptable experience following graduation is necessary for registration as a Professional Geophysicist, the APEGGA membership category which confers the right to accept responsibility for geophysical work. Contact the APEGGA office for more information.

193.9 Immunology and Infection

193.9.1 Honors in Immunology and Infection

Continuation in the Honors in Immunology and Infection program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★60 credited to the degree.

Year 1

- BIOL 107, 108
- CHEM 101, 102, 261 (164)
- ★3 in MATH 113, 114 or 125
- STAT 141 or 151
- ★3 Approved Option
- ★6 Arts options (junior level ENGL or junior WRS recommended)

Year 2

- BIOCH 200
- BIOL 201, 207, 208
- CHEM 263
- IMIN 200
- MICRB 265
- ★6 Arts options
- ★3 Approved Option (GENET 270 highly recommended, see Note 1)

Years 3 and 4

- ★3 from BIOCH 430, GENET 304 or MICRB 316
- ★3 from BIOL 391, IMIN 391 or MMI 391
- IMIN 324, 371, 452
- MMI 351
- ZOOL 241 and 242; or PHYSL 210; or PHYSL 212 and 214
- ZOOL 352
- BIO 499 or MMI 499
- ★6 Arts options
- ★9 from the List below (see Note 2)
- ★12 in approved options from the List below or approved by the Departmental Advisor

List

- BIOCH 320, 330, 430, 450
- CELL 300
- ENT 378
- GENET 270, 304
- IMIN 372, 401, 405, 410
- MICRB 316, 470
- MMI 352, 405, 415, 426, 427
- ZOOL 35A, 452

Notes

(1) GENET 270 is the prerequisite for: GENET 304, MICRB 316
(2) At least ★3 must be in a course with a laboratory component.
(3) Normally only ★12 are allowed outside the Faculties of Science and Arts in the entire program. See §194 for courses outside the Faculty of Science that will be considered as Science options
(4) Credit in Science 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 164; MATH 114 and ★9 approved options.

193.9.2 Specialization in Immunology and Infection

Continuation in the Specialization in Immunology and Infection program requires successful completion of at least ★24 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on all courses credited to the degree.

Year 1

- BIOL 107, 108
- CHEM 101, 102
- CHEM 164 or 261
- MATH 113 or 114 or 125
- STAT 141 or 151
- ★3 Approved Option
- ★6 Arts options (junior level ENGL or junior WRS recommended)

Year 2

- BIOCH 200
- BIOL 201
- BIOL 207, 208
- CHEM 263
- IMIN 200
- MICRB 265
- ★3 Approved Option (GENET 270 highly recommended, see Note 1)
- ★6 Arts options

Years 3 and 4

- ZOOL 241 and 242 or PHYSL 210 or 212 and 214
- One of: BIOCH 430; GENET 304; MICRB 316
- IMIN 324, 371, 452
- MMI 351
- ZOOL 352
- ★6 Arts options
- ★9 from the List below (see Note 2)
- ★21 in approved options from the List below or options approved by an advisor (see Note 3)
193.10 Marine Science

Excellent opportunities for the study of marine biology and related subjects exist at Bamfield Marine Sciences Centre (BMSC) on Vancouver Island, BC. An academic program operates at the station, with summer and fall programs providing credit toward degrees in Science.

Prerequisite for all the MA SC courses is consent of the Department of Biological Sciences.

Students are expected to take a full course load of ★15 during the Fall Term. Courses run Monday to Saturday.

In addition to tuition paid to the University there are room and board fees payable to BMSC. Information concerning course prerequisites and application procedures for Marine Science may be obtained from BMSC, the Department of Biological Sciences or the Office of the Dean of Science. Permission to register in these courses is available from the University Programs Coordinator of the Bamfield Marine Sciences Centre, to whom application should be made. See BMSC website bms.bc.ca/university.html.

See §231 Course Listings for descriptions of available Marine Science courses.

See also BMSC website bms.bc.ca/university.html for courses offered in the current year.

193.11 Mathematics

193.11.1 Honors in Mathematics

Continuation in the Honors in Mathematics program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. Graduation requires the successful completion of at least ★24 with a minimum 3.0 GPA in each Fall/Winter.

Year 1

MATH 117, 118, 127, 227
★6 in an approved Science option
★6 in approved Arts options
★6 in approved options

Year 2

MATH 217, 317, 328, either 326 or 334
★6 in approved Science options
★6 in approved Arts options
★6 in approved options

Years 3 and 4

★30 in MATH courses including MATH 325 or 424, 326, 334, 411, 417, 418, 446 or 448, 447, 496
★6 in approved Science options including ★3 in CMPUT or STAT
★6 in approved Arts options
★18 in approved options

Notes

(1) Several of the required courses, including MATH 496 are only offered in alternate years.
(2) MATH 496 should be taken in third year.
(3) ECON 299, 386 or 387 may not be used for credit in any Honors degree offered by the Department of Mathematical and Statistical Sciences.
(4) SCI 100 will be considered equivalent to MATH 114, 115, CMPUT 174 and ★18 Science options.

Honors in Applied Mathematics

Continuation in the Honors in Applied Mathematics program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. Graduation requires the successful completion of at least ★24 with a minimum 3.0 GPA in each Fall/Winter.

Year 1

MATH 117, 118, 127, 227
★6 in an approved Science options
★6 in approved Arts options
★6 in approved options

Year 2

MATH 217, 317, 325 or 328, 334
★6 in approved Science options
★6 in approved Arts options
★6 in approved options

Years 3 and 4

★21 in Mathematics including MATH 337, 381, 411, 417, 436, 496
★6 in approved options at the 300-level in the field of application
★3 in an approved 300- or 400-level MATH or MA PH
★3 in CMPUT or STAT option
★6 in approved Science options
★6 in approved Arts options
★12 in approved Science options

Notes

(1) Several of the required courses, including MATH 496 are only offered in alternate years.
(2) MATH 496 should normally be taken in third year.
(3) ECON 299, 386 or 387 may not be used for credit in any Honors degree offered by the Department of Mathematical and Statistical Sciences.
(4) SCI 100 will be considered equivalent to MATH 114, 115 and ★21 Science options.

Minor in Statistics

The degrees Honors in Mathematics and Honors in Applied Mathematics can each be obtained with a minor in Statistics if the student's program includes STAT 265, 266, 312, 372, 471, and two of STAT 368, 441, 472, 479.

Minor in Computing Science

The degrees Honors in Mathematics and Honors in Applied Mathematics can each be obtained with a minor in Computing Science. The student's program must include CMPUT 114 and 115 or 174 and 175, 201, 204, 272, 291, 304, 328 and at least an additional ★3 in Computing Science at the 300- or 400-level.

The Department also offers a BA Honors in Mathematics (see §44.18.1).

Honors in Mathematical Physics

See §193.16.7 for details.

Honors in Statistics

See §193.19.1 for details.

193.11.2 Specialization in Mathematics

Continuation in the Specialization in Mathematics program requires successful completion of at least ★24 with a minimum 2.3 GPA and a minimum 2.3 GPA on all MATH courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA and a minimum 2.3 GPA on all MATH courses taken in the last Fall/Winter of the degree, as well as a minimum 2.3 GPA on all MATH courses credited towards the degree and a minimum 2.3 GPA on all MATH courses credited towards the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

Year 1

MATH 114, 115
MATH 125
CMPUT 101 and 114, or 114 and 115, or 174 and 175
★6 in junior ENGL
★3 in a Science option
★6 in options

Year 2

MATH 214, 215
MATH 225
MATH 229
★3 in a MATH option
★3 in a Science option
★6 in Arts options
★6 in options
Year 3
MATH 314, 414
★6 in MATH options
★6 in Science options
★6 in Arts options
★6 in options

Notes
(1) Each student's program must have the approval of the Department of Mathematical and Statistical Sciences.
(2) Recommended MATH options include MATH 322, 325, 334, 337, 373, 411, 417, 421, 422, 481.
(3) Recommended MATH options include MATH 301, 304, 313, 325, 379, 391, 401, 411.
(4) STAT 265/366 can be substituted for STAT 221, 222.
(5) Each student’s program must have the approval of the Department of Mathematical and Statistical Sciences.
(6) Credit will not be given for ECON 299, 386 or 387.
(7) Credit in SCI 100 will be considered equivalent to MATH 114, 115; CMPUT 174 and ★18 Science options.

193.11.3 Specialization in Computational Science (Mathematics)

Continuation in the Specialization in Computational Science (Mathematics) program requires success completion of at least ★24 with a minimum 2.3 GPA and a minimum 2.3 GPA on all CMPUT, MATH and STAT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA and a minimum 2.3 GPA on all CMPUT, MATH and STAT courses taken in the last Fall/Winter of the degree, as well as a minimum 2.3 GPA on all courses credited towards the degree and a minimum 2.3 GPA on all CMPUT, MATH and STAT courses credited towards the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

Year 1
CMPUT 114, 115, or 174 and 175
MATH 114 and 115, or 117 and 118
MATH 125
★6 in a junior ENGL
★9 in options

Year 2
CMPUT 201, 204, 272
MATH 214 and 215, or 217 and 317
MATH 222, 225
★6 in Arts

Year 3
CMPUT 229, 291
MATH 228, 381
STAT 222
★3 in MATH or STAT
★3 in Arts
★9 in options

Year 4
★6 in CMPUT at 300-level or higher
★6 in MATH or STAT at 300-level or higher
★3 in an option at 300-level or higher
★3 in Arts
★12 in options

Notes
(1) Each program must contain at least ★72 in Science and ★18 in Arts.
(2) Recommended MATH options include MATH 314, 322, 324, 325, 334, 337, 373, 414, 421, 422, 481.
(3) Recommended MATH options include MATH 301, 304, 313, 325, 379, 391, 401, 411.
(4) Recommended STAT options include STAT 368, 378, 466, 471, 479.
(5) STAT 265/366 can be substituted for STAT 221, 222.
(6) Each student’s program must have the approval of the Department of Mathematical and Statistical Sciences.
(7) Credit will not be given for ECON 299, 386 or 387.
(8) Credit in SCI 100 will be considered equivalent to CMPUT 174; MATH 114, 115 and ★18 options.

193.11.4 Mathematics and Economics

The Faculty of Science offers an Honors degree and a Specialization degree in Mathematics and Economics.

Honors in Mathematics and Economics

Continuation in the Honors in Mathematics and Economics program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. Graduation requires the successful completion of at least ★24 with a minimum 3.0 GPA in each Fall/Winter.

Year 1
ECON 101, 102
MATH 117, 118, 127, 227
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS
★6 in approved Science options

Year 2
ECON 281, 282
MATH 217, 317, 325 or 326 or 328
STAT 205, 206
★3 in approved Science options
★6 in approved options

Years 3 and 4
ECON 384, 385, 399, 481, 482, 497
★6 in Economics options
★12 from MATH 334, 373, 381, 411, 417, 421, 422, 481
★12 in MATH or STAT courses
★6 in approved Science options
★6 in approved options

Notes
(1) Credit is not granted for ECON 299, 386 or 387.
(2) Credit in SCI 100 will be considered equivalent to MATH 114, 115, ★15 Science options and ★6 approved options.

Specialization in Mathematics and Economics

Continuation in the Specialization in Mathematics and Economics program requires successful completion of at least ★24 with a minimum 2.3 GPA and a minimum 2.3 GPA on all ECON, MATH and STAT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA and a minimum 2.3 GPA on all ECON, MATH and STAT courses taken in the last Fall/Winter of the degree, as well as a minimum 2.3 GPA on all courses credited towards the degree and a minimum 2.3 GPA on all ECON, MATH and STAT courses credited towards the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

Year 1
ECON 101, 102
MATH 114, 115, 125
STAT 151
★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS
★3 in a Science option
★3 in an option

Year 2
ECON 281, 282
MATH 214, 215, 225
STAT 205, 206
★6 in Science options
★3 in an option

Years 3 and 4
★24 in ECON including ECON 399
★18 in MATH or STAT options
★3 in a Science option
★15 in options

Notes
(1) Each student’s program must have the approval of the Department of Mathematical and Statistical Sciences and must include
a. at least ★6 in Science
b. at least ★4 in MATH and STAT with at least ★12 of these at the 300-level or higher
c. CMPUT 101 and 114, or 114 and 115, or 174 and 175
d. at least ★36 in ECON, including ★12 chosen from ECON 384, 385, 399, or courses at the 400-level or higher.
(2) Credit will not be given for ECON 299, 386, or 387.
(3) Students who are considering graduate work in Economics should take ECON 497.
(4) A student must take at least ★6 in ECON, MATH, or STAT in each Fall/Winter of the program.
A corresponding Honors MATH course can be substituted for any MATH course listed. For example, MATH 117 can be substituted for MATH 114.

Students interested in taking non-junior CMPUT courses as options in subsequent years should note that CMPUT 115 or 175 is a prerequisite for most non-junior CMPUT courses.

Credit in SCI 100 will be considered equivalent to MATH 114, 115; CMPUT 174, ★12 Science options and ★6 options.

193.11.5 Specialization in Mathematics and Finance

Continuation in the Specialization in Mathematics and Finance program requires successful completion of at least ★4 with a minimum 2.3 GPA and a minimum 2.3 GPA on all ACCTG, ECON, FIN, MATH, MGTSC and STAT courses completed in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA and a minimum 2.3 GPA on all ACCTG, ECON, FIN, MATH, MGTSC and STAT courses taken in the last Fall/Winter of the degree, as well as a minimum 2.3 GPA on all courses credited towards the degree and a minimum 2.3 GPA on all ECON, FIN, MATH, MGTSC and STAT courses credited towards the degree.

The program must contain the following courses. It is recommended that these courses be taken in the years indicated.

**Year 1**

- CMPUT 101 and 114, or 114 and 115, or 174 and 175
- ECON 101, 102
- MATH 114, 115, 125
- STAT 151
- ★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS

**Notes**

1. Each student’s program must have the approval of the Department of Mathematical and Statistical Sciences and must include
   a. ★18 in Arts courses
   b. ★63 in Science courses
   c. ★33 in ACCTG, ECON, FIN, or MGTSC, including ★9 in 400-level FIN

2. Approved ACCTG, ECON, FIN and MGTSC options include ACCTG 322, 412, 432, 443, 444, ECON 282, 283, 385, 399, 408, 481, 482; FIN 412, 413, 414, 416, 422, 434, 442; MGTSC 404, 405. Credit will not be given for ECON 299, 396 or 387.

3. Recommended Science options include: MATH 334, 337, 381, 432, 481; STAT 354, 465, 471, 472, 479.

4. A corresponding Honors MATH course can be substituted for any MATH course listed. For example, MATH 117 can be substituted for MATH 114.

5. Students interested in taking non-junior CMPUT courses as options in subsequent years should note that CMPUT 115 or 175 is a prerequisite for most non-junior CMPUT courses.

6. Credit in SCI 100 will be considered equivalent to CMPUT 174; MATH 114, 115 and ★18 options.

193.11.6 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Mathematical and Statistical Sciences (see §193.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May, September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 955 and 956 plus MATH or STAT 400. MATH or STAT 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in MATH or STAT 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in MATH or STAT 400. Neither MATH 400 nor STAT 400 can be used for credit toward a Specialization or Honors degree offered by the Department of Mathematical and Statistical Sciences.

Interested students should see the Industrial Internship Advisor in the Department of Mathematical and Statistical Sciences for more information.

193.12 Neuroscience

193.12.1 Honors in Neuroscience

The Honors program in Neuroscience is an interdisciplinary program coordinated by the Centre for Neuroscience and administered by the Faculty of Science. This program is for students planning a career in Neuroscience. For admission to the Honors in Neuroscience program see Admission Chart 5, §15.15.

Neuroscience is a broadly based discipline covering all aspects of brain function. Some major areas are brain development, nerve cells and synapses, sensation and perception, learning and memory, control of movement, animal behavior, cognitive psychology, and disorders of the nervous system.

The Honors program introduces the major areas of Neuroscience and allows students to explore topics of interest in their final year.

Continuation in the Honors in Neuroscience program requires successful completion of ★30 with a minimum 3.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.3 GPA on the last ★60 credited to the degree.

A full course load of ★30 per academic year must be maintained throughout each year of the Honors program. Courses cannot be deferred to the Spring/Summer Terms without prior permission of the program coordinator.

**Year 1**

- BIOL 107
- CHEM 101, 261
- ★6 junior ENGL or ★3 junior ENGL and ★3 junior WRS
- MATH 113 or 114
- MATH 113 or STAT 141 or 151
- PHYS 129, 128
- PSYCO 104

**Year 2**

- BIOL 200
- BIOL 207
- CHEM 263
- NEURO 210
- PHYS 212, 214 (Students must be manually enrolled in both courses by the Department of Physiology. Registration via Bear Tracks is not possible.)
- PSYCO 275
  - ★5 in Science options
  - ★5 in Arts options

**Year 3**

- NEURO 375 or PSYCO 475
- PMCOL 371
- PHYS 372
- One of PSYCO 371, 375, 377; GENET 270, 390; ZOOL 342, 344
- ★12 in approved Science options
- ★6 in Arts options

**Year 4**

- NEURO 450
- NEURO 451 and/or 452
  - ★6 chosen from the following courses covering topics in Cellular and Molecular Neuroscience: NEURO 410; PHYS 444; PMCOL 412; PSYCO 478
  - ★6 chosen from the following courses covering topics in Systems and Cognitive Neuroscience: NEURO 443, 472, 498; PSYCI 511.
★6 (if NEURO 451 and 452 are both taken) or ★9 (if one of NEURO 451 or 452 is taken)
of Science options chosen from the following: PMCOL 512; PHYSL 401, 403, 405, 527; ZOOL 442. Other choices require approval of the Centre for Neuroscience. ★3 in Arts options

Notes
(1) Each student’s program must include:
   a. a minimum of ★18 in Arts courses;
   b. a minimum of ★90 in Science courses;
   c. no more than ★12 in Outside (non-Science, non-Arts) courses;
   d. no more than ★62 at the junior level.
(2) Each student’s program must have the approval of the Centre for Neuroscience.
(3) Approved Science options in Years 1–3 may be chosen from the following: BIOCH 310, 320, 330, 410, 430; BIOL 168, 201, 315, 380; CELL 300, 301, 402, 415, 445; CHEM 102, 211, 213, 313; CMPUT 114, 115, 174, 175, 201, 204, 299, 329, 366; EAS 100, 105, 201, 207, 230; ENT 220, 321; GENET 270, 275, 301, 302, 304, 392; IMIN 200, 371, 452; MATH 214; MICRB 265, 311; PMCOL 201, 305, 343, 344, 415; PHYS 208, 211, 234, 281; PHYSL 401, 402, 403, 404; PSYCO 267, 281, 351, 365, 371, 372, 375, 377, 381, 385, 458, 485; STAT 221, 222, 252, 253, ZOOL 342, 343, 344, 370.
(4) Suggested Arts options include the following: ANTHR 230, 332; CLASS 110, 254, 255, C LIT 342; HIST 391, 396, 397, 398, 399; PHIL 205, 217, 265, 317, 366, 375, 386; PSYCO 105, 106, 233, 258, 339, 350, 357; WRITE 298. Any course from ENGL, FREN, GER, ITAL, JAPAN, SPAN, RUSS.
(5) Courses in faculties outside of the Faculties of Science and Arts that may be used as approved Outside (non-Science, non-Arts) options include: ANAT 200, 400; LABMP 400, POTHER 567. All other Outside options require prior approval by the Centre of Neuroscience.
(6) In the fourth year, all students must successfully complete an individual study program with members of the Centre for Neuroscience. This program consists of a reading course, NEURO 450, and a laboratory course, NEURO 451/452. Students must consult the Centre for Neuroscience before the beginning of their fourth year to arrange an individual study program.
(7) Credit in SCI 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 164; MATH 114, 115; PHYS 144, 146; PSYCO 104.

193.13 Northern Studies

Students interested in Canada’s North and especially those planning a career in northern Canada should include within their curriculum some of the following: ANTHR 246, 340, 355, 445, and 446; BIOL 366; CANST 302 and 408; EAS 453 and 455; ENCS 201; INT D 443; POL S 454. Other choices require approval of the Centre of Neuroscience.

Notes
(1) PALEO 414 is offered in alternate years but must be taken in Year 3 or 4. Approved Science options: BIOL 315, 361, 364; EAS 207, 220, 250, 460, 462, 465; ENT 220; ZOOL 405, 406, 407, 408, 427. Approved Arts options: ANTHR 391; CHRTC 350, 451; PHIL 265, 317. For information regarding additional approved options, please consult your Department advisor.
(2) Credit in Science 100 will be considered equivalent to BIOL 107, 108, CHEM 101, EAS 100, 105, MATH 113, 115, PHYS 144 and 146, for students entering Paleontology Honors.

193.14 Paleontology

Paleontology is a basic science concerned with the evolutionary history of life. Students are required to have a broad knowledge base of biological and geological knowledge. Areas of detailed knowledge will include vertebrate and invertebrate paleobiology, paleobotany, evolutionary biology, systematics, functional morphology, sedimentology, stratigraphy, and plate tectonics. Paleontologists usually hold advanced research degrees and work as research scientists and teachers in universities, museums, and industrial laboratories.

193.14.1 Honors in Paleontology

The Honors program is administered by the Departments of Earth and Atmospheric Sciences and Biological Sciences. The curriculum is drawn from both departments enabling students to develop a broad knowledge base that will prepare them for later entry into more specialized postgraduate studies in their selected paleontological discipline. Interested students should consult with an Honors program advisor to prepare their programs.

Continuation in the Honors in Paleontology program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★80 credited to the degree.

Notes
(1) PALEO 414 is offered in alternate years but must be taken in Year 3 or 4. Approved Science options: BIOL 315, 361, 364; EAS 207, 220, 250, 460, 462, 465; ENT 220; ZOOL 405, 406, 407, 408, 427. Approved Arts options: ANTHR 391; CHRTC 350, 451; PHIL 265, 317. For information regarding additional approved options, please consult your Department advisor.
(2) Credit in Science 100 will be considered equivalent to BIOL 107, 108, CHEM 101, EAS 100, 105, MATH 113, 115, PHYS 144 and 146, for students entering Paleontology Specialization.
193.15 Pharmacology

193.15.1 Honors in Pharmacology

The program leading to an Honors degree in Pharmacology prepares students for advanced study leading to academic or research careers. Continuation and graduation in the Honors in Pharmacology program requires successful completion of 6 in approved options, 3 in Science options as indicated in Year 1, BIOCH 320, 330, PHYSL 210 or 211, CHEM 211, 213, 263, BIOCH 200.

Year 2

BIOCH 200
CHEM 211, 213, 263
PHYS 210 or 211
PMCOL 201, 202
★6 in Arts options

Year 3

PMCOL 303, 305, 343, 344
BIOCH 320, 330
★3 in Science options as indicated in Year 1
★3 in Arts options
★6 in approved options

Year 4

PMCOL 337, 498
★3 in approved options
★3 in Science option as indicated in Year 1
★15 from PMCOL 401, 402, 412, 415, 416, 425, 442, 450, 475

Notes
1. Students must consult the Chair of the Department or designee for approval of the selection of options. Students will not be permitted to take 400-level pharmacology courses unless all prerequisites have been met.
2. Credit in SCI 100 will be considered equivalent to BIOL 107, 108, CHEM 101, 102, 164 or 261.

193.15.2 Specialization in Pharmacology

The program leading to a Specialization degree in Pharmacology is for students who want to pursue further studies in the health sciences and those who want to prepare for a career in the Pharmaceutical industry. Although not as rigorous as an Honors program, the Specialization program is a solid background for advanced study leading to a career in academia or research.

Continuation and graduation in the Specialization in Pharmacology program requires successful completion of at least 6 in approved options, 3 in Science options as indicated in Year 1, BIOCH 320, 330.

Year 1

BIOCH 107, 108
CHEM 101, 102, 164 or 261
★6 in Arts options ENGL recommended
STAT 141 or 151
★6 in Science options from BIOCH, BIOL, CHEM, GENET, MATH, MICROB, PHYS, PHYSL, PMCOL, STAT or ZOOL

Year 2

BIOCH 200
CHEM 211, 213, 263
PHYS 210 or 211
PMCOL 201, 202
★6 in Arts options

Year 3

PMCOL 303, 305, 343, 344
BIOCH 320, 330
★3 in Science options as indicated in Year 1
★3 in Arts options
★6 in approved options

Year 4

PMCOL 337
★15 from PMCOL 401, 402, 412, 415, 416, 425, 442, 450, 475
★3 in Science options as indicated in Year 1
★3 in Arts options
★6 in approved options

Notes
1. Students must consult the Chair of the Department or designee for approval of the selection of options. Students will not be permitted to take 400-level pharmacology courses unless all prerequisites have been met.
2. Credit in SCI 100 will be considered equivalent to BIOL 107, 108, CHEM 101, 102, 164; MATH 113, or 114 and 115, PHYS 372, 401, 402, 403, 404, PMCOL 371, STAT 252.

193.16 Physics

The Honors Programs offered by the Department of Physics provide a comprehensive education for students planning advanced degrees and a research or academic career.

Notes
1. Students interested in the Engineering-Physics program should consult §82.8 of the Faculty of Engineering section.
2. Honors and Specialization Physics students must consult an advisor in the Department of Physics regarding their programs. Note to second-, third-, and fourth-year students: Not all 200-, 300- and 400-level Physics and Geophysics courses are offered every year.

193.16.1 Honors in Physics

Continuation in the Honors in Physics program requires successful completion of at least 24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last 90 credited to the degree.

Notes
1. By the end of their programs, students must have taken 18 of Arts options.
2. PH Pool A options: All 400-level ASTRO; PHYS 415, 485, 495.
3. PH Pool B options: MA PH 451; all 400-level MATH; PHYS 458, 467.
4. PH Pool options: ASTRO 320, 322; EAS 370, 371, 373; all 300- and 400-level GEOPH; all 400-level PHYS; all courses in Pool A and Pool B. Other courses may be taken by prior consent of the Department of Physics.
5. Credit in SCI 100 will be considered equivalent to MATH 114, 115; PHYS 144, 146 and ★6 Science options.

Year 1

MATH 113 (or 114, or 117), 115 (or 118)
PHYS 125 (or 127), 225 (or 227)
PHYS 144, 146
★6 in Science options
★6 in an Arts options (see Note 1 above)

Year 2

MATH 214 (or 217), 215 (or 317)
PHYS 234, 244, 271, 281, 295, 297
★6 in an Arts option (see Note 1 above)

Year 3

MATH 311 (or 411), 334, 337
PHYS 310, 311, 362, 372, 381, 397
★3 in an Arts option (see Note 1)

Year 4

MA PH 343
PHYS 472, 481, 489
★3 in PH Pool A options (see Note 2)
★3 in PH Pool B options (see Note 3)
★6 in PH Pool options (see Note 4)
★6 in an Arts option (see Note 1)

193.16.2 Specialization in Physics

Continuation in the Specialization in Physics program requires successful completion of at least 24 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last 90 credited to the degree.
Notes

(1) By the end of their programs, students must have taken ★18 of Arts options.
(2) PS Senior Science options: Any 200- or higher level course offered by the Faculty of Science.
(3) PS Pool A: PHYS 301, 362, 364, all 300- and 400-level ASTRO, GEOPH, MA PH, and MATH courses; all 400-level PHYS courses. Other courses may be taken with prior consent of Department.
(4) PS Pool B: all 400-level ASTRO, GEOPH, MA PH, and PHYS. Other courses may be taken with prior consent of Department.
(5) Credit in SCI 100 is considered equivalent to MATH 114, 115; PHYS 144, 146 and ★6 Science options

193.16.3 Honors in Astrophysics

Continuation in the Honors in Astrophysics program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★90 credited to the degree.

Notes

(1) Students must take a total of ★18 in Arts options.
(2) AH Pool: EAS 370, 371, 373; all 300-level GEOPH courses; PHYS 397; MA PH 451; all 400-level ASTRO, GEOPH, PHYS, and MATH courses. Other courses may be taken with prior consent of Department.
(3) Credit in SCI 100 will be considered equivalent to MATH 114, 115; PHYS 144 and 146 and ★6 Science options

Year 1
MATH 113 (or 114 or 117), 115 (or 118), 125 (or 127), 225 (or 227)
★6 in Science options
★6 in Arts options (see Note 1 above)

Year 2
MATH 214 (or 217), 215 (or 317)
PHYS 234, 244, 271, 281, 295, 297
★6 in an Arts option (see Note 1 above)

Year 3
MATH 334, 337
PHYS 310, 311, 372, 381, 397
★3 in Arts options (see Note 1)
★3 in PS Senior Science option (see Note 2)
★3 in PS Pool A option (see Note 3)

(1) Students must take a total of ★18 in Arts options.
(2) AS Senior Science options: Any 200-, 300-, or 400-level course offered by the Faculty of Science.
(3) AS Pool options: PHYS 301, 362, 364, 397; all 300- and 400-level GEOPH, MA PH, MATH, and PHYS courses; all 400- level ASTRO courses. Other courses may be taken with prior consent of Department.
(4) Credit in SCI 100 is considered equivalent to MATH 114, 115; PHYS 144, 146 and ★6 Science options

Year 1
MATH 113 (or 114 or 117), 115 (or 118), 125 (or 127), 225 (or 227)
PHYS 144, 146
★6 in Science options (recommended options are ASTRO 120 and 122)
★6 in Arts options

Year 2
ASTRO 320
MATH 214 (or 217), 215 (or 317)
PHYS 234, 244, 271, 281, 295, 297
★3 in Arts options

Year 3
ASTRO 322
MATH 334, 337
PHYS 310, 311, 372, 381
★3 in Arts option

★6 from ASTRO 429, 430, 465
MA PH 434
PHYS 458, 472, 481, 499
★3 in AH Pool option (see Note 2)
★6 in Arts options

193.16.4 Specialization in Astrophysics

Continuation in the Specialization in Astrophysics program requires successful completion of at least ★24 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★90 credited to the degree.

Notes

(1) Students entering this program after first year may take GEOPH 210 in lieu of GEOPH 110. However, students will not receive credit for both GEOPH 110 and 210.
(2) Students in Geophysics will not have the formal prerequisites for many of the EAS, MIN E, and PET E courses, and must get prior approval to register in those courses from the department offering the particular course.
(3) Not all 300-level and 400-level courses are offered every year. Students must consult the Department of Physics for approval of third- and fourth-year programs.
(4) Students entering this program after first year may take GEOPH 210 in lieu of GEOPH 110. However, students will not receive credit for both GEOPH 110 and 210.
(5) Credit in SCI 100 will be considered equivalent to CHEM 101, 102; EAS 105; MATH 114, 115; PHYS 144, 146.

193.16.5 Honors in Geophysics

Continuation in the Honors in Geophysics program requires successful completion of at least ★24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.0 GPA on the last ★90 credited to the degree.

Notes

(1) In addition to the specific courses listed in the program, students must take ★15 in Approved Science options, and ★12 in Arts options.
(2) Suggested approved Science options: ASTRO 429; EAS 221, 224, 320, 323, 324, 422, 424, 425, 430, 433; GEOPH 223, 332, 431, 446; MIN E 323; PET E 365, 473, 477; PHYS 308, 310 (recommended), 499; STAT 141 (or 151). Students in Geophysics will not have the formal prerequisites for many of the EAS, MIN E, and PET E courses, and must get prior approval to register in those courses from the department offering the particular course.
(3) Students must consult the Department of Physics for approval of third- and fourth-year programs.
(4) Credit in SCI 100 will be considered equivalent to CHEM 101, 102; EAS 105; MATH 114, 115; PHYS 144, 146.
193.16.6 Specialization in Geophysics

Continuation in the Specialization in Geophysics program requires successful completion of at least ★24 with a minimum 2.3 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 2.3 GPA on the last ★90 credited to the degree.

**Notes**
1. In addition to the specific courses listed in the program, students must take a minimum of ★3 from specialization Pool B, ★6 from specialization Pools A or B, ★15 in Approved Science options, and ★12 in Arts options.
2. **Specialization Pool A courses:** ASTRO 429; EAS 221, 320, 323, 324, 425, 430, 433; GEOPH 332, 421, 431, 440; MIN E 323; PET E 365, 473, 477; PHYS 308, 499. Students in Geophysics will not take the formal prerequisites for many of the EAS, MIN E, and PET E courses, and must get prior approval to register in those courses from the Department offering the particular course. MPH courses are recommended.
3. **Specialization Pool B courses:** EAS 22A, GEOPH 223, PHYS 261, 310 (recommended), 362, 420, 467, STAT 141 (or 151).
4. Not all 300-level and 400-level courses are offered every year. Students must consult the Department of Physics for approval of third- and fourth-year programs.
5. Students entering this program after first year may take GEOPH 210 in lieu of GEOPH 110. However, students will not receive credit for both GEOPH 110 and 210.
6. Credit in SCI 100 will be considered equivalent to CHEM 101, 102; EAS 105; MATH 114, 115; PHYS 144 and 146.

**Year 1**

193.16.8 Industrial Internship Program

An Industrial Internship Program, similar to a co-op program, is offered to students in the Specialization or Honors programs in Physics (see §193.1.9 for guidelines to the program). The Industrial Internship designation will appear on the degree parchments of students who have participated in the program.

Students approved to enter this stream register for a continuous sequence of Science Work Experience courses (WKEXP 955, 956, 957, 958), starting in May, September or January. During the program, students are considered full-time students of the University. Work experience courses have no weight and are graded credit/no credit, and recorded on the student’s transcript. The Industrial Internship Program Advisor maintains contact at approximately three-month intervals with the student and the person designated by the employer to be responsible for the student’s progress. This arrangement ensures satisfaction on all sides. If the review shows the situation is not satisfactory, the internship may be terminated and the student would then return to classes at the next available opportunity. The graduation requirements for the Industrial Internship program designation include successful completion of at least WKEXP 955 and 956 plus PHYS 400. PHYS 400 must be taken in the first term immediately following completion of the WKEXP period. If required by the employer, the student’s written report and oral presentation in PHYS 400 may be classified confidential. The employer also assesses the student’s performance during the work term. Based on the student’s written report and oral presentation, and the report from the employer, students are awarded a grade in PHYS 400.

Interested students should see the Industrial Internship Advisor in the Department of Physics for more information.

193.17 Physiology

193.17.1 Honors in Physiology

Honors in Physiology is offered by the Department of Physiology in the Faculty of Medicine and Dentistry through the Faculty of Science.

The Honors program is designed to prepare students for advanced study leading to careers in academia, industrial research, or for entry into health-related professions. A choice of courses is available for students with interests in particular branches of the life sciences (e.g., cell and molecular biology, endocrinology, cardiovascular physiology, and neurobiology).

Continuation and graduation in the Honors Physiology program requires successful completion of ★30 with a minimum 3.3 GPA, in the previous Fall/Winter. In addition, second-year students must present a minimum grade of B in PHYSL 212 and PHYSL 214 in order to continue, whereas students who are eligible to enter the program in their third year and have credit in PHYSL 210 must present a minimum grade of A- in order to be admitted. Students must consult the Departmental Advisor prior to registration in each year of the program.

The course requirements for the program are as follows:

**Year 1**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 107</td>
<td></td>
</tr>
<tr>

</tbody>
</table>
193.18 Psychology

193.18.1 Honors in Psychology

The Department offers courses leading to the degrees of BSc and BA with Honors in Psychology. Students wishing to emphasize the physical, biological, and mathematical sciences should enroll in the BSc program; those wishing to emphasize the humanities and social sciences should enroll in the BA program. Either program is appropriate for students considering postgraduate training in psychology or in other fields that require these research skills.

Admission into the Honors program is permitted only at the end of the second year of study (after completion of a minimum of 48 credits). Final acceptance into the Honors program is dependent upon obtaining approval from a potential research supervisor prior to August 7.

Continuation in and graduation from the Honors Psychology program require successful completion of 24 credits with a minimum GPA of 3.3 in each Fall/Winter. Exceptions to this requirement must be approved by both the Department of Psychology and the Faculty of Science. In addition, students must present a minimum of 68 credits in Psychology courses or a minimum of 72 in Science courses must be taken. A student’s program of courses must be approved in advance each year by the Honors Psychology advisor.

Notes
(1) The program must consist of a minimum of 90 credits in Science, a minimum of 18 in Arts, and no more than 12 in non-Arts/non-Science options and no more than 12 in junior (100-level) courses.
(2) Honors students in the first year of the program who are unable to take CHEM 265 may take 265 in second year.
(3) All options must be approved by the Department Advisor.
(4) Credit in SCI 100 will be considered equivalent to BIOL 107, 108; CHEM 101, 102, 164; PHYS 144, 146 and 6 Approved Science options.

193.18.2 Specialization in Psychology

Continuation in the Specialization in Psychology program requires a minimum GPA of 2.3 in the preceding Fall/Winter. Graduation requires a minimum GPA of 2.3 on all courses credited to the degree.

Year 1

BIOL 107, 108
6 in junior ENGL
PSYC 104, 105
6 from junior Mathematical Sciences
6 in approved Science options

Year 2

STAT 151 and PSYCO 212
6 (two of) from PSYCO 223, 233, 241, 258
6 (two of) from PSYCO 267, 275, 281
6 from approved courses offered by the Departments of Anthropology, Economics, Linguistics, Political Science and/or Sociology
6 in approved Science options

Year 3

PSYC 308, 309 and PSYCO 303 or 304
3 (one of) PSYCO 356, 410, 411, 413, 431, 475, 476, 482, or other advanced research methods course approved by the Honors Advisor
9-12 in approved Science options
6-9 in approved options

Year 4

PSYCO 409, 499
6 (two of) in a 400-level Psychology course other than 409, 410, 411, 413, 431, 475, 476, 482, 489, 496, 497, 498, except as approved by the Honors Advisor
9-15 in approved Science options
6-9 in approved options

Notes
(1) To fulfill the degree requirements, students must complete a minimum of 38 credits in Psychology courses. At least 6 must be at the 400-level. A minimum of 72 in Science is required (see §193.1.2).
(2) Credit in Science 100 will be considered equivalent to BIOL 107, 108; CHEM 101, CMPT 174, MATH 114, PHYS 144, PSYCO 104, and 6 Approved Science options.
193.19 Statistics

193.19.1 Honors in Statistics

Continuation in the Honors Statistics program requires successful completion of at least 24 with a minimum 3.0 GPA in the previous Fall/Winter. In addition, graduation requires a minimum 3.3 GPA on all MATH and STAT courses credited towards the degree and a minimum 2.7 GPA on the final 30 credits towards the degree.

The program must contain the following courses, which should be taken in the years indicated:

**Year 1**

<table>
<thead>
<tr>
<th>Courses</th>

<td></td>
</tr>
<tr>
<td>★18 in approved Science options</td>
<td></td>
</tr>
</tbody>
</table>

**Notes**

(1) At least 9 in approved options in one distinct field of application must be taken at the 300- or 400-level. Examples of fields of applications are Biology, Business, Computing Science, Economics, Engineering, Pharmacology, Political Science, Psychology, and Sociology. Students should plan to take the proper prerequisites early in the program.

(2) The program must include at least 18 in a single field of applications. The student is advised to consult the Department of Mathematical and Statistical Sciences regarding specific program recommendations for the field of applications.

(3) The program must meet the requirements of the Faculty of Science (§193.1.2) and include 18 in Arts courses.

(4) A corresponding Honors MATH course can be substituted for any MATH course listed. For example, MATH 117 can be substituted for MATH 114.

(5) Students interested in taking non-junior CMPUT courses as options in subsequent years should note that CMPUT 115 or 175 is a prerequisite for most non-junior CMPUT courses.

(6) Credit will not be granted for ECON 299, 386, or 387.

(7) Credit in SCI 100 will be considered equivalent to MATH 114, 115; CMPUT 174 and 18 options.

193.19.3 Industrial Internship Program

See §193.11.6 for details.

194 Details of Courses

194.1 Course Listings

Science courses can be found in §231, Course Listings, under the following subject headings:

- Astronomy (ASTRO)
- Biochemistry (taught by the Faculty of Medicine and Dentistry) (BIOCH)
- Biochemistry (taught by the Faculty of Medicine and Dentistry) (BIOM)
- Biological Science - Botany (BOT)
- Biological Science - Entomology (ENT)
- Biological Science - Genetics (GENET)
- Biological Science - Microbiology (MICR)
- Biological Science - Zoology (ZOO)
- Biologie (BIOLE) (Faculté Saint-Jean)
- Cell Biology (taught by the Faculty of Medicine and Dentistry) (CELL)
- Chemistry (CHEM)
- Chimie (CHIM) (Faculté Saint-Jean)
- Computing Science (CMPUT)
- Earth and Atmospheric Sciences (formerly Geography and Geology (EAS))
- Environmental Physical Sciences (ENVPS)
- Geophysics (GEO)
- Immunology and Infection (MIN)
- Laboratory Animal Management (LAB)
- Marine Science (MA SC)
- Mathematical Physics (MA PH)
- Mathematics (MATH)
- Mathématiques (MATHQ) (Faculté Saint-Jean)
- Neuroscience (taught by the Faculty of Medicine and Dentistry) (NEURO)
- Paleontology (PALEO)
- Pharmacology (taught by the Faculty of Medicine and Dentistry) (PMCOL)
- Physiology (taught by the Faculty of Medicine and Dentistry) (PHYS)
- Physics (PHYS)
- Physique (PHYSQ) (Faculté Saint-Jean)
- Psychology (PSYCHO)
- Sciences de la Terre et de l’atmosphère (SCTA) (Faculté Saint-Jean)
- Statistics (STAT)
- Statistique (STATO) (Faculté Saint-Jean)

194.2 Prerequisites

Where a prerequisite is stated in a course description, it is understood that equivalent courses may satisfy the requirement. Also, the department offering
a course with prerequisite requirements may waive the prerequisite in writing.  
(Prerequisite waiver forms are available from the Faculty of Science office and 
the Department offices.)

194.3 Course Exceptions

194.3.1 Biochemistry Courses
All BIOCH courses can be used by students in the Faculty of Science as 
science courses.

194.3.2 Cell Biology Courses
All CELL courses can be used by students in the Faculty of Science as 
science courses.

194.3.3 Food Science Courses
NU FS 363 may be used by students in the Faculty of Science as a science 
course in Microbiology.

194.3.4 Human Geography/Planning Courses
HGP 492 may be used by students in the Faculty of Science as a science 
course.

194.3.5 Medical Microbiology Courses
All MMI courses, with the exception of MMI 133, may be used by students 
in the Faculty of Science as science courses.

194.3.6 Neuroscience Courses
All NEURO courses may be used by students in the Faculty of Science as 
science courses.

194.3.7 Pharmacology Courses
All PMCOL courses, with the exception of PMCOL 300, may be used by 
students in the Faculty of Science as science courses.

194.3.8 Physiology Courses
All PHYSL courses, with the exception of PHYSL 600, may be used by 
students in the Faculty of Science as science courses.

194.4 Graduate Courses
Courses numbered 500 and up are restricted to graduate students and 
normally may not be taken for credit by undergraduate science students without 
prior written permission by the Senior Associate Dean or designate.
